THE

THIRTY-FIFTH REPORT

OF THE

COMMISSIONERS OF NATIONAL EDUCATION IN IRELAND,

(FOR THE YEAR 1868).

TO HIS EXCELLENCY JOHN POYNTZ, EARL SPENCER, K.G.,

LORD LIEUTENANT-GENERAL AND GENERAL GOVERNOR OF IRELAND.

May it please your Excellency,

I.—1. We, the Commissioners of National Education in Ireland, submit to your Excellency this our Thirty-fifth Report.

Number of schools in operation.

II.—2. On the 31st of December, 1867, we had 6,520 schools, in operation, which had on their rolls, for the year then ended 913,198 children; with an average daily attendance, for the same period, of 321,683 children. At the close of the year 1868, the number of schools in operation was 6,586. The *total number of children on the rolls* within the year was 967,563,* and the *average daily attendance* of children for the year was 354,853.

Increase in attendance.

3. This year 54,365 more children were enrolled than in the year 1867. Hitherto in making out the number of children in our schools we included all whose names appeared on the rolls during the particular year; but of those children who were so enrolled, many had not actually attended. Thus, in the year 1868, there were 49,219 on the rolls that failed to attend on any day. The net number, therefore, in actual attendance in our schools during this year was 918,344. The increase in the average daily attendance at our schools is 33,170.

4. During the past year the number in average daily attendance was not only greater absolutely than in 1867, but was greater relatively to the number on the rolls, thus proving that the pupils attended more regularly in 1868 than in 1867.

Increase in Schools.

5. As compared with the year 1867, there is an increase of 66 in the number of schools in operation for the year 1868.

Schools in course of erection.

6. We have in course of erection 100 National *School-houses*, which will contain 155 separate *school-rooms*. When these 100 buildings shall have been completed, they will afford accommodation to 13,260 children. Of the above 100 school-houses, the erection of 35, containing 51 school-rooms, was sanctioned during the year 1868. The names of these 35 school-houses, and the particulars connected with them, are set forth in the Appendix; where also are inserted the names of those vested National Schools for the improvement of which grants were made during the year 1868, calling for action on the part of the Board of Works.

Vested schools opened, &c.

7. There were 19 vested schools opened during the year, towards the erection of which grants had been made, and 4 sus-

*(I.) By the *total number of children on rolls* is meant the gross aggregate of distinct individual children whose names have appeared on the school-rolls within the year.

(II.) By the *average daily attendance* of children for the year is meant the *mean* or average of the numbers found in *actual* attendance—not on rolls merely, but present in their classes, from day to day throughout the year.

pended schools re-opened; there was also 1 struck-off school restored to our roll. These are included in the 6,586 schools in operation on the 31st December, 1868, and their names will be found inserted in a list in the Appendix.

Number of schools struck off roll.

8. The number of schools struck off our roll, during the year 1868, was 84. Of these, 82 had been previously in operation, the remaining 2 being merely cases in which grants for building were cancelled. A list of the schools struck off is given in the Appendix, with the reasons for their having been removed from our roll.

Suspended schools.

9. The number of schools in the "suspended list" at the close of the year was 69, of which 2 were suspended during the year 1868. Many of these suspended schools are from time to time re-opened, on the causes for their suspension being removed.

Number of schools in operation, and number of children on rolls from 1833 to 1868.

10. The following Table exhibits the number of National Schools in operation, together with the number of children on the rolls, as specified in our several Reports, to the 31st of December, 1868:—

No. and Date of Report.	No. of Schools in operation.	No. of Children on the Rolls for:	
No. 1, 31st December, 1833,	789	Half-year ended 30th Sept.,	107,042

No. 33, do. 1866,	6,453	"	910,819
No. 34, do. 1867,	6,520	"	913,198
No. 35, do. 1868,	6,586	"	967,563

* In this year, 1857, the Commissioners for the first time thought it right to ascertain and record the *total number of children* appearing on the rolls within the *entire* year. Hence the large increase in the number of children in the above table for year 1857 and subsequent years, as compared with the year 1856.

11. The number of applications for grants to new schools in the year 1868 was 229. To 177 of these we promised the required assistance, either for building or for salaries and requisites. The remaining 52 applications were rejected for various reasons, of which official records are kept. Applications for grants to new schools.

12. The annexed Tabular Return of the 177 Schools added to our list during the Year 1868, shows the Number in each Province, with the Nature of the Aid Granted. Return of new schools in 1868, arranged in provinces.

Province.	Salary and Requisites.	Towards Building and Furnishing Schools.	Total.
Ulster, . .	54	8	62
Munster, . .	26	35	61
Leinster, . .	18	4	22
Connaught, .	28	4	32
Total, . .	126	51*	177

13. The 177 schools specified in the preceding Table, are under the management of 136 individuals, several having more than one school under their care. The following Table shows the Number of these schools under the management of Patrons of each religious denomination—distinguishing lay from clerical:— Number and religious denominations of the Patrons or Managers of the new schools added in 1868.

Religious Denominations.	Clerical.		Lay.		Total.	
	No. of Patrons.	No. of Schools.	No. of Patrons.	No. of Schools.	No. of Patrons.	No. of Schools.
Established Church, .	10	13	13	19	23	32
Roman Catholics, . .	79	102	9	14	88	116
Presbyterians, . .	17	21	3	3	20	24
Other Persuasions, . .	3	3	2	2	5	5
Total, . .	109	139	27	38	136	177

14. The following Summary exhibits the Total Number of National Schools in each Province on the 31st December, 1868, distinguishing those Schools which were in operation, those to which building grants had been promised, and those upon the suspended list:— Number of Schools in each province, distinguishing Operation, Building, and Suspended Schools.

Summary.

Province.	Schools in Operation List on 31st Dec., 1868.	Schools to which there are outstanding Building Grants.	Suspended.	Total Number of Schools in connexion, on the 31st Dec., 1868.
Ulster, . .	2,432	23	25	2,480
Munster, . .	1,616	99	18	1,733
Leinster, . .	1,490	11	17	1,518
Connaught, .	1,048	22	9	1,079
Total, . .	6,586	155	69	6,810

III.—15. At the termination of the year 1868, we had on our Number of

* That is, 51 *schools* as distinguished from *school-houses*;—there being sometimes two schools, male and female, in the same house.

vested schools.

list, vested either in Trustees or in our Board, or secured by bond, 1,249 school-houses, containing 1,909 rooms, accommodating distinct schools. The number of these schools vested in trustees was 1,057: the number vested in our Board in its corporate capacity (including 148 assigned) was 757: the number for which we held bonds for the observance of our rules was 95.

16. The following Table shows the counties and provinces in which the vested schools and houses are situated, distinguishing the number held under each kind of security:—

Vested schools, in counties and provinces.

TABLE showing the Number of Vested School-houses in each County and Province, with the Number of separate Schools held in those Houses.

N.B.—The returns of the Managers fail to state the Religious Denominations in the case of 119 Pupils.

Average number of pupils in *mixed* schools.

23. At pages 10 and 11 we give a Table showing the Religious Denominations of the Pupils on the Rolls of those Schools from which returns have been received exhibiting a *mixed* attendance of *Protestant and Roman Catholic* Pupils, for the year 1868.

24. The following analysis shows the *average* number of Protestant and Roman Catholic Pupils in each of the mixed Schools:— Average number of Protestant and Roman Catholic pupils in mixed schools.

A.—Under PROTESTANT Teachers.

	Mixed Schools.	Protestant Pupils.	R. C. Pupils.
Ulster, . . .	1,020	113·2	25·5
Munster, . . .	17	49·5	30·6
Leinster, . . .	51	38·8	57·0
Connaught, . .	34	45·6	43·7
Total, . .	1,122	106·8	27·6

B.—Under ROMAN CATHOLIC and PROTESTANT Teachers conjointly.

	Mixed Schools.	Protestant Pupils.	R. C. Pupils.
Ulster, . . .	58	169·7	67·2
Munster, . . .	17	108·8	122·1
Leinster, . . .	37	61·5	155·5
Connaught, . .	8	55·7	75·1
Total, . .	120	120·1	102·7

C.—Under ROMAN CATHOLIC Teachers.

	Mixed Schools.	Protestant Pupils.	R. C. Pupils.
Ulster, . . .	912	19·7	118·6
Munster, . . .	604	3·8	161·1
Leinster, . . .	620	4·8	127·9
Connaught, . .	459	5·8	152·5
Total, . .	2,595	10·0	136·7

25. The following summary shows how the Protestant pupils in mixed National schools are distributed:—

119,817 mixing with 30,895 Roman Catholic pupils in 1,122 schools, taught exclusively by Protestant teachers; giving to each school an average of 106·8 Protestant, and 27·6 Roman Catholic pupils.

14,415 mixing with 12,327 Roman Catholic pupils in 120 schools, taught conjointly by Protestant and Roman Catholic teachers; giving to each school an average of 120·1 Protestant, and 102·7 Roman Catholic pupils.

26,046 mixing with 354,764 Roman Catholic pupils in 2,595 schools, taught exclusively by Roman Catholic teachers; giving to each school an average of 10·0 Protestant, and 136·7 Roman Catholic pupils.

NOTE.—There are two schools with an unmixed attendance of 115 Roman Catholic pupils, under Protestant teachers; and there is one school with an unmixed attendance of 211 Roman Catholic pupils, under teachers, one of whom is Protestant and the other Roman Catholic.

27. In our Report for last year, and for the year 1866, we entered at some length into the question of the success of the system as a mixed system of secular instruction. This year we consider it unnecessary to do more than publish the tables bearing upon this subject.

VI.—28. We have received returns showing, as in the subjoined Table, the literary proficiency of 729,462 of the pupils on the rolls for the *last quarter* of the year 1868. Literary classification of pupils.

Total amount of salaries, gratuities, &c., paid in 1868.

VII.—29. The total amount of salaries, premiums, gratuities, and allowances paid in 1868 to the Principal Teachers, Assistants, Monitors, and Workmistresses in National Schools—including the Central and other Model Schools, and the payments to Organizing Teachers—was £270,724 7*s.* 10*d.* This sum includes £4,231 16*s.* 5*d.*, school fees, apportioned to Teachers in Model Schools. The details for each species of service are given in our Financial Statement, hereto appended.

Sale Stock Requisites.

VIII.—30. The amount received for books, school requisites, and apparatus, sold at reduced prices to National Schools in the year 1868, was £17,310 18*s.* The number of orders was 12,046; and the average amount of each order, £1 8*s.* 8*d.*

Free Stock Requisites.

31. The value of the grants of school requisites and apparatus, given as Free Stock, in 1868, was £2,697 6*s.* 9*d.* The number of grants was 671; and the average value of each, £4 0*s.* 4*d.*

Total number of children on the rolls of the Central Model Schools on 31st Dec., 1868, with their religious denominations.

IX.—32. The number of pupils on the rolls of our Model Schools in Marlborough-street upon the 31st of December, 1868, was—males, 1,072; females, 597; infants, 388; making a total of 2,057. This number includes 282 males in Night School.

33. The religious denominations of the pupils on the rolls of the Model Schools, Marlborough-street, at the end of the past year, are specified in the following return:—

	Males.	Females.	Infants.	Total.
Established Church, .	299	154	71	524
Roman Catholics, .	654	376	281	1,311
Presbyterians, .	98	46	25	169
Other Persuasions, .	21	20	9	50
Jews, ...	–	1	2	3
Unascertained, .	–	–	–	–
Total, . .	1,072	597	388	2,057

The number of pupils on the rolls at the corresponding period of 1867 was 2,048.

Number of Teachers trained in 1868.

X.—34. We trained during the year, and supported at the public expense, 270 Teachers, of whom 134 were males, and 136 females. We also trained, for the office of Teacher, 9 persons

who supported themselves during their attendance at the Model Schools. The total number trained in 1868 was 279. Of the 270 Teachers trained during the year, 54 were of the Established Church, 141 were Roman Catholics, 64 were Presbyterians, and 11 were of other persuasions. The total number of male and female teachers trained from the commencement of our proceedings to the 31st December, 1868, is 8,101. We do not include in this last number those Teachers who, at the time of their training, were unconnected with National Schools.

Navigation teachers.

35. Besides the Teachers trained in the ordinary courses of literature, science, and school-keeping, during the past year, we caused an additional number of Teachers to be instructed in the principles of Navigation and the use of nautical instruments. In admitting Teachers to this department, we select those only who are possessed of the attainments necessary to profit by the special instruction given, and whose schools are the most favourably situated for the introduction of this branch of education.

Training departments.

36. The establishments in which the Teachers, both male and female, attending at our Training Institution, are boarded and lodged, continue to be efficiently conducted. The inmates have been distinguished, as heretofore, for the general correctness of their conduct, for the maintenance of order and discipline, for the exercise of kindly feeling towards each other, and for the careful observance of their religious duties.

Number of Teachers in Board's service at end of 1868.

XI.—37. We had in our service at the end of the year 1868, 6,171 Principal Teachers, 2,079 Assistants, and 370 Junior Literary and Industrial Assistants, making, in the whole, 8,620*—of whom 3,457 are trained. We also had in our service, at the same period, 358 Workmistresses and Teachers of the higher industrial branches.

38. The following Table shows the Number of Teachers of each Grade:—

Class.	Principals.		Assistants.		Junior Assistants.	Workmistresses and Industrial Teachers.
	Males.	Females.	Males.	Females.		
1^1 . .	109	58	3	2	.	.
1^2 . .	139	91	3	4	.	.
1^3 . .	257	135	18	24	.	.
2^1 . .	634	343	32	69	.	.
2^2 . .	661	349	39	108	.	.
3^1 . .	1,427	625	228	568	.	.
3^2 . .	580	271	124	341	.	.
Probationers, .	348	144	223	293	370	.
Total, .	4,155	2,016	670	1,409	370	358
	6,171		2,079			

* This number is exclusive of the Teachers in 19 Prison Schools, 4 Lunatic Asylum Schools, and 145 Workhouse Schools, in connexion with us; and also, of the Lay Teachers in Convent Schools—the former not being paid by our Board, and the latter being paid according to the average daily attendance in their respective schools.

Number of Paid Monitors in Board's service.

39. The number of Paid Monitors in our service in Ordinary National Schools was 3,567: First Class, 144; Senior, 2,866; and Junior, 557.

40. The following Table distinguishes the Males from the Females, and shows the number of each grade in each year of service:—

Year of Service.	First Class.		Senior.		Junior.	
	Males.	Females.	Males.	Females.	Males.	Females.

Total, .	27	126	243	19	56	82
	396			157		
	553					

Scales of salaries, &c.

43. In our "Rules and Regulations," published in the Appendix, we give the scales of salaries allowed to the several grades of Teachers in connexion with us; also, the various gratuities awarded for special services rendered by the Teachers in the training and instruction of their pupils. These special gratuities are conferred on a large number of the Teachers, and have had the effect of stimulating the whole body to increased energy and devotion in the discharge of their school duties.

Local emoluments of Teachers.

XII.—44. The following Table exhibits, in counties and provinces, the amount of local emoluments received in aid of salaries of teachers of National Schools (excluding Workhouse Schools,

Prison Schools, Lunatic Asylum Schools, and Closed or Suspended Schools) during the year 1868, with the average for each school, and for each pupil in daily average attendance.

AMOUNT of LOCAL EMOLUMENTS received in aid of Salaries of Teachers of National Schools in 1868.

45. The total amount received by the teaching-staff of the schools in connexion with our Board for the year 1868, appears to have been £323,795 1*s.* 2*d.*—only 16·7 per cent. of this sum having been locally provided, whilst the large proportion of 83·3 per cent. was derived from the funds placed at our disposal by the State. Total emoluments.

XIII.—46. The number of Workhouse Schools in connexion with us on the 31st December, 1868, was 145. Of these schools 32 are in Ulster, 49 in Munster, 35 in Leinster, and 29 in Connaught. Workhouse schools, and attendance.

47. The total number of pupils appearing on the rolls of these 145 Workhouse Schools, for the year ending 31st December, 1868, was 19,583, and the average daily attendance, 9,916.

Attendance at District and Minor Model Schools.

XIV.—48. The number of District and Minor Model Schools in operation at the end of the year was 27—including the Central or Metropolitan District.

49. The total number of pupils on the rolls of these schools for the year ended the 31st of December, 1868, was 17,689*, and the average daily attendance for the same period, 7,930*. In the following Table the total number on the rolls is divided into males, females, and infants:—

County.	Number.	Name of School.	No. of Pupils on the Rolls for the year ended 31st December, 1868.				Average daily attendance for the year ended 31st Dec., 1868.

APPENDICES

TO THE

THIRTY-FIFTH REPORT

OF

COMMISSIONERS OF NATIONAL EDUCATION IN IRELAND.

(1868.)

APPENDIX A.

Appendix A.

Rules and Regulations of the Commissioners of National Education in Ireland.

Rules and Regulations of Commissioners.

Part I.

Part I.

General Nature of the System of National Education.

I.—*Its Object and Fundamental Principle.* § I.

1. The object of the system of National Education is to afford *combined* literary and moral, and *separate* religious instruction, to children of all persuasions, as far as possible, in the same school, upon the fundamental principle, that no attempt shall be made to interfere with the peculiar religious tenets of any description of Christian pupils.

2. It is the earnest wish of Her Majesty's Government, and of the Commissioners, that the Clergy and Laity of the different religious denominations should co-operate in conducting National Schools.

3. The Commissioners by themselves, or their Officers, are to be allowed to visit and examine the Schools whenever they think fit. Those who visit on the part of the Commissioners are furnished with credentials under their Seal.

4. The Commissioners will not change any fundamental Rule without the express permission of His Excellency the Lord Lieutenant.

5. The Commissioners will not withdraw, or essentially alter, any book that has been, or shall be hereafter, unanimously published or sanctioned by them, without a previous communication with the Lord Lieutenant.

II.—*Description of Schools to which the Commissioners grant aid.* § II.

1. The Schools to which the Commissioners grant aid are divided into two classes, viz.:—1st, Vested Schools, of which there are two sorts, namely, first, those vested in the Commissioners; and, second, those vested in Trustees, for the purpose of being maintained as National Schools; 2ndly, Non-Vested Schools, the property of private individuals. Both these classes of Schools are under the control of local Patrons or Managers.

2. There are also Model Schools, of which the Commissioners are themselves the Patrons, but which are conducted on the same fundamental principles as the ordinary National Schools.

3. The Commissioners encourage Industrial Instruction in National Schools in all suitable cases.

4. The Commissioners require that instruction shall be given in plain needlework in all Female Schools.

III.—*Use of School-houses.* § III.

1. In Non-Vested Schools, the Commissioners do not, in ordinary cases, exercise control over the use of the School-houses on Sundays, or before or after the School-hours on the other days of the week; such use being left altogether to the local Patrons or Managers, of all religious persuasions, subject to the interference of the Board in cases leading to contention or abuse.

2. No National School-house shall be employed, at any time, even temporarily, as the *stated* place of DIVINE WORSHIP of any religious community; or for the celebration or administration of the Sacraments or Rites of any Church.

Appendix A.

Rules and Regulations of Commissioners.

PART I. § III.

3. No aid will be granted to a School *held in a place of worship*; nor will the Commissioners sanction the *transfer* of an existing School, to a place of worship, even for a temporary period.

4. When a School-room is in any way connected with a place of worship, there must not be any *direct internal* communication between the School-room and such place of worship.

5. Vested School-houses must be used, *exclusively*, *for the education* of the pupils attending them: except on Sundays, when they may be employed for Sunday Schools, with the sanction of the Patrons or Managers, subject, in cases leading to contention or abuse, to the interference of the Commissioners.

6. No political meetings shall be held in National School-houses, whether Vested or Non-Vested; nor shall any political business *whatsoever* be transacted therein.

7. When any School is received by the Commissioners into connexion with them, the inscription, "NATIONAL SCHOOL," shall be put up in plain and legible characters on the School-house, or on such other place as may render it conspicuous to the public. When a School-house is built partly by aid from the State, a stone is to be introduced into the wall having that inscription cut upon it. The Commissioners will not, when granting aid *in future*, sanction any inscription containing a title of a *denominational character*, or which may appear to them to indicate that the School is one belonging to any particular religious body. The Commissioners do not object to the terms, Male, Female, or Infant; or the proper local designation taken from the city, town, parish, street, village, or townland, in which the School may be situated; or the name of the founder being included in the inscription.

8. No emblems or symbols of a *denominational* nature shall be exhibited in the School-room during the hours of united instruction; nor will the Commissioners in future, grant aid to any School which exhibits on the exterior of the buildings any such emblems.

9. No emblems or symbols of a *political* nature shall at *any time* be exhibited in the School-room, or affixed to the *exterior* of the buildings: nor shall any placards whatsoever, except such as refer to the legitimate business of school management, be affixed thereto.

§ IV.

IV.—*Religious and Secular Instruction.*

1. Opportunities are to be afforded (as hereinafter provided for) to the children of all National Schools for receiving such religious instruction as their parents or guardians approve of.

2. Religious instruction must be so arranged, that each School shall be open to children of all communions; that due regard be had to parental right and authority; that, accordingly, no child shall receive, or be present at, any religious instruction of which his parents or guardians disapprove; and that the time for giving it be so fixed that no child shall be thereby, in effect, excluded, directly or indirectly, from the other advantages which the School affords.

3. A public notification of the times for religious instruction must be inserted in large letters in the "Time Table" supplied by the Commissioners, who recommend that, as far as may be practicable, the general nature of such religious instruction be also stated therein.

4. The "Time Table" must be kept constantly hung up in a conspicuous place in the School-room.

5. When the religious instruction comes after the secular, the Teacher must, immediately before the commencement of the former, announce distinctly to the pupils that the hour for religious instruction has arrived, and must, at the same time, put up and keep up, during the period allotted to such religious instruction, and within the view of all the pupils, a notification thereof, containing the words "Religious Instruction," printed in large characters, on a form to be supplied by the Commissioners. Similarly when the School commences with religious instruction, the Teacher is to put up and keep up the same notification.

6. When the secular instruction precedes the religious instruction, in any National School, there shall be a sufficient interval between the announcement and the commencement of the religious instruction; and whether the religious or the secular instruction shall have priority in any National School, the books used for the instruction first in order shall be laid aside at its termination, in the press or other place appropriated for keeping the School-books.

7. No secular instruction, whether literary or industrial, shall be carried on in the same apartment, during school-hours,* simultaneously with religious instruction.

8. In Schools towards the building of which the State has contributed, and which are VESTED in Trustees, for the purposes of National Education, or which are vested in the Commissioners in their corporate capacity, such pastors or other persons as shall be approved of by the parents or guardians of the children respectively, shall have access to them *in the School-room*, for the purpose of giving them religious instruction there, at times convenient for that purpose—that is, at times so appointed as not to interfere unduly with the other arrangements of the School.

9. In Schools, NOT VESTED, and which receive no other aid than Salary and Books, it is for the Patrons or Managers to determine whether any, and if any, what religious instruction shall be given *in the School-room;* but if they do not permit it to be given in the School-room, the children whose parents or guardians so desire, must be allowed to absent themselves from the School, at reasonable times, for the purpose of receiving such instruction ELSEWHERE.

10. The reading of the Scriptures, either in the Protestant Authorized, or Douay Version,—the teaching of Catechisms,—public prayer,—and all other religious exercises, come within the rules as to religious instruction.

11. The Patrons and Managers of *all* National Schools have the right to permit the Holy Scriptures (either in the Authorized or Douay Version) to be read, at the time or times set apart for religious instruction; and in *all Vested Schools* the parents or guardians of the children have the right to require the Patrons and Managers to afford opportunities for the reading of the Holy Scriptures, in the School-room, under proper persons approved of by the parents or guardians for that purpose.

12. Religious instruction, prayer, or other religious exercises, may take place, at any time, before and after the ordinary School business (during which all children, of whatever denomination they may be, are required to attend); but must not take place *at more than one intermediate* time, between the commencement and the close of the ordinary School business. The Commissioners, however, will not sanction any arrangement for religious instruction, prayer, or other religious exercises *at an intermediate time*, in cases where it shall appear to them that such arrangement will interfere with the usefulness of the School, by preventing children of any religious denomination from availing themselves of its advantages, or by subjecting those in attendance to any practical inconvenience.

13. With the above exception, the secular School business must not be interrupted, or suspended, by any spiritual exercise whatsoever.

Note.—The Commissioners earnestly recommend that Religious Instruction shall take place either immediately before the commencement, or immediately after the close, of the ordinary School business; and they further recommend that, whenever the Patron or Manager thinks fit to have religious instruction at an intermediate time, a separate apartment shall (when practicable) be provided for the reception of those children who, according to these Rules, should not be present thereat.

14. The Registry kept in each School, according to the Form furnished by the Commissioners, must show the religious denomination of each child on the School Roll.

15. No pupil who is registered by its parents or guardians as a Protestant is to be permitted to remain in attendance during the time of Religious instruction in case the Teacher giving such instruction is a Roman Catholic; and no pupil who is registered by its parents or guardians as a Roman Catholic is to be permitted to remain in attendance during the time of Religious instruction in case the Teacher giving such instruction is not a Roman Catholic. And further, no pupil is to be permitted to remain in attendance during the time of any Religious instruction to which its parents or guardians object.

Provided, however, that in case any parent or guardian shall express his desire that his child should receive any particular Religious instruction, and shall record such desire in a book to be provided in the School, when necessary for that purpose, this prohibition shall not apply to the time during which such Religious instruction only is given.* The entry in the book shall be signed with the name or mark of the parent or guardian, and the book shall be submitted to the Inspector so often as he visits the School.

* Such expression of desire may at any time be revoked by the parent or guardian, and shall thereupon become inoperative.

* The term "SCHOOL-HOURS," is always to be understood to mean the entire time in each day, from the opening of the School to the closing of the same for the dismissal of the pupils.

Appendix A.

Rules and Regulations of Commissioners.

The following is the Form of Book.

Roll No., ——— *School*, ——— *County*, ———
Name of Teacher who gives Religious Instruction, ———
Religious Denomination of do., ———

CERTIFICATE OF PARENT OR GUARDIAN.

PART I. § IV.

[In case a Parent or Guardian should wish his Child to receive religious instruction from a Teacher who is of a different religious denomination from the Child, or from a Teacher who gives any religious instruction different from that which is in accordance with the creed of the Child, the following Certificate is to be made by such Parent or Guardian.]

NOTE.—As some doubts have arisen as to the interpretation of the Rule, attention is requested to the following minute of the Board, dated February 26, 1867:—

"The object of the Rule is more fully to carry out the general principle of the Board, that no child is to receive any religious instruction contrary to the wishes of its parent. Accordingly the Rule first provides for the case where the Teacher is a Protestant and the child a Roman Catholic, or *vice versâ*. In this case the dissent of the parent is implied, and no religious instruction can be given to a child by a Teacher of the different creed unless the parent expressly requests it. But where the Teacher and the child are both Protestants, whether of the same or of a different denomination, the dissent of the parent will not be implied. In this case religious instruction may be given to the child unless the parent expressly forbids it. In each case, however, the assent or dissent, whether implied or expressed, may be modified by an entry, duly signed by the parent, in the Certificate Book of Religious Instruction. Cases may occur in which the conduct of the Teacher, although not coming within the strict letter of the new Rule, is obviously contrary to the general spirit of the National System; as, for instance, if instruction should be given in the Catechism or Creed of a different persuasion from that of the child."

I (1) ———, being the (2) —— of (3) ———, who is registered by me as (4) ——— in the School Register of the (5) —— National School, HEREBY CERTIFY that it is my desire that the said (6) ——— shall receive instruction in (7) ——— during the time set apart for Religious Instruction.

Signature of Parent or Guardian, (8) ———
Witness, if signed by "Mark," ———
Dated —— day of ——, 18—.

CERTIFICATE OF TEACHER.

I HEREBY CERTIFY that before (9) ——— signed the above Certificate, I read aloud to (10) —— the following Rule of the COMMISSIONERS OF NATIONAL EDUCATION:—

"No Pupil who is registered by its Parents or Guardians as a Protestant is to be permitted to remain in attendance during the time of religious instruction in case the Teacher giving such instruction is a Roman Catholic; and no Pupil who is registered by its Parents or Guardians as a Roman Catholic is to be permitted to remain in attendance during the time of religious instruction in case the Teacher giving such instruction is not a Roman Catholic. And further, no Pupil is to be permitted to remain in attendance during the time of any religious instruction to which its Parents or Guardians object.

"Provided, however, that in case any Parent or Guardian shall express his desire that his Child should receive any particular religious instruction, and shall record such desire in a Book to be provided in the School, when necessary for that purpose, this prohibition shall not apply to the time during which such religious instruction only is given.* The entry in the Book shall be signed with the name or mark of the Parent or Guardian, and the Book shall be submitted to the Inspector so often as he visits the School.

"* Such expression of desire may at any time be revoked by the Parent or Guardian, and shall thereupon become inoperative."—*Part I., Sec. IV., Par.* 15.

And I FURTHER CERTIFY that I believe when the said (11) ——— signed the above Certificate (12) —— had a full apprehension of the meaning and force of the Rule, and also of the true intent and object of the Certificate.

Signature of Teacher, ———
Dated — day of ——, 18—.

(1) Insert the name of the Parent or Guardian who makes the Certificate.
(2) Insert the relationship of the Parent or Guardian; as—"Father," "Mother," "Aunt," &c.
(3) Insert the name of the Pupil. (4) Insert the registered religion of the Pupil.
(5) Insert the name of the National School. (6) Insert the name of the Pupil again.
(7) Insert in full the nature of the Religious Instruction; as—The Holy Scriptures in the Authorized Version—The Roman Catholic Catechism—The Protestant Catechism, &c., &c. *This is to be written by the Parent or Guardian;* but in case the Parent or Guardian cannot write, it may be written by the Teacher.
(8) The Parent or Guardian is here to inscribe his name. If the Parent or Guardian be unable to write his name, he is to sign by mark; but this mark must be witnessed by some respectable third party.
(9) Insert the name of the Parent or Guardian. (10) Insert "him" or "her."
(11) Insert the name of the Parent or Guardian. (12) Insert "he" or "she."

CERTIFICATE OF INSPECTOR.

I HEREBY CERTIFY that I have examined the Certificate of (1) ——— and also of the Teacher (2) ——— above set forth, and that I am satisfied as to the genuineness of each.

Signature of Inspector, ———
Dated — day of ——, 18—.

16. A sufficient number of hours, to be approved of in each case by the Commissioners, is to be appropriated to the ordinary School business, during which all children, of whatever denomination they may be, are required to attend.

17. In all National Schools (except those in which Industrial instruction is the *chief* object) there must be Literary instruction for at least *four* hours, upon five days in the week.

18. In Industrial Schools—that is, in Schools where Industrial instruction is the *chief* object—the Commissioners require that not less than *two* hours, daily, shall be devoted to Literary instruction.

V.—*Use of Books and Tablets.*

1. The use of the books published by the Commissioners is not compulsory; but the titles of all other books which the Patrons or Managers of Schools intend for the ordinary School business, are to be notified to the Commissioners; and none are to be used to which they object. The approval of any such books is to extend only to the particular edition which has been submitted to the Commissioners.

2. If any books other than the Holy Scriptures, or the *standard* books of the Church to which the children using them belong, be employed in communicating religious instruction, the title of each is to be made known to the Commissioners whenever they deem it necessary.

3. The Commissioners do not insist on the "Scripture Lessons" or book of "Sacred Poetry" being read in any of the National Schools, nor do they allow them to be read as part of the ordinary School business (during which all children, of whatever denomination they may be, are required to attend) in any School attended by children whose parents or guardians object to their being read by their children. In such cases the Commissioners prohibit the use of these books, except at times set apart for the purpose, either before or after such ordinary School business, and under the following conditions:—

First—That no child, whose parent or guardian objects, shall be required directly or indirectly, to be present at such reading.

Second—That in order that any children, whose parents or guardians object, may be at liberty to absent themselves, or to withdraw, at the time set apart for the reading of the books above specified, public notification of the time set apart for such reading shall be inserted in large letters in the Time-table of the School—that there shall be a sufficient interval between the conclusion of such ordinary School business and the commencement of such reading; and that the Teacher shall, immediately before its commencement, announce distinctly to the pupils, that any child whose parent or guardian so desires may then retire.

Third—That in every such case there shall be, exclusive of the time set apart for such reading, sufficient time devoted each day to the ordinary School business, in order that those children who do not join in the reading of these books may enjoy ample means of literary instruction in the School-room.

4. When using the Scripture Lessons, the Teachers are prohibited, except at the time set apart for religious instruction, from putting to the children any other questions than those appended to the end of each lesson.

5. The Commissioners require that the principles of the following Lesson, or of a Lesson of a similar import (to be approved of by the Commissioners), shall be strictly inculcated, during the hours of united instruction, in all Schools received into connexion with the Board, and that a copy of the Lesson itself be hung up in each School.

Christians should endeavour, as the Apostle Paul commands them, to live peaceably with all men (Rom. ch. xii., v. 18), even with those of a different religious persuasion.

Our Saviour, Christ, commanded his disciples to love one another. He taught them to love even their enemies, to bless those that cursed them, and to pray for those who persecuted them. He himself prayed for his murderers.

Many men hold erroneous doctrines, but we ought not to hate or persecute them. We ought to hold fast what we are convinced is the truth; but not to treat harshly those who are in error. Jesus Christ did not intend his religion to be forced on men by violent means. He would not allow his disciples to fight for him.

(1) Insert the name of the Parent or Guardian. (2) Insert the name of the Teacher.

Appendix A.

Rules and Regulations of Commissioners.

PART I, § V.

If any persons treat us unkindly, we must not do the same to them; for Christ and his apostles have taught us not to return evil for evil. If we would obey Christ, we must do to others, not as they do to us, but as we would wish them to do to us.

Quarrelling with our neighbours and abusing them, is not the way to convince them that we are in the right, and they in the wrong. It is more likely to convince them that we have not a Christian spirit. We ought, by behaving gently and kindly to every one, to show ourselves followers of Christ, who, when he was reviled, reviled not again (*1 Pet. ch. ii., v. 23*).

6. The use of the Tablet, furnished by the Commissioners, containing the Ten Commandments, is not compulsory.

7. The rules as to religious instruction do not apply, except in the way hereinbefore stated, to the Scripture Lessons and the Book of Sacred Poetry, or to the matter contained in the common School-books, or in any other book, the use of which the Commissioners may at any time sanction for the purpose of united instruction.

§ VI. VI.—*Management of National Schools.*

1. The local government of the National Schools is vested in the local Patrons thereof.

2. The Commissioners recognise as the local Patron the person who applies in the first instance to place the School in connexion with the Board, unless it be otherwise specified in the application.

3. If a School be under the local management of a School-Committee, such Committee has all the rights of an individual Patron.

4. The Patron has the right of nominating any fit person to act as his representative in the local management of the School; such representative to be designated the "Local Manager." The Patron may, at any time, resume the direct management of the School, or appoint another Local Manager. This rule applies equally whether the Patronship be vested in one or more individuals.

5. When a school is vested in Trustees, they have the right to nominate the Local Manager.

6. When a School is vested in the Commissioners, the name of the Patron or Patrons is inserted in the lease.

7. In the case of a vacancy in the Patronship by death, the representative of a lay Patron, or the successor of a clerical Patron, is recognised by the Board (where no valid objection exists) as the person to succeed to the Patronship of the School.

8. If a Patron wishes to resign the office, he has the power of nominating his successor, subject to the approval of the Board.

9. In all cases, the Commissioners reserve to themselves the power of determining whether the Patron, or the person nominated by him, either as his successor, or as local Manager, can be recognised by them as a fit person to exercise the trust.

10. In all cases, whether the School be vested or non-vested, the Patron, when nominating a local Manager, ought to notify to the Commissioners whether or not the person so nominated is to exercise all the rights of Patron during the period he acts as Manager.

11. When a School is under the control of a Committee, or of joint Patrons, a "Local Manager" should be appointed, to correspond with the office, sign documents, &c., &c.

12. The local Patrons (or Managers) of Schools have the right of appointing the Teachers, subject to the approval of the Board, as to character and general qualifications; the local Patrons (or Managers) have also the power of removing the Teachers of their own authority.

13. Patrons and Managers are permitted to close their respective Schools for a reasonable time during the year, subject to the interference of the Commissioners in cases of abuse; such periods of closing should be limited to six weeks in the year, including the recognised vacations.

14. Managers of National Schools are requested to notify all changes of Teachers to the Office, and to the Inspectors of the respective districts.

§ VII. VII.—*Inspection by the Commissioners or their Officers.*

1. As the Commissioners do not take the control or regulation of any School, except their own Model Schools, directly into their own hands, but leave all Schools aided by them under the authority of the local Patrons or Managers; the *Inspectors* are not to give *direct orders*, as on the part of the Board, respecting any necessary regulations, but to point out such regulations to the local Patrons or Managers of the Schools, that *they* may give the requisite orders.

2. The Commissioners require that every National School be inspected by the *Inspector of the District*, at least three times in each year.

3. The *District Inspector*, after each inspection, is to communicate with the local Patron or Manager, for the purpose of affording information concerning the general state of the School, and pointing out such violations of rule, or defects, if any, as he may have observed; and he is to make such suggestions as he may deem necessary.

§ VII.

4. Upon ordinary occasions, the Inspector is not to give any intimation of his intended visit; but when the inspection is to be public, he is to make such previous arrangements with the local Patrons or Managers, as will facilitate the attendance of the parents of the children, and other persons interested in the welfare of the Schools.

5. The Inspector is to report to the Commissioners the result of each visit, and to use every means to obtain accurate information as to the proficiency of the pupils, and the discipline, management, and methods of instruction pursued in the School.

6. When applications for aid are referred to the District Inspector, he is to have an interview with the applicant; and also to communicate personally, or by writing, with the clergymen of the different denominations, and with other parties in the neighbourhood, with the view of ascertaining their opinions on the application, and whether they have any, and what, objections thereto.

7. The Inspector is also to supply the Commissioners with such local information as they may from time to time require from him, and to act as their agent in all matters in which they may employ him; but he is not invested with authority to decide upon any question affecting a National School, or the general business of the Commissioners, without their direction.

§ VIII.

VIII.—*Admission of Visitors.*

1. The public, generally, must have free access to every National School (whether Vested or Non-Vested) during the hours devoted to secular instruction,—not to take part in the ordinary business, or to interrupt it, but, as Visitors, to observe how it is conducted.

2. Visitors of all denominations are to be received courteously by all Teachers of National Schools, and are to have free access to the School-rooms, and full liberty to examine the Registers, Daily Report Books, and Class Rolls; to observe what books are in the hands of the children, or upon the desks, what tablets are hung up on the walls, and what is the method of teaching; but they are not authorized to interrupt the business of the School, by asking questions of the children, examining classes, calling for papers or documents of any kind, except those specified, or in any other way diverting the attention of either Teachers or Scholars from their usual business.

3. Should any Visitors wish for information which they cannot obtain by such an Inspection, it is the duty of the Teachers to refer them to the Patron or Manager of the School for such information.

4. As the religious instruction of the children given in the School-room is under the control of the Clergyman or Lay person communicating it with the approbation of their parents, the *Commissioners* can give no liberty to any Visitor, whether Clergyman or other person, to interfere therewith, or to be present thereat.

5. The Commissioners require that a copy of PART I., with selections from other Parts, of these, their Rules, on a form furnished by them, shall be suspended in every National School-room.

PART II.

PART II.

EXTENT OF AID, AND CONDITIONS UPON WHICH GRANTED.

§ I.

I.—*Kinds of Aid.*

1. The Commissioners of National Education award aid under two general heads, viz.:—

First—Towards building School-houses and providing suitable fittings and furniture. In such cases, the Commissioners also grant aid towards the payment of Teachers, supply of Books, &c., as hereafter explained.

Secondly—Towards the support and maintenance of Schools established without any assistance from the public funds for the erection of the buildings, or providing furniture.

Appendix A.

Rules and Regulations of Commissioners.

PART II. § II.

2. The Commissioners desire it to be distinctly understood that they reserve to themselves in all cases, in vested as well as in non-vested schools, the right to withdraw any grant of salary or books, whenever they see fit.

II.—*Towards Building School-houses (Vested).*

1. Before any grant is made towards building a School-house, the Commissioners are to be satisfied that a necessity exists for such a School, that an eligible site has been procured, that a satisfactory lease of the site will be executed either to Trustees for the purposes of National Education, or to the Commissioners in their Corporate capacity; and that the applicants are prepared to raise, by local contribution, at least one-third of the whole sum which the Commissioners deem necessary for the erection of the house, providing furniture, &c.

2. If the proposed site for a School be in a rural district, and be within three statute miles of a School-house erected with aid from the State, no grant will be made, except under special circumstances.

3. In a rural district, the site should contain one rood. In a town district, the site for a single School should be 100 feet in front, and 80 feet from front to rear; and for a double School, 100 feet square. It should be in a healthy situation, on a public road or street, and have a dry level surface, with a good foundation at a moderate depth, and be convenient to pure water.

4. Although the Commissioners do not refuse aid towards the erection of School-houses on ground connected with places of worship, yet they much prefer having them erected on ground which is not so connected, where it can be obtained; they therefore require that, before Church, Chapel, or Meeting-house ground be selected as the site of a School-house, *strict* inquiry be made whether another convenient site can be obtained, and that the result shall be stated to them.

5. The School premises must be vested in the Commissioners, or in Trustees, at a nominal rent, and for such term as, under the circumstances, the Commissioners may deem necessary.

6. The lease must be prepared in the Office; the expense to be borne by the Commissioners of National Education.

7. The Commissioners will cause to be kept in repair the School-house and furniture, where the premises are vested in them in their Corporate capacity.

8. When the School premises have been vested in Trustees, for the purposes of National Education, it devolves on the Trustees to keep the house, furniture, &c., in repair.

9. When grants are voted towards the building, &c., of a School-house, the conveyance must be duly executed *before the works are commenced.*

10. No grant can be approved until the District Inspector shall have reported upon all the circumstances of the case; until the Board of Works shall have reported on the eligibility of the proposed site; and the Law Adviser of the Commissioners shall have given his opinion, from the information laid before him, that a satisfactory lease can be executed.

11. The Commissioners determine, from the information afforded them, what amount of School accommodation should be provided in the proposed building.

The following is the scale of Grants for the erection of School-houses, whether vested in Trustees or in the Commissioners.

Class of School.	No. of Children to be accommodated.	Total Estimated Cost, including School Furniture and Out-offices.	Board's Grant.	Description of School.
		£ s. d.	£ s. d.	
1	60	207 0 0	138 0 0	Single School-room.
2	75	225 0 0	150 0 0	Ditto.
3	100	255 0 0	170 0 0	Ditto.
4	120	306 0 0	204 0 0	Ditto.
5	150	416 5 0	277 10 0	Two rooms on ground.
5 A	150	360 0 0	240 0 0	Ditto—one over the other.
6	200	487 10 0	325 0 0	Two rooms on ground.
6 A	200	435 0 0	290 0 0	Ditto—one over the other.

NOTE.—In many poor localities, where buildings of a less expensive nature than those erected according to the above scale of grants may answer the necessary purposes, the Commissioners will be prepared to grant two-thirds of the expense of erection, provided—

(*a*). That the general conditions already specified with regard to building grants be complied with. *Appendix A.*

(*b*). That the erection of such *exceptional* class of building shall not cost more than £100. Rules and Regulations of Commissioners.

(*c*). That as regards the character and size of the building, the instructions issued by the Board of Works, from time to time, shall be complied with.

12. The cost of the house, &c., is determined by the number of children which it is intended to accommodate. Part II. § II.

13. The Board of Works will furnish instructions as to the plan and specification, to which the parties receiving aid are bound strictly to adhere.

14. The Commissioners do not sanction grants for the ornamenting of School-houses, but merely for such expenditure as may be necessary for having the children accommodated in plain, substantial buildings. If buildings of another description be preferred, the whole of the extra expense must be provided by the applicants.

15. The Commissioners do not sanction grants towards the expense of erecting residences for the Teachers.

16. The Commissioners do not sanction grants to purchase, alter, or furnish houses, for the purpose of being converted into School-houses.

III.—*Towards Support of Schools previously established (Non-Vested).* §III.

1. The aid granted to Schools previously established is limited to Salary and Books, and the benefits of Inspection and Training.

2. The Commissioners do not contribute towards Repairs, Fittings, or Furniture; or to the Rent of the School-house.

3. Before aid can be granted, the Commissioners must be satisfied that the case is deserving of assistance; that there is reason to expect that the School will be efficiently and permanently supported; that some local provision will be made in aid of the Teacher's Salary, in addition to the School-fees; that the School-house is in good repair, and provided with a sufficient quantity of suitable Furniture; that a competent Teacher has been appointed; and that the School is in operation.

4. Before the Commissioners consider any application for aid, they require, from the Inspector of the District, a Report upon all the circumstances of the case.

5. To entitle a School to a continuance of aid, the House and Furniture must be kept in sufficient repair by means of local contributions; the School conducted in all respects in a satisfactory manner, and in accordance with the regulations of the Commissioners; and it must appear from the Records of the School that there is a sufficient average daily attendance of pupils.

6. In Mixed Schools, *i.e.*, Schools in which male and female children are taught in the same room, the Teacher may be either male or female, as the circumstances of the School may require; but when a Mixed School has been received into connexion, by the Commissioners, under a male or a female Teacher, the Commissioners will not sanction the appointment of a Teacher of a different sex, unless previous application be made to them to sanction such change.

7. When a school has been taken into connexion, as a School for Males or for Females solely, the Commissioners will not sanction the change from a male to a female school, or *vice versâ*, without their permission having been previously obtained.

Part III. Part III.

Different Classes of National Schools.

I.—*District and Minor Model Schools.* § I.

1. District and Minor Model Schools are built and supported entirely out of the funds placed by Parliament at the disposal of the Commissioners, and are therefore under their exclusive control.

2. The chief objects of Model Schools are to promote united education; to exhibit the most improved methods of literary and scientific instruction to the surrounding schools, and to train young persons for the office of Teacher.

3. In District and Minor Model Schools, the Commissioners appoint and dismiss, of their own authority, the Teachers and other officers; regulate the

Appendix A.
Rules and Regulations of Commissioners.

course of instruction, and exercise all the rights of Patrons. The Commissioners afford the necessary opportunities for giving religious instruction to the pupils, by such Pastors or other persons as are approved of by their parents or guardians, and in separate apartments allotted to the purpose.

4. Some of the Model Schools have farms attached to them, for the purpose of affording instruction in agriculture.

PART III. § II.

II.—*Ordinary Literary Schools.*

1. Such Schools may be established either with aid from the State, or by local provision solely.

2. In Vested Schools, the local expenditure need only be one-third of the expense, and the Teachers' salaries are supplemented by the Commissioners.

3. In Non-vested Schools, the State assistance is limited to salary and books and the benefits of inspection and training.

§ III.

III.—*Agricultural Schools.*

1. To Schools of this description Farms are attached, for the purpose of illustrating and introducing the most approved systems of tillage and cropping, and general husbandry.

2. Agricultural Schools of every class must have a literary department annexed to them; conducted on the principles of ordinary National Schools.

3. Agricultural Schools consist of two classes, those connected with School Farms of the First Class, and those connected with Ordinary School Farms.

4. School Farms are further subdivided into two classes, viz., those under the exclusive control of the Commissioners, and those under local Patrons.

5. In all Schools connected with School Farms of the First Class the Commissioners will grant salary to a Teacher for the literary department *exclusively*, when the extent of the farm and other circumstances render such an appointment necessary.

A.—*School Farms of the First Class under the exclusive control of the Commissioners.**

1. The Commissioners defray the greater portion of the cost of erecting the necessary buildings; but they require the local parties to contribute in such proportion as may be deemed necessary, according to the circumstances of each case.

2. The Commissioners undertake the *entire* cost of the furniture, fittings, rent, taxes, maintenance, implements, stock, &c., &c.

3. A Farm of sufficient extent must be conveyed to the Commissioners, at a moderate rent, and on a satisfactory lease.

4. The Commissioners exercise all the rights of Patrons, as in the case of District and Minor Model Schools.

5. The Commissioners admit into these Schools a limited number of free, and also of paying resident Agricultural Pupils.

6. The Commissioners contribute a small weekly payment to the class of day pupils who work on the farm.

B.—*School Farms of the First Class under Local Patrons.*

1. *Where the Premises are Vested.*

1. The Commissioners contribute a certain amount of assistance towards the erection of the buildings, in proportion to the amount of local contribution, and the extent of the farm. The remaining portion of the cost of the buildings and furniture, and the whole cost of implements, stock, seed, &c., must be contributed by local parties.

2. The site of the buildings must be legally vested in the Commissioners, or in Trustees, at a moderate rent, and on a satisfactory lease.

3. The only aid granted by the Commissioners towards the *maintenance* of such Schools, consists of salary to the Master (who must be competent to conduct both the literary and agricultural departments); a sum towards the support of a limited number of resident Agricultural pupils, and a weekly payment to the class of day pupils who work on the farm.

2. *Where the Premises are Non-vested.*

1. The entire cost of the necessary buildings, furniture, implements, stock, seed, &c., must be defrayed by local parties, and a farm of sufficient extent must be provided.

* The Commissioners have, for the present, ceased to take into connexion School Farms of the First Class.

2. The Commissioners, besides salary to the Master, contribute also towards the support of a limited number of resident Agricultural pupils, and a weekly payment to the class of day pupils who work on the farm.

C.—*Ordinary Agricultural Schools.*

1. This class of Schools consists of Ordinary National Schools (either Vested or Non-vested), to which a small farm (from one to three acres), is annexed. The Teacher must be competent to give instruction both in the theory and practice of Agriculture, and must cultivate the land, with the assistance of his pupils. § III.

2. The only aid granted by the Commissioners, is an addition to the class salary of the Teacher, and in some special cases, a small weekly payment to an Industrial class of pupils.

3. To entitle a School to such aid, the Commissioners require to be satisfied, from the Reports of the Agricultural Inspectors, that the Agricultural department is efficiently conducted.

D.—*School Gardens.*

The Commissioners award gratuities, on the recommendation of the Agricultural Inspectors, to the Teachers of National Schools, who exhibit the best specimens of garden culture, on ground attached to their respective Schools, the ground to be cultivated by the pupils.

IV.—*Industrial Schools.* § IV.

1. In these Schools, embroidery and other advanced kinds of needlework are taught. The Commissioners grant salaries to the Teachers, on the following conditions:—

First—That *all* the pupils of the industrial department shall receive literary instruction, for at least *two hours* daily.

Second—That no religious instruction or religious exercise shall take place during the time the pupils are engaged in industrial occupation.

Third—That a separate room be provided for industrial instruction.

Fourth—That in addition to the literary Teacher, there shall be a suitable person appointed to conduct the industrial department.

2. None but lay Teachers are entitled to a salary from the Commissioners, for conducting an Industrial Department in connexion with a *Convent School.*

3. The amount of salary will depend upon the circumstances of each case.

V.—*Convent Schools.* § V.

1. Convent Schools receive aid under the conditions applicable to Non-vested Schools, and they are subject to the same Rules and Regulations.

2. The members of the community may discharge the office of Literary Teachers, either by themselves or with the aid of such other persons as they may see fit to employ; the salaries of such assistants to be defrayed by the community, except in the case of monitors.

3. The amount of salary awarded to Convent Schools is regulated by the average number of children in daily attendance, according to a scale laid down by the Commissioners.

4. The Commissioners will grant aid to *one School only*, in *connexion with the same* Convent.

VI.—*Workhouse Schools.* § VI.

1. Such Schools are received into connexion, and grants of Books made to them, on condition that they shall be subject to inspection by the Commissioners, or their Officers, and that all the Rules of the Board applicable to Non-vested Schools be faithfully observed.

2. The Commissioners award gratuities to a certain number of the Teachers of Workhouse Schools in each District, on the recommendation of the Inspector.

VII.—*Schools attached to Prisons, Asylums, &c.* § VII.

Such Schools are received into connexion, upon the same general principles as the Workhouse Schools, and grants of Books are made to them. In special cases gratuities are awarded to the Teachers.

VIII.—*Evening Schools.* § VIII.

The Commissioners grant aid towards the support of Evening Schools, where the wants of the locality render such institutions desirable. The aid is limited to salary, books, and inspection.

Appendix A.

Rules and Regulations of Commissioners.

PART IV. §I.

PART IV.

TEACHERS.

I.—*Their Qualifications and Duties.*

1. National Teachers should be persons of Christian sentiment, of calm temper, and discretion; they should be imbued with a spirit of peace, of obedience to the law, and of loyalty to their Sovereign; they should not only possess the art of communicating knowledge, but be capable of moulding the mind of youth, and of giving to the power which education confers a useful direction. These are the qualities for which Patrons of Schools, when making choice of Teachers, should anxiously look. They are those which the Commissioners are anxious to find, to encourage, and to reward.

2. No clergyman of any denomination, or member of any religious order, can be recognised as the Teacher of a National School. This does not apply to the Teachers of Convent Schools, nor to those of any Monastery Schools which have been at any time previously in connexion with the Board.

3. Teachers of National Schools are not permitted to carry on, or engage in, any business or occupation that will impede, or interfere with, their usefulness as Teachers. They are especially forbidden to keep public-houses, or houses for the sale of spirituous liquors.

4. Every Teacher is required to have his Daily Report Book lying upon his desk, that Visitors may, if they choose, enter remarks in it. Such remarks as may be made, the Teachers are by no means to alter or erase; and the Inspector of the district is required to transmit to the Commissioners copies of such remarks as he may deem of sufficient importance to be made known to them.

5. Should the Commissioners consider any Teacher in a vested school unfit for his office, or otherwise objectionable, they will require that he be dismissed and another provided: in non-vested schools the grant of salary will be withheld until a suitable Teacher be procured. Teachers are also liable to be fined, depressed, or suspended, at all times, when the Commissioners shall deem it necessary, on sufficient cause being shown.

6. Teachers, whose Schools may have declined in usefulness and efficiency, or who may have conducted themselves improperly, or who, from any other cause, may seem to merit punishment, may be fined, depressed, or deprived of salary.

7. *Newly appointed* Teachers are not *entitled* to any salary from the Commissioners, until examined and pronounced competent; and any Teachers *newly appointed* to National Schools, who, after examination by the Inspectors, may be found wholly unqualified, must be removed.

8. If a Teacher who has been dismissed from a National School for any cause, be appointed to another National School, the Commissioners reserve to themselves the right to determine whether the appointment can be sanctioned, or any salary paid to such Teacher.

9. No Teacher dismissed for incompetency is eligible for re-entry into the Board's service till after the expiration of at least six months from the date of such dismissal.

10. If a Teacher who has been a considerable period out of the service of the Board shall again enter it, the Commissioners reserve to themselves the right to determine, in each case, whether such Teacher shall retain the class he was in previous to quitting the service of the Board.

11. The Commissioners regard the attendance of any of the Teachers at meetings held for *political purposes*, or their taking part in elections for Members of Parliament, or for Poor Law Guardians, &c., except by voting, as incompatible with the performance of their duties, and as a violation of rule which will render them liable to dismissal.

12. Teachers, to be eligible for entering the service of the Board must, if males, have completed their seventeenth year; and, if females, their sixteenth.

13. No Assistant Teachers will be recognised whose qualifications are not at least equal to those required of Probationers.

14. The same rule as to age applies to Assistant as to Principal Teachers.

15. The Commissioners will not grant a salary to an Assistant Teacher in a Boys' School in which there is not an average daily attendance of at least sixty pupils; but in the case of Girls' Schools, or Mixed Schools—that is, Schools attended by both sexes—salary may be obtained for an Assistant, when the attendance shall have maintained itself at an average of at least fifty.

16. In Mixed Schools presided over by a Master, it is desirable, where the attendance warrants it, that a Female Assistant should be selected. *Appendix A.*

17. The Commissioners will not grant salary to Workmistresses in Mixed Schools, unless there be an average daily attendance of at least forty-five pupils; and the Commissioners require that at least two hours each day be devoted to instruction in this branch. Rules and Regulations of Commissioners.

18. If any Workmistress whose appointment has been sanctioned by the Commissioners, be employed during the remainder of the ordinary school-hours in giving literary instruction to the junior classes, it is competent for the District Inspector, if he considers her qualified, to recommend that she be paid at the rate of salary awarded to "Probationers." PART IV. § I.

19. In Schools attended by Female Children only, under the care of a Female Teacher, such Teacher must be competent not only to conduct the Literary Department, but also to give instruction in Needlework; but if the average daily attendance amount to forty-five, application may be made for a grant of salary to a Workmistress to take charge of the Industrial Department, which, however, must be superintended by the principal Teacher, who will be held responsible for its efficient management.

20. The following Practical Rules are to be strictly observed by the Teachers of National Schools:—

I. To keep at least one copy of the *General Lesson* suspended conspicuously in the School-room, and to inculcate the principles contained in it on the minds of their Pupils. This should be done at the time of combined ordinary instruction.

II. To exclude from the School, except at the hours set apart for Religious Instruction, all Catechisms and Books inculcating peculiar religious opinions.

III. To avoid fairs, markets, and meetings—but above all, *Political* meetings of every kind; to abstain from controversy; and to do nothing either in or out of School which might have a tendency to confine it to any one denomination of Children.

IV. To keep the Register, Report Book, and Class Rolls, accurately, neatly, and according to the precise forms prescribed by the Board; and to enter or mark in the two latter, before *noon* each day, the number of Children in actual attendance.

V. To classify the Children according to the National School Books; to study these Books themselves; to teach according to the improved method, as pointed out in their several prefaces; and to labour diligently to train up their Pupils in each branch of knowledge to that degree of attainment, or amount of proficiency, pointed out for each Class, respectively, in the *Programme of Instruction for National Schools.*

VI. To observe themselves, and to impress upon the minds of their Pupils, the great rule of regularity and order—A TIME AND A PLACE FOR EVERY THING, AND EVERY THING IN ITS PROPER TIME AND PLACE.

VII. To promote, both by precept and example, *Cleanliness*, *Neatness*, and *Decency*. To effect this, the Teachers should set an example of Cleanliness and Neatness in their own persons, and in the state and general appearance of their Schools. They should also satisfy themselves, by personal inspection every morning, that the Children have had their hands and faces washed, their hair combed, and clothes cleaned; and, when necessary, mended. The School apartments, too, should be swept and dusted every *evening*; and whitewashed at least once a year.

VIII. To pay the strictest attention to the morals and general conduct of their Pupils, and to omit no opportunity of inculcating the principles of *Truth* and *Honesty*; the duties of respect to superiors, and obedience to all persons placed in authority over them.

IX. To evince a regard for the improvement and general welfare of their Pupils; to treat them with kindness, combined with firmness; and to aim at governing them by their affections and reason, rather than by harshness and severity.

X. To cultivate kindly and affectionate feelings among their Pupils; to discountenance quarrelling, cruelty to animals, and every approach to vice.

XI. To record in the Report Book of the School, the weekly receipts of School Fees, and the amount of all grants made by the Board, as well as the purposes for which they were made, whether in the way of premiums, salaries to Teachers, or payments to Monitors or Workmistresses; also School Requisites, whether Free Stock or purchased at the reduced prices.

XII. To take strict care of the *Free Stock* of Requisites granted by the Board; and to endeavour to keep the School constantly supplied with the National School Books and requisites, for sale to the Children, at the reduced prices charged by the Commissioners; also to preserve, for the information of the Inspectors, the Invoices of Free Stock or purchased Requisites, which will be enclosed with the Grant.

XIII. Should it be intended to close a School for a time not included in the recognised Vacations, notice should be given some days previously to the Inspector; and when a Teacher is summoned for training, and means to obey the Summons, or intends resigning or removing to another School, he should intimate his intention to the Inspector a month, at least, before his removal or resignation, in order that the latter may have an opportunity of visiting his School, and reporting upon the state of the Premises, Free Stock, School Accounts, &c., &c.

XIV. To attend to the Ventilation of the School:—I. Immediately after entering the room in the morning; II. At the time of Roll-call; III. About an hour before the School breaks up. The ventilation can best be effected by lowering, where practicable, the upper part of the Windows, so as to admit a thorough air through the room.

Appendix A.

Rules and Regulations of Commissioners.

PART IV.

21. In cases of illness, and upon Medical Certificates being submitted, the Commissioners allow to Principal Teachers, or Assistants, *one* month's leave of absence from school duty in the year, for which time their salaries will be paid without deduction. If any more lengthened leave of absence be required, there must be competent substitutes appointed, such substitutes to be paid by the recognised teachers, at the rate of, at least, the salary allowed to probationers. In no case can leave be granted for more than six months.

§ II.

II.—*Training of Teachers.*

1. The Commissioners have provided a Normal Establishment in Dublin, for training Teachers, and educating persons who are intended to undertake the charge of Schools.

2. Teachers selected by the Commissioners for admission to the Normal Establishment, must produce a Certificate of good character; also a Certificate from a member of the Medical Profession that they are in good health, and free from any cutaneous disease; and must be prepared to pass through an examination in the Books published by the Commissioners. They are boarded and lodged at the Establishments provided by the Commissioners; and arrangements are made for their receiving religious instruction from their respective Pastors, who may attend at the Normal Establishment at convenient times appointed for the purpose. On Sundays they are required to attend their respective places of worship; and a vigilant superintendence is at all times exercised over their moral conduct. The Teachers undergo examination at the close of the course, and they then receive a certificate according to their deserts. The Teachers are, for a considerable time previous to their being summoned, required to prepare themselves for the course.

3. During the absence of the recognised Teacher, a temporary Teacher must be provided to take charge of the School, who is to be paid a portion of the salary falling due to the recognised Teacher during such Teacher's attendance at the Normal Establishment.

4. Assistant Teachers of Model Schools, while in training, receive but half their accustomed share of the fees, and a deduction is made from their salaries at the rate of £20 per annum in the case of males, and £18 in the case of females: these deductions to serve as payment for their substitutes.

5. Should any Teachers present themselves in a delicate state of health, or affected with any cutaneous disease, they will not be received or allowed any travelling expenses. No Teacher can be admitted who has not had the Small-pock, or been vaccinated.

6. The Teachers trained in the Normal Institution are divided into three Classes, namely:—

First—The General or Ordinary Class, composed of Teachers (males or females) of National Schools, who have been recommended by the District or Head Inspectors as eligible Candidates for Training.

Second—The Special or Extra Training Class, composed chiefly of Teachers (males or females) who have been selected from the Ordinary or General Class, for additional Training.

Third—The Candidate or *Extern* Class, composed of a limited number of respectable and well-informed young persons, who wish to qualify themselves to act as Teachers. The Candidates admitted to this Class are permitted to attend, without any charge, the Model Schools and the Lectures of the Professors, and at the end of the course they are examined and classed as Teachers, according to their merits and qualifications. Permission is also given to Teachers of Schools not connected with the Board to attend the Model Schools as *Auditors* or *Visitors*, for any period that may suit their own convenience.

7. No Teachers can be admitted to the General or Ordinary Class but those who have succeeded in obtaining Classification after Examination by a Board of Inspectors, or who may be *specially* recommended by the Inspectors or Professors.

§ III.

III.—*Classification of Teachers, &c.*

1. All National Teachers are either "Classed Teachers" or "Probationers." The former are divided into three classes.

The class in which Teachers are ranked depends (I.) upon their qualifications, as determined after examination by the Professors, or by the Inspectors; and (II.) on their proved capacity and efficiency as conductors of Schools.

All Teachers, on first entering the service of the Board, or who have not been classed, are termed Probationers.

2. Besides the Principal and Assistant Teachers included under the foregoing heads, there are Junior Literary and Industrial Assistant-Teachers, Teachers of Needlework, Pupil-Teachers, and Paid Monitors.

3. The Commissioners have determined upon a course of study for each class, in which the Teachers are to be examined, as one of the tests of their fitness for promotion.

4. Every National Teacher will be furnished, on application to the District Inspector, with a copy of the programme of the course of study above referred to, in which is stated the minimum of proficiency required for each class.

5. Teachers already classed are to be admitted to examination, with a view to promotion, only on the recommendation of the District Inspector, and no one on whose School a decidedly unfavourable report has been made within the previous year is to be admitted.

6. (*a*). Teachers will not be eligible for promotion, unless, in addition to satisfactory answering in the course prescribed for the Class to which they aspire, it appears from the reports of the respective District Inspectors, that the Schools are properly organized and well conducted; that adequate exertions have been made to keep up a sufficient average attendance; that their Classes are taught according to the *Programme of Instruction for Schools;* that while the junior pupils are carefully taught, a fair proportion of the pupils of the higher classes, besides being proficients in the ordinary branches of Reading, Spelling, Writing, and Arithmetic, are possessed of a respectable amount of knowledge in Grammar and Geography, and able to write from dictation ordinary sentences with readiness and correctness. In Female Schools it will be further requisite that instruction in plain Needlework, including sewing, knitting, and cutting-out, be given to all girls capable of receiving it, and that they exhibit a due proficiency in this department.

(*b*). It must also appear from the reports of the Inspectors, that the School accounts have been regularly and correctly kept; that the School premises have been preserved with neatness and order; that cleanliness in person and habits has been enforced on the children attending them, and that an adequate supply of *Sale Stock* of Lesson Books and other necessary School Requisites has been regularly kept up.

(*c*). It must also clearly appear that, JUDGED BY THE TOTAL RESULTS PRACTICALLY REALIZED IN THEIR SCHOOLS in the instruction and discipline of their pupils, they are worthy of the higher class to which they aspire.

7. All Teachers, who have not been classed, will be paid as Probationers, until they be classed at the first Examination, to which they shall have been summoned. Those who then obtain classification, will be paid from the commencement of their service under the Board, according to the rate of salary attached to their class. This rule will not extend to those Teachers who when summoned, shall fail, from any cause whatever, to present themselves for examination.

8. All Teachers who have been unsuccessful at their first examination, and who may be retained on trial, will receive the salary of the class to which they may be promoted at any subsequent examination, from the 1st of April of the year in which they offer themselves for such subsequent examination.

9. Teachers who, after their first examination, have been retained on trial as Probationers, if not recommended for promotion by the Head or District Inspectors at the next ensuing examination, cannot be continued in the service of the Board.

10. Classed Teachers who may offer for re-classification will, if promoted, be paid according to their new grade from the 1st of April of the year in which they offer themselves for examination.

11. The Pupil-Teachers of District Model Schools, on taking charge of National Schools after the completion of their course of training, shall, if not already classed, rank as Third Class Teachers (provided they be deemed qualified for that class by the Head Inspector) until they shall have been classed at the first Examination held after their appointment, in the district in which their Schools are situated—when they will be paid according to their classification, from the date of their appointment.

12. All Teachers must remain *at least* one year in a lower *division* of any

Appendix A.

Rules and Regulations of Commissioners.

PART IV. § III.

class, before they are eligible for promotion to a higher division; and they must remain *at least* two years in a lower *class* before they can be promoted to a higher class. These conditions, however, being fulfilled, Teachers of superior attainments, and of eminent usefulness, may be advanced from any division of one class to any division of another, after their first classification, without being required to pass through the intermediate divisions.

13. This regulation does not apply to Teachers who may be promoted on the recommendation of the Professors at the termination of their course of training.

14. Teachers who may have absented themselves from the examinations of previous years, without satisfactory reason assigned, will be liable to be dismissed should they not present themselves when again summoned.

15. All Teachers also who may be *specially* summoned, and who shall be absent without a sufficient reason, will be liable to be fined or depressed.

§ IV.

IV.—*Salaries (Ordinary National Schools).*

1. The Commissioners grant salaries to Teachers of National Schools at the following rates, subject to the foregoing and annexed regulations:—

Principal Teachers:—		Males.	Females.
First Class,	1st Division,	£52	£42
	2nd „	44	36
	3rd „	38	30
Second Class,	1st Division,	32	26
	2nd „	28	24
Third Class,	1st Division,	24	20
	2nd „	18	16
Probationers,		15	14

(*a*). As a general rule, a School, to be entitled to be taken into connexion, or to remain in connexion, must exhibit an average daily attendance of at least 30 pupils.

(*b*). Teachers cannot be admitted to the enjoyment of First Class salary, nor allowed to continue in its enjoyment, unless their Schools command an average daily attendance of 35 pupils.

(*c*). Should Schools of the ordinary class be retained in connexion after the attendance shall have fallen below *thirty pupils*, as in certain circumstances they may be retained, their Teachers will be paid according to the provisions of the modified scale given below.

(*d*). But as regards the Schools placed in connexion with the Board *before* the close of October, 1860, in every case where the attendance shall appear to be diminished by the admission of new Schools, the Commissioners will not make any reduction of salary on the *first* occasion of such diminution taking place, but will defer making such reduction until a period of six months shall have elapsed from the termination of the quarter in which the attendance shall, on such *first* occasion, fall below the required *minimum*.

(*e*). And in the case of Schools taken into connexion *since* October, 1860, reduction of salary, proportioned to the decrease in attendance, will be made in the *next* quarter subsequent to that in which it first occurs, should the decrease re-appear.

Assistant Teachers:—	Males.	Females.
Unclassed,	£15	£14
If classed 3^2,	18	16
If classed 3^1, or higher,	24	20
Junior Literary and Industrial Assistants,	—	14
Workmistresses,	—	8

2. To entitle a School to the services of an Assistant, the School, if for boys only, must have an average daily attendance of at least 60; but if for girls only, or if a mixed School, an average of 50 will suffice. While, however, the average daily attendance in such Schools, respectively, remains under 65 and 55, no higher salary than that of III^2 can be awarded.

3. In mixed Schools presided over by a Master, the Assistant should be a female.

4. To entitle an Assistant to the salary of III^1, the School, if for boys only, must have an average daily attendance of at least 65, or if mixed, or for girls only, an average daily attendance of 55.

5. In Schools where the average attendance amounts to 110, salary of Classification, up to 2^1, will be allowed to the First or Senior Assistant.

6. To entitle a girls' School, or a mixed School, presided over by a Master, to the services of a Workmistress, an average daily attendance of 45 pupils is required, of whom, in the case of mixed Schools, 20 at least must be girls. The same rule applies to Junior Literary and Industrial Assistants in such Schools.

NOTE.—In cases where Schools enjoying the services of Assistants (under which term are included Monitors, Workmistresses, and Industrial Instructors) fail to command the average attendance required for the amount of aid awarded for such services, Managers must be prepared for the entire withdrawal or reduction of such aid in the Second Quarter in which the falling off appears.

A like rule will be applied to Evening Schools.

7. The Commissioners in certain cases are prepared to act on the following modification of the above Scale of Salaries provided for Principal Teachers.

I. *Attendance under* 15 *Pupils.*—Schools with an average daily attendance under 15 pupils, conducted on the principles and the system of the Board, will not be admitted to the enjoyment of salary, but may be allowed Inspection, Books, and Apparatus, under existing regulations. The teachers will be eligible for training, and their service, from their connexion with the Board, will count to their credit in respect to supplemental salaries, retiring allowances, &c., should their Schools afterwards become entitled to regular grants of salary, or should they be removed to others so entitled.

II. *Attendance* 15 *but under* 20 *Pupils.*—When the average daily attendance is 15, but under 20, in addition to Inspection, Books, &c., and training, the Commissioners will make an award of salary to the teacher, to the amount of two-thirds of a Probationer's salary.

III. *Attendance* 20 *but under* 25.—When the average daily attendance is 20, but under 25, the full salary of a Probationer, but no more, will be awarded to the teacher.

IV. *Attendance* 25 *but under* 30.—When the average daily attendance is 25, but under 30, salary as high as that of First Division of Third Class, but no higher, will be awarded to the teacher, should his qualifications in other respects entitle him to such classification.

NOTE.—These modified grants the Commissioners are prepared to make where the means of religious instruction are not attainable by children of a particular denomination within a reasonable distance of their homes, in any existing National School; but they reserve to themselves the power, in all cases, of preventing the unnecessary multiplication of Schools in any district, and will require as a condition of this modified aid that the Managers of such Schools shall be either Clergymen or other persons of good position in society.

8. The Commissioners are anxious that a further income be secured to the Teacher, either by Local Subscription or School-fees, and they require that the payments made by the Children shall not be diminished in consequence of any increase of Salary which may be awarded to the Teacher.

V.—*Paid Monitors—Their Salaries, &c.* § V.

Junior Monitors.		*Senior Monitors.*	
For the First Year,	£2	For the First Year,	£5
For the Second Year,	£3	For the Second Year,	£6
For the Third Year,	£4	For the Third Year,	£8
		For the Fourth Year,	£10

1. No School whose Teacher does not rank at least in 3^1 Class, can get the benefit of the services of a Junior Monitor; nor can any School whose Teacher ranks not at least in 2^2 Class, be allowed the services of a Senior Monitor.

2. The Paid Monitors are selected from among the best pupils in the National Schools of each district, and are appointed by the Commissioners upon the recommendation of the District Inspectors.

3. No Manager of a National School is obliged to employ a Paid Monitor, nor will such be appointed without his approval.

4. The appointment of a Junior Paid Monitor cannot be held for a longer period than THREE YEARS, nor that of a Senior Paid Monitor for more than FOUR YEARS, at the expiration of which periods, respectively, the salary will be discontinued.

5. The salary may, however, be withdrawn at any time, should want of diligence, of efficiency, or of good conduct on the part of the Monitor, or any other circumstance, render such a course desirable.

6. The Commissioners select (on the recommendation of the Inspectors) the Schools in which the services of Paid Monitors may be employed.

7. When a vacancy in a Monitorship occurs, whether before or after the expiration of a Monitor's term of service, it does not necessarily follow that a successor shall be appointed in the same School.

8. The Programme of the course of study for Paid Monitors can be obtained on application to the District Inspector.

9. Paid Monitors who have completed their course in a satisfactory manner, are eligible, on examination by the Inspectors, to offer as candidates for Assistant-Teacherships or for Pupil-Teacherships in District Model Schools.

Appendix A.

Rules and Regulations of Commissioners.

10. In the case of a few very large and highly efficient schools, the Commissioners are prepared to appoint young persons of great merit to act as First Class Monitors.

Salary for the First year, ...	£15
Ditto Second year, ...	£17

PART IV. § VI.

VI.—*Salaries, &c., to other than Ordinary National Schools.*

A.—*Evening Schools.*

The Commissioners grant salaries, generally amounting to £5 a year, to Teachers of Evening Schools, for every 25 Pupils in average attendance.

B.—*Schools connected with School Farms of the First Class, under the exclusive control of the Board.*

Teachers of this class of Schools receive such amount of Salary as the Commissioners deem sufficient, according to the circumstances of each case.

C.—*Schools connected with School Farms of the First Class under Local Patrons.*

Masters of this class of Schools, competent to conduct both the Literary and Agricultural Departments, receive £10 per annum in addition to the salary of the class in which they may be placed; but if their income from the Board, with this addition, should fall short of £30 per annum, the difference will be granted to them, so that in all cases such Teachers shall have secured to them for their *combined* services a salary of £30 a year at least.

D.—*Schools connected with Ordinary School Farms*

Masters of such Schools receive £5 per annum in addition to the salary of their class, provided they are competent to conduct both the Literary and Agricultural Departments, and that the Commissioners shall have previously approved of Agriculture being taught in the School.

E.—*Industrial Schools.*

In National Schools where embroidery and other advanced kinds of needlework are taught, the amount of salary granted for giving such instruction is regulated by the nature of the work, and the number of pupils engaged in it.

F.—*Schools connected with Convents and Monasteries.*

1. In Schools of this description, salary is paid according to a per-centage on the average daily attendance:—

Average Attendance.				Salary. £		Average Attendance.				Salary. £ s.
30	to	50	Increase at £30 per cent.	10		301	to	325	Increase at £17 per cent.	64 5
51	,,	75		15		326	,,	350		68 10
76	,,	100		20		351	,,	375		72 15
101	,,	125		25		376	,,	400		77 0
126	,,	150		30		401	,,	425		81 5
151	,,	175		35		426	,,	450		85 10
176	,,	200		40		451	,,	475		89 15
201	,,	225		45		476	,,	500		94 0
226	,,	250		50		501	,,	525		98 5
251	,,	275		55		526	,,	550		102 10
276	,,	300		60		551	,,	575		106 15
						576	,,	600		111 0

601 upwards, increase at £15 per cent.

2. As the amount of salary to Schools of this class will in all cases depend upon the average daily attendance of pupils, Managers are to be prepared for augmentation or diminution accordingly, at the expiration of each quarter.

3. Schools of this class are entitled to the services of Paid Monitors.

4. For Evening Schools, an allowance is made at the rate of £10 for every hundred pupils in average attendance.

G.—*Model Schools.*

(a.) Scale of Salaries to Head Masters and Mistresses of Model Schools.

1. The head master to receive £60 per annum, and after the completion of three years' service to rise by £5 per annum, until the salary amount to £100, should he be reported faithful and efficient in the discharge of his duties.*

* In case of head masters of Model Schools residence is provided, or in lieu thereof, in some cases, allowance for house rent.

2. The head mistress to receive £55* per annum, and after three years' service to rise by £2 10*s.* per annum, on the same condition as in the case of males, until the salary amount to £75 a year.

3. Principals, both males and females, enjoy also one-half the school-fees received in their respective departments.

(*b.*) *Scale of Salaries and Allowances to Assistant Masters and Mistresses in Model Schools.*

1. An assistant master to receive his class salary, a supplemental salary of £16 per annum, and generally a certain proportion of the school fees.

2. An assistant mistress to receive her class salary, a supplemental salary of £12 per annum, and generally a certain proportion of the school fees.

3. The grant of such supplemental salaries to be contingent upon the Report of the Head and District Inspectors.

(*c.*) *Allowances to Teachers of Model Schools who, possessing Certificates of Competency, shall give Instruction in Singing, Drawing, or Physical Science.*

1. The head master or mistress to be allowed £10 annually, but to be paid for teaching only *one* of these subjects.

2. The assistant master or mistress to be allowed for

Singing,	£8
Drawing,	8
When both are taught,	12
And an Assistant Master for teaching Physical Science,	8

3. When the assistant teacher is engaged in teaching both physical science and *either* drawing or singing (for not more than *two* of these extra branches are to be taken by the same assistant), a sum of £12 annually to be granted to him.

4. If in the case of singing or drawing the instructions of the teacher, Principal or Assistant, are confined to but one department of the school, as the Boys' or Girls', but half the assigned rate of payment is allowed.

5. These allowances to be contingent upon the Report of the Head and District Inspectors.

(*d.*) *Paid Monitors and Pupil-Teachers in Model Schools.*

1. Monitors are allowed for the

First Year,	£6	Third Year,	£10
Second Year,	8	Fourth Year,	12

2. In the case of Pupil-teachers resident in the house, an allowance at the rate of £20 a year is granted to the Master for the board, &c., of each.

3. Extern Pupil-teachers are allowed at the rate of £20 a year each, in lieu of board, &c.

(*e.*) *Gratuities to Pupil-Teachers and Paid Monitors in Model Schools.*

1. An annual gratuity not exceeding 30*s.* may be awarded to pupil-teachers (of *first* year) and paid monitors for good conduct, distinguished merit in their studies, and success in the instruction of the classes intrusted to their charge.

2. Pupil-teachers who may be retained for training beyond their first year, will be allowed a gratuity of 30*s.* a quarter, as reward for good conduct, &c.

3. These gratuities are granted on the recommendation of the Head and District Inspectors.

II.—*Gratuities to Literary Teachers of Workhouse Schools.*

1. The Commissioners of National Education (with the concurrence of the Poor Law Commissioners) award gratuities to a certain number (forty males and forty females) of the Teachers of the Workhouse Schools, in connexion with the National Board, who shall be recommended by the District Inspectors.

The gratuities are divided into two classes:—

For Male Teachers,	First Class,	Twenty	at the rate of £6	a year each.
	Second Class,	Twenty	„ £4	„
For Female Teachers,	First Class,	Twenty	„ £3	„
	Second Class,	Twenty	„ £3	„

* This includes £20 a year for lodging allowance.

Appendix A.

Rules and Regulations of Commissioners.

PART IV. § VI.

2. The awards are made half-yearly, for the periods ending 31st March, and 30th September.

3. It is to be understood that such gratuities are given in *addition* to the salaries paid to the Teachers of Workhouse Schools under the provisions of the Poor Law Act.

4. No Teacher is precluded from receiving the gratuity two or more half years in succession, if recommended by the District Inspector as deserving of it; but a Teacher having received a gratuity for one half year, is not thereby *entitled* to the payment of another for the succeeding half year.

5. If the Local Guardians know any just cause for withholding the gratuity from the Teacher, they are to return the receipt unsigned, and communicate to the Commissioners of National Education the grounds for so doing.

6. The Teachers of Workhouse National Schools are also eligible to receive the gratuity for instructing pupils in Vocal Music.

§ VII.

VII.—*Gratuities, &c., to Teachers of Ordinary National Schools.*

A.—*Premiums for Order, Neatness, and Cleanliness.*

1. The sum of £22 10*s.* will be allocated to each of the School Districts, and divided into Thirteen Premiums.

One of £4 . . .	£4	Five of £1 10*s.* . . .	£7 10*s.*
Two of £3 . . .	£6	Five of £1 . . .	£5

2. These Premiums are awarded ANNUALLY on the recommendation of the District Inspector, at the expiration of the year.

3. No Teacher is eligible for this Premium for more than two years in succession, or who shall be in receipt of Good Service salary.

4. These Premiums will be awarded to Teachers of all classes, provided the average attendance in each case shall not fall below that required for Salary of Teacher's Class; but none will be deemed eligible to receive such Premiums against whom there is any well-founded charge of neglect in the performance of their duties, of impropriety in their conduct, or whose Schools are not conducted in all respects in a satisfactory manner.

5. If the Patron or Manager of a National School knows any just cause for withholding the Premium from the Teacher, he is to return the receipt unsigned, and state his reasons for so doing.

B.—*Supplemental or Good Service Salaries.*

1. Supplemental or Good Service Salaries are awarded to a certain number of Teachers of National Schools on the recommendation of the Head and District Inspectors, subject to the following conditions:—

(*a*). That the teacher ranks not lower than First Division of Third Class.

(*b*). That the average attendance at his school amounts to thirty-five at least.

(*c*). That the teacher has given not less than eight years' service under the Board; period of service to be reckoned from the date from which salary as a Classed Teacher was first paid.

2. No teacher to be eligible for such Supplemental Salary who shall have been depressed or fined for misconduct or neglect of duty, or on whose school a decidedly unfavourable report shall have been made within the preceding three years, or who shall not have shown himself, throughout his whole career, to have been attentive and painstaking, and mindful of all the details of school-keeping.

3. Any teacher to whom such Good Service Salary shall have been awarded, but who shall subsequently cease to exhibit those qualities which first obtained for him this distinction, or whose school shall fall below an average daily attendance of thirty-five pupils, shall thereby forfeit such Supplemental Salary.

4. Teachers in receipt of Good Service Salary who may become entitled to an increase, on the ground of a more lengthened term of service, or on account of promotion to a higher class, must be specially recommended by Inspector for such increase.

5. In case of promotion from a lower to a higher class, teacher will not be entitled to the consequent increase of Good Service Salary until he shall have been a year in his new class.

6. Payments to be made annually; and in no case without the united recommendation of the Head and District Inspectors.

MALES.									FEMALES.

C.—*Allowances for teaching Vocal Music, Drawing, and Navigation.*

1. To every teacher, possessing a certificate of competency, who shall give instruction in vocal music in his school, a gratuity ranging from £2 to £5 a-year, according to the number under instruction and the success of the teacher's efforts.

2. To every teacher possessing a certificate of competency from the drawing-master in the Central Model School, or from the master of a School of Art, who shall give instruction in drawing to a class with sufficient average attendance, an annual gratuity, varying from £3 to £10, according to the number under instruction and the success of the teacher's efforts.

3. Gratuities for teaching singing and drawing are awarded to the conductors of Convent Schools on the same conditions as in the case of ordinary Schools, provided satisfactory proof is afforded of the competency of the teachers, and that the instruction is given during the hours of secular education.

4. To every teacher of a National school, possessing a certificate of competency from the masters of the Dublin, Belfast, Limerick, or Waterford Model Maritime Schools, who shall give evidence of having an average attendance of at least six pupils under instruction in navigation, an annual gratuity of £5 for an attendance of six pupils, and £10 for an attendance of twelve or more.

D.—*Gratuities for Instructing Paid Monitors.**

		£	s.	d.
Junior Monitors,	For each junior monitor, a gratuity of	1	0	0
Senior Monitors,	For each monitor of 1st year, a gratuity of	1	0	0
	do. of 2nd year, do.	1	10	0
	do. of 3rd or 4th year, do.	3	0	0
1st Class Monitors,	do. of 1st or 2nd year, do.	3	0	0

E.—*Gratuities for Extra Instruction to Unpaid Monitors.**

1. A gratuity not exceeding *four pounds* may be awarded to teachers of organized schools, who shall give *extra* instruction to a staff of *unpaid monitors* appointed by the Inspector or Organizer.

a. Teachers must, to entitle them to such gratuities, keep a record of the time devoted by them to the monitors' instruction.

b. No gratuity can be awarded under this or the preceding head unless the answering of the monitors be satisfactory and that such answering can be fairly referred, in great part at least, to the care bestowed by the teacher during the time of such special instruction.

F.—*Gratuities for preparing Young Persons for the Office of Teacher.**

1. For every pupil who, after having been appointed to a school, shall pass respectably the *first* annual examination, held subsequently to such appointment, the master or mistress by whom such pupil shall have been trained will be entitled to a sum of not less than £2, and not more than £3; but in no year is the amount to exceed £15 to any one school or teacher as the reward of such services.

2. The conditions to be observed in regard to these gratuities are—

(*a*). That such pupil shall have attended in the school not less than two consecutive years immediately preceding his or her appointment as a teacher.

* Teachers of Model Schools are excluded from obtaining this class of gratuities.

Appendix A.

Rules and Regulations of Commissioners.

(*b*). That the District Inspector shall certify that the school in which such pupil shall have been trained is efficiently conducted in all other respects.

(*c*). That the Head Inspector before whom such pupil shall have been examined shall certify that the teacher is entitled to the gratuity.

(*d*). That not more than twelve months shall have elapsed between such pupil's first examination and the date of his leaving the school of his former instructor.

PART IV. § VII.

G.—*Gratuities for preparing Young Persons for the Office of Pupil-Teacher in Model Schools.**

1. A gratuity not exceeding £2 may be awarded to teachers from whose schools shall proceed eligible candidates for the office of pupil-teacher in the Model Schools.

2. The conditions to be observed in regard to these gratuities are—

(*a*). That such pupil shall have attended in the school not less than two consecutive years immediately preceding his appointment as pupil-teacher.

(*b*). That the District Inspector shall certify that the school in which such pupil shall have been trained is efficiently conducted in all respects.

(*c*). That the Head Inspector before whom such pupil shall have been examined shall certify that the teacher is entitled to the gratuity.

NOTE.—In regard to the foregoing special gratuities, as in regard to the annual salaries of the teachers of National schools, it is to be distinctly understood that the Commissioners reserve to themselves the right to determine, on cause shown, whether the payment is to be made in whole or in part, or is to be altogether withheld.

H.—*Retiring Gratuities.*

In particular cases the Commissioners have the privilege of granting gratuities of reasonable amount to deserving Teachers of long standing in their service, when, from old age and infirmity, they are obliged to retire.

PART V.

PART V.

SUPPLIES OF BOOKS, SCHOOL REQUISITES, AND APPARATUS.

§ I.

I.—*Nature and Extent of Grants, and Conditions on which made.*

1. The Commissioners furnish gratuitously to each School a First Stock of School Requisites, in proportion to the attendance of Children. These Requisites are to be kept as a School Stock, for which the Master or Mistress is held responsible, and are on no account to be sold or taken out of the School.

2. The funds of the Commissioners do not enable them to give a Free Stock sufficiently large for the entire wants of the School; and they therefore require that the local parties shall purchase a Stock of Books and other Requisites—proportionate to the grant of Free Stock—for the use of the School, and for sale to the Pupils. Any additional maps, stationery, slates, clocks, and other requisites, must also, as required from time to time, be purchased at reduced rates.

A.—*Free Stock.*

The value of the grant of Free Stock is regulated by the average daily attendance of Pupils, as ascertained from the reports of the Inspectors. The Managers of Schools have the privilege of selecting their grants of Free Stock from the following List—being at liberty to choose such of them as they most approve of, and to omit any to which they object:—

Slates, Large.
Do. Small, ruled.
Slate Pencil Holders.
Ink Wells.
Patterson's Sheet of Illustrations to Zoology, No. 1.
Do., Do, No. 2.
One Set Tablet Lessons, Arithmetic, 60 sheets mounted on 30 Boards.
Do. do. Reading, part 1, 35 sheets, mounted on 18 Boards.
One Set of Copy Lines, mounted.
Thirty-hour American Clock, in case.
Professor Sullivan's English Dictionary.

* Teachers of Model Schools are excluded from obtaining this class of gratuities.

Fleming's Atlas (Outline Maps).
Dower's Atlas, 12 Maps, coloured.
Kirkwood's Atlas, 12 Maps, coloured.
Dawes' Hints on Secular Instruction.
Young's Infant School Manual.

3. Watch and Clock work.	7. Hydrostatics.
	8. Hydraulics.
4. Elements of Machinery.	9. Pneumatics.

Graphic Illustrations of Animals, showing their uses in life, and after death, 21 prints, mounted.
Natural History, 150 prints, mounted.
Natural Phenomena, 30 prints, mounted.
Animals illustrated in their comparative sizes, on roller.
Tool Box, containing an assortment of most useful Tools.
Centrifugal Machine.
Archimedean Screw; Working Model.

Black Boards:—42 by 30.
Do., 36 by 30.
Do., 30 by 24.
Do., 42 by 30, on Stand.
Do., 36 by 30, Ruled for Music.

Framed Black Boards:—42 by 30.
Do., 36 by 30.
Do., 24 by 16.

Easels:—Shut-up Easel, 7 feet.
Do., Do., 6 feet.
Framed Easel, 6 feet, double leg.
Lesson Post, suitable for Tablet Lessons.
Pointers, common, long.
Do. do., short.

ARITHMETIC FRAMES:—

Frame and Stand.
Hand Frames, 17 by 19 inches.
„ 15 by 13 „

The following requisites are included in the grant:—

District Inspector's Observation Book.
School Register.
Daily Report Book.
Roll Book.
General Lesson.
Commandments.
Time Table.
Commissioners' Rules.
Rules for Teachers.
Religious Instruction Tablet.
Religious Instruction Certificate Book.
Programmes of Instruction.

B.—*Requisites supplied at Reduced Prices.*

1. When Books, &c., purchased from the Commissioners at the reduced prices are sold to the children attending a National School, it is directed that in no case shall any advance be made on these prices; and the District Inspectors have instructions to inquire into and report upon any infraction of this rule.

Appendix A.

Rules and Regulations of Commissioners.

PART V. § I.

2. The following is the List of Books, School Requisites, and Apparatus supplied to Schools at reduced prices:—

First Book of Lessons,
Second do.
Third do.
Fourth do.
Fifth Book (Boys').
Reading Book for Girls' School.
Biographical Sketches of British Poets.
Selections from the British Poets, Vol. 1.
Do., do., Vol. 2.
Introduction to the Art of Reading.
English Grammar.
Key to do.
First Book of Arithmetic.
Key to do.
Arithmetic in Theory and Practice.
Key to do.
Book-keeping.
Key to do.
Epitome of Geographical Knowledge.
Compendium of do.
Elements of Geometry.
Mensuration.
Appendix to do.

Natural Philosophy, &c.:—
Vol. 1. Mechanics, Hydrostatics.
Vol. 2. Electricity, Galvanism, &c.
Vol. 3. Chemistry and Chemical Analysis.

Scripture Lessons (Old Testament), No. 1.
Do. do. No. 2.
Do. (New Testament), No. 1.
Do. do. No. 2.

Sacred Poetry.
Agricultural Class Book.
Farm Account Book.
Directions for Needlework.
Do. with Specimens.
Tablet Lessons, Arithmetic, 60 sheets.
Do. mounted on 30 Pasteboards.
Do. Spelling and Reading Tablets, Part 1.
Do. do. Part 2.
Do. mounted on 17 Boards, Part 1.
Do. do. Part 2.
Copy Lines.
Do. mounted.

Large Map of the World.
Map of Ancient World.
„ Europe.
„ Asia.
„ Africa
„ America
Map of United States.
„ Australia.
„ British Isles.
„ England.
„ Scotland.
„ Ireland.
„ Palestine.

Thirty-hour American Clock, in case.
Eight-day Spring Clock, not striking the hours.
Copy Books, Large, } without head-lines.
Do., Small, }
Do. (Vere Foster's), with head-lines.
Quills.
Steel Pens (Nibs).
Do., broad, medium, or fine points, No. 075 F, 075 M, 075 B.
Do., broad, medium, or fine points, No. 0142 F, 0143 M, 0144 B.
Barrel Pen, N.
Holders for do.
Slates, Large.
Do. Small, ruled.
Slate Pencils.
Slate Pencil Holders.
Ink Stands.
Ink Powders.

Books not Published, but Sanctioned by the Commissioners of National Education.

Professor Sullivan's English Dictionary.
Do. Spelling Book Superseded.
Do. English Grammar.
Do. Introduction to Geography and History.
Do. Geography Generalized.
Do. Literary Class Book.
Fleming's Atlas of Outline Maps, coloured.
Dower's Atlas, 12 Maps, coloured.
Kirkwood's Atlas, 12 Maps, coloured.
Dawes' Hints on Secular Instruction.

Do. Elements of Euclid, Part 1.
Do. do., Part 2.
Do. Introduction to Algebra.
Arithmetical Table Books.

Works for the Use of Agricultural Pupils.

Dr. Hodges' First Steps in Agricultural Chemistry.
Do. First Lessons in do.
Johnston's Catechism of do.
Murphy's Agricultural Instructor.
Campbell's Farmer's and Cottager's Guide.
Pringle on Green Cropping.
Stephen's Catechism of Practical Agriculture.

Wilhelm's Vocal Music, supplied only to Schools where the Teachers hold Certificates of competency to instruct in Singing.

Hullah's Manual.
Do. Songs for Schools, No. 1.
Do. Do., No. 2.
Do. Set of 8 Large Sheets.
Do. Exercises, Book 1.
Do. Do., Book 2.
Slate, ruled for Music.
Tuning fork.

GLOBES:—
12-inch, in Mahogany, low stand, Brass Meridian.
12-inch, in Stained Wood, low stand, Iron Meridian.
6-inch Semi-Globe, on Mahogany board.
3-inch do. do.
3-inch do. hinged.

MAPS:—
Johnston's School and Family Maps—size, 23 by 27 inches, on rollers, varnished—

Eastern Hemisphere.
Western do.
England.
Scotland.
Ireland.
Europe.
Asia.
Africa.
America.
Canaan and Palestine.
Chart of the World.
Geographical Terms.
United States and Canada.
Chronological Chart of Ancient History.

*** These Maps are of the same character as the large Maps usually supplied by the Commissioners, but being smaller, may be more convenient to many Schools.

Johnston's Physical Map of the World.
Do. Physical Map of Europe, with book.
Betts' Educational Maps—size, 23 by 26 inches, on roller, varnished—

England.	America.
Scotland.	Australia.
Ireland.	Palestine.
Europe.	Eastern Hemisphere.
Asia.	Western do.
Africa.	

Interrogatory Maps, with Book of Exercises to each map, to correspond with the Educational Series, on roller, varnished—

Europe.	England.
Asia.	Scotland.
Africa.	Ireland.
America.	

Geographical Slates—Each Slate has Two Outline Maps permanently engraved on it, and accompanied with Key Maps—

England and the World.	United States and England.
Europe and Asia.	United States and the World.
Africa and America.	
Ireland and Scotland.	

Outline Maps—size, 17 by 13¼ inches, printed on good paper, for Geographical Exercises—

England.	Africa.
Scotland.	North America.
Ireland.	South America.
France.	Eastern Hemisphere.
Europe.	Western do.
Asia.	Palestine.

Key Maps—same size and sorts as preceding—coloured.
Physical Geography (Reynolds'), mounted—

1. Physical Features of the Land.	5. Distribution of Rain.
2. Volcanic System.	6. Distribution of the Winds.
3. Climates.	
4. Movements of the Waters.	

Griffith's Geological Map of Ireland, on roller.
School Atlas of Physical Geography, with Introduction, and 39 Maps, coloured, bound.
Atlas illustrative of the Physical, Political, and Historical Geography of the British Empire, 10 Maps, coloured, bound.

DIAGRAMS:—Illustrations of Natural Philosophy (Johnston's), on roller, varnished, each accompanied by a book—

No. 1. Properties of Bodies.
No. 2. Mechanical Powers.
No. 3. Hydrostatics.
No. 4. Hydraulics.
No. 5. Physiology, No. 1.
No. 6. Physiology, No. 2.
No. 7. Steam Engines.

Astronomy, 6 sheets (Reynolds'), mounted.
View of Nature in all climates, in wrapper.
Do., Do., mounted on a roller.
Do., in ascending regions, mounted on roller.
The Human Species, 4 sheets, mounted on roller.

Machinery and Manufactures, viz.:—

1. Condensing Steam Engine.
2. High Pressure Engine.
3. Locomotive Engine.
4. Marine Engine—side Lever.
5. Marine Engine—Oscillating.
6. Marine Engine—Screw.
7. Paper-making Machine.
8. Printing Machine.
9. Manufacture of Gas.
10. Electric Telegraph
11. Fire Engine and Pumps.
12. Malting and Brewing.
13. Distilling.
14. Principle of the Watch.
15. Hydraulic Press.

	8. Hydraulics.
4. Elements of Machinery.	9. Pneumatics.

Section of Screw Line-of-Battle-Ship, mounted.
Table of British Strata, mounted.
Natural Phenomena, 30 prints.
Do. mounted.
Useful Plants, a set of 12 plates, coloured, in wrapper, with Book.
Do., Do., mounted.
Natural History, 150 prints.
Do., mounted.
Animals, illustrated in their comparative sizes, on roller.
Graphic Illustrations of Animals, showing their uses in life and after death, 21 prints mounted.
The Animal Kingdom, 4 sheets, coloured, mounted.
Patterson's Zoological Diagrams (10), mounted on rollers, varnished.
Set of Chemical Apparatus for performing experiments to illustrate Johnston's Agricultural Chemistry.
Tool Box, containing an assortment of most useful Tools.
Compound Portable Microscope.
Magnetic Ship's Compass, 10-inch.
Magnetic Compass, in brass case, 1½-inch.
Do. in mahogany case.
Thermometers:—Boxwood Thermometers.
Models, &c.:—Working Models of Mechanical Powers (Edwards).
Centrifugal Machine.

Archimedean Screw; Working Model.

Cards of Model Tools—Carpenter, Cabinetmaker, Bricklayer, Plumber, Painter and Glazier, Printer, Bookbinder, Goldbeater, Cooper, Farrier, Miner, Roadmaker and Pavior, Gardener, 12 sorts.
Geometrical Solids, set of, in box.
Conic Sections, do.
Dissected Cone, in boxwood.
Dissected Cube, Octahedron.
Do. Tetrahedron.
Do. Dodecahedron.
Do. Pentagonal Dodecahedron.

Steel Goniograph, for illustrating Geometrical figures.

Tangible Arithmetic, consisting of 12 doz. cubes in box.

Appendix A. Rules and Regulations of Commissioners.

PART V. § I.

ILLUSTRATIONS OF THE USEFUL ARTS:—

The Manufacture of a Needle described, with specimens of wire in its various stages up to the finished needle.
The Manufacture of a Pin described, with specimens, showing the progress from the rough metal to the finished article.
The Manufacture of Paper described, accompanied by sixteen illustrative specimens.

EDUCATIONAL CABINETS:—

Edwards' Educational Cabinet, consisting of Natural Objects to illustrate Lessons on Common Things.
M'Nab's Object-Lesson Cards, illustrative of the Vegetable Kingdom, with specimens.
The Silkworm, exhibiting its various changes from the egg; in glazed case.

MATHEMATICAL DRAWING INSTRUMENTS:

Leather pull-off Case of Patent Instruments, No. 0211, containing 5-inch steel-joint compass, pen point, pencil point, hand pen, and 6-inch boxwood scale.
Mahogany Case of ditto, No. 0212, containing 6-inch steel-joint compass, pen and pencil points, divider, bow pen, hand pen, pencil, box scale, ebony parallel, and brass protractor.
Land Surveying Chains, English Measure.
Do., Irish Measure.
Flat Rulers, Pear Tree Wood, No. 2, 12-inch.
Do., Do., No. 3, 15 „
Do., Do., No. 4, 18 „
Round Ebony Rulers, 12-inch.
Do., 18 „
Gunter's Scales, boxwood, 12-inch.
Do., 24 „
Chain Scale, boxwood, 12-inch.
Plotting Scale, 12-inch.
Offset Scales.
Ebony Parallel Rulers, 15 inches.
T Squares, No. 1, 16-inch.
Do., No. 3, 26 „
Do., No. 4, 30 „
Black Boards:—42 by 30-inch.
Do., 36 by 30 „
Do., 30 by 24 „

Do., 36 by 30, Ruled for Music.
Framed Black Boards:—42 by 30-inch.
Do., 36 by 30 „
Do., 24 by 16 „
Easels:—Shut-up Easel, 7 feet.
Do., 6 feet.
Framed Easel, 6 feet, double leg.
Lesson Post, suitable for Tablet Lessons.
Black Canvas, stretched on Frames, 22 by 17 inches.
Drawing Boards—Clamped:—13 by 9¾.
Do., Do., 18 by 13½.
Do., Do., 20 by 15½.

ARITHMETIC FRAMES:—

Frame and Stand.
Hand Frames, 15 by 13 inches.
Pointers, common, long.
Do., Do., short.
Sewing Needles:—Assorted sizes.
Packets of Needles.
Darning Needles:—Assorted sizes.
Crochet Needles:—Steel.
Knitting Pins.
Sewing Cotton:—Clarke's.
Do., Brook's.

THIMBLES:—

Brass, common.
Do., steel top.

SCISSORS:—

Cutting-out Scissors.
Class Scissors, No. 99.
Do., No. 264.
Penknives, No. 4000.

WORKING MATERIALS:—

Knitting Cotton, blay.
Do., white.
Knitting Worsted, white.
Do., gray.
Do., black drab.
Do., black.
Yellow Sampler Canvas.
White do.
Yellow Stripe, do.
White Muslin.

BLACK LEAD PENCILS, CHALK, &c.:—

Black Lead Drawing Pencils, HB, B. BB, F.
Common Drawing Pencils.
India Rubber.
White Chalk—French.
Charcoal.
Black Conté Crayons, Nos. 1, 2, 3.
Drawing Pins.
Porte Crayons, brass.

DRAWING PAPER:—

Cartridge Paper.
Do., tinted.
Medium Drawing Paper.
Do. do., hand made.
Royal do.
Imperial do.

DRAWING MATERIALS:—

Water Colours in boxes.
School of Art Colour Box.
Water Colours in boxes, best quarter cakes, slide lid.
Do., half cakes, slide lid.
Indian Ink.
Camel Hair Pencils, crow-quill.
Do., duck-quill.
Do., goose-quill.
Cabinet Nests, 6 saucers.

DRAWING COPIES, &c.:—

Lineal Drawing Copies, mounted, in portfolio.
Easy Drawing Copies, do.
Hermes' Drawing Instructor, 64 Nos.:—
Part 1 to 24—Landscapes.
25 to 36—Flowers and Fruit.
37 to 48—Heads.
49 to 60—Arabesques.
61 to 64—Horses.
School of Art Drawing Book.
Familiar Freehand Drawing Copies.
Green's First Studies in Landscape, 6 Nos.
Elementary Studies, by Julien and others.
Heads from the Antique, drawn by Smeeth, plain.
Do., do., tinted.

HARMONIUMS—with each Instrument an Instruction Book is supplied:—

Harmonium (of 5 Octaves) with expression stop.
Do., do., without stop.
Do., (of 4 Octaves).

II.—*Regulations, &c., to be observed by Managers in regard to Grants of Books, &c.*

1. All applications for Books, School Requisites, and Apparatus, at reduced prices, must be addressed to the Secretaries, and be accompanied by a Money Order for the amount, in favour of JAMES KELLY, or WILLIAM HOMAN NEWELL, Esq., and PAYABLE IN DUBLIN ON DEMAND.

2. Half Notes, Cash, Postage Stamps, Orders or Cheques drawn on Country Banks, cannot be received in payment. If remitted, they will be returned at the risk of the sender.

3. When a Post Office Order or Letter of Credit is transmitted, and the amount is under TEN SHILLINGS, the cost of the remittance must be paid by the Person applying for the same; but if the sum exceeds TEN SHILLINGS, the cost of the remittance will be allowed, and Requisites given for the *full amount* PAID.

4. When the Teacher of an ordinary National School advances, from his own resources, the amount of an order for Requisites, and that such amount is not less than the sum of ONE POUND FIVE SHILLINGS, an allowance of 20 per cent. will be made as commission on the order, if demanded.

5. When a National School has had a grant, either as Free Stock or at reduced prices, of a Clock, or of any of the large Maps, another will not be supplied until *three* years shall have elapsed, unless in special cases, the circumstances of which are to be stated, when the grant will be sanctioned, if the reasons assigned be deemed satisfactory.

6. Teachers are not permitted to include, in the applications for Requisites, *Clocks* or *Maps* for their own private use. Managers should, therefore, caution Teachers that such irregularity, if reported, will subject them to a fine, or other serious mark of the Board's displeasure. *Books* for their own use may be purchased by the Teachers at the reduced prices, but then they should be careful to indicate the fact to the Manager, by writing the words "for Teacher" after the name of the book in the List.

7. The Patron or Manager should not sign any Application for Books, Requisites, or Apparatus, without first ascertaining that they are actually wanted for the School on behalf of which the application is made. The Inspectors are required to report to the Commissioners whenever it appears that an undue quantity of Requisites, &c., has been ordered for a National School.

8. When there are separate ROLL NUMBERS for Male and Female National Schools, the application should state for which of them the Books, &c., are required; and if for both, *two* forms should be used.

9. Parcels of Books, &c., when so desired, will be forwarded, carriage free, to the Depôt of the District in which the School for which they are required is situated, and the Inspectors will inform the Managers on what day they will be ready for delivery; or to the Depôt of any other District if more convenient; but in the latter case, the Inspector, who may not know the Managers of any Schools not in his District, cannot be expected to give notice.

10. Or the Parcel will be forwarded to the Railway station nearest to the Manager's residence. In this case the Manager must himself incur the risk of its safe delivery, and the expense of carriage.

11. Parcels are sent free to any place within the civic boundaries of Dublin.

12. When Parcels are forwarded to the Depôt of a District it is *not* the duty of the Inspector to transmit the Parcel to the Manager's residence or to the School.

13. On the day appointed by the Inspector for the delivery of parcels, the Manager is required to send a Messenger to the Depôt with the order on the Inspector (with which the Manager will be furnished), and which order the Inspector is required to transmit to the Office as a proof of the delivery of the parcel.

14. If a Parcel is to be sent by a Carrier, he must call at the Office in Dublin not sooner than two days after the Manager's directions shall have been received, and must produce the Manager's order to the Storekeeper here, for its delivery, on the form supplied for the purpose.

15. The School Apparatus must, on no account, be taken out of the School for which it has been procured, and must be used solely for School purposes. If it, or any portion of it, should be removed from the School, or any improper

Appendix A.

Rules and Regulations of Commissioners.

Part V. § II.

use be made of it, the Commissioners will adopt such measures as the nature of the case may demand.

16. The Commissioners do not supply Books, Requisites, or Apparatus to the public, or to Schools not connected with the Board of National Education.

17. The amount of each grant must be inserted in the Daily Report Book of the School, and the Invoice of the Articles preserved for the examination of the Inspector, who will be required to report whether the Articles in the School correspond with the Invoice, and are in a good state of preservation.

Part VI.

Part VI.

General Instructions to Managers and Correspondents.

1. Persons desirous of obtaining assistance from the Commissioners of National Education, will, upon intimating to the Secretaries the nature of the aid required, be furnished with the Forms, upon which their application must be laid before the Commissioners: and all grants of salary will date from the *first of the month nearest to the return of* such Application Forms to the Office.

2. Applicants for assistance are to understand that the Commissioners are not bound to grant the full amount of aid, as set forth in the foregoing Regulations, n every case; nor can they grant any, unless they have sufficient funds for the purpose, which depends upon the amount placed at their disposal by Parliament.

3. The Commissioners desire it to be distinctly understood that they do not hold themselves bound to grant aid, unless application shall have been made to them in the first instance, on the proper form, and unless the application shall have been favourably and finally decided upon by the Board. Applicants, therefore, should not incur any expense towards the payment of which they expect the Commissioners to contribute, until the decision of the Board shall have been communicated to them.

4. The Managers of National Schools are particularly requested to attend to the following Regulations respecting the payment of Salaries or Gratuities to Teachers, as the Lords of Her Majesty's Treasury and the Commissioners for Auditing the Public Accounts will not, in future, sanction any payments which are not in compliance with these Rules:—

Every Receipt should be signed by the Manager and by the Teacher who is to receive the amount of Salary or Gratuity therein specified.

Whenever a Manager or other person advances money to a Teacher on account of the Salary payable by the Commissioners of National Education, he should *take a Receipt* for the same (Stamped, if the amount be £2, or upwards), in order to have a proper Voucher to produce to the Office for repayment.

If a Teacher die to whom any Salary is due by the Commissioners at the time of his or her death which, with any other property he or she may have been possessed of, would amount to £20 or above, it will be paid only to the representatives or next of kin, on the exhibition, at the Office, of Letters of Administration.

If the amount be over £5, and under £20, payment will be made without the production of Letters of Administration, to the alleged next of kin, on satisfactory proof that the just debts of the deceased have been paid, and on the party claiming payment giving a Bond, on the Form issued from the Office, to free the Commissioners from any claim on the part of other next of kin or of creditors: if the amount be £5, or under, neither Letters of Administration nor Bond will be required, provided the debts are certified to have been paid.

If a Teacher leave a National School, and authorize the Manager or some other person to receive the Salary due from the Board, such authority must be given in writing, or the amount will not be paid.

5. All communications in reference to National Schools should be signed and made by the Patron or Manager. The Commissioners do not correspond with Teachers of National Schools.

6. No attention can be paid to "anonymous" communications.

7. Correspondents are requested to attend to the following directions, viz.:— *Appendix A.*

To write at the head of any letter addressed to the Office, the Name and Roll Number of the School referred to, and the County in which it is situated.

To make communications on different subjects in separate letters.

To state in every case the writer's Post Town; and, in the case of persons whose names are not recorded as Patrons or Managers of Schools, to give the name and style of address in full.

In replying to an Official letter, to quote its number and date.

It is particularly requested that all letters may be written clearly, and on paper of Foolscap size, or, at least, large-sized letter-paper.

Letters or other communications addressed to the Secretaries, on the business of the Board, need not be prepaid.

Rules and Regulations of Commissioners.

PART VI.

8. All letters, or other communications, in any manner relating to the business of the Board, or to the National Schools, are to be addressed to the Secretaries, and not to any other Officer or person connected with the Board—such communications to be directed thus:—

> *The Secretaries,*
> *Education Office,*
> *Marlborough Street,*
> *Dublin.*

By order of the Commissioners of National Education,

JAMES KELLY,
WM. HOMAN NEWELL, } *Secretaries.*

EDUCATION OFFICE,
June, 1869.

APPENDIX B.

Appendix B.

ANNUAL REPORTS upon DISTRICT and MINOR MODEL SCHOOLS.

Reports upon District and Minor Model Schools.

The Commissioners, while publishing the Reports of their Inspectors upon the District and Minor Model Schools, desire it to be distinctly understood that they do not hold themselves responsible for the opinions expressed in those Reports, nor do they feel called upon to adopt any suggestions they may contain.

No. 1.—ANNUAL REPORT of M. FITZGERALD, Esq., Head Inspector, and E. SHEEHY, Esq., District Inspector, on the Examination of the WEST DUBLIN MODEL SCHOOLS, for the year 1868.

West Dublin.

Dublin, March, 1869.

GENTLEMEN,—We have the honour to submit, for the information of the Commissioners of National Education, the following Report of our Examination of the West Dublin Model Schools, for the year 1868.

The examination was held early in November, and extended over eight days; during which we were occupied for more than five hours each day, on an average, with the classes in the three departments of the school; four days being devoted to the boys, three to the girls, and one to the infants. There were on the rolls, at the time, 219 in the boys' school, 119 in the girls' school, and 126 in the infants' school; and of these we minutely examined 190 boys, 101 girls, and 79 infants, on every subject

Appendix B.

Reports upon District and Minor Model Schools.

West Dublin.

of the school course, as laid down in their respective programmes; every answer and miss being duly recorded on the marking sheets prepared for the purpose. It was absolutely necessary that we should be thus particular for two reasons; first, that we might be in a position to speak with authority on the state and progress of this important educational establishment; and, secondly, that we might have accurate data to guide us in awarding the premiums granted by the Commissioners; which, from the poverty of many, perhaps the majority of the pupils, are a subject of very keen competition in this school. In order more fully to attain these important objects, we divided the work of examination in the following manner:—one of us took each class in half the subjects, and we exchanged subjects in alternate classes. Thus, each of us examined every child individually in half of the business prepared; and half the school collectively in each branch of instruction. We can, therefore, speak jointly of the result of our examination with as much confidence as if each of us had examined the entire school; which we could scarcely do if we had divided the work upon any other principle. The particular teacher, in charge of each draft, was present with it while under examination, but was not allowed to interfere in any way; the questions being put and the answering marked entirely by ourselves. Programmes of the business in which the several classes were prepared for examination, were furnished to us by the principal teacher of each department, and we examined the classes with special reference to these programmes.

We have prepared, from the marking sheets, a series of tables exhibiting the results of our examination in the different branches. Each of these tables gives a summary view of the proficiency of the classes, in one department of the school, on some one subject taught there; and we append to each a brief analysis, showing in general terms the results indicated by the table. It is to be borne in mind, however, that the judgments of "good," "fair," &c., are relative as regards the classes. "Good," for instance, in the case of the reading of a boy in fourth class, and of another in third class, does not imply that the reading of the latter was equal to that of the former; it simply means that these two boys occupy corresponding positions in the scale of fourth and third class readers. And so, also, with the other subjects.

With regard to the standards which we adopted in determining the value of the pupils' answering, we desire to state that, in the subjects in which each answer and miss was recorded, we considered answering equal to sixty per cent. or above as "good;" from forty to sixty per cent., as "fair;" from twenty to forty per cent., as "middling;" and under twenty per cent., as "bad." In reading and penmanship, the standard of proficiency is sufficiently indicated by the terms employed; these subjects could not be measured in the same manner as the others.

It affords us much pleasure to state that the answering was, in general, of a satisfactory character; and that in only one branch—writing, in the girls' school—had we occasion to find fault. In some subjects, as will be seen from the tables, the proficiency was very high. We can further state that the school has improved during the year; and that the ordinary branches of a good primary education are efficiently taught. The school is situated in one of the very poorest localities in the city of Dublin; and the attendance is made up, in great measure, of children from its immediate neighbourhood. There are at present 505 pupils on the rolls, of whom 241 pay 2*s.* 6*d.* per quarter; and 264 only 1*s.* 1*d.* per quarter; not a single pupil in the school paying the higher rate of 5*s.* per quarter, which the teachers are permitted to charge if the parents are able to pay it. No free pupils are admitted; and the wisdom of requiring some payment, however small, is shown by the fact that the average attendance for last

week amounted to 442 pupils, or 87·5 per cent., out of a total of 505 pupils on rolls. This large and regular attendance proves how well the school is adapted to the wants of the locality; and how thoroughly its advantages are appreciated by those for whose benefit it was established. We attribute this success chiefly to the fact that the essential branches of primary instruction receive special attention, and that thus the education given is exactly adapted to the wants of those who attend the school; and to the further fact that the teachers, and especially the head master, exhibit a personal interest in the progress of the pupils, which has won largely the confidence of the parents. This is a branch of "school-keeping," which our teachers, especially in model schools, too often lose sight of. It was the secret of the success of the masters of the old "hedge" or "adventure" schools; and it would be well if their successors were to endeavour to imitate them in this respect. The National teacher, being paid in great measure by the State, is apt to forget that the parents have the largest stake in the progress made by their children; and he thus neglects to cultivate those feelings of parental interest and pride, which, if enlisted in his favour, would prove his most valuable auxiliaries. When teachers complain of the want of interest manifested by parents in not sending their children regularly to school, they should be asked to state what means they have themselves taken to awaken this interest; and it would generally be found that the fault is their own. It is not necessary that a teacher should degrade himself and his office by paying court to parents, or by pandering to their prejudices; all that is required is that he should let them see individually that he has the welfare of their children at heart, and that he desires their co-operation in securing it; that he is not a mere official discharging a routine duty for a stated salary, but an earnest fellow-worker, sympathizing with their struggles and their hopes, and anxious to do all in his power to promote the interests of their children. To such a teacher parents instinctively give their confidence; and were such more numerous the apathy and indifference of parents, of which we now hear so much, would largely disappear.

We now proceed to exhibit more in detail the results of our examination. The form of Table which we have chosen, is that we believe best adapted to show at a glance the proficiency of each class in each subject; and we have designedly omitted some points of interest which would have rendered the tables more complicated, without adding much to the fulness and clearness of the general result. We first give the classification and average age of the pupils examined.

TABLE showing the Classification and Average Age of the Pupils examined.

Class.	Boys.		Girls.		Infants.	
	Number examined.	Average age.	Number examined.	Average age.	Number examined.	Average age.
First,	21	9·4	–	–	57	6·3
Second,	108	10·5	32	10·0	22	7·3
Third,	32	11·4	34	11·1	–	–
Fourth,	29	12·6	28	12 3	–	–
Fifth,	–	–	7	14·3	–	–
Totals and averages,	190	10·9	101	11·3	79	6·5

In considering the following tables it must be borne in mind that every pupil present was examined, and that the answering of every pupil so examined is included in the tabulation. No selection or exclusion has been made; and thus the tables contain the answering of some pupils

Appendix B.

Reports upon District and Minor Model Schools.

West Dublin.

who attended very irregularly, and of others who had been but a short time at the school, though for neither of these classes should the teachers, strictly speaking, be held responsible.

MALE DEPARTMENT.

TABLE I.—Showing the Boys' proficiency in Reading.

Class.	Division.	Number examined.	Number whose Reading was			
			Good.	Fair.	Middling.	Bad.
IV.	First,	14	11	2	1	–
„	Second,	15	9	6	–	–
III.	First,	14	9	4	1	–
„	Second,	18	10	5	2	1
II.	First,	29	22	7	–	–
„	Second,	18	14	4	–	–
„	Third,	16	10	5	1	–
„	Fourth,	23	18	4	1	–
„	Fifth,	22	15	7	–	–
I.	First,	12	3	5	2	2
„	Second,	9	4	2	–	3
Totals,		190	125	51	8	6
Per-centages,		–	65·8	26·9	4·2	3·1

From this table it appears that of the 190 boys examined in reading, 21, or 11·1 per cent., were in First Book; 108, or 56·8 per cent., in Second; 32, or 16·8 per cent., in Third; and 29, or 15·3 per cent., in Fourth Book; in other words, nearly two-thirds were in the junior classes, and one-third in the senior classes. The reading of 65·8 per cent. was *good;* of 26·9, *fair;* of 4·2, *middling;* and of 3·1, *bad.* The style of reading in the different classes was in general plain, distinct, and fluent, and the pupils' pronunciation was correct. Considering that the model school is situated in one of the poorest parts of the city, and where the English language is not spoken in its purity, we regard the proficiency in reading as satisfactory.

TABLE II.—Showing the Boys' proficiency in Spelling and Explanation.

Class.	Division.	Number examined.	Number whose Spelling and Explanation were			
			Good.	Fair.	Middling.	Bad.
IV.	First,	14	11	3	–	–
„	Second,	15	9	3	3	–
III.	First,	14	12	1	1	–
„	Second,	19	10	7	1	1
II.	First,	29	11	12	4	2
„	Second,	18	12	6	–	–
„	Third,	16	8	1	3	4
„	Fourth,	23	11	8	3	1
„	Fifth,	22	3	9	3	7
I.	First,	12	1	1	5	5
„	Second,	9	5	2	–	2
Totals,		191	93	53	23	22
Per-centages,		–	48·5	27·7	12·	11·8

Comparing the per-centages of Table II. with those in Table I.; it is evident that the boys showed more proficiency in reading than in the cognate subjects of spelling and explanation.

TABLE III.—Showing the Boys' proficiency in Dictation.

Class.	Division.	Number examined.	Number whose Dictation was			
			Good.	Fair.	Middling.	Bad.
IV.	First,	14	11	2	–	1
„	Second,	15	12	3	–	–
III.	First,	14	14	–	–	–
„	Second,	19	16	3	–	–
Totals,		62	53	8	–	1
Per-centages,		–	85·5	13·	–	1·5

It is seen from Table III. that the boys of third and fourth classes, which are the only ones taught writing from dictation, are proficient in that important branch; as 85·5 per cent. of them acquitted themselves *well*, 13 per cent. *fairly*, and only 1·5 per cent. *badly*, although the exercises we gave them were rather difficult: those in third class, for instance, were got to write from dictation a paragraph of eighty-seven words taken from Third Book. For every mistake the pupils made as regards spelling, capital letters, and omissions of words, half a mark was deducted from the ten marks we assigned to dictation.

TABLE IV.—Showing the Boys' proficiency in Writing.

Class.	Division.	Number examined.	Number whose Writing was			
			Good.	Fair.	Middling.	Bad.
IV.	First,	14	11	2	1	–
„	Second,	15	10	5	–	–
III.	First,	14	9	5	–	–
„	Second,	19	9	10	–	–
II.	First,	29	13	13	3	–
„	Second,	18	15	3	–	–
„	Third,	14	7	7	–	–
„	Fourth,	21	14	4	3	–
„	Fifth,	21	1	9	11	–
I.	First,	12	–	4	8	–
„	Second,	–	–	–	–	–
Totals,		177	89	62	26	–
Per-centages,		–	50·3	35·	14·7	–

Of the 177 boys whose writing on paper we examined, 89, or one-half, exhibited specimens of good penmanship; 62, or over one-third, showed specimens of fair writing; and the remaining 26, or less than one-sixth of the whole, had specimens of middling or indifferent penmanship to show. The pupils write a round, even, and legible hand, which they have ac-

Appendix B. Reports upon District and Minor Model Schools.

quired from copying the head-lines in their papers, under the close supervision of the teachers and monitors. We dare say that the proficiency of the boys in this important branch has contributed to the popularity of the male department of the model schools, as the parents of the pupils are better able to appreciate good writing than good reading, or good answering on grammar, geography, or arithmetic.

West Dublin.

TABLE V.—Showing the Boys' proficiency in Arithmetic.

Class.	Division.	Number examined.	Number whose Arithmetic was			
			Good.	Fair.	Middling.	Bad.
IV.	First,	14	6	4	2	2
"	Second,	15	4	11	–	–
III.	First,	14	14	–	–	–
"	Second,	19	17	2	–	–
II.	First,	29	26	3	–	–
"	Second,	18	17	1	–	–
"	Third,	14	13	1	–	–
"	Fourth,	23	15	3	1	4
"	Fifth,	21	13	1	5	2
I.	First,	12	3	2	4	3
"	Second,	8	1	1	5	1
Total,		187	129	29	17	12
Per-centages,		–	69·	15·6	9·	6·4

This table exhibits the proficiency of first class in addition tables, of second in multiplication tables and simple rules, of third class and second draft of fourth in simple and compound rules, and of senior draft of fourth in simple and compound rules, and also in proportion, fractions, and decimals. The second draft of fourth class answered middlingly on the theory of the rules gone over, and the senior draft fairly on the theory of fractions and proportion.

TABLE VI.—Showing the Boys' proficiency in Grammar.

Class.	Division.	Number examined.	Number whose proficiency in Grammar was for grade			
			Good.	Fair.	Middling.	Bad.
IV.	First,	14	3	3	7	1
"	Second,	15	5	4	6	–
III.	First,	14	9	–	5	–
"	Second,	18	4	3	7	4
II.	First,	29	9	12	6	2
"	Second,	18	4	5	7	2
"	Third,	16	15	1	–	–
"	Fourth,					
"	Fifth,					
I.	First,		Grammar was not taught to these drafts.			
"	Second,					
Totals,		124	49	28	38	9
Per-centages,		–	39·5	22·6	30·6	7·3

Appendix B.

Reports upon District and Minor Model Schools.

West Dublin.

Adhering to the programme for National Schools, we examined the senior drafts on the article, noun, and adjective, by getting them to define these three parts of speech, and to point them out in their reading lessons. We examined third class on simple parsing, and fourth class on syntactical parsing and portions of the text-book. The third draft of second class appears to have done better than the first, and the second draft of fourth better than the first draft. We are of the opinion that this branch of instruction is best taught by frequent practice in parsing, accompanied by definitions of the parts of speech and their accidents, and by repetitions of the rules of syntax.

TABLE VII.—Showing the Boys' proficiency in Geography.

Class.	Division.	Number examined.	Number whose answering in Geography was			
			Good.	Fair.	Middling.	Bad.
IV.	First,	14	–	7	4	3
„	Second,	15	6	2	3	4
III.	First,	14	7	4	3	–
„	Second,	18	11	–	5	2
II.	First,	29	17	7	3	2
„	Second,	18	5	5	6	2
„	Third,	14	3	4	5	2
„	Fourth,	21	2	3	9	7
„	Fifth,	21	14	3	3	1
I.	First,	Geography was not taught to First Class.				
„	Second,					
Totals,		164	65	35	41	23
Per-centages,		–	39·7	21·3	25·	14·

Second class boys were questioned by us on the geographical definitions, and were asked to point out on the map of the world the leading divisions of land and water. Third class boys were examined on the map and geography of Ireland, and fourth class on the maps and geography of the British Isles and Europe. The boys in head draft of fourth class were examined on mathematical geography besides, but did not answer as well on it as on local geography; and hence it is that the marks for that draft are lower than for the second draft.

TABLE VIII.—Showing the proficiency of the Senior Draft of Fourth Class in Book-keeping.

		Per cent.
Class IV., Senior Division, number examined,	14	–
Number whose answering on Book-keeping was good,	5	35·7
„ „ fair,	5	35·7
„ „ middling,	1	7·2
„ „ bad,	3	21·4

The portions of the book-keeping on which the boys in senior draft of fourth class were questioned were the definitions and cash, wine, personal, balance, and profit and loss accounts.

Appendix B. Reports upon District and Minor Model Schools.

TABLE IX.—Shows the proficiency of the Senior Draft of Fourth Class in Mensuration.

		Per cent.
Class IV., Senior Division, number examined,	14	–
Number whose proficiency in Mensuration was good,	9	64·3
" " fair,	2	14·3
" " middling,	–	–
" " bad,	3	21·4

West Dublin. The examination on mensuration consisted of questioning on the definitions of rectilinear figures and of requiring the pupils to find the areas of triangular and quadrangular figures. The proficiency evinced by the boys in this branch is greater than what they had shown in book-keeping. This arises from the latter being less attractive than the former to boys as well as to teachers. Both branches are carefully explained, and are illustrated by examples on the black-board.

FEMALE DEPARTMENT.

TABLE I.—Proficiency of Girls in Reading.

Class.	Draft.	Number examined.	Good.	Fair.	Middling.	Bad.
V.	First,	7	6	1	–	–
IV.	First,	13	10	3	–	–
"	Second,	15	7	8	–	–
III.	First,	6	1	2	2	1
"	Second,	15	8	5	2	–
"	Third,	13	9	4	–	–
II.	First,	15	4	8	3	–
"	Second,	9	8	1	–	–
"	Third,	8	4	3	1	–
Totals,		101	57	35	8	1
Per-centages,		–	56·4	34·7	7·9	1·0

This table indicates a high standard of proficiency in reading. More than half the number examined read well, and more than three-fourths of the remainder fairly, the number of middling or bad readers being only nine out of 101. In the senior classes the reading was fluent, intelligent, and marked by a fair amount of expression; in the junior classes it was correct, and with due attention to the stops. We consider that this branch is effectively taught.

TABLE II.—Proficiency of Girls in Spelling, Explanation, &c.

Class.	Draft.	Number examined.	Good.	Fair.	Middling.	Bad.
V.	First,	7	5	2	–	–
IV.	First,	13	7	3	3	–
"	Second,	15	5	2	5	3
III.	First,	6	2	2	2	–
"	Second,	15	7	3	3	2
"	Third,	13	4	8	1	–
II.	First,	15	6	6	1	2
"	Second,	9	3	4	1	1
"	Third,	8	3	5	–	–
Totals,		101	42	35	16	8
Per-centages,		–	41·6	34·7	15·8	7·9

The proficiency in spelling, &c., was not as high as in reading. The examination included not only the spelling of single words, but in every class above the lowest draft of third embraced a portion of the Spelling Book Superseded. If the spelling had been tabulated separately, the results would have been higher; but being coupled with explanations, and, in the senior classes, with derivations, the joint results do not indicate so high a degree of proficiency. Explanation, whether of words or phrases, is the branch least efficiently taught, and in most cases least attended to in primary schools.

Appendix B.
Reports upon District and Minor Model Schools.
West Dublin.

TABLE III.—Proficiency of Girls in Writing from Dictation.

Class.	Draft.	Number examined.	Good.	Fair.	Middling.	Bad.
V.	First, . . .	7	6	1	–	–
IV.	First, . . .	12	11	–	1	–
„	Second, . .	14	6	5	3	–
III.	First, . . .	6	6	–	–	–
„	Second, . .	15	8	2	2	3
„	Third, . . .	13	10	1	1	1
II.	First, . . .	Not examined in this branch.				
„	Second, . .					
„	Third, . . .					
Totals, . . .		67	47	9	7	4
Per-centages, . .		–	70·1	13·4	10·5	6·0

Writing from dictation is taught with considerable success. The fourth and fifth classes were required to write more than half a page of a difficult lesson in the new Fourth Book, and the third class a long passage from their own lesson book. The comparatively low proficiency of the second draft of fourth class may be accounted for by the fact that ten of the fourteen examined had been little more than four months, including the summer vacation, in the class, having been promoted from third class on the 20th of June preceding.

TABLE IV.—Proficiency of Girls in Writing.

Class.	Draft.	Number examined.	Good.	Fair.	Middling.	Bad.

IV.	First, . . .	13	4	8	1	–
„	Second, . .	15	–	6	9	–
III.	First, . . .	6	1	4	1	–
„	Second, . .	15	2	9	4	–
„	Third, . . .	13	1	5	7	–
II.	First, . . .	15	–	5	10	–
„	Second, . .	9	–	2	7	–
„	Third, . . .	8	–	5	3	–
Totals, . . .		101	10	48	43	–
Per-centages, . .		–	9·9	47·5	42·6	–

This is the only branch of instruction in the girls' school with which we had to find fault. Only ten girls out of 101, or one-tenth of the

Appendix B.

Reports upon District and Minor Model Schools.

West Dublin.

whole, could be classed as writing well for their respective classes, and little more than half the remainder as able to write fairly. This is the more strange as the head mistress writes a very superior hand. We may add, however, that, since we called attention to the defective style of the writing, there has been considerable improvement in this important branch.

TABLE V.—Proficiency of Girls in Arithmetic.

Class.	Draft.	Number examined.	Good.	Fair.	Middling.	Bad.

II.	First,	15	8	3	2	2
„	Second,	9	3	–	4	2
„	Third,	8	4	1	1	2
Totals,		99	45	29	12	13
Per-centages,		–	45·5	29·3	12·1	13·1

Our examination in arithmetic was of a very searching character. We gave difficult sums in each rule to be worked on slates, and we examined the senior classes on the reasons of the rules and theory of proportion, and the junior classes in the more useful tables. The course in the fifth class included compound proportion, practice, interest, and vulgar and decimal fractions; in the fourth class simple proportion; in the third class all the compound rules, and in the second all the simple rules. The proficiency, as shown by the table, was satisfactory, fully three-fourths of those examined having acquitted themselves creditably.

TABLE VI.—Proficiency of Girls in Grammar.

Class.	Draft.	Number examined.	Good.	Fair.	Middling.	Bad.
V.	First,	7	4	2	1	–
IV.	First,	13	3	7	2	1
„	Second,	15	7	2	5	1
III.	First,	6	4	2	–	–
„	Second,	15	10	2	3	–
„	Third,	13	–	1	8	4
II.	First,	15	10	4	1	–
„	Second,	9	5	4	–	–
„	Third,	–	Not	learning	Grammar.	
Totals,		93	43	24	20	6
Per-centages,		–	46·2	25·8	21·5	6·5

In grammar the fifth and fourth classes were examined in syntactical parsing, and the third class and second were required to point out and define the parts of speech. The fifth and fourth classes, and two drafts of third, were also examined on the text-book.

In general we found the classes very fairly prepared, the only serious deficiency being in the lowest draft of third class. The teachers explained that very little time was allowed for grammar in this draft, as the pupils in it required special attention in reading and spelling.

TABLE VII.—Proficiency of Girls in Geography.

Class.	Draft.	Number examined.	Good.	Fair.	Middling.	Bad.
V.	First,	7	6	1	–	–
IV.	First,	13	3	3	6	1
„	Second,	15	6	3	4	2
III.	First,	6	4	1	1	–
„	Second,	15	6	1	6	2
„	Third,	13	5	1	6	1
II.	First,	15	10	2	3	–
„	Second,	9	1	2	4	2
„	Third,	8	4	2	1	1
Totals,		101	45	16	31	9
Per-centages,		–	44·6	15·8	30·7	8·9

The fifth class and senior draft of fourth were examined in mathematical and local geography. The former answered well on both branches of the subject; the latter failed in mathematical geography. The third class was examined on the maps of the world and Europe, with a portion of the Text Book referring to Ireland; and the second class on the map of the world. The general proficiency was fairly satisfactory, the good or fair answers amounting to 60 per cent. of the whole. The fifth class, and the first drafts of third and second, were the best prepared.

It is not without some hesitation that we give tables showing the proficiency in the infants' school; but, as we examined twenty-two of them in the second class, we think it only fair to the teachers to place on record the answering of these children, who acquitted themselves very creditably. The average age of these twenty-two children was 7·3 years, none of them being quite 8 years old. They were examined individually, as in the case of the boys' and girls' schools, and their answering recorded in the same manner. We subjoin tables showing the results of our examination under the four most important heads.

INFANT DEPARTMENT.

TABLE I.—Proficiency of Infants in Reading.

Class.	Draft.	Number examined.	Good.	Fair.	Middling.	Bad.
II.	First,	11	11	–	–	–
„	Second,	11	6	3	2	–
Totals,		22	17	3	2	–
Per-centages,		–	77·3	13·7	9·0	–

The first draft had read to page 122 of the Second Book; the second draft to page 62, within these limits both drafts acquitted themselves satisfactorily. All in first draft and more than half of second read well—that is correctly and distinctly, and with due attention to the pauses; more than half the remainder read fairly; and only two fell below this standard.

Appendix B.

Reports upon District and Minor Model Schools.

West Dublin.

TABLE II.—Proficiency of Infants in Spelling.

Class.	Draft.	Number examined.	Good.	Fair.	Middling.	Bad.
II.	First,	11	9	2	–	–
„	Second,	11	7	3	1	–
Totals,		22	16	5	1	–
Per-centages,		–	72·7	22·7	4·6	–

The examination in spelling extended over the lessons in Second Book which each draft had read, the senior draft to page 122, the junior to page 62. The proficiency in this branch was highly satisfactory.

TABLE III.—Proficiency of Infants in Writing.

Class.	Draft.	Number examined.	Good.	Fair.	Middling.	Bad.
II.	First,	11	2	5	4	–
„	Second,	9	3	3	3	–
Totals,		20	5	8	7	–
Per-centages,		–	25·0	40·0	35·0	–

Children under eight years of age could not be expected to exhibit a high order of proficiency in penmanship; but, on the whole, these had made quite as much progress as could be expected from them.

TABLE IV.—Proficiency of Infants in Arithmetic and Tables.

Class.	Draft.	Number examined.	Good.	Fair.	Middling.	Bad.
II.	First,	11	8	2	–	1
„	Second,	11	6	1	2	2
Totals,		22	14	3	2	3
Per-centages,		–	63·7	13·6	9·1	13·6

The tests applied in arithmetic were rather severe, considering the age of the children. Both drafts were examined in numeration and notation, the senior draft to six, and the junior to five places of figures—in simple addition of seven and five addends respectively—in simple subtraction, of which "take 143 from 609," for junior draft, and "take 8,760 from 76,047" for senior, may be regarded as typical exercises; and the senior draft was examined in simple multiplication. Both drafts were examined on the addition and multiplication tables. Over three-fourths of the entire number examined exhibited a satisfactory amount of proficiency.

The second class pupils in the infant school were also examined in grammar, viz., pointing out and defining the parts of speech; and geography, on the maps of the World and Ireland. The majority were well, or fairly prepared in both branches, but we do not consider it necessary to give the tabulations. Neither do we think it would be of any use or interest to give the tabulated results of our examination of first class; in four drafts of which, containing 57 children, we recorded the proficiency.

Under the head of "extra branches," instruction is given in the boys' and girls' schools in vocal music and linear drawing. These subjects are taught by professors who attend specially for the purpose, on stated days of the week. These gentlemen are not exclusively attached to this model school, but attend at other National schools in the city. Their labours have been rewarded with a fair amount of success in this school.

West Dublin.

Until recently physical science was taught by one of the assistant masters to the senior boys; but it was found that the subject did not possess any attractions for them. Almost all the pupils belong to the manual labour, or the petty dealer class; and leave school at an early age. To obtain such an education as will fit them to become apprentices to mechanics, or to obtain employment as messengers is all they desire. They paid no attention, therefore, to the lessons on physical science; and in the course of the past year, it was considered advisable to discontinue the teaching of it. The extra branch most sought after by the boys is mensuration; and this as a preparation for the apprenticeships above referred to.

The girls receive instruction in plain and fancy needlework, knitting, &c., from the workmistress, who attends every day. Their progress in this essential branch of female education is satisfactory. The specimens of plain work, executed for the premiums, were creditably done; and there were also several pieces of fancy work, of every kind, exhibited. These had been done by the girls during the preceding year, and several of them exhibited considerable merit.

We have now laid before the Commissioners a detailed statement of the progress and proficiency of the pupils in this important school, one of the most important under their immediate management. Though from its backward situation, and other causes, it is less showy, and attracts less public notice than other model schools, it performs its task not the less efficiently. It attracts within its walls a large attendance of the class of children for whose special benefit the machinery of public education primarily exists; and it affords them sound instruction in the branches of knowledge best adapted to their wants. We do not know of any model school which more thoroughly realizes the ideal of an efficient primary school.

It is not customary to hold a public examination in this, as is done in other model schools; but we attended on Saturday, 14th of November, and distributed the premiums granted by the Commissioners, to the pupils who had answered best at our examination.

These schools were visited on the 14th August last, by S. N. Stokes, esq., one of Her Majesty's Inspectors of schools, and a member of the Royal Commission on Primary Education in Ireland, accompanied by Mr. King, Assistant Commissioner. They remained for about four hours, and examined classes in each department. There were present on this day 144 boys, 78 girls, and 118 infants, total, 340. Mr. Stokes had previously visited the school, one afternoon during the summer vacation, in company with Rev. B. M. Cowie, also one of Her Majesty's Inspectors, and a member of the Royal Commission, on which occasion they inspected the school buildings and premises.

We have the honour to be, gentlemen, your obedient servants,

M. FitzGerald, Head Inspector.
Edward Sheehy, District Inspector.

The Secretaries, &c., &c.

Appendix B.

Reports upon District and Minor Model Schools.

Trim.

No. 2.—Annual Report of M. FitzGerald, Esq., Head Inspector, and E. A. Conwell, Esq., District Inspector, on the Examination of the Trim District Model School, for the year 1868.

Trim, 5th March, 1869.

Gentlemen,—We have the honour to state, for the information of the Commissioners of National Education, that the examination of the Trim District Model School for 1868 was held in the month of December last, commencing on the 21st, and ending on the 24th of that month. The time occupied in the preliminary examination was less than usual, owing to the great decrease in the attendance in the female and infant departments, consequent on the opening of the convent school in Trim. This school, which had been for a considerable time in preparation was opened on the 25th of May, under the special patronage of the Roman Catholic bishop and clergy of the town, who used every means to withdraw the pupils of that persuasion from the model schools, and with such success that, within a few weeks, scarcely any were left in the girls' and infants' schools. The great majority of the pupils being Roman Catholics, their removal left those departments comparatively empty; and at the time of the examination there were only twenty girls and thirty-two infants on the rolls.

We examined all the pupils present in every branch of their school course, with one or two trifling exceptions; and in every case recorded the answering on sheets prepared for the purpose. In order that we might be able to judge individually of the proficiency in every class and in every subject, each of us examined each class in half of the subjects which they had learned, and we exchanged subjects in every alternate class. Thus, if one of us examined the fifth class in reading, spelling, grammar and geography, he examined the fourth class in arithmetic, writing and dictation, and *vice versa*. Thus, we made a joint examination in the true sense of the word; every class and every subject passed in review before each of us; and we are consequently enabled to speak with more confidence of the state of the school, than if we had divided the work upon any other basis, if, for instance, one of us had taken the senior classes, and another the junior, or if one had taken one set of subjects in all classes, and another the remaining subjects. Another advantage resulting from this mode of division of labour was, that the premiums were granted upon the joint award of us both, and all possible suspicion of favouritism, or the reverse, avoided. We have reason to know that, in this respect, the results were eminently satisfactory. The best pupils in every case succeeded in carrying off the prizes; and even those who were unsuccessful were obliged to admit the perfect fairness and justice of the awards.

For the reason already stated we were chiefly occupied, during the three days devoted to the preliminary examination, with the classes in the boys' school. The numbers on the roll at the time of the examination were—

First Class,	13 or 10·6	per cent.
Second Class,	55 or 44·7	„
Third Class,	23 or 18·7	„
Fourth Class,	22 or 17·9	„
Fifth Class,	10 or 8·1	„
	123	

Of this number, eighty-four, or little more than two-thirds, presented themselves for examination. No special reason can be assigned for the

comparatively large number of absentees, beyond the inclement season of the year at which the examination was held, and the fact that many of them lived at some miles' distance from the model school.

The pupils present and examined were classed as follows :—

First Class,	5
Second Class,	39
Third Class,	15
Fourth Class,	17
Fifth Class,	8
	84

Each class was thus fairly represented; and we had ample means of judging of the state and progress of the school.

We are happy to be able to say generally, that the answering at this examination was superior to that in 1867, in some respects much superior, and that the essential branches of primary education are now efficiently taught. The following tables which we have prepared from the marking sheets used at the examination, show the proficiency under seven different heads, exclusive of extra branches, for every class examined. In compiling them we have adopted the following standard for the subjects in which each answer or miss was recorded, that is, for all the subjects except reading and penmanship. We considered sixty per cent. and above to be "good" answering; forty per cent. and under sixty per cent. we ranked as "fair;" twenty per cent and under forty per cent. as "middling," and under twenty per cent. as "bad." In reading and writing we adopted the standards indicated by the terms employed. All through our examinations we were guided by the programme for each class, furnished to us by the teachers, and which represented the nature and extent of the business in which the pupils were prepared for examination. It would swell this report unnecessarily to insert these programmes; but we may say that, as a rule, they are higher than the ordinary official programme for National schools. It may not be amiss to add that each class is judged with reference to its own programme, and that the per-centages at foot of each table do not imply absolute excellence in the subject to which the table refers, but that amount of proficiency required for each class by the programme.

The average age of the pupils examined was as follows :—

First Class,	7·8 years	11·0 years.
Second Class,	9·9 „	
Third Class,	11·3 „	
Fourth Class,	12·8 „	
Fifth Class,	14·3 „	

TABLE I.—Boys' School.—Reading.

Class.	Draft.	Number examined.	Good.	Fair.	Middling.	Bad.
V.	First,	8	5	2	1	–
IV.	First,	17	14	3	–	–
III.	First,	15	8	6	1	–
II.	First,	18	16	1	1	–
„	Second,	7	6	1	–	–
„	Third,	14	9	5	–	–
I.	First,	5	4	1	–	–
Totals,		84	62	19	3	–
Per-centages,		–	73·8	22·6	3·6	–

Appendix B.
Reports upon District and Minor Model Schools.
Trim.

The proficiency in reading, indicated by this table, is highly satisfactory. It shows that three-fourths of those examined acquitted themselves well, while not quite four per cent. could be considered as not having made fair progress in this essential art. Bearing in mind the fact stated in the report on this school for 1867, that the social position of many of the pupils is below that usually met with in model schools, the high proficiency in reading is the more creditable and gratifying.

TABLE II.—Boys' School.—Spelling and Explanation.

Class.	Draft.	Number examined.	Good.	Fair.	Middling.	Bad.
V.	First,	8	4	4	–	–
IV.	First,	17	4	3	7	3
III.	First,	15	2	3	5	5
II.	First,	18	8	5	2	3
„	Second,	7	6	1	–	–
„	Third,	14	1	4	6	3
I.	First,	5	5	–	–	–
	Totals,	84	30	20	20	14
	Per-centages,	–	35·7	23·8	23·8	16·7

The proficiency in spelling and explanation, though fair on the whole, is not as good as in reading, nor as might be expected. About sixty per cent. of those examined, or six out of every ten, acquitted themselves well or fairly; but the remainder failed to exhibit the required proficiency, and nearly seventeen per cent. were badly prepared.

TABLE III.—Boys' School.—Grammar.

Class.	Draft.	Number examined.	Good.	Fair.	Middling.	Bad.
V.	First,	8	3	2	3	–
IV.	First,	17	7	4	4	2
III.	First,	15	1	8	6	–
II.	First,	18	9	3	5	1
„	Second,	7	1	4	2	–
„	Third,	14	3	5	3	3
I.	First,	First Class not examined in Grammar.				
	Totals,	79	24	26	23	6
	Per-centages,	–	30·4	32·9	29·1	7·6

This table exhibits a very fair amount of proficiency in grammar; 63 per cent. of those examined having acquitted themselves more or less creditably. The fourth and fifth classes were examined in syntactical parsing, and the third and first draft of second class were required to point out and define all the parts of speech. In addition, all above the second class were examined on the portions of the text-book they had learned, including the rules of syntax.

TABLE IV.—Boys' School.—Geography.

Class.	Draft.	Number examined.	Good.	Fair.	Middling.	Bad.
V.	First, . . .	8	3	2	3	–
IV.	First, . . .	Not examined in Geography.				
III.	First, . . .	15	4	4	3	4
II.	First, . . .	15	6	5	–	4
,,	Second, . .	8	8	6	2	–
,,	Third, . . .	15	4	3	6	2
I.	First, . . .	Answering not tabulated.				
Totals, . .		61	23	16	12	10
Per-centages, . .		–	37·7	26·2	19·7	16·4

The course of instruction in geography extended from a knowledge of the leading features of the maps of the world and Europe in the junior drafts of second class, to a rather extended course, including the elements of mathematical and physical geography, in the fifth class. By an oversight the fourth class pupils were not examined in this branch; hence the table is somewhat imperfect; but, on the whole, the proficiency in geography may be characterized as fair; and is, perhaps, as high as is necessary or desirable in a primary school.

TABLE V.—Boys' School.—Arithmetic.

Class.	Draft.	Number examined.	Good.	Fair.	Middling.	Bad.
V.	First, . . .	8	6	1	1	–
IV.	First, . . .	17	9	3	3	2
III.	First, . . .	15	4	9	2	–
II.	First, . . .	15	11	2	2	–
,,	Second, . .	8	–	5	3	–
,,	Third, . . .	15	4	2	5	4
I.	First, . . .	Answering not tabulated.				
Totals, . . .		78	34	22	16	6
Per-centages, . .		–	43·6	28·2	20·5	7·7

The foregoing table shows that arithmetic is carefully taught. The course of instruction includes, in the highest class, the ordinary commercial rules with vulgar and decimal fractions, involution, evolution, and the calculation of averages. The number who acquitted themselves more or less satisfactorily was nearly 72 per cent. or about three-fourths of the whole number examined; while only about 8 per cent., nearly all in the lowest draft of second class, could be considered positively bad. Mental arithmetic receives due attention.

It is scarcely necessary to offer any remark on the following table. It shows a highly creditable state of proficiency in this most important branch, one-third of the whole being able to write well in their respective classes, and the remaining two-thirds fairly. The fact that none appear under the headings "middling" or "bad" is the best proof of the care and attention bestowed on the penmanship of the pupils.

Appendix B.

Reports upon District and Minor Model Schools.

Trim.

TABLE VI.—Boys' School.—Penmanship.

Class.	Draft.	Number examined.	Good.	Fair.	Middling.	Bad.
V.	First, . . .	8	6	2	–	–
IV.	First, . . .	17	7	10	–	–
III.	First, . . .	15	2	13	–	–

„	Second, . .	8	2	6	–	–
„	Third, . . .	13	2	11	–	–
I.	First, . . .	Not examined.				
Totals, . . .		79	26	53		–
Per-centages, . .		–	32·1	67·9	–	–

TABLE VII.—Boys' School.—Writing from Dictation.

Class.	Draft.	Number examined.	Good.	Fair.	Middling.	Bad.
V.	First, . . .	8	5	1	1	1
IV.	First, . . .	17	4	5	6	2
III.	First, . . .	15	4	5	4	2
II.	First, . . .	The First and Second Classes do not write from Dictation.				
„	Second, . .					
„	Third, . . .					
I.	First, . . .					
Totals, . .		40	13	11	11	5
Per-centages, . .		–	32·5	27·5	27·5	12·5

This Table presents a very remarkable coincidence with the results obtained in oral spelling, &c., as shown in Table II. It appears from it that 60 per cent. acquitted themselves fairly or well, and that 40 per cent. fell below the required standard. We consider the proficiency as fair on the whole, but not as good as it should be. It is, however, much better than in 1867; and there is, perhaps, no branch in which we observed a more decided improvement since the examination of that year.

TABLE VIII.—Boys' School.—Extra Branches.

		Good.	Fair.	Middling.	Bad.
GEOMETRY AND MENSURATION,	No. examined, 6	3	2	1	–
	Per-centages,	50·0	33·3	16·7	–
ALGEBRA,	No. examined, 6	–	1	1	4
	Per-centages,	–	16·7	16·7	66·6
PHYSICAL SCIENCE,	No. examined, 6,	3	1	2	–
	Per-centages,	50·0	16·7	33·3	–

The instruction in extra branches is confined to the fourth and fifth classes. Of these we examined only the senior division, consisting entirely of boys in the fifth class. The proficiency in geometry and physical science was satisfactory; that in algebra but poor. The course in geometry was limited to the First Book of Euclid, with deducibles; that in mensuration to superficies as given in the Board's treatise on the subject.

The course in physical science included the elements of mechanics, hydrostatics, pneumatics, and optics; and instruction in these branches was given wholly outside the ordinary school-hours. There is a large class attending the head master's lectures on physiology and physical geography, under the Science and Art Department; but this it did not come within our province to examine.

Instruction in linear drawing is given by the assistant master; and in vocal music by Mr. Goodwin, who attends periodically for the purpose; in both these branches a creditable degree of proficiency has been attained.

In the female school only fifteen girls presented themselves for examination. These were examined with the same care and minuteness as the boys, and we have the record of their answering before us; but we do not consider it necessary to embody it in a similar tabular form. No trustworthy inference could be drawn from tables based on such limited data—suffice it to say, that the general proficiency of the girls was fairly up to the required standard, and that we observed no defect deserving of notice.

In the infant department we examined twenty-three children, of both sexes, of whom eleven were on rolls of first class, and twelve in second class. The average age of all was only 5·2 years, no child in the school being above seven years old, while some were barely three years of age. Most of those in second class had been but recently promoted from first class, and had made but little progress in the business of the higher class. To expect a high degree of proficiency from such very young children would be unreasonable, and to require it would be injudicious. An infant school, properly so called, is a place for training infant children to habits of order and obedience, and for imparting the simplest elements of knowledge, by means of song and object lessons, rather than for formal instruction; and the most that should be expected is that while learning to read and spell easy lessons, the little ones will pick up such elementary information on other subjects as can be imparted by the means above referred to. However, more is generally attempted, and this school is no exception to the general rule. It could serve no useful purpose to exhibit in detail the answering of such very young children as those we examined, and we shall content ourselves with stating that, except in point of numbers, the infant school shows no falling off from the standard it has so long maintained.

The public examination was held on Thursday, the 24th of December, and was of an interesting character; but owing to the inclemency of the weather the attendance was very limited. After the examination, the premiums were distributed to the successful competitors; and the proceedings were brought to a close by a pleasing selection of vocal music, effectively rendered by the singing class under Mr. Goodwin.

On the 3rd of September this model school was visited by two of Her Majesty's Inspectors of Schools, the Rev. B. M. Cowie and S. N. Stokes, esq., both members of the Royal Commission on Primary Education in Ireland. They were accompanied by Mr. Harvey, Assistant Commissioner. They remained about three hours in the establishment, and examined the classes on some portions of the school course. There were present on the day of their visit ninety-two boys, fourteen girls, and nineteen infants.

We have the honour to be, gentlemen, your obedient servants,

M. FitzGerald, Head Inspector,
Eugene A. Conwell, District Inspector.

The Secretaries, &c., &c.

Appendix B. Reports upon District and Minor Model Schools.

No. 3.—ANNUAL REPORT for the year 1868, upon the LIMERICK DISTRICT MODEL SCHOOL, by JAMES PATTERSON, Esq., Head Inspector.

February, 1869.

Limerick.

GENTLEMEN,—The Limerick district model school continued for the ten years preceding 1868, under the charge of Mr. Sheridan, Head Inspector. The alteration in the grouping of the districts effected in February last, having transferred it to me, I have the honour now to furnish for the information of the Commissioners, my first annual report on this Institution.

The school-house, situated at the south end of the city of Limerick, is a handsome and very commodious building, and was kept in fair order during the year. The boarding establishment for the pupil-teachers is about two miles distant, at the model farm, affording the young men a healthful walk to and from school every day, and opportunity for witnessing a systematic course of agricultural operations.

This model school, having so long enjoyed the able superintendence of Mr. Sheridan, was, when I got charge of it, already organized in a very effective manner; and the teachers, one and all, laboured in the instruction of their pupils throughout the year with intelligence, industry and success. The District Inspector, Dr. Potterton, was ever at hand to direct and encourage them in the discharge of their duty; and to his unceasing and wise attention to the working of the school much of the estimation in which it is held by the public is undoubtedly due.

I.—The *staff of teachers* consisted of—

In BOYS' SCHOOL, . .	*Principal*, Mr. Edmond Downing, *Roman Catholic.*
	Assistant, Mr. John T. Brown, *Established Church.*
In GIRLS' SCHOOL, . .	*Principal*, Miss M. M. Campion, *Roman Catholic.*
	Assistant, Miss E. Weir, *Presbyterian.*
In INFANTS' SCHOOL, .	*Principal*, Miss W. Clarke, *Established Church.*
	Assistant, Miss E. Naughten, *Roman Catholic.*
Also,	*Teacher of Navigation, &c.*, Mr. P. Murray, *Roman Catholic.*
	Teacher of Vocal Music, Mr. C. Wötzell, *Roman Catholic.*

During the latter half of the year the Assistant Master, Mr. Brown, was incapacitated by illness from attending; his place was filled by Mr. G. Leetch, temporarily; and I have to bear testimony to the zealous interest that Mr. Leetch manifested in his work.

II.—*Pupil Teachers and Monitresses.*—Seven pupil-teachers and eight monitresses, young men and young women in training to become teachers, are the numbers allowed to this establishment; of these there are—

	Pupil teachers.	Monitors.
Of the Established Church and other Protestant denominations, ...	3	5
Roman Catholics, ...	4	4
	7	9

These practised teaching daily in the schools, and were also instructed daily in their programme of study by the teachers. The young men were examined with the teachers of the district as candidates for third class, and, according to the time they had been in training, acquitted themselves with more or less ability, but in all cases so as to give promise of becoming well-informed teachers. The monitresses were not examined *with* teachers, but were tried with similar questions, and in general answered well enough to entitle them to classification as teachers if they had presented themselves as such.

Appendix B.

Reports upon District and Minor Model Schools.

In the course of the year two pupil-teachers and two monitresses completed their period of training in this establishment, and, except one of the latter, were summoned for further training in the central establishment in Dublin. Two other pupil-teachers and one monitress resigned their places without having completed the course, and took other situations as teachers. None, during 1868, left this model school for other occupation than that of teaching.

Limerick.

III.—*The Attendance of Pupils* was somewhat less in 1868 than it had been in 1867. The difference was chiefly in Roman Catholic pupils, whose number was reduced through the renewed efforts of their clergy to keep them from the school. The average number on rolls, and the average daily attendance for the two years were—

	1867.		1868.	
	Average No. on Rolls.	Average daily Attendance.	Average No. on Rolls.	Average daily Attendance.
In Boys' School, .	153	116	137	100
In Girls' School, .	113	88	119	87
In Infants' School, .	124	93	110	82
Total, .	390	297	366	269

IV.—*Religious Denominations of Pupils.*—At the end of the year the numbers of pupils of the several religious denominations remaining on the rolls were—

Of the Established Church, . .	245,	or 72·2 per cent
Roman Catholics, . . .	37,	„ 10·9 „
Presbyterians, ...	25,	„ 7·5 „
Protestant Dissentors, . .	32,	„ 9·4 „
Total, ...	339	

These proportions varied very slightly during the year.

V.—*The Rates of Payment* made by these 339 pupils were—

5*s.* a quarter by	142	pupils, or	42 per cent.
2*s.* 6*d.* „	101	„	30 „
1*s.* 1*d.* „	96	„	28 „
Total, .	339		

The rates are regulated not by what the children learn, but by what the parents are supposed able to pay. I am sorry to observe a growing disposition on the part of parents to offer less than they ought to do for the instruction of their children, or than they would willingly give if they did not suppose the State support to the National schools is all, or nearly all, they should receive, and that the education given in them ought to be free, or nearly free, to all who choose to accept it. I mention this in my report on the Limerick model school, because here the feeling is manifested in a comparatively slight degree; it exists at least equally in regard to other model schools, and in a far greater degree is it practically exhibited in relation to the majority of the ordinary National schools that I have visited since my appointment as Head Inspector.

VI.—*Proficiency of the Scholars.*—A joint report has been furnished by the District Inspector (Dr. Potterton) and myself, on the annual examination of the pupils. It is to the credit of the teaching in this institution that the pupils who had received most of their education within its walls, acquitted themselves at the examination much better than those who had come to it more recently after attending other schools. Taking their ages into account, I was well satisfied with the proficiency attained by nearly all the pupils. The senior pupils in both the boys' and the girls' school answered remarkably well in all parts of their programme, and gained high marks for their written exercises. The junior classes in

Appendix B Reports upon District and Minor Model Schools.

Limerick.

those departments, containing many new-comers, seemed, although fairly proficient in reading and writing, to require a greater amount of instruction in other branches than they had yet received from the experienced teachers; for the pupil-teachers and monitresses, who had had most to do with their instruction, were not sufficiently advanced in their own studies to forward them much in intellectual learning. The progress made by the infants in reading, writing, knowledge of the maps, singing, easy calculation, &c., was quite satisfactory. Altogether, 319 pupils, a number fifty in excess of the average daily attendance, were examined in the three departments or schools. These were classed thus:—

	Boys.	Girls.	Infants.	Total.
Reading in First Book, . . .	8	14	77	99
„ Second Book, . . .	38	53	22	113
„ Third Book, . . .	39	27	–	66
„ Fourth Book, . . .	15	8	–	23
„ Fifth Book, . . .	16	2	–	18
	116	104	99	319

VII.—*Ages of the Pupils examined.*—Of these children—

72 were under Seven years of age.
175 were Seven, but under Twelve years of age.
72 were Twelve years of age, or upwards.

The average age of the boys was 11·5 years, of the girls 10·8 years, and of the infants 6·1 years.

I have the honour to remain, gentlemen, your obedient servant,

JAMES PATTERSON, Head Inspector.

The Secretaries, &c., &c.

APPENDIX to REPORT upon LIMERICK DISTRICT MODEL SCHOOL for year 1868.

JOINT REPORT upon the ANNUAL EXAMINATION of the PUPILS of the LIMERICK DISTRICT MODEL SCHOOL, for the year 1868, by JAMES PATTERSON, Esq., Head Inspector, and ROBERT POTTERTON, Esq., District Inspector.

GENTLEMEN,—We beg to submit, for the information of the Commissioners, this our joint report on the annual examination of the pupils of the Limerick District Model Schools for the year 1868.

Prior to the "public day" of the examination in question, which fell on the 22nd May, we spent nearly a week in a searching, detailed, private examination of every class in each of the departments in their full courses, as indicated by the subjoined classification.

The general proficiency was, on the whole, fair; the boys, however, being in several cases rather behind in grammar, geography, and dictation; while the arithmetic, too, of both boys and girls might, save in the higher classes of boys, have been perhaps more exact. The fact that several of the more grown pupils were newcomers and backward should be taken into consideration. In geometry and physical science there was some good answering for their *ages*—only four being fifteen years old and upwards—and in drawing many well-deserved premiums were awarded to both boys and girls. As to the infants, their proficiency was quite as high in every respect as is desirable in the case of such young children.

The classification of the pupils examined by us, and the branches they were learning, were as follows:—

Subjects.	Boys.	Girls.	Infants.
Lesson Books:			
Book I.,	8	14	77
„ II.,	38	53	22
„ III.,	39	27	–
„ IV.,	15	8	–
„ V.,	16	2	–
Totals,	116	104	99
Grammar:			
Parts of Speech *only*,	60	43	22
Parsing and Syntax,	40	37	–
Derivations,	31	10	–
Composition,	24	10	–
Geography:			
Lessons on Maps *only*,	48	53	60
From Text-Books:			
Local,	20	27	–
Mathematical and Physical,	24	10	–
Arithmetic:			
Tables *only*,	8	14	70
Simple Rules,	43	55	22
Compound do.,	20	18	–

Subjects.	Boys.	Girls.	Infants.
Arithmetic—*continued.*			
Proportion,	20	10	–
Practice, Interest, &c.,	25	7	–
Mental,	31	10	–
Writing:			
On Slates *only*,	–	–	77
„ Paper,	116	104	22
From Dictation,	96	81	–
Branches for Females:			
Sewing,	–	104	–
Knitting,	–	18	–
Netting,	–	18	–
Embroidery,	–	18	–
Cutting-out,	–	37	–
Extra Branches:			
British Poets,	31	10	–
Mensuration,	31	–	–
Geometry,	31	–	–
Algebra,	16	–	–
Book-keeping,	31	–	–
Music (vocal),	86	84	–
Drawing,	116	104	–
Physical Science,	40	–	–

On the public day above referred to the attendance of visitors was immense throughout the entire examination—indeed quite in excess of all our powers of accommodation, large as they were—very many even failing to get tolerable standing room.

The actual business of examining was in great measure assigned to the several teachers (principals and assistants), and to some of both the monitorial and pupil-teachers' staff, and elicited the marked approval of the audience, as well in regard to the tact and method of the several examiners as to the answering of the various classes. Indeed the exhibition in both respects was highly creditable throughout. The reading and penmanship of the girls especially were recognised as of superior finish and excellence; while specimens of useful needlework were on view during the day in considerable quantity and variety, and were much admired.

The singing, too, of the pupils, as well in several beautiful solos as in their joint performances, was listened to with gratified attention, and was very warmly applauded.

The premiums were adjudicated and distributed in the usual way; and the decisions arrived at, after very great care, evidently reflected the general feeling and opinion of both pupils and teachers as regards the merits of the successful competitors.

As, in accordance with the "Board's Order," an opportunity was not afforded at the examination for any public expression of opinion, we have only to add that the interest taken by all in the day's proceedings, and the remarks made privately to us by many individuals showed the general feeling to be that the model school reflects credit on the intention of the Commissioners by the good it directly effects, and by the example it affords of what might be done elsewhere in the education of the people.

We are, gentlemen, your obedient servants,

JAMES PATTERSON, Head Inspector.
R. POTTERTON, District Inspector.

The Secretaries, &c., &c.

Appendix B.

Reports upon District and Minor Model Schools.

Galway.

No. 4. Annual Report for the year 1868 upon the Galway District Model School, by James Patterson, Esq., Head Inspector of National Schools.

Gentlemen,—The Galway District Model School came under my charge in February, 1868. The building is handsome, well situated, and commodious; and it and the ornamental grounds about it were kept in good order during the year. The head master, who, being resident, has charge of the house and grounds, and the other teachers in their own departments deserve credit for the care they have taken of the neatness of the place.

I.—*Staff of Teachers.*—At the beginning of the year the staff of teachers consisted of the following persons:—

Boys' School, . . .	*Principal*, Mr. Jeremiah Moylan, *Roman Catholic.*
	Assistant, Mr. Robert Clements, *Presbyterian.*
Girls' School, . .	*Principal*, Miss Mary Brady, *Roman Catholic.*
	Assistant, (place vacant).
Infants' School, . .	*Principal*, Mrs. J. M'Cullagh, *Established Church.*
	Assistant, Miss Mary O'Malley, *Roman Catholic.*
	Teacher of Vocal Music, Mr. J. J. O'Shanessy, *Established Church.*

In the course of the year Mr. Clements, assistant master, resigned, and Mr. John Morrison, Presbyterian, was appointed to succeed him. The vacant place of assistant teacher in the girls' school was also filled by the appointment of Miss Julia Greer, a member of the Established Church. All the teachers have exhibited much earnestness in the discharge of their duties.

II.—*Pupil Teachers and Monitresses.*—In this, as in the other model schools, a certain number of young men and young women, whose object is to become teachers, undergo as pupil-teachers and monitresses a course of training to prepare them for conducting National schools. Most of them having completed their term here, are received for a further course into the central training establishment, Dublin, after which they prove to be skilful and successful teachers. The normal numbers in the Galway Model School are six pupil-teachers and five monitresses; at the end of the year all the places were filled, four of the pupil-teachers and three monitresses being Roman Catholics, and two pupil-teachers and two monitresses Protestants. As places fall vacant they are filled by the appointment of new candidates; seven pupil-teachers and two monitresses were thus appointed during the year—one place being filled twice. The application to business, and the general conduct of these young people was, with scarcely any exception, satisfactory. The pupil-teachers in office when the male teachers of National schools in the district were examined were examined along with them. Only three of them had served for more than three months as pupil-teachers in this or any other model school; and these three might from their answering have been classed as teachers in the higher division of third class. Of the probationary teachers, on the other hand, who had been preferred by the managers of their schools because they had *not* been trained in a model school, and who were given the same questions to answer, three had to be dismissed for utter incompetency, five were almost as illiterate as those three, but were retained another year on trial, and five barely succeeded in obtaining places in the lowest division of the lowest class. Not one, even of the teachers already placed in the third class and seeking promotion in it, acquitted himself as well at the examination as those three pupil-teachers did upon the same questions. The result of the examination of the monitresses showed that they also were

being well prepared for the office of teacher, the lowest score obtained by any of them, for her written and oral answering combined, being 57 per cent., which, if she had belonged to an ordinary National school, or to a Convent National school, would have entitled her teacher to a gratuity, whereas many of the monitresses examined with them failed to gain any gratuity for their teachers, and some even incurred for themselves and for their teachers the censure of the Board on account of the ignorance they displayed. Six pupil-teachers and two monitresses left the institution in 1868; two of the former and one of the latter for a further course of training in Dublin; three pupil-teachers to take charge of schools; and the other pupil-teacher and monitress gave as their reason for leaving the directions of their spiritual teachers.

III.—*The Attendance of Pupils* during 1868 was, as exactly as possible, equal to that in 1867. The average number on rolls, and the average daily attendance in the two years were—

	1867.		1868.	
	Average No on Rolls.	Average Daily Attendance.	Average No. on Rolls.	Average Daily Attendance.
In Boys' School,	81	62	81	61
In Girls' School,	50	39	55	43
In Infants' School,	52	40	49	38
Total,	183	141	185	142

IV.—*Religious Denominations of Pupils.*—At the end of the year the numbers of pupils of the several religious denominations remaining on the rolls were—

Of the Established Church,	99,	or 51·6 per cent.
„ Roman Catholics,	37,	„ 19·3 „
„ Presbyterians,	38,	„ 19·8 „
„ Protestant Dissenters,	18,	„ 9·3 „
Total,	192	

At the end of 1867 the number of Roman Catholics on the rolls was 56, or 29·6 per cent. of all the pupils.

V.—*The Fees paid* by the 192 pupils on the rolls at the close of the year were at the following *rates*:—

5*s.* a quarter by	76	pupils, or	39·6 per cent.
2*s.* 6*d.* „	71	„	37· „
1*s.* 1*d.* „	45	„	23·4 „
Total,	192		

The fees for the year amounted to £99 5*s.* 1*d.*; in 1867 the amount received was £96 11*s.* 8*d.*

VI.—*Proficiency of the Pupils.*—At the annual examination, a joint report on which has been furnished by the District Inspector and myself, 158 children were present, and were classed thus:—

	Boys.	Girls.	Infants.	Totals.
Reading in First Book,	2	–	27	29
„ Second „	7	17	16	40
„ Third „	32	15	–	47
„ Fourth „	13	6	–	19
„ Fifth „	17	6	–	23
Totals,	71	44	43	158

This classification of the boys was in many cases higher than the ages of the pupils clearly warranted, and, as the pupils had not thoroughly mastered the programme of the junior classes before being advanced to the senior, they had made less progress in these latter than should be

Appendix B.

Reports upon District and Minor Model Schools.

Galway.

expected from their standing in the books. The same error had not been committed in the girls' school; there the classification was very reasonable; and, in consequence, the scholars had made more satisfactory progress in some parts of their programme. In arithmetic, however, the girls were less expert than the boys, their attention to needlework having interfered with their practice in this branch. The reading and the penmanship of both boys and girls were good. I was disappointed with the boys' writing from dictation, and with their knowledge of grammar and geography, disappointed, because they were pupils at a model school; for in an ordinary National school I should have considered the proficiency fair for pupils of the same age. With the proficiency in the infant school I was well satisfied. The progress made in that department can never be great, for as soon as the children have attained the age of seven years and a half, they are drafted to the other departments.

VII.—*Ages of the Pupils examined.*—Of all the pupils examined—

31 were under seven years of age.
67 „ seven, but under twelve.
60 „ twelve years of age, or upwards.

The average age of the boys was 12·2 years, of the girls, 12·2 years, and of the infants, 6 years.

VIII.—*Religious Instruction.*—The clergymen of all the Protestant churches in Galway, Episcopal, Presbyterian, Wesleyan, attended during the year most sedulously to the religious instruction of the pupils belonging to their respective flocks, each coming once a week, or oftener, to conduct it personally; the Protestant teachers, under their direction, performing the duty on the other days of the week. The Roman Catholic children received religious instruction daily from the teachers professing the same creed, none of their pastors visiting the school. It was only for religious instruction, at the time set apart for it, that the children of the different creeds were ever separated.

IX.—In conclusion, I have to express the conviction that, if no unforeseen and untoward circumstances occur, the quality of the work done in this institution during the ensuing year will be eminently satisfactory. There is an efficient staff of teachers who appear to be most anxious to produce good results; and they have the advantage of the constant supervision and direction of the District Inspector, Mr. Gordon, a gentleman whose extensive scholarship, thoroughly practical mind, and large experience, peculiarly fit him for his office of superintendent.

I have the honour to be, gentlemen, your obedient servant,

JAMES PATTERSON, Head Inspector.

The Secretaries, &c., &c.

APPENDIX to REPORT upon the GALWAY DISTRICT MODEL SCHOOL, for year 1868.

JOINT REPORT upon the Examination of the Pupils of the GALWAY DISTRICT MODEL SCHOOL for the year 1868, by JAMES PATTERSON, Esq., Head Inspector, and JOHN GORDON, Esq., District Inspector.

Galway, 6th February, 1869.

GENTLEMEN,—We beg to forward for the information of the Commissioners our report on the annual examination of the Galway District

Model school. It took place during the first fortnight in June, the greater portion of the time being taken up by the preliminary part, in which we tested the actual proficiency, in all branches, attained by each pupil. From the results of this examination we give the subjoined analysis of the state of the three departments:—

Boys' School.—Of this department there are two divisions, a junior and a senior; the senior division comprising the classes reading the Fourth and Fifth Lesson Books, and the junior, those reading the Second and Third Books. The use of the First Book is almost exclusively confined to the infant school. Seventy-one boys were examined. Their reading was satisfactory, over 70 per cent. of their number being able to read the Third and higher books, with ease and intelligence. The proficiency in arithmetic stood next to that in reading, a large proportion of the boys being expert in ordinary arithmetical calculation on slates. An occasional lesson on *oral*, as distinguished from *written* arithmetic together with increased attention to abridged methods would tend to develop further an intellectual acquaintance with the science of numbers and to promote readiness of computation.

The penmanship though not characterized by slovenliness, was, nevertheless, somewhat deficient in tasteful execution, and much of it gave evidence of the absence of careful supervision at the writing lesson. We have good hope, however, that in future, an effort will be made to secure not only a passable but even a finished style of penmanship. The junior division failed somewhat in writing from dictation. Some pupils of the senior division, though far from being bad spellers, committed mistakes which a closer attention to this important branch of instruction may easily remedy in future. While grammar may be said to have been fairly satisfactory, on the whole, still we cannot help adding that on the part of many of the senior pupils, there was an absence of that facility in syntactical parsing and knowledge of grammatical analysis which ought to characterize the answering of the most advanced boys in one of our longest established model schools. The junior division passed a fair examination on geography. The senior division, as a whole, did not seem to have advanced much beyond a meagre knowledge of the outline of the maps of the World and Europe, together with a certain amount of text-book information about the British Islands, the still more important knowledge of the maps being imperfectly acquired.

The pupils of the senior division acquitted themselves creditably in geometry and algebra, many of the boys in fifth class having an intelligent knowledge of the Sixth Book of Euclid, and some exhibiting much quickness in solving examples in simple and quadratic equations.

Girls' School.—This department also is organized in two divisions. Forty-four pupils were submitted for examination. The reading in the several classes may be pronounced satisfactory, evidencing as it did a clear appreciation of the sense. The arithmetic was not quite so good as the reading. The pupils of the junior division should have been more accurate in the elementary operations, and those of the senior division appeared to have advanced less rapidly in their knowledge of this subject than was indicated by their classification. Penmanship is carefully taught. The copy-books are really *models* of carefully executed writing. A little more freedom and boldness of style might perhaps be an advantage, but the general proficiency in this branch is highly creditable. Both divisions passed satisfactorily in writing from dictation. In this branch the girls have attained a higher grade of proficiency than the boys. Though a few of the more advanced girls in the senior division showed an accurate, and even a critical, knowledge of syntactical parsing and analysis, the grammar can hardly be set down as satisfactory on the

109274

Appendix B.
Reports upon District and Minor Model Schools.
Galway.

whole, the principle failure being in the junior division. The geography is in much the same state as in the boys' school, home lessons from the text-book being too much depended on for imparting a knowledge of this subject, and the maps evidently too seldom used. It is only just to the head mistress of the girls' school to add that the assistant teacher who had been required in this school for a length of time, was not appointed till after the examination, and that in consequence the instruction of the junior classes had been, necessarily, left too much in the hands of monitresses.

Infants' School.—The pupils in this school acquitted themselves well on all subjects which are usually taught in an infant school. Forty-three pupils were examined of whom sixteen were in Second Book. As at the date of their examination no pupil in this school had reached the age of 7½ years, a large proportion of them ranging between 3 and 6, it would have been unreasonable to expect a high grade of proficiency. It was evident nevertheless that their short time at school had been well spent. The pupils in Second Book read well, answered very fairly on the tables, were able to work sums in addition, and showed some knowledge of subtraction. They wrote very nicely on paper and had a fair elementary knowledge of grammar and geography.

The following table exhibits the classification of the pupils examined, and the subjects they were learning:—

Subjects.	Boys.	Girls.	Infants.	Subjects.	Boys.	Girls.	Infants.
Lesson Books:				Arithmetic—*continued.*

The public examination was held on the 12th of June in the largest apartment in the building which was crowded with visitors. The resident Protestant clergy of the various denominations, many of the Professors of the Queen's College, merchants and others interested in the education of the young, especially the parents of the children themselves, were present. To exemplify the ordinary practice in the school, the several teachers examined the pupils of their own departments in as much of the programme as time permitted. Mr. Moylan and Mr. Clements the head and assistant masters, and J. Hanify a pupil-teacher; Miss Brady and her

monitresses, Miss Hegarty and Miss Reid, and Mrs. M'Cullagh with her assistant, Miss O'Malley, examined respectively the boys, the girls, and the infants. Professor Melville was good enough to undertake the examination of the senior class of boys in physical science; and the opinion of the ladies present was taken on the needlework executed by the girls. There was a fair display of the drawings done by the pupils in the course of the year. As is usual on such occasions the part of the proceedings that seemed to give most pleasure to the audience was the vocal music, with which Mr. O'Shanessy, the teacher, had taken great pains.

Although we have felt it to be our duty to advert to some backwardness in the proficiency of the pupils, we are happy to be able to add that the teachers are anxious to remedy all defects, and that this institution enjoys the confidence of those parents who avail themselves of the opportunity afforded them of securing in it, a sound elementary education for their children.

We have the honour to be, gentlemen, your very obedient servants,

JAMES PATTERSON, Head Inspector.
J. GORDON, District Inspector.

The Secretaries, &c., &c.

No. 5.—ANNUAL REPORT for the year 1868, upon the PARSONSTOWN MINOR MODEL SCHOOL, by JAMES PATTERSON, Esq., Head Inspector of National Schools.

Parsonstow

GENTLEMEN,—I have the honour to furnish for the information of the Commissioners of National Education, this my fifth annual report on the Parsonstown Minor Model School.

I. *The School-house.*—At the date of my last report alterations were in progress, intended to afford increased and better accommodation. These have been cleverly executed by the Contractor, and give what were much required, a suitable school-room for the infant school, and a commodious hall for the public examinations. There were already good school-rooms, with class-rooms attached, for the male and female schools, together with ample play-grounds. The house wants some painting and some cleaning done by tradesmen; in other respects it and the grounds about it are in a good state.

II. *Staff of Teachers.*—In 1868 only one change took place among the teachers, Miss M. H. O'Brien, the very meritorious assistant teacher in the girls' school having been transferred to the more important model school at Cork, and her place having been filled by the appointment of Miss M. Clark, who has shown herself to be a zealous and intelligent teacher. Each teacher in the establishment, indeed, deserves to be spoken of in the same terms of praise: well qualified by acquirements, superadded to natural aptitude for the duties to which they are appointed, they labour most earnestly and harmoniously in the performance of them. The following are their names and religious denominations:—

BOYS' SCHOOL,	*Principal*, James M'Garry, *Roman Catholic.*
	Assistant, William M'Manus, *Established Church.*
GIRLS' SCHOOL,	*Principal*, Eliza Butler, *Established Church.*
	Assistant, Mary Clarke, *Roman Catholic.*
INFANTS' SCHOOL,	*Principal*, M. A. Hartigan, *Roman Catholic.*
	Assistant, Anne G. Porter, *Presbyterian.*
	Teacher of Vocal Music, Mr. Calwick, *Established Church.*

Appendix B.

Reports upon District and Minor Model Schools.

Parsonstown.

III. *Pupil Teachers and Monitors.*—In this model school there were, during the year, simultaneously holding place, three male and two female pupil-teachers, and one male and four female monitors. As there is no boarding department in the institution itself, the pupil-teachers find boarding for themselves with respectable families in the town, for which they are allowed by the Commissioners £20 a year each; the monitors, as in all the model schools, have small salaries, £6 the first year, £8 the second, £10 the third, and £12 the fourth, to enable them to continue at school while still residing with their parents. Both these classes, the monitors who belong to the town or its immediate neighbourhood, and who consequently live at home, and the pupil-teachers who come from a distance, and lodge in the town, are instructed by the teachers in their proper programmes and daily practise teaching in the school. As candidates for the place of teacher they have invariably passed their examination most creditably and obtained good classification; and I have never heard a complaint, and I believe there has been none made against them of misconduct during the period of their training or afterwards. Of the pupil-teachers two were Protestants and three Roman Catholics, and of the monitors three were Protestants and two Roman Catholics. One pupil-teacher went in the beginning of the year to Dublin for further training in the central institution and, that completed, was appointed to the situation of teacher in a National school near Parsonstown; one monitress, having completed her course of four years was prevented by ill health from undertaking any employment; and another, induced by clerical suasion (she is a Roman Catholic) to resign her monitorship, is anxiously looking for employment as a teacher. No others resigned within the year.

IV. *Number of Pupils in Attendance.*—Two causes combined this year to reduce the attendance of scholars at the Parsonstown Model School. One was the continuous opposition of the Roman Catholic clergy; the other the prevalence of an epidemic, by which a large proportion of the children in the town were prevented for many weeks from attending school. The average number on rolls and the average daily attendance for 1867 and 1868 where these:—

	1867.		1868.	
	Average No. on Rolls.	Average Daily Attendance.	Average No. on Rolls.	Average Daily attendance.
In Boys' School,	84	66	67	48
In Girls' School,	56	46	48	39
In Infants' School,	36	29	40	33
Total,	176	141	155	120

V. *Religious Denominations of Pupils.*—At the end of the year the numbers of pupils for the several denominations were—

Of the Established Church,	90,	or 60 per cent.
„ Roman Catholics,	44,	„ 30 „
„ Presbyterians,	8,	„ 5 „
„ Protestant Dissenters,	8,	„ 5 „
Total,	150	

At the end of 1867 the number of Roman Catholics was 65, or nearly 39 per cent. of the total on rolls.

VI. *The fees paid* by the 150 pupils on the rolls at the end of the year were at the following rates:—

5*s.* a quarter by	108	pupils,	or 72 per cent.
2*s.* 6*d.* „	39	„	26 „
1*s.* 1*d.* „	3	„	2 „

The total amount of fees for the year was £124 4*s.* 2*d.*, the amount

received in 1867, was somewhat larger, owing to the larger attendance of scholars. *Appendix B.*

Reports upon District and Minor Model Schools.

VII. *Classification and Proficiency of the Pupils.*—In our joint report the District Inspector and I have given details of the annual public examination of the school and the preliminary examination of the classes in detail, in which we occupied several days. The pupils whom we examined were classed thus:—

Parsonstown.

	Boys.	Girls.	Infants.	Total.
Reading in First Book,	–	–	21	21
„ Second „	13	11	23	47
„ Third „	26	17	–	43
„ Fourth, „	8	5	–	13
„ Fifth, „	7	8	–	15
Totals,	54	41	44	139

The answering of the pupils was very good, giving proof that they and their teachers had been very diligent in this as in previous years. Through the munificence of the Earl and Countess of Rosse, an unusual stimulus is given here to instruction in the higher branches of our programme, Lord Rosse's valuable premiums being given for the best answering in mathematical and physical science, and her ladyship's to the girl who is most proficient in the literary programme of the highest class, and to the girl who is best at needlework. The frequent examinations held by Dr. Brown the District Inspector, who, with characteristic good judgment, devotes much attention to the management of the school, are an additional guarantee that the work of instruction proceeds steadily and effectively. The result of the efficient work done is that the pupils, especially the boys, can be kept but a very short time in the senior classes, as they readily obtain employment, many of them in Dublin, and some in England, for which the education they have already received fits them.

VIII. *Ages of the Pupils examined.*—Of the 139 pupils examined

21 were under seven years of age.	50 were twelve, but under fifteen.
52 „ seven, but under twelve.	16 „ fifteen years of age, or upwards.

The average age of the boys was 12·9 years, of the girls 13 years, and of the infants 6·8 years.

IX. The arrangements for the religious instruction of the pupils continued during 1868 as before. The Protestant pupils were catechised by the Protestant teachers, under direction of their own pastors, who, especially the rector and curate of the parish, very regularly took part in it themselves; and the Roman Catholic children were separately instructed by the Roman Catholic teachers. Three hours every week were devoted to this duty, and it was only during that time that the children of the different creeds were not taught together.

I have the honour to be, gentlemen, your obedient servant,

JAMES PATTERSON, Head Inspector.

The Secretaries, &c., &c.

APPENDIX to REPORT upon the PARSONSTOWN MINOR MODEL SCHOOL for year 1868.

JOINT REPORT upon the Examination of the Pupils of the PARSONSTOWN MINOR MODEL SCHOOL, for the year 1868, by JAMES PATTERSON, Esq., Head Inspector, and SAMUEL BROWN, Esq., District Inspector.

5th February, 1869.

GENTLEMEN,—We have the honour to submit, for the information of the Commissioners, our Report on the Annual Examination of the Parsonstown Minor Model School for the past year.

Appendix B.

Reports upon District and Minor Model Schools.

Parsonstown.

Out of respect to the memory of the late Lord Rosse, whose accustomed presence at such times, and whose constant and generous interest were of the greatest advantage to the Institution, the annual exhibition was postponed from Spring, the season of its ordinary recurrence for some years past. On this occasion it was held on the 13th November, and in the Infant School-room, which was considerably enlarged in the early part of this year, and is now a handsome and commodious room.

The proceedings were honoured by the countenance of the present Earl of Rosse, who, continuing to the Institution the friendship shown to it by his honoured father, took part in the examination, and with Lady Rosse. contributed generously to the prizes. The Hon. R. Parsons, brother of the Earl of Rosse, was also present, and there was a large attendance of clergymen, resident gentry, the principal inhabitants of the town, and the parents of the children who attend the school.

The examination was very cleverly conducted by the teachers, and the children acquitted themselves creditably, and frequently elicited the applause of the visitors. The boys' school was ably examined by Mr. M'Garry, the head teacher, on mechanics and hydrostatics, and on algebra and geometry. On the latter subject the Earl of Rosse also proposed some questions. The middle division of the boys' school was examined by Mr. MacManus, the assistant, on reading, spelling, and geography.

The senior girls were examined by Miss Butler, the head teacher, on reading, grammar, grammatical analysis, etymology, and arithmetic, and Miss Clark, the assistant, examined on geography. The infants were subjected to a most interesting examination by Miss Hartigan, the principal of that department, on reading, spelling, mental arithmetic, and geography; and by Miss Porter, assistant teacher, on the "oak," as an object lesson. The answering of the infants was of the most animated character, and fully proved the care and skill with which they are instructed.

At the commencement and close of the examination, and at intervals during its progress, the children sang several pieces with great taste, under the direction of their able teacher, Mr. Culwick. It is but justice to Mr. Culwick to state that he has succeeded in bringing the singing of the senior classes to a high degree of perfection.

In no previous year since the opening of the school had so many children left the senior division of the male and female departments. Having acquired a sufficient amount of education to fit them for various situations, they had finally left school for the active business of life. While the school was thus furnishing the best evidence that it was effectually accomplishing the important end for which it was instituted, it came before the public under unfavourable circumstances, with the senior division diminished in numbers, and deprived of the most advanced scholars. Yet at the preliminary examination at which we had been occupied during several days, in testing the quality and amount of the instruction imparted to every pupil in the school, the senior boys and girls acquitted themselves very creditably on all the most necessary branches—the boys not quite so well as heretofore on geography, and the girls on grammar and geography. The infants answered well in all respects; their proficiency is, in fact, very satisfactory.

Physical science, geometry, algebra, &c., needlework and drawing are well taught, and the proficiency in these branches is good.

The following table shows the classification of the pupils examined, and the numbers learning the several branches :—

Subjects.	Boys.	Girls.	Infants.	Total.	Subjects.	Boys.	Girls.	Infants.	Total.

No. 6.—ANNUAL REPORT for the year 1868, upon the DUNMANWAY DISTRICT MODEL SCHOOL, by TIMOTHY SHEAHAN, Esq., A.M., T.C.D., Head Inspector.

Dunmanway.

Passage West, 22nd February, 1869.

GENTLEMEN,—I have the honour to submit for the information of the Commissioners, my report upon the Dunmanway Model School for the year 1868.

House and Premises.—I have been through the different rooms of the establishment, and found them in good repair, and well attended to. The grounds, too, are carefully looked after.

Teaching Staff.—The only change that took place in the staff of principal and assistant teachers was in the infant school. Miss Sheidow the assistant was transferred to Bailieboro' and succeeded by Miss Thorne, who is still in the establishment.

Appendix B.

Reports upon District and Minor Model Schools.

C. M. Sweeny,	do.	16½	do.	9/68
H. Young,	do.	14	do.	9/68

In the course of this year 1 pupil teacher and 2 monitors were summoned to the central training department, and a third monitress emigrated.

Pupil Teachers and Paid Monitors.—There were 5 pupil teachers and 2 monitors in the male school, and between the girls' and the infant schools there were 10 monitresses.

The pupil teachers were examined with the male teachers at the late examination in Dunmanway. The 2 seniors were examined with the candidates for promotion to second class, and the 3 juniors were examined with the third class teachers. Their general answering was satisfactory, having shown due attention on part of their teachers, and fair progress on their own part.

The monitresses were also carefully examined and, with two exceptions, exhibited due proficiency.

The annual examination was held in December, and the premiums were distributed on the 23rd, immediately before closing the schools for vacation. The results of the examination were very creditable to the different teachers. From the report of the examination which has been forwarded to the office I take the following summaries to show the character of the general answering in each of the departments.

In the boys' school the answering in the ordinary subjects was 59 per cent.; in book-keeping, 56; geometry, 40; algebra, 39.

In the girls' school the general answering amounted to 58·6 per cent., and the proficiency in the branches for females was considered very satisfactory.

In the infant school the answering of the boys amounted to 51, and that of the girls to 58 per cent. This answering was considered very satisfactory taking into account the tender years of the children examined.

The following tables contain interesting statistics on the state of this school for the past year.

TABLE I.—Literary classification of the pupils on the rolls at the close of the year :—

Appendix B.

Reports upon District and Minor Model Schools.

No. 7.—Annual Report of J. G. Fleming, Esq., Head Inspector, upon the Monaghan Minor Model School, for the year 1868.

Derry, 5th January, 1869.

Monaghan.

Gentlemen,—I beg to submit, for the information of the Commissioners, the following report on the Monaghan Minor Model School for the year 1868.

The house and premises have been kept in thorough repair, and, together with the school grounds, present a neat and trim appearance. But the school-rooms are somewhat gloomy owing to insufficient light, and the cap and cloak rooms are singularly unsuitable. The latter of these apartments is so small, and so badly ventilated, that the air in it, particularly on a wet day, is quite loathsome and sickening. This serious defect will, I trust, be speedily remedied, as it causes the pupils much inconvenience. Their cloaks and overcoats are often saturated with rain in the morning and remain so throughout the day from the want of space for thorough ventilation. Many of these children live at a considerable distance from the school, and, it is hardly necessary to add, the wearing of damp clothing for any length of time endangers their health. This was specially the case during the past four months in consequence of the prevalence of scarlatina, a disease which proved fatal in very many cases.

Various changes in the teaching staff took place during the past twelve months. Mrs. Campbell, principal of the infant school, after a useful public career of some twenty years, resigned through ill health. The Lords of the Treasury have granted her a pension in consideration of her past services. Her successor, Miss Blackburne, a former pupil of the institution, has given the utmost satisfaction since her appointment. Mr. Butler, assistant in the boys' department, accepted the situation of principal teacher of a National school in Mullingar under the management of the Rev. Dr. Reichel. His place has been filled by Mr. Frazer, late of the Limerick Model School; he, like his predecessor, Mr. Butler, carries on the instruction in drawing, and, it is to be hoped, with the same success. It is in place to mention that the specimens executed by some of Mr. Butler's pupils attracted, through their conspicuous merit, the attention of numerous visitors to the school on the day of the public examination. Towards the end of the year an official letter was received, directing the transfer of Mr. M'Entee, principal of the boys' department, to the Cork Model School. Mr. M'Entee has well earned the promotion, but his removal to Cork will be a great loss to the Monaghan Model School, for he possessed the entire confidence and esteem of the parents of his pupils owing to his uniform good conduct, and distinguished success as a teacher. The inhabitants of the town, without distinction of creed, united, at a period of unprecedented political and religious bitterness, in presenting him, on the eve of his departure to Cork, with a valuable gold watch and chain, as a token of their regard. Miss Collins, assistant teacher in the female department since the opening of the schools in 1861, has been promoted to the post of principal teacher in the Lurgan Model School. She is a most experienced teacher, and during her stay in Monaghan she was punctual and assiduous in the performance of her duties; she will be succeeded by her sister from the Trim Model School. The full staff of monitors has been maintained, and it is my pleasing duty to state that their conduct throughout the year was, in all respects, satisfactory. One of these monitors is now in charge of a National school, and another of them has gone to the Central Training Schools with a view of preparing himself for a like situation.

The following Table shows the average number on rolls, and the average attendance for each year since the opening of the schools in 1861 :—

	Average on Rolls.			Average Attendance.		
	Males.	Females.	Infants.	Males.	Females.	Infants.
1861, . . .	80·5	59·2	33·6	74·5	53·4	28·5
1862, . . .	101·2	89·	43·3	88·5	70·	35·
1863, . . .	96·7	85·2	44·3	79·	76·	34·3
1864, . . .	95·7	90·7	47·	82·	80·	40·
1865, . . .	108·5	100·	50·	90·9	86·	41·
1866, . . .	103·3	95·4	53·	83·5	75·4	38·5
1867, . . .	92·7	93·4	48·4	76·2	76·5	38·3
1868, . . .	79·2	85·	48·	64·1	67·6	40·

The attendance at the schools during the past year has decreased, as compared with the attendance of the six preceding years. The decrease was most marked in the boys' school, while in the infants' department I have to notice a slight increase. The falling off is, I believe, principally due to the opposition of the Roman Catholic clergy, who have established a school in the town under the management of the Christian Brothers.

The children on rolls at the end of the year 1868 were classified as follows :—

Subjects.	Boys.	Girls.	Infants.	Subjects.	Boys.	Girls.	Infants.
Lesson Books :				Arithmetic—*continued :*			
Book I., . . .	–	1	35	Practice, interest, &c., .	27	32	–
„ II., . . .	16	23	19	Mental, . . .	66	85	–
„ III., . . .	23	29	4				
„ IV., . . .	14	13	–	Writing :			
„ V., . . .	13	19	–	On slates *only*, . .	–	–	40
				„ paper, . . .	66	85	18

				Branches for females :			
				Sewing, . . .	–	80	–
Scripture Lessons, .	–	–	–	Knitting, . . .	–	76	–
Sacred Poetry, . .	–	–	–	Netting, . . .	–	12	–
				Embroidery, . .	–	40	–
Grammar :				Straw Platting, . .	–	–	–
Parts of speech *only*, .	28	35	–	Cutting-out, . . .	–	10	–
Parsing and syntax, .	38	50	–				
Derivations, . . .	38	50	–	Extra Branches :			
Composition, . .	38	32	–	British Poets, . . .	27	32	–
				Mensuration, . .	27	–	–
Geography :				Geometry, . . .	27	–	–
Lessons on maps *only*, .	16	15	58	Algebra, . . .	27	–	–
From Text Books :				Book-keeping, . .	13	–	–
Local, . . .	23	38	–	Trigonometry, . .	–	–	–
Mathematical and physical, . .	27	32	–	Reasoning, . . .	–	–	–
				Agriculture, . . .	–	–	–
				Navigation, . . .	–	–	–
Arithmetic :				Music, . . .	66	85	–
Tables *only*, . . .	–	–	35	Drawing, . . .	66	85	–
Simple rules, . .	15	25	23	Physical and Applied			
Compound do., . .	16	19	–	Science, . . .	27	–	–
Proportion, . . .	8	9	–	Modern Languages, .	–	–	–

The pupils of the three departments were minutely examined by the District Inspector and myself. Their answering is set forth in the subjoined table, which exhibits the proficiency of the several classes (the infants being excluded) in every branch of their prescribed course :—

	Males.	Females.	Total.
Lesson Books :			
Able to read I. Book correctly, ...	6	4	10
„ II. Book correctly, ...	4	13	17
„ III. or higher Books with ease and intelligence,	55	58	113
Grammar :			
Acquainted with parts of speech *only*, ...	20	15	35
Able to parse syntactically, ...	24	34	58

Appendix B.

Reports upon District and Minor Model Schools.

Monaghan.

	Males.	Females.	Total.
Geography:			
Acquainted with the outlines and general features of the Map of the World *only*,	35	25	60
Acquainted with Maps of Europe and Ireland,	20	28	48
Acquainted with general course of geography,	5	8	13
Arithmetic:			
Able to set down accurately a sum of 7 places of figures,	56	50	106
„ work correctly a sum in Subtraction,	62	68	130
„ „ sum in Division of Money,	49	44	93
„ „ sum in Proportion or Practice,	30	30	60
Writing:			
Able to write on paper fairly,	22	28	50
„ „ a good hand with ease and freedom,	37	34	71
„ „ sentence with tolerable accuracy,	20	23	43
„ „ with ease and correctness,	29	38	67

Classification of the pupils examined—

	Males.	Females.		Males.	Females.
Book I.,	–	–	Book III.,	24	27
Book II.,	16	23	Book IV.,	28	25

Sixty-seven premiums were awarded in the male and female departments—thirty in the former, and thirty-seven in the latter. Any pupil who answered less than 60 per cent. of the questions proposed at the private examination was deemed ineligible for a premium. In some respects the proficiency in the boys' school was not so high as I have been informed it was on former occasions. But this is easily accounted for. Mr. M'Entee's eldest son, a fine promising lad, was drowned at Bundoran during the summer vacation, and this sad accident necessarily impaired his energies for some months, the more so as he witnessed his child's dying struggles without being able to give the slightest help.

Generally speaking the reading in the boys' school, although correct and fluent, was not characterized by special gracefulness of delivery or distinctness of enunciation. The girls read much better, and their answering in grammar was creditable; the boys also acquitted themselves tolerably well in the same subject. As regards geography, the proficiency was not so high in either school as might reasonably be expected. On the other hand, the senior pupils in both schools displayed a considerable knowledge of the principles on which the arithmetical rules are founded, and they worked questions in the advanced rules with facility and accuracy. Mr. M'Entee was famous for his success in teaching writing, but owing to the melancholy occurrence to which I have already referred, his pupils have not made satisfactory proficiency in penmanship during the past six months. The truth is, he mourned the loss of his child so deeply that his health was at length injured, and his mental faculties so weakened from excess of grief that he was for a considerable time wholly unable to attend to his ordinary duties; hence the short-comings of his pupils at the examination held last December. I have only to add that the proficiency of the girls in writing from dictation was quite satisfactory, but the style of penmanship which characterized their exercises was not quite up to the mark. The state of the infant school was excellent, and reflects much credit on the teacher in charge of it.

The annual public examination and distribution of premiums took place on the 3rd December, in the presence of a large and respectable assemblage. The different classes of boys and girls were examined by the teachers on a variety of subjects. Their general answering was very good, and evinced a sound knowledge of the elementary branches which form the groundwork of a solid education. The infants elicited the warm approbation of the audience by the excellence of their reading and singing, and by the readiness and accuracy of their replies to questions suited to their tender years.

Abstract of answering of the paid monitors, showing the results of their examination in 1868 :— *Appendix B.*

The Secretaries, &c., &c.

No. 8.—ANNUAL REPORT by J. G. FLEMING, Esq., Head Inspector, upon the LURGAN MINOR MODEL SCHOOL, for the year 1868.

Lurgan.

Derry, January, 1869.

GENTLEMEN,—I beg to submit, for the information of the Commissioners, the following report on the Lurgan Minor Model School for the year 1868 :—

I visited the several departments of this institution on nine different occasions during the past year. As these visits varied from one to two or three hours in length, I had ample opportunity of seeing that good order and cleanliness had been strictly observed, and that the discipline and general arrangements of the schools were admirable.

In addition to the visits just referred to, I devoted four days to the examination of the pupils in order to ascertain their literary proficiency, and award premiums and certificates of merit to those who distinguished themselves by superior answering in their prescribed course of study. But institutions of this kind are something more than first class schools established for the sole purpose of conferring on a limited number of pupils a thoroughly sound education. They are also looked upon as training schools, and as such they materially serve the interests of education by exemplifying in a practical and comprehensive way the best and most suitable methods of teaching. This object has, however, been very imperfectly attained in the Lurgan Model School, which, with a single exception, commands a larger attendance than any other model school in Ulster. Nevertheless it has no staff of pupil teachers, nor has a residence been provided for the head master. Lord Lurgan and the principal inhabitants of the town, who take a deep interest in the welfare of this school, are anxious that apartments should be provided for the head master and six pupil teachers. I hope steps will soon be taken to supply so great a want.

The subjoined table shows the character of the attendance, the amount of school-fees received, the sum paid by the pupils for books and stationery sold at reduced price, and the number on rolls at the several rates of payment.

1868.

	Boys.	Girls.	Infants.	Total.
Average number on rolls,	190	89	91·1	370·1
Average number in daily attendance,	155·4	73·5	76·8	305·7

* Appointed as junior monitress in October, 1863.

Appendix B.

	Boys.	Girls.	Infants.	Total.
Number on rolls at 5*s.* per quarter,	51	20	23	94
,, 2*s.* 6*d.* ,,	71	40	35	146
,, 1*s.* 1*d.* ,,	58	35	32	125

	Boys.			Girls.			Infants.			Total.		
	£	*s.*	*d.*	£	*s.*	*d.*	£	*s.*	*d.*	£	*s.*	*d.*
Amount of school-fees received,	102	8	4	45	19	1	48	18	3	197	5	8
,, requisites sold,	16	3	6½	4	12	3½	2	7	10½	23	3	8½

The attendance, compared with that for 1867, exhibits in the aggregate an increase, but it has been mainly confined to the infants' school, in which the increase is as high as 43 per cent. In the boys' school, on the other hand, there has been a decrease of 10 per cent., which I ascribe to the fluctuations to which all schools are subject, and which are wholly beyond the teacher's control. I have the strongest assurance for stating that this slight falling off in the attendance has not occurred through any fault of Mr. Greer, the head master, or of his assistants. In the girls' school a trifling increase in the attendance has taken place. The per-centage of pupils in daily average attendance to the average number on rolls was, in boys' school, 81·8 per cent.; girls' school, 82·6 per cent.; infants' school, 84·3 per cent.

The teaching staff consists of three principal and eight assistant teachers, and seven paid monitors. During the year one pupil teacher and one monitor resigned their situations, one to become a stonemason, and the other to fill a situation in a linen factory. Another pupil teacher left to take charge of a National school. Miss Greer was appointed assistant teacher, in the beginning of the year, as successor to Miss Nicholson, transferred to the Belfast Model school. Mrs. Campbell, the head mistress, was, I regret to say, obliged to tender the resignation of her office owing to bad health. She was in the service of the Board for a period of some twenty years, and until her constitution broke down, she was, I believe, a very painstaking and successful teacher. Her place has been filled by Miss Collins, recently an assistant in the Monaghan Model school. Two paid monitresses resigned their situations towards the end of the year, having been appointed teachers of National schools. No change of teacher took place in the infants' school during the past year.

I give in the subjoined list the names and dates of appointment of the pupil-teachers and paid monitors on the teaching staff of this model school, and the per-centages of their answering at the examinations they attended last year :—

—	—	Dates of appointment.	Resigned.	Per-centage of answering at Examinations.
P. Fullerton,	Pupil Teacher,	1/9/66	31/5/68	71·6
Robert Mercer,	Do.,	1/5/67	31/10 68	76·1
Samuel Finlay,	Paid Monitor,	1/6/66	1/8/68	49·8
Lizzie Larkin,	Paid Monitress,	1/4/64	—	68·4
Anna Meharg,	Do.,	1/6/66	8/8/68	66·3
Christina Bowen,	Do.,	1/11/67	—	61·6
Mary A. Martin,	Do.,	1/3/68	—	57·0

Of the above, Robert Mercer and Anna Meharg have become National teachers. Peter Fullerton and Samuel Finlay have abandoned the teaching profession.

The following tables show the classification of the pupils on rolls in the last week of December, 1868, and the classification of the pupils

examined by me and Mr. Brown, District Inspector, during the week ended the 28th November last :—

Subjects.	Boys.	Girls.	Infants.	Subjects.	Boys	Girls.	Infants.

Of the foregoing pupils examined there were—

	Boys.	Girls.	Total.
Able to read Second Book correctly,	56	38	94
„ Third or higher Books with ease and intelligence,	75	27	102
Acquainted with the parts of speech only,	38	21	59
Able to parse syntactically,	32	9	41
Acquainted with the Map of the World only,	64	30	94
„ the Maps of Europe and Ireland,	53	27	80
„ a general course of Geography,	6	3	9
Able to set down correctly a sum of seven places of figures,	106	36	142
„ work correctly a sum in Subtraction,	132	59	191
„ „ a sum in Division of Money,	91	27	118
„ „ a sum in Proportion or Practice,	33	8	41
„ write on paper fairly,	62	38	100
„ „ a good hand with ease and freedom,	46	11	57
„ „ a sentence with tolerable accuracy,	49	17	66
„ „ a sentence with ease and correctness,	39	14	53

Boys' School.—Of 175 pupils examined, nearly one-half read lessons in third or fourth class books with ease and correctness, while all the pupils

Appendix B.

Reports upon District and Minor Model Schools.

Lurgan.

of fifth class, and a select portion of the fourth class, read some choice pieces taken from Bell's Elocutionist with great taste and an evident appreciation of the author's style and meaning. The specimens of penmanship were varied and numerous, and bore very strong proof of the teacher's skill and attention. Forty-six of his pupils wrote a good hand with ease and freedom, and as many as sixty-two could write fairly on paper, which means that if they continue at school for the next twelve or eighteen months they will, with ordinary diligence, write an excellent business hand. The figures in the table of proficiency show that the general proficiency in arithmetic and writing from dictation was remarkably high. But the junior division answered indifferently in grammar and geography, and the pupils of the third class also failed in grammar.

Girls' School.—The proficiency of the pupils of the senior division in reading, penmanship, and writing from dictation may be regarded as satisfactory. But I cannot speak favourably of their answering in arithmetic and geography. I am also sorry to add that needlework has not received due attention. Steps have already been taken to remedy these defects which, it is only fair to explain, must be attributed to the protracted illness of the head mistress, who was unable to take an active part in conducting the business of her school for several months before she sent in her resignation to the Commissioners. I have only to add that the neatness in dress and personal cleanliness of her pupils, and the excellent order which they observed on all occasions, merit special praise. The ease and quietness with which the change of classes and other arrangements have always been carried out afford the best proof of the suitableness and efficacy of the discipline.

The public examination was held on the 30th November, and was numerously attended, notwithstanding the extreme wetness of the day. As on former occasions, it was conducted by the principal teachers and their assistants. The accuracy and readiness which characterized the answering of the several classes evidently made a most favourable impression upon the minds of those who witnessed the proceedings. I have also to remark that the pupils acquitted themselves fully as well at the special examination held by me and Mr. Brown, District Inspector, during the preceding week. It was truly gratifying to us to find that the labours of the teachers had borne such fruitful results. At the close of the examination the certificates of merit were distributed by Mr. Handcock, the respected agent of Lord Lurgan. The sum of £15 was likewise awarded as premiums to the pupils whose answering qualified them for such a favour. In addition to these ordinary prizes, Lord Lurgan, who takes a deep interest in the welfare of this institution, presents every year five medals, for which there is always a hot, spirited competition among the cleverest pupils in the middle and senior divisions. Mr. Handcock was so pleased with the reading of all the classes that were examined that he signified his intention of giving a special medal for good reading at the next yearly examination. His kind and generous offer was warmly acknowledged by the pupils and their worthy teachers. The manufacturers in Lurgan also offer five other prizes, known as the "Manufacturers' Medals," to be competed for annually.

I am, gentlemen, your obedient servant,

J. G. Fleming, Head Inspector.

The Secretaries, &c., &c.

No. 9.—ANNUAL REPORT, by J. G. FLEMING, Esq., Head Inspector, upon the BELFAST DISTRICT MODEL SCHOOL, for the year 1868.

Appendix B.

Reports upon District and Minor Model Schools.

Belfast.

Derry, January, 1869.

GENTLEMEN,—I beg to submit for the information of the Commissioners the following report on this model school for the year 1868 :—

The buildings and offices are in a good state of repair, but owing to the great size of the house, the large number of apartments it contains, and its situation in the centre of a large manufacturing district, it cannot be kept so clean as is desirable without considerable expense and labour. All the woodwork, except the desks and furniture, was painted last year, and the walls were thoroughly cleansed and coloured. It was deemed advisable to have the plain and ornamental stonework on the exterior of the building also painted. This, it is hoped, will have the effect of staying the rapid decay of the stone from atmospheric influences.

The three departments of the institution continue in charge of Mr. Moore, Miss Cleary, and Miss Heritage, who have hitherto conducted them with remarkable skill and success. Four of the assistants in the boys' school resigned during the year ; one got a situation in a merchant's office, another was appointed an Inspector of National Schools after a competitive examination, the third went into business on his own account, and the fourth took charge of an ordinary National school in Belfast. One of the assistants in the girls' school resigned, and another has been, for a considerable time, off duty owing to bad health.

The junior teaching staff in the boys' school was not complete at any period of the year. Great difficulty has been experienced in securing the services of even tolerably well qualified young persons for the office of pupil-teacher. Few, if any, can be had in Belfast or in the Belfast school districts, and most of those brought from a distance are found to possess very moderate acquirements when they enter upon their duties. Nevertheless, owing to the untiring care and attention devoted to their improvement by the head and assistant teachers, these young men become very promising school-keepers by the time they have completed their course of training. Thirteen of these young persons left the institution during the year 1868. One had been in it for two years, seven for eighteen months, four for more than twelve months, and one, a paid monitor, for five years. Four of them were appointed teachers in National schools, one to a school not National, three went to the training class in Dublin, three left from ill health, and two of them obtained situations in mercantile offices.

Of twelve present at the annual examination three made upwards of 60 per cent. of answering, six answered about 50 per cent., and three, who had been recently appointed, answered respectively 47, 46, and 46 per cent.

The female and infant departments are more favourably circumstanced as regards the junior teaching staff, which is entirely recruited from the pupils in the most advanced division in the girls' school as vacancies arise. As a proof of the extent and excellence of the instruction imparted to these young persons, it may be stated that in the course of the year, at a competitive examination extending over the greater part of three days, Miss Moore, only a few months out of office as a monitress, obtained the vacant assistant-teachership in the girls' school, and Miss Ferguson, then and still a pupil-teacher in the establishment, took second place, both making better answering than three first and two second

Appendix B.

Belfast.

class teachers, candidates for the same post. Three monitresses left after three years' service to fill situations in National schools, and the fourth has been engaged to teach in a ladies' institute.

The following table shows the average number on rolls, and the average daily attendance, for the years 1867--1868 :—

Of these there were in attendance and individually examined—

	Boys.	Girls.	Infants.	Total.
In Reading Lessons,	435	300	207	942
„ Grammar,	435	293	137	865
„ Geography,	435	285	207	927
„ Arithmetic,	435	294	207	936
„ Writing on Paper,	435	293	59	787
„ „ from Dictation,	404	293	137	834

The following table of proficiency has been carefully compiled from the records made of each child's answering:—

Of the pupils examined there were—

	Boys.	Girls.	Infants.	Total.
Able to read I. Book correctly,	19	4	72	95
„ II. Book correctly,	112	70	105	287
„ III. or higher books with ease and intelligence,	304	226	–	530
Acquainted with the parts of speech *only*,	204	199	105	508
Able to parse syntactically,	160	94	–	254
Acquainted with the outlines and general features of the Map of the World *only*,	115	136	72	323
Acquainted with Maps of Europe and Ireland,	151	94	105	350
„ with general course of geography,	105	55	–	160
Able to set down accurately a sum of seven places of figures,	404	280	79	763
Able to work correctly a sum in Subtraction,	384	294	59	737
„ „ Division of Money,	278	127	–	405
„ „ Proportion or Practice,	179	103	–	282
Able to write on paper fairly,	144	108	59	311
„ a good hand with ease and freedom,	275	184	–	459
„ a sentence with tolerable accuracy,	128	70	59	257
„ „ ease and correctness,	231	198	–	429

These results are truly satisfactory, especially when it is considered that the several classes were tested by a standard much higher than that applied to the ordinary National schools, while the senior divisions, including boys and girls, were subjected to an examination quite as searching as that which teachers, candidates for the higher division of third class, are required to pass. It is my pleasing duty to add that the infant school continues to merit and secure a large amount of public support. The children in the several classes have made considerable progress in the elementary branches for their respective terms of attendance. Many of them will shortly be transferred to the upper schools, where they will very likely be found qualified to enter some draft of third class. In fact the three departments are in a highly efficient state, and reflect much credit on the principal and assistant teachers. As a high degree of excellence has been attained by the pupils of the boys' school in penmanship, this branch deserves special notice. There are, I believe, few schools in which so many boys have acquired so good a hand—a point of the utmost importance in a large commercial community like Belfast. I am bound to add that the writing of the pupils in the girls' school is also admirable, and merits the highest commendation.

The special subjects deserving of notice are physical science and drawing. The first-mentioned branch has been taught by Mr. Wren, assistant in the boys' school. His pupils have made considerable proficiency in elementary mechanics and theory of heat and light. Mr. Smeeth's drawing classes continue to improve, their general progress during the year being very fair. The former teacher of vocal music left in the early part of the year, and as his successor, Mr. Gaskin, only entered on his duties in the beginning of December, the list of pieces sung by the pupils was necessarily limited in extent, and confined to the girls of the senior division, as the boys had not received instruction in singing during the year. Now that Mr. Gaskin has taken charge of this department, the best results may be anticipated. Bearing in mind the shortness of the time at his disposal before the public examination, his success was surprising, as evidenced by the musical treat which he produced for the gratification of those present at the public examination.

The evening school has been conducted in a very satisfactory manner during the past twelve months, and it has been more numerously attended than heretofore.

The public examination of the pupils was held on Tuesday, the 22nd December, in the boys' school-room, which was tastefully ornamented for the event under the superintendence of Miss Heritage, the head teacher

Appendix B.

Reports upon District and Minor Model Schools.

Belfast.

of the infant school. The ceiling was decorated with evergreens and the word "Welcome," in a floral wreath attracted much admiration. The following mottoes were placed on the walls of the examination room :—

"Cherish kindly feelings at this merry Christmas time."
"Glory to God in the highest, and on earth peace and good will to men."
"A merry Christmas and a happy new year."
"God save the Queen."

The attendance of visitors was very large, and comprised a considerable number of the relatives and friends of the pupils, and of others interested in education. The junior division of girls was examined by Miss Sedley on grammar, and on flax, hemp, and cotton by Miss Moore. On all these subjects the pupils exhibited a good deal of accurate information. Mr. Boomer examined the junior division of boys on geography, and Mr. M'Grath tested the same division on the history of the British Islands and arithmetic. The infants were examined by Miss Heritage in reading, and by Miss Cunningham on geography and arithmetic. These little scholars also sang several suitable airs with remarkable taste and sweetness. After this the boys and girls of the drawing class were examined by their teacher, Mr. Smeeth. The middle division of girls was examined on trees by Miss Ferguson, and on geography by Miss Coates. Mr. Gregg examined the boys' middle division on history, and Mr. Greer examined them on the rules for spelling, natural history, and the coast scenery of Ireland. Miss Shaw examined the girls of senior division on the geography of the British possessions. Miss Cleary, principal teacher, examined them in reading, parsing, and arithmetic, and Miss Sloane tested them in writing from dictation. The senior division of boys was examined by Mr. Brown on the British Constitution, and by Mr. Moore, the head master, on arithmetic and geography. The pupils in each division acquitted themselves remarkably well, their general answering reflected much credit on those who have had charge of their education. The examination of the girls of senior division in singing—a very pleasing item in the proceedings of the day—elicited hearty encomiums from the audience.

The following table shows the names of the teachers in charge of a class or division, and also the highest, the lowest, and the average percentage on which premiums were awarded :

* No teacher in charge.

† Pupil teacher acting for assistant; ill.

In order to afford the visitors an opportunity of testing for themselves the quality and amount of the instruction imparted to the classes, some gentlemen were invited to select passages for reading and dictation, exercises in arithmetic, &c.—even the infant school children belonging to the most advanced division, were subjected to a like ordeal. Several gentlemen who have frequently attended public examinations at this and other schools, stated they had never witnessed better answering.

Some of the pupils in the girls' school omitted to bring, or could not produce specimens of their needlework when their class was examined. The loss of marks for this branch considerably lessened the per-centage of their answering. It was, nevertheless, remarkably high, and affords a very convincing proof of the skill and success with which the business of the school has been conducted.

Rev. Dr. Henry, President Queen's College, Belfast, kindly promised to attend the public examination and distribute the premiums to the successful pupils; but he was unable, through illness, to keep his engagement, in consequence of which he wrote a letter to me and Mr. Molloy. I furnish with much pleasure a copy of this cordial and friendly communication, in which he refers to the subject of education and the flourishing condition of the Belfast Model School :—

"To the Head and District Inspectors of the Model Schools.

"My dear Sirs,—A rather painful injury to one of my legs confines me closely, and will, I fear, do so for some days. I greatly regret, therefore, to be obliged to forego the pleasure of presiding at the conferring of prizes at the model school to-day. Though general addresses on these occasions are prohibited by the Board, I do not overstep the limits of my duty as a Commissioner of Education in expressing the great satisfaction I feel that the condition and utility of the model school afford gratifying evidence of your own judicious administration of its affairs, and also of the zeal and efficiency of the teachers employed. That school, in its various departments, strongly illustrates the perfect practicability of united education, and remains a centre where children of the various denominations receive together those common lessons of instruction which fit them for afterwards mingling together harmoniously and with immense public advantages, in the ordinary walks and occupations of life. I believe that the children of your school could enter into a competitive examination most successfully with any children of similar ages, not only in secular branches, but also in regard to the great principles of religion. For myself, after all that has been written and spoken on the subject, my convictions remain unchanged that the system of 'United secular and separate religious instruction' is the only one suited to the wants of the population of this country; and I trust it will be the basis of a still more comprehensive scheme when the blessings of education shall be enjoyed far more extensively than at present by the masses of all denominations now sunk into poverty and crime. Two things are clear to my mind—first, that the State will be guilty of a dereliction of its duty if it shall not charge itself much more directly than ever with the responsibility of educating the people at large; and next, that this can only be properly and justly effected by a mode that shall secure to all parents, teachers, and children the full and free exercise of the sacred rights of conscience.

"Will you be so good as to give the teachers and children an additional holiday for me? I intended to have proposed this had I been able to be with you.

"Wishing you continued success in your most useful labours, I remain yours very truly,

"P. Shuldham Henry.

I am, gentlemen, your obedient servant,

J. G. Fleming, Head Inspector.

The Secretaries, &c., &c.

Appendix B.

Reports upon District and Minor Model Schools.

No. 10.—Annual Reports for the year 1868 upon the Londonderry, Coleraine, Ballymoney, Enniskillen, Sligo, Omagh, and Newtownstewart Model Schools, by Andrew O'Callaghan, Esq., Head Inspector.

Londonderry, 8th February, 1869.

Londonderry, Coleraine, Ballymoney Enniskillen, Sligo, Omagh, and Newtownstewart.

Gentlemen,—I have the honour to submit, for the information of the Commissioners, the following reports, for the year 1868, on the seven model schools situated respectively in Londonderry, Coleraine, Ballymoney, Enniskillen, Sligo, Omagh, and Newtownstewart.

The information, conveyed in each of these reports, has been for the most part arranged in a tabular form, and bears reference to the following points:—

1. The present condition of the buildings, &c., &c.

2. The average number on the rolls and in attendance for the years 1867 and 1868 respectively.

3. Tables III. and IV. give the number of individual or distinct pupils on the rolls in the year 1868, and in 1863; thus comparing the results of two years, which are separated by an interval of five years.

4. In Table V. is shown the classification of the pupils on rolls, in each class, in the last quarter of the year 1868, with their average age.

5. Table VI. exhibits the number of the promotions made, in each department, during the year; that is, the number of pupils advanced, in that period, from a lower to a higher class. It is generally admitted that this number should bear a large proportion to the number in average attendance. This table, therefore, furnishes one of the best tests of the educational effectiveness of the school. Taken by itself, however, it does not yield full and conclusive evidence on this point. But the evidence may be considered as nearly complete, when the character of the answering of the pupils, in their registered classification, has been ascertained by a careful examination. This additional test is supplied in Table XI., in which the proficiency of each class is represented by per-centages; that is, by numbers representing the centesimal proportion of the number of correct answers and the number of the questions proposed.

6. In Table VII. the pupils are distributed, according to the numbers on rolls in the last quarter of the year, paying the different rates of school-fees. The amount arising from these payments, for the whole year, is also given.

7. Table VIII. represents the extent of the teaching staff—teachers, pupil-teachers, and paid monitors—and the religious denomination to which they respectively belong.

8. Table IX. refers to the model school, in its capacity of a training institution for young persons intending to become teachers. The table gives information on the following points:—

(*a.*) The number of pupil-teachers and paid monitors who completed their course of training in 1868.
(*b.*) Of this number, those who were admitted to the central training establishment.
(*c.*) Who were appointed teachers in National schools.
(*d.*) Who were appointed to schools not connected with the Board.
(*e.*) Who have adopted a different calling in life.

This table does not exhibit results sufficiently satisfactory. They would be very different, but for the difficulty experienced in recruiting the junior staff; that is, the staff of pupil-teachers and monitors. Suitable candidates are not as numerous as might reasonably be expected. Several weeks and sometimes months elapse between the occurrence of a vacancy in the staff and the new appointment. Accordingly the means possessed by these schools for training young teachers are seldom in full operation. One reason may be offered to account for the inadequate supply of candidates. The position of pupil-teacher or paid monitor appears to many parents to be wanting in valuable privileges. The practice in all these model schools is to employ these young persons in teaching during the *whole* of the school time; that is, from ten o'clock to three o'clock. The paid monitors receive generally only one hour's special instruction, and this is sometimes given at an unfavourable time, from three to four o'clock, when teachers and monitors are tired from the day's work in school. This arrangement is plainly disadvantageous, and tends to make progress in their own studies slow and unsatisfactory, as the time allowed is insufficient. Besides the continued employment of the paid monitors in teaching for five consecutive hours has naturally the effect of disgusting them altogether with the occupation. I know many instances of young persons who were deterred by this practice from becoming candidates for appointment to the monitorial staff. Their parents, too, feel that the salary and the technical knowledge to be acquired in the office do not compensate for the laborious occupation, and for the disadvantage to their children of being withdrawn from their own studies during a large and important portion of the day. In ordinary schools the existing regulation requires that the paid monitors should be employed for only three hours. I am of opinion that this regulation should be extended to model schools, and that pupil-teachers and paid monitors should be afforded an opportunity of receiving instruction, in the subjects of their course of study, for two hours of the school-time. The adoption of this regulation would be found serviceable in several respects. It would be advantageous to the school itself, for with their knowledge of the subjects to be taught, improved by extended opportunities of instruction and of study, the members of the junior staff would certainly prove more intelligent and successful as teachers. The training given would be more thorough, and would render them, on the completion of their period of office, at once capable of doing effective work in the public service. This change, which I recommend, would have the tendency besides of increasing the number of candidates, and thus the training capabilities of every model school would be exercised to their fullest development.

Londonderry, Coleraine, Ballymoney, Enniskillen, Sligo, Omagh, and Newtownstewart.

Each of these reports concludes with a short account of the public examination and distribution of premiums. A table (XI.) is added, exhibiting the proficiency in each of the classes.

I have to state, in conclusion, that the order, the discipline, and the moral tone of all these schools are highly satisfactory. No instance has occurred in which it was found necessary to remove the name of any pupil from the rolls for serious breach of discipline or misconduct of any kind. The teachers, I feel pleasure in stating, are zealous and devoted to their business, and have with rare exceptions, been very successful in the discharge of their duties.

I have the honour to remain, gentlemen, your obedient servant,

ANDREW O'CALLAGHAN, Head Inspector.

The Secretaries, &c., &c.

Appendix B.

Reports upon District and Minor Model Schools.

Londonderry.

(*q.*) ANNUAL REPORT, for the year 1868, upon the LONDONDERRY DISTRICT MODEL SCHOOL.

I. *House and Grounds.*—The state of repair of all the buildings is quite satisfactory, except in the following instance. This defect exists in two of the bedrooms of the boarding establishment occupied by teachers. They complain that the roof, although it has externally the appearance of being in perfect repair, is unfinished within, and freely admits the air in currents. The attention of the Clerk of Works has been recently drawn to this defect. There is no other deserving of notice. The school-rooms present a neat and orderly appearance. The play-grounds are in a satisfactory condition, and the ornamental plots are neat, and carefully preserved.

II. *Attendance of Pupils.*—Table showing the average number on rolls, the average daily attendance, and the centesimal proportion of the latter to the former, in each of the three departments for the year 1868 :—

	Average on Rolls.	Average Attendance.	Per-centage.
Boys' Department, ...	184	161	87·5
Girls' do.	116	90	77·6
Infants' do.	90	71	79·

The corresponding numbers for 1867 were :—

	Average on Rolls.	Average Attendance.	Per-centage.
Boys' Department, ...	189	161	85·2
Girl's do.	124	95	76·6
Infants' do.	107	86	80·4

III. Table showing the number of individual pupils, distributed according to religious denomination, for the year ended the 31st December, 1868 :—

	Boys.	Girls.	Infants.	Total.
Number of individual Pupils on Rolls, . .	289	195	171	655
Number belonging to the Established Church, .	75	56	53	184

„ are employed in other schools, or private tuition,	–	–	–	1	1
„ have adopted some other calling in life,	–	–	–	1	1

X. *The Public Examination.*—The examination of the pupils in the presence of the public, and the distribution of the premiums, took place on the 19th January, 1869. The occasion attracted, as usual, a crowded and highly respectable audience. The gentry and merchants were well represented; there was also a large attendance of the clergy of the Established Church and of Presbyterian Ministers. The professors of the Magee College were also present. The Mayor of Derry (T. H. Babington, esq.) kindly presided, and, at the conclusion of the examination, handed the certificates of merit to the deserving pupils. The number of these had been, of course, determined at a preliminary examination, extending over a fortnight, before the Christmas vacation. The Honorable the Irish Society make an annual grant to the school of £50, for premiums. This sum, with that given by the Board, represents the "stimulating force" in this school; its amount is much larger than that in any other model school, being £75. Every pupil is not necessarily qualified to compete for the premiums granted by the Irish Society. To secure eligibility, it is necessary for each pupil to have fulfilled two conditions, namely—1. He must have been enrolled for at least nine months previously to the date of the annual examination. 2. He must have attended for eighty out of every hundred school-days. These conditions have been completely successful in obtaining a very desirable result—perfect regularity of attendance.

There is a third condition in connexion with the Society's premiums namely, that the examination in the leading subjects of the school course must be conducted by written exercises. The mass of these exercises became so great that Mr. Dugan and myself found it an impossible task to mark them and register the results before the Christmas vacation. We were, accordingly, obliged to postpone until January, on the re-opening of the school, the public examination and distribution of premiums. The proceedings of the day were very interesting, and appeared to give entire satisfaction to the visitors, who frequently testified to their feelings in loud applause.

The number of pupils who obtained premiums was, as I have already mentioned, determined at a previous examination. This was conducted with scrupulous accuracy. Every pupil was examined in all the subjects prescribed for his class in the school programme; and the results—correct and incorrect answers—were carefully recorded on examination sheets. To every subject of the course was assigned a numerical value, in accordance with its relative importance to the other subjects. In this way the amount of each pupil's answering, in each subject, is denoted numerically, and the sum of all these numbers determines his position in his class. The merit of every pupil has been recorded by numbers, exhibiting the centesimal proportion of the number of correct answers to the number of

the questions given. The results for the male and female schools are represented in the following table :— *Appendix B.*

Reports upon District and Minor Model Schools.

XI. Table showing the number of pupils examined in each class, arranged according to the per-centage of the answering :—

Londonderry.

	Classes of boys' department.					Classes of girls' department.				
	5th.	4th.	3rd.	2nd.	Total	5th.	4th.	3rd.	2nd.	Total
Number of pupils whose answering amounted to 90 per cent.,	–	–	–	–	–	–	–	–	–	–
,, 80 and under 90,	3	2	3	–	8	3	1	1	–	5
,, 70 ,, 80,	6	4	14	–	24	8	4	4	4	20
,, 60 ,, 70,	2	10	27	1	40	3	5	10	2	20
,, 50 ,, 60,	–	4	19	3	26	–	5	11	8	24
,, under 50,	–	2	16	38	56	–	3	6	5	14
Total number in each class, . .	11	22	79	42	154	14	18	32	19	83

From this table it appears that 64 per cent. of the number of pupils examined in the boys' school made 50, or over 50, per cent. of answers; and 36 per cent. of the number examined made under 50 per cent. of answers.

Of the number examined in the girls' school 83 per cent. exceeded 50 per cent. in answering, while 17 per cent. of the number failed—that is, made less than 50 per cent. of answers.

The centesimal proportion of the number of pupils promoted in the boys' school to the average number in attendance is only 45·4, while in the girls' school it is 73·4.

The regularity of attendance is of nearly the same character in both these departments.

These three circumstances having been taken into consideration, it is evident that the value of the educational results in the girls' school is very far superior to that of those produced in the boys' school.

(*b.*) Annual Report for the year 1868 upon the Coleraine District Model School. *Coleraine.*

I. *State of buildings, &c.*—The repair of the school-rooms and the other parts of the premises is quite satisfactory. By alterations executed during the year, the light has been increased and the ventilation improved in the corridors leading to the different class-rooms. The only apartment in which the appliances for light are defective is the boys' school-room. In the arrangement of the school-rooms neatness and order are prevailing characteristics.

II. *Attendance of pupils.*—Table showing the average number on rolls, the average daily attendance, and the centesimal proportion of the latter to the former in each of the three departments for the year 1868 :—

	Average on Rolls.	Average attendance.	Per-centage.
Boys' Department, ...	71·2	56·7	79·6
Girls' ,, ...	88·4	74·3	84
Infants' ,, ...	36·4	27·2	74·7

IX. Table showing the number of pupil teachers and paid monitors who left the establishment, having completed their period of training, during the twelve months ended the 31st December, 1868 :—

Number of male pupil teachers	who left during the year 1868,	3
	who were admitted to the Central Training Establishment,	1
	who obtained employment as teacher in National schools,	1
	who have adopted some other calling in life,	1

NOTE.—There were twelve of the junior staff examined during the year in the subjects set down in their course of study. The answering of nine was satisfactory. Of the three who left in 1868, two had received a training extending to one year, and one to two years.

X. *Annual Examination.*—The public examination and distribution of prizes took place in December last. The school-rooms were most tastefully decorated for the occasion. There was a large attendance of the friends of popular education. Sir Hervey Bruce, Bart., M.P., and Lady Bruce honoured the school with their presence. The audience evinced, as usual, much interest in the day's proceedings. The conduct of the pupils was excellent, and their answering frequently elicited applause. At the conclusion of the examination, Lady Bruce handed the certificates of merit to the deserving candidates, an act of kindness which gave universal satisfaction.

The premiums had been decided in the results of a preliminary examination, conducted by Mr. Bole and myself, and which had occupied us for upwards of eight days.

The following table exhibits the proficiency of the several classes in the boys' and girls' departments. In the observations which follow it, an

Appendix B.

Reports upon District and Minor Model Schools.

Coleraine.

estimate is given of the success which has attended each of the departments during the past year.

XI. Table showing the number of pupils who were examined, arranged with reference to the character of their answering:—

	Classes of Boys' department.					Classes of Girls' department.				
	5th.	4th.	3rd.	2nd.	Total	5th.	4th.	3rd.	2nd.	Total

„ 60 „ 70,	5	4	7	3	19	5	3	12	3	23
„ 50 „ 60,	4	2	4	2	12	2	6	12	4	24
under 50,	1	5	6	8	20	–	3	16	2	21
Total number in each class, . .	12	15	25	15	67	16	15	45	10	86

From a consideration of the three principal tests of the effective force of a school on local education, namely, the character of the attendance (regular or irregular), the rate of progress of the pupils from class to class, and their actual proficiency, it appears (by Tables II., VI., and XI.) that in this school—

1. The character of the average attendance is good, it being 80 per cent. of the numbers on rolls in the boys' department, and 84 per cent. in the girls'.

2. The number of pupils advanced from class to class during the year bears to the number in average attendance the proportion of 50 per cent. in the boys' department, and 63 per cent. in the girls'.

3. The proportion to the number of pupils examined, of the number of them who answered 60 per cent. and above of the questions proposed, is 52 per cent. in the boys' and 48 per cent. in the girls' department.

This comparison of educational results shows a superiority of the girls' department over the boys'; for while the number of promotions made in the girls' is much greater than that effected in the boys', the proficiency of the pupils in the latter is only slightly in advance of that in the former. But it is only fair towards the present head master, who is most zealous, and is a highly competent teacher, that I should state that, from the outset, when he took charge of the school, he had to face very unusual difficulties. These disadvantageous circumstances being considered, it is certain that, but for his strenuous efforts, the results would have fallen far below those which I have exhibited above.

Ballymoney

(*c.*) ANNUAL REPORT for the Year 1868 on BALLYMONEY MINOR MODEL SCHOOL.

I. *State of buildings, &c.*—The school-rooms are in good repair; they are well lighted and ventilated, and present a neat and orderly appearance. There is, however, a very serious defect, which has caused much inconvenience. I refer to the want of a second class-room. There is, at present, only one class-room which is common to the male and the female departments, being used at alternate hours, by classes of male or female pupils; but it is inconveniently situated for either of these departments,

being in a different story of the building. A pupil teacher or a paid monitor having the charge of a class in this class-room is beyond the immediate control or supervision of the principal teachers. The want of a second class-room has proved a source of great inconvenience, and is the only serious defect to be noticed by me.

There has been no change in the staff of teachers during the past year.

II. *Attendance of Pupils.*—Table showing the average number on rolls, the average daily attendance, and the centesimal proportion of the latter to the former in each of the three departments for the year 1868:—

	Average on Rolls.	Average attendance.	Per-centage.
Boys' Department, . . .	90·8	71	78
Girls' „ . . .	70·3	49	70
Infants' „ . . .	56·4	48	85

The corresponding numbers for 1867 were:—

	Average on Rolls.	Average attendance.	Per-centage.
Boys' Department, . . .	87	6	76
Girls' „ . . .	73	54	74
Infants' „ . . .	55	43	78

III. Table showing the number of individual pupils, distributed according to religious denomination, for the year ended 31st December, 1868:—

	Boys.	Girls.	Infants.	Totals.

Note.—There were ten of the junior staff examined during the year; and of this number eight exhibited a satisfactory proficiency in the subjects prescribed in the course of study. Of the three who left the school during the year, two had received a training extending over three years, and one over two years.

X. *Annual Examination.*—The public examination and distribution of prizes took place in June last, in the presence of a large and respectable audience. The school-room, which has been always found entirely inadequate in its space accommodation on similar occasions, was also now overcrowded to inconvenience. But this did not abate the interest of the audience, the greater number of whom waited until the close of the day's proceedings, which appeared to give entire satisfaction. At the conclusion of the examination, the deserving pupils were called before the audience, and received from me their certificates of merit. *Appendix B. Reports upon District and Minor Model Schools. Ballymoney*

These certificates had been determined on the results of a preliminary examination, conducted by Mr. Bole and myself, and which had lasted for upwards of six days.

The following table exhibits the proficiency of the several classes in the boys' and girls' departments. In the observations which follow it, an estimate is given of the success which has attended each of those departments during the past year.

XI. TABLE showing the number of pupils who were examined in the year 1868, arranged with reference to the character of their answering:—

	Classes of Boys' department.					Classes of Girls' department.				
	5th.	4th.	3rd.	2nd.	Total	5th.	4th.	3rd.	2nd.	Total

" " 70 " 80,	1	1	5	1	8	4	–	5	2	11
" " 60 " 70,	4	9	7	1	21	–	5	5	7	17
" " 50 " 60,	4	3	10	–	17	–	4	5	1	10
" " under 50,	2	9	14	8	33	–	1	9	4	14
Total number in each class,	12	22	37	10	81	6	10	25	15	56

From a consideration of the three principal tests of the effective force of a school on local education, namely, the character of the attendance (regular or irregular), the rate of progress of the pupils from class to class, and their actual proficiency, it appears (by tables II., VI., and XI.) that in this school—

1. The character of the average attendance is fair, it being 78 per cent. of the number on rolls in the boys' department, and 70 per cent. in the girls'.

2. The number of pupils advanced from class to class during the year bears to the number in average attendance the proportion of 38 per cent. in the boys' department, and 65 in the girls'.

3. The proportion to the number of pupils examined, of the number of them who answered 60 per cent. and above of the questions proposed, is 38 per cent. in the boys', and 57 per cent. in the girls' department.

The comparison of educational results shows that the girls' department has been far more successful than the boys' during the year 1868.

(*d.*) ANNUAL REPORT for the Year 1868 on the ENNISKILLEN DISTRICT MODEL SCHOOL. *Enniskillen.*

I. *State of Buildings, Grounds, &c.*—The school-rooms are in excellent order, cheerful, well furnished, and properly ventilated.

The only defects deserving of notice are the following:—

1. The means for carrying off the surface water in the boys' and the

Appendix B.
Reports upon District and Minor Model Schools.
Enniskillen.

girls' playground are insufficient. The grounds remain flooded in the centre for some hours after heavy falls of rain. This defect is very inconvenient, as the way to the school-rooms lies through the playgrounds.

2. The grounds around the domestic establishment present a bare and neglected appearance. They are not used for any purpose whatever. They adjoin the public road and the principal entrance, and, from their rugged and uncultivated look, impress visitors unfavourably. The cost of making a few plots in them, and of planting some evergreens, would be inconsiderable, in comparison with the improvement the change would effect.

II. *Attendance of Pupils.*—Table showing the average number on rolls, the average daily attendance, and the centesimal proportion of the latter to the former in each of the three departments for the year 1868 :—

	Average on Rolls.	Average Attendance.	Per-centage.

Note.—The pupil-teacher who left in 1868, had been under training for one year This Model school was not in operation until September, 1867.

Appendix B.

Reports upon District and Minor Model Schools.

Enniskillen.

X. *Annual Examination.*—The public examination and distribution of prizes took place in July last. More than ordinary interest was manifested, as it was the first public examination of this school, which was opened in the previous year. The proceedings of the day were witnessed by a very large and respectable audience, which completely filled the spacious school-room of the boys' department. The classes were placed in succession in the gallery, and examined by their respective teachers. The answering of the boys in arithmetic and political economy was loudly applauded. The proficiency exhibited by the pupils in vocal music, which is taught with marked success by Mr. Morris, head master, gave entire satisfaction. At the conclusion of the examination the certificates of merit were handed by me to the deserving pupils.

The certificates had been determined by the results of a preliminary examination, conducted by Mr. Healy and myself, and which had occupied us for eight days.

The following table exhibits the proficiency of the several classes in the boys' and girls' departments. In the observations which follow it an estimate is given of the success which has attended each of them during the past year :—

XI. TABLE showing the number of pupils who were examined in the year 1868, arranged with reference to the character of their answering :—

	Classes of Boys' department.					Classes of Girls' department.				
	5th.	4th.	3rd.	2nd.	Total	5th.	4th.	3rd.	2nd.	Total

Total Number in each class,	–	24	43	38	105	–	5	10	20	35

From an examination of the three principal tests of the effective force of a school on local education, namely, the character of the attendance (regular or irregular), the rate of progress of the pupils from class to class, and their actual proficiency, it appears (from Tables II., VI., and XI.) that in this school—

1. The character of the average attendance is good in the boys' department, and fair in the girls', it being 86 per cent. of the number on rolls in the former, and 77 per cent. in the latter.

2. The number of pupils advanced from class to class during the year bears to the number in average attendance the proportion of 70 per cent. in the boys' department, and 49 per cent. in the girls'.

3. The proportion to the number of pupils examined, of the number of them who answered 60 per cent. and above of the questions proposed, is 50 per cent. in the boys', and 49 per cent. in the girls' department.

This comparison of educational results shows that the boys' department has been far more successfully conducted during the year than the girls'. As regards the latter, the number of the promotions is not greater than that which is effected generally in the ordinary rural schools, while in the better class of these the proficiency of the pupils is superior.

(*e.*) ANNUAL REPORT for the Year 1868 upon the SLIGO DISTRICT MODEL SCHOOL.

I. *State of School Premises.*—The condition of the school-rooms and class-rooms is quite satisfactory. But the playgrounds continue in the same unsafe condition as in previous years. Large blocks of stone, made still more prominent after every fall of rain, cover the surface in various parts and render the playgrounds dangerous to the pupils. A week seldom passes without an accident of a more or less serious nature happening to one of them. I beg leave to suggest that the attention of the Board of Public Works be called to this very serious defect.

The ornamental grounds in front of the building are too bare; the evergreens planted in the first year have entirely decayed. A small outlay would effect a marked improvement by fresh planting.

No change has been made in the staff of teachers during the year.

II. *Attendance of Pupils.*—Table showing the average number on rolls, the average daily attendance, and the centesimal proportion of the latter to the former in the three departments for the year 1868:

	Average on Rolls.	Average attendance.	Per-centage.
Boys' Department, ...	93·3	71·3	76·5
Girls' „	76·9	61·1	79·4
Infants' „	85·3	70·2	86·5

The corresponding numbers for 1867 were:—

	Average on Rolls.	Average attendance.	Per-centage.

NOTE.—Of the six pupil teachers who left during the year 1866, four had received a training extending over two years; and two over three years.

X. *Annual Examination.*—The public examination and distribution of prizes took place in July last. The school-rooms were, as usual, very tastefully decorated for the occasion. A large and respectable audience crowded the boys' spacious school-room, and showed by their attention and by their applause that they were deeply interested in the proceedings of the day. The conduct of the pupils was excellent. They were examined by the teachers in the leading subjects of the school programme. The proficiency of the classes of vocal music, which branch is taught with great ability and success by Mr. Feehan, head master, gave marked satisfaction. At the conclusion of the examination I handed the certificates of merit to the deserving pupils.

These certificates had been determined at a preliminary examination, conducted by Mr. Robinson and myself, and which had occupied us for upwards of nine days.

The following table exhibits the proficiency of the several classes of the boys' and girls' departments. In the observations which follow it an estimate is given of the success which has attended each of these departments during the past year.

XI.—TABLE showing the number of pupils who were examined, arranged with reference to the character of their answering :—

	Classes of Boys' Department.					Classes of Girls' Department.				
	5th.	4th.	3rd.	2nd.	Total	5th.	4th.	3rd.	2nd.	Total

From an examination of the three principal tests of the effective force of a school upon local education, namely, the character of attendance (regular or irregular), the rate of progress of the pupils from class to class, and their actual proficiency, it appears (from Tables II., VI., and XI.) that in this school—

1. The character of the average attendance is fair, it being 77 per

Appendix B.

Reports upon District and Minor Model Schools.

Sligo.

cent. of the number on rolls in the boys' department, and 79 per cent. in the girls'.

2. The number of pupils advanced from lower to higher classes during the year bears to the number in average attendance the proportion of 37 per cent. in the boys' department, and 44 per cent. in the girls'.

3. The proportion to the number of pupils examined, of the number of them who answered 60 per cent. and above of the questions proposed, is 64 per cent. in the boys', and 52 per cent. in the girls' department.

This comparison of educational results leaves the two departments about equal as to the work done during the year; for while the promotions have been more numerous in the girls' department than in the boys', the answering in the latter has been superior to that in the former. But in neither department have the results been satisfactory, especially as regards the number of promotions, which is below that which is generally reached in the ordinary rural schools.

Omagh.

(*f.*) ANNUAL REPORT for the year 1868 upon the OMAGH MINOR MODEL SCHOOL.

I. *State of Premises.*—The condition of the school buildings and the playgrounds is quite satisfactory. The school furniture is adequate to the requirements of the school, and is in proper repair. The school-rooms are kept with care, and present a very neat and orderly appearance. There is no defect deserving of notice.

No change has taken place in the staff of teachers during the year.

II. *Attendance of Pupils.*—Table showing the average number on rolls, the average daily attendance, and the centesimal proportion of the latter to the former in each of the three departments for the year 1868 :—

	Average on Rolls.	Average attendance.	Per-centage.
Boys' department,	98·6	81·8	82·9
Girls' „	85·	69·7	82·
Infants' „	81·	65·9	81·3

The corresponding numbers for 1867 were :—

	Average on Rolls.	Average attendance.	Per-centage.
Boys' department,	99·2	77·9	78·5
Girls' „	87·2	68·7	78·8

IX. TABLE showing the number of pupil teachers and paid monitors who left the establishment, having completed their period of training, during the 12 months ended the 31st December, 1868:—

	Pupil Teachers.		Paid Monitors.		
	Males.	Females.	Males.	Females.	Totals.
Number who left during the year 1868,	1	1	1	1	4
„ were admitted to the Central Training Establishment,	1	1	–	–	2
„ are employed in other schools or private tuition,	–	–	1	–	1
„ have adopted some other calling in life,	–	–	–	1	1

NOTE.—The pupil-teachers and paid monitors—eleven in number—were examined during the year in the subjects set down in their course of study. The answering of ten of them was satisfactory. Of the four who left the school during the year one had been in training for one year, one for two, and two for four years.

X. *Annual Examination.*—The public examination and distribution of prizes took place in November last, in the presence of a large and respectable audience. The school-rooms were tastefully decorated. The conduct of the pupils was excellent, and their intelligent answering, more particularly that of the girls, elicited frequent marks of approbation.

The premiums had been determined at a preliminary examination conducted by Mr. Adair and myself, and which had occupied us for seven days.

The following table exhibits the proficiency of the several classes in the boys' and girls' departments. In the observations which follow, an estimate is given of the success which has attended each of the departments during the past year.

XI. TABLE showing the number of pupils who were examined in the year 1868, arranged with reference to the character of their answering:—

	Classes of Boys' department.					Classes of Girls' department.				
	5th.	4th.	3rd.	2nd.	Total	5th.	4th.	3rd.	2nd.	Total
Number of pupils whose answering amounted to 90 per cent.,	–	–	–	–	–	6	2	–	–	8
„ „ 80 and under 90,	2	–	–	–	2	–	1	1	–	2
„ „ 70 „ 80,	2	–	8	2	12	–	4	14	2	20
„ „ 60 „ 70,	2	4	11	6	23	–	4	18	–	22
„ „ 50 „ 60,	–	10	9	9	28	–	–	4	–	4
„ „ under 50,	–	1	2	26	29	–	–	6	4	10
Total number in each class,	6	15	30	43	94	6	11	43	6	66

From an examination of the three principal tests of the effective force of a school on local education, namely, the character of the attendance (whether regular or irregular), the rate of progress of the pupils from class to class, and their actual proficiency, it appears (from Tables II., VI., and XI.), that in this school—

1. The character of the average attendance is good, it being 83 per cent. of the number on rolls in the boys' department, and 82 per cent. in the girls'.

2. The number of pupils advanced from class to class during the year bears to the number in average attendance the proportion of 31 per cent. in the boys' department, and 60 per cent. in the girls'.

3. The proportion to the number of pupils examined, of the number of them who answered 60 per cent. and above of the questions proposed, is 39 per cent. in the boys', and 79 per cent. in the girls' department.

This comparison of educational results shows a very marked superiority of the girls' department over the boys'. With respect to the number of promotions made in the latter during the year, and the proficiency exhibited by the pupils, they are inferior to those which are frequently accomplished in ordinary rural schools.

(*g.*) ANNUAL REPORT for the Year 1868 upon the NEWTOWN-STEWART MINOR MODEL SCHOOL. *Newtown stewart.*

I. *State of Premises.*—The school-rooms, class-rooms, &c., are in a satisfactory state of repair, and are kept with order and neatness. The accommodation is amply sufficient for the number of pupils in attendance.

With respect to light, ventilation, water-supply, and sewerage, there is no defect deserving of notice.

No change has taken place in the staff of teachers during the past year.

II. *Attendance of Pupils.*—Table showing the average number on rolls, the average daily attendance, and the centesimal proportion of the latter to the former in each of the three departments for the year 1868:—

	Average on Rolls.	Average Attendance.	Per centage.
Boys' department,	47·4	40·7	86·
Girls' „	52·1	42·8	82·
Infants' „	43·	37·6	87·

The corresponding numbers for 1867 were:—

	Average on Rolls.	Average Attendance.	Per-centage.
Boys' department,	49·5	38·	77·
Girls' „	47·	36·7	78·
Infants' „	42·5	37·2	88·

III. Table showing the number of individual pupils, distributed according to religious denomination, for the year ended the 31st December, 1868:—

IX. Table showing the number of pupil teachers and paid monitors who left the establishment, having completed their period of training, during the twelve months ended the 31st December, 1868:—

One Female Pupil Teacher left during the year 1868, having adopted some other calling.

NOTE.—The junior staff, consisting of six pupil teachers, or paid monitors, were examined in 1868 in the subjects set down in their course of study. The answering of all of them was satisfactory. The pupil teacher who left the school in 1868, had received a training extending over three years.

Appendix B.

Reports upon District and Minor Model Schools.

Newtownstewart.

X. *Annual Examination.*—The public examination and distribution of prizes took place in June last. A large and respectable audience crowded the school-room to witness the proceedings of the day, which, as usual, appeared to excite the warmest interest. The Rev. Dr. M'Ivor, ex-F.T.C.D., the indefatigable friend and advocate of popular education, was also present. The rooms were tastefully decorated for the occasion. The classes were placed in succession on the platform and examined by their respective teachers. At the conclusion of the examination, the certificates of merit were handed by me to the deserving pupils.

The premiums had been determined by the results of a preliminary examination, conducted by Mr. Adair and myself, and which had occupied us for six days.

The following table exhibits the proficiency of the pupils of the boys' and girls' departments. In the observations which follow it an estimate is given of the success which has attended each of the departments during the past year.

XI. Table showing the number of pupils who were examined in the year 1868, arranged with reference to the character of their answering :—

	Classes of Boys' department.					Classes of Girls' department.				
	5th.	4th.	3rd.	2nd.	Total	5th.	4th.	3rd.	2nd.	Total
Number of pupils whose answering amounted to 90 per cent.,	2	–	–	–	2	1	–	–	–	1
" " 80 and under 90,	1	1	1	–	3	2	–	–	1	3
" " 70 " 80,	–	4	3	2	9	2	1	3	4	10
" " 60 " 70,	–	–	8	1	9	–	6	5	4	15
" " 50 " 60,	–	–	6	2	8	–	1	6	6	13
" " under 50,	–	–	9	5	14	–	–	2	6	8
Total number in each class, . .	3	5	27	10	45	5	8	16	21	50

From a consideration of the three principal tests of the effective force of a school on local education, namely, the character of the attendance (regular or irregular), the rate of progress of the pupils from class to class, and their actual proficiency, it appears (by Tables II., VI., and XI.) that in this school—

1. The character of the average attendance is good, it being 86 per cent. of the number on rolls in the boys' department, and 82 per cent. in the girls'.

2. The number of pupils advanced from class to class during the year bears to the number in average attendance the proportion of 42 per cent. in the boys' department, and 56 per cent. in the girls'.

3. The proportion to the number of pupils examined, of the number of them who answered 60 per cent. and above of the questions proposed, is 51 per cent. in the boys' and 58 per cent. in the girls' department.

This comparison of educational results shows that the girls' department has been far more successfully conducted than the boys'. With regard to the number of promotions made in the latter, and the proficiency exhibited by the pupils, they are not higher than those which are commonly found in the better class of the ordinary rural schools.

M. Sullivan,	do.	15	do.	1/67
M. Crofts,	do.	16	Established Church,	3/68
C. Moore,	do.	17	do.	5/68
C. Gibbons,	do.	16	do.	1/67

On the 1st January Mr. Linehan, head master, was transferred by the Board to the Monaghan Model School, in place of Mr. M'Entee, head

master, who has succeeded him here. It is due to Mr. Linehan to state that for the year the school has been under my charge, I always found him actively engaged, either teaching himself, or superintending the teaching of others; and that the proficiency exhibited at the late annual examination of the male school, so far as it could be traced to his tuition or supervision, was very creditable to him.

TABLE II.—This table gives the literary classification of the pupils on the rolls at the end of the year.

Subjects.	Boys.	Girls.	Infants.	Subjects.	Boys.	Girls.	Infants.

Cork.

TABLE IV.—*continued.*

		Boys.	Girls.	Infants.	Total.
1867.	Established Church,	189	142	126	457
	Roman Catholics,	30	31	27	88
	Presbyterians,	18	10	17	45
	Others,	36	41	31	108
	Totals,	273	224	201	698

TABLE V.—Number remaining on the rolls 31st December, 1868.

	Boys.	Girls.	Infants.	Total.
At 5*s.* per quarter,	180	137	105	422
,, 2*s.* 6*d.* ,,	61	48	34	143
,, 1*s.* or 1*s.* 1*d.* ,,	20	16	17	53
Total on the rolls,	261	201	156	618

It appears from this last table that very few children of the humbler classes are entered on the rolls. They are admitted at the lowest rate, 1*s.* 1*d.* per quarter, and there being only 53 at this rate, while there are 422 at the highest rate, makes it clear that the great advantages of these schools are enjoyed in a large measure by the children of parents in comfortable circumstances.

Annual Examination.—The annual examination took place in December, immediately before vacation. The classes were carefully examined by the District Inspector and myself, and due pains were taken to measure the work done during the year in each school, and select the most deserving pupils for the premiums granted by the Commissioners.

A full report of this examination, showing the proficiency of the different classes in each school, in the several subjects set down in their respective programmes has been sent to the office.

Infant School.—Spelling, good; reading, excellent; penmanship, good; grammar, good; geography, good; arithmetic, good.

Girls' School.—Reading, very fair; penmanship, tolerable as to junior class, very fair as to senior classes; spelling, very fair; grammar, tolerable; geography, very fair; arithmetic, tolerable; writing from dictation, good; etymology, very fair; sewing, &c., &c., satisfactory.

Boys' School.—Reading, good; spelling, good; grammar, very fair; geography, very fair; penmanship, good; writing from dictation, good; etymology, good; book-keeping, very fair; mensuration, very fair; algebra, very fair; natural philosophy, very fair.

Pupil-Teachers and Paid Monitors.—Six pupil-teachers left the male school this year for the central training school, and one for a clerkship. Neither pupil-teacher nor monitor left the girls' or the infants' school.

I have recently examined the pupil-teachers of nine months' standing that remained in the school, and was pleased with their proficiency.

The monitresses have been examined at a written examination, and orally, and with a few exceptions, the results of their examination were satisfactory.

I have the honour to be, gentlemen, your obedient servant,

TIMOTHY SHEAHAN, Head Inspector.

The Secretaries, &c., &c.

APPENDIX to foregoing REPORT on CORK DISTRICT MODEL SCHOOL for the year 1868 by TIMOTHY SHEAHAN, Esq., Head Inspector, and JAMES GILLIC, Esq., District Inspector. *Appendix B.* Reports upon District and Minor Model Schools. *Cork.*

Cork, January 9, 1869.

GENTLEMEN,—We beg to submit the following report of the progress and proficiency of the classes in the three departments of this school, as ascertained at the examination held previous to the Christmas vacation.

Infant School.—The programme of examination for first class included reading, spelling, and geography, and the proficiency on these subjects was very satisfactory.

Second Class.—Programme:—Reading—Second Book to page 110. Spelling, including a knowledge of verbal distinctions. Grammar—all the parts of speech. Geography—outlines of maps of Europe, Ireland, and World. Arithmetic—notation to four places, and multiplication. Writing on paper. Recitation.

The results of the examination were as follow:—reading, excellent; spelling, grammar, arithmetic, writing, geography, good; recitation, very good.

Female School.—First Class.—Proficiency in reading and spelling very fair; in writing and arithmetic, tolerable.

Second Class.—Programme:—Reading—Second Book to page 157. Spelling—first class of verbal distinctions. Arithmetic—simple rules to short division. Grammar—to distinguish all the parts of speech. Geography—outlines of Maps of World, Europe, and Ireland. Writing—Foster's No. 4.

Results of Examination.—Reading, very fair; writing, tolerable; grammar, fair; geography, tolerable; arithmetic, poor.

Third Class.—Programme:—Reading—Third Book to page 160. Spelling—first, second, and third classes of verbal distinctions, rules for spelling, with exceptions. Grammar, page 21 to 54, large type. Geography—Maps of World, Europe, and Ireland; arithmetic, compound long division of money; tables of weights and measures. Writing—Foster's No. 6. Writing from dictation—Third Book to page 160.

Results of Examination.—Reading, very fair; spelling, very fair; grammar, tolerably fair; geography, fair; arithmetic, tolerably fair; writing, tolerable; writing from dictation, good.

Fourth Class.—Programme:—Reading—Fourth Book to page 273; poetry to 239. Spelling—five classes of verbal distinctions; rules for spelling, difficult words to page 130. Derivations—prefixes, affixes, and Latin roots. Grammar, Syntactical parsing, Text Book to page 100. Geography—Maps of the Continents and British Isles, first two chapters of mathematical geography, and preliminary definitions. Arithmetic—practice and first ten rules of mental arithmetic.

Results of Examination.—Reading, writing, grammar, and geography, very fair; arithmetic, backward; writing from dictation, excellent; Spelling Book Superseded, very fair; etymology, good.

Fifth Class.—Programme:—Reading—Fourth Book, Literary Class Book, Girls' Reading Book to page 36, poetry of Fourth Book to page 250, British Poets. Spelling Book—five classes of verbal distinctions, rules for spelling, difficult words to page 142. Etymology—prefixes, affixes, and Latin roots in Spelling Book. Grammar—rules of Syntax, Syntactical parsing, Text Book to page 100. Geography—Maps of the Continents and British Isles, three chapters of mathematical geography.

Appendix B.

Reports upon District and Minor Model Schools.

Cork.

Arithmetic—all the rules to interest (inclusive), and first ten lines for mental calculation.

Proficiency of Pupils.—Reading, fair; writing, very fair; grammar, backward; arithmetic, backward; geography, fair; writing from dictation, excellent; Spelling-Book Superseded, tolerable; etymology, tolerable.

Proficiency of female school in needlework satisfactory.

Boys' School.—The answering of the first class, seven in number, was very fair in all branches.

Second Class.—Programme:—Reading—Second Book to page 259. Spelling—first class verbal distinctions. Grammar—all the parts of speech. Geography—Maps of World and Ireland. Writing—Foster's, Nos. 2 and 4. Arithmetic—notation to eight places; multiplication of money.

Proficiency.—Reading, spelling, grammar, geography, writing, and arithmetic, good.

Third Class.—Programme:—Reading—Third Book. Spelling—three classes of verbal distinctions. Grammar—Etymological parsing, and the more important rules of Syntax. Geography—Maps of World, Europe, and Ireland. Arithmetic—easy questions in practice. Writing, Foster's, No. 6.

Proficiency.—Reading and writing, good; arithmetic, grammar, and geography, very fair; writing from dictation and spelling, good.

Fourth Class.—Programme:—Reading—Fourth Book to page 200. Spelling-Book Superseded—three classes of verbal distinctions, prefixes and affixes, Latin roots. Grammar—Syntactical parsing, Sullivan—large type to end of syntax, and more important parts of small type. Arithmetic—vulgar and decimal fractions, practice, interest, and square root. Mensuration—areas of square, parallelogram, triangle, quadrilateral, and circle—diameter being given. Geography—Geography of British Islands, Maps of Europe and Asia, preliminary definitions.

Proficiency.—Reading, Spelling-Book Superseded, and grammar, good; geography, very fair; writing from dictation, penmanship, arithmetic, and mensuration, good.

Fifth Class.—Programme:—Reading—Fourth Book. Spelling-Book Superseded, all; Grammar, all. Geography—general course. Arithmetic—to profit and loss and square root (inclusive). Mensuration—surfaces and solids. Euclid—three books. Algebra—simple equations. Book-keeping—four sets.

Proficiency.—Reading, writing, and etymology, writing from dictation, and arithmetic, good; grammar, geography, algebra, geometry, mensuration, and book-keeping, very fair.

We are happy to report that the boys' school is in a very flourishing and efficient condition; and we think it fair to Mr. Linehan, the late head master, to add, that the successful results attained are due, in a great measure, to his untiring energy and industry, directed by great professional skill.

In the advanced classes of the girls' school we observed that the pupils were backward in arithmetic and grammar; but it must be remembered that those pupils had not the advantage of commencing their education in National schools.

The state of the infant department, as regards the progress and proficiency of the children, is highly satisfactory.

We have the honour to be, gentlemen, your obedient servants,

TIMOTHY SHEAHAN, Head Inspector.
J. GILLIC, District Inspector.

The Secretaries, &c., &c.

No. 12.—Annual Report for the year 1868, upon the Ballymena Model School, by J. G. Fleming, Esq., Head Inspector.

Derry, January, 1869.

Gentlemen,—I beg to submit, for the information of the Commissioners, the following report on the Ballymena Model School for the year 1868:—

The house, grounds, and premises present an appearance in every way creditable to Mr. Given, the head master. He has shown much taste and judgment in the selection and culture of the flowers and shrubs which adorn the grounds, and, as no caretaker has been employed, the necessary work has been done at a trifling cost.

Some improvements are needed in the school-rooms and adjacent passages, these are far too numerous and intricate; some of them might, with great advantage, be dispensed with, as they shut out much light and fresh air from the corridors which lead to the school-rooms.

I have also to call attention to the imperfect ventilation in all the apartments of the institution, a defect which can be easily remedied at a small outlay, as it is only necessary that the windows should be constructed so as to open at the top. An office for the Inspector is also much wanted, a room, now seldom used, adjoining the hall door, would answer this purpose; a water-closet and bath-room should be fitted up for those who reside in the establishment, and the sewerage and out-offices of the infants' school put in proper order.

The following tables furnish information on the main points of interest in connexion with the statistics of this model school.

Appendix B.

Reports upon District and Minor Model Schools.

Ballymena.

A marked increase has taken place in the average daily attendance in the boys' and infants' schools during the past year, while I have to report a slight falling off in the attendance at the girls' school. I have to remark that many of the pupils reside at a considerable distance from Ballymena, but they willingly travel many miles daily by railway, by car, and even on foot, in order that they may avail themselves of the advantages open to them in the model school. In some instances parents send their children to lodge in the town, as their own places of residence are too distant from it. These facts show that the schools are thoroughly appreciated by the public, and the increased attendance is very creditable to the teachers, especially as there is a large number of schools in Ballymena, and the competition to secure pupils is keen and persevering.

Mr. Given states that the pupil-teachers and monitors now in the boys' school are the best he has had since the opening of the institution in 1849. Five of them were his own pupils, of whom two were advanced to their present situation during the past twelve months. The assistant in the boys' school has been punctual, assiduous, and, to a great extent, successful in the performance of his duties. He cannot, however, teach drawing; this is a serious drawback. I therefore beg to recommend his removal to some model school in which there is a person qualified to instruct in this branch. Mr. Shannon's successor should be qualified to act as literary assistant and drawing master.

I give in the annexed table the classification of the pupils examined in December last by me and Mr. Wilson, District Inspector. I also specify the results of their answering in the usual branches:—

TABLE IV.—TEACHING STAFF.

	Boys' School.	Girls' School.	Infants' School.
Principal,	Mr. J. Given,	Miss A. Coyle,	Mrs. B. Joyce.
Assistant,	Mr. A. Shannon,	Miss J. Brown,	Miss E. J. Magee.
	Six pupil-teachers,	Five monitresses.	
	Two senior monitors.		

The examination of the senior and middle divisions in the boys' and girls' schools was mainly conducted by means of written questions prepared for the occasion. In this way the pupils of the same class were tested by the same standard. Of course ample time was allowed for writing down the answers to the several questions, and, when necessary, for entering down the work which their solution involved. This plan saved much time, and it afforded little room for the haphazard answering incidental to an oral examination of young persons more or less excited by such an ordeal. The figures in the table of proficiency show that the pupils in the boys' school acquitted themselves creditably at the preliminary examination.

The pupils in the girls' school read with ease and accuracy several difficult passages in prose and verse, and their exercises written from dictation exhibit very few errors in spelling, punctuation, and the use of capital letters. The style of their penmanship was also pretty good; but their answering in other subjects was below the standard reached in almost every other model school. I regret to add that the specimens of plainwork executed by the pupils were by no means numerous. I believe sufficient attention had not been given to this all-important branch. At this examination special premiums were allotted to those pupils who excelled in needlework, but henceforth the marks for good sewing, knitting, &c., will be added to those assigned for good answering in the literary branches. Hence girls who choose to neglect their needlework will have but a small chance of winning a premium, a certificate of merit, or even honourable mention at the next examination, as very high marks will be obtained by those who excel in plainwork.

I mentioned in my general report that little children who are fortunate enough to attend a good infant school for any length of time are, generally speaking, among the best pupils of the upper schools. I am happy to be able to state that the Ballymena Model Infant School, as far as I can form an opinion, corroborates this assertion. Mrs. Joyce, the head mistress, has trained her little pupils to habits of cleanliness, to be obedient and docile, and, what is far more important, to love and speak the truth. Many of them can read, write, and spell words of two syllables with surprising

Appendix B.

Reports upon District and Minor Model Schools.

Ballymena.

readiness and accuracy; they can also work easy sums in simple addition and subtraction. But the play-ground, object lessons, manual exercises, and singing, very properly occupy most of their time.

The annual public examination of the pupils was held on Wednesday, the 23rd December, in presence of a large and highly respectable audience. Indeed at one period of the day the examination hall was so crowded that many persons anxious to witness the interesting proceedings were, owing to the want of room, obliged to forego that pleasure. The examination of the classes began at 11 and ended at 2.30 o'clock. The programme was extensive and varied, and therefore afforded the principal and assistant teachers an excellent opportunity of making known to all present their method of imparting instruction, and of acquainting them with the range of subjects which constitute the school programme or course of study. The exercises written from dictation by the pupils of the senior divisions and the arithmetical questions proposed to them were selected by some gentlemen who expressed themselves perfectly satisfied with the results of their examination in these essential subjects.

No. 13.—ANNUAL REPORT upon the EXAMINATION of the BAILIEBOROUGH DISTRICT MODEL SCHOOL for the Year 1868, by M. FITZGERALD, Esq., Head Inspector, and A. J. SIMPSON, Esq., District Inspector.

Bailieborough, February, 1869.

Bailieboro'.

GENTLEMEN,—We have the honour to submit, for the information of the Commissioners of National Education, the following report of our examination of Bailieborough District Model School, which was held in October last. The preliminary examination commenced on the first of that month, and lasted during portions of six days, equivalent to about five days in all. We examined every class in every subject of the school programme, and from the records of the answering we have prepared tables showing the proficiency attained in each class and each branch of instruction. In drawing up these tables we adopted the following standard for those subjects in which the examination was catechetical, and in which each answer and miss was recorded. We considered 60 per cent. and above as "good" answering; 40 per cent. and under 60 as "fair," from 20 to 40 per cent. as "middling," and under 20 per cent. as "bad." In reading and writing, which could not be measured in the same way, the terms used sufficiently denote our estimate of the proficiency. It is to be remembered, however, that the terms "good," "fair," &c., denote relative, not absolute merit, and are to be understood as having reference only to the class in which the pupil is placed. Thus "good" in fifth class, and the same term applied to second class, by no means indicate equal merit, but simply that the pupils who attained that standard had acquitted themselves "well" in their respective classes, according to the recognised programme for each class, and due regard being had to difference of age and standing in school. We are of opinion that tables thus drawn up exhibit more fairly and more accurately the general state of the school than an absolute proficiency table, such as is used in reporting on ordinary National schools, in which no allowance is made for the difference in the classification of the pupils tabulated.

The number of pupils on the rolls of the school at the time of the examination was 232, consisting of 89 boys, 90 girls, and 53 infants; and of these 69 boys, 85 girls, and 10 infants, were minutely examined, and their answering recorded. Of the 20 boys not examined, ten—viz., two in the fourth class, five in the third, and three in the second, failed to attend; and the other ten, of whom three were in second class, and seven in first, were pupils who had been so recently admitted to the school that they could not fairly be considered as belonging to it. Of the 90 girls on the rolls, 85 were present, and were examined; and of the five absentees, three were in second class, and two in first class. The ten infants examined were in the two highest drafts of second class; the remaining infants we considered too young to subject them to formal examination.

The attendance at Bailieborough Model School differs in one respect from that at many others, namely, that it is largely made up of pupils from the surrounding country, some of whom lodge in Bailieborough for the purpose of attending the school, and several of whom travel considerable distances to and from school every day. These country pupils are generally boys or girls who have spent some time at ordinary National schools, and who come to the model school for the purpose of finishing their education, preparatory either to becoming teachers, or to seeking employment in shops or offices. Many former pupils of this class, are now employed as teachers, or filling other situations, for which they would scarcely

Appendix B.

Reports upon District and Minor Model Schools.

have been able to qualify had it not been for the opportunity of obtaining superior instruction afforded by this model school.

We now proceed to give the tabulated results of our examination of the boys' and girls' schools, merely adding to each table a brief summary of the information it conveys, and a general expression of our opinion as to the manner in which the subject to which it relates has been taught.

Bailieboro'.

TABLE I.—Boys' School. Reading:—

Class.	Draft.	Number Examined.	Good.	Fair.	Middling.	Bad.
V.	First, . . .	2	2	-	-	-
IV.	First, . . .	6	2	3	1	-
„	Second, . . .	12	8	4	-	-
„	Third, . . .	6	-	3	3	-
III.	First, . . .	12	7	2	2	1
„	Second, . . .	8	5	3	-	-
„	Third, . . .	7	3	1	3	-
II.	First, . . .	9	3	5	1	-
„	Second, . . .	7	-	5	2	-
Totals, . . .		69	30	26	12	1
Per-centages, . .		100·0	43·5	37·7	17·4	1·4

From this table it appears that, in round numbers, 81 per cent. of the pupils examined read "well," or "fairly," while about 19 per cent. failed to acquit themselves to our satisfaction. The chief failure was in the *lowest* drafts of the fourth and third classes, a fact which may probably account for the deficiency without imputing neglect to the teachers. The large per-centage under the first two heads shows that the subject, as a whole, is carefully taught. The general style of the reading was fluent and intelligent, such as readily to convey to a listener the sense of the passage read.

TABLE II.—Boys' School. Spelling, &c.:—

Class.	Draft.	Number Examined.	Good.	Fair.	Middling.	Bad.
V.	First, . . .	2	2	-	-	-
IV.	First, . . .	6	2	3	1	-
„	Second, . . .	12	4	6	2	-
„	Third, . . .	6	5	1	-	-
III.	First, . . .	12	8	2	2	-
„	Second, . . .	8	3	1	3	1
„	Third, . . .	7	4	1	2	-
II.	First, . . .	9	5	2	-	2
„	Second, . . .	7	5	2	-	-
Totals, . . .		69	33	18	10	3
Per-centages, . .		100·0	55·1	26·1	14·5	4·3

The proficiency in spelling accords very closely with that in reading, 81 per cent. being classed as "good," or "fair," and only 19 per cent. as "middling," or "bad." The sub-divisions of the first two heads are, however, in favour of the spelling, as 55 per cent., or more than half the

entire number examined, appear as "good" spellers. The examination in spelling consisted not only of difficult words selected from the Lesson Books, but included in the senior classes the meanings of words and the rules for spelling, and in all classes portions of the Spelling-Book Superseded.

TABLE III.—Boys' School. Writing.

Class.	Draft.	Number examined.	Good.	Fair.	Middling.	Bad.
V.	—	2	2	–	–	–
IV.	First, . . .	6	5	1	–	–
,,	Second, . .	12	6	5	1	
,,	Third, . . .	6	1	2	3	–
III.	First, . . .	12	5	6	1	–
,,	Second, . .	8	1	4	3	–
,,	Third, . . .	7	1	4	2	–
II.	First, . . .	10	–	5	5	–
,,	Second, . .	7	–	2	5	–
Totals, . . .		70	21	29	20	–
Per-centages, . .		100·0	30·0	41·4	28·6	–

The proficiency in writing does not call for any special remark. The boys in the senior classes generally write "well" or "fairly," those in the junior classes "fairly" or "middling." Of the entire number examined, over 70 per cent. acquitted themselves satisfactorily; while nearly 30 per cent. failed to do so. We consider that, on the whole, the penmanship might be better; and that taking into account its great importance as a branch of primary education, no pains should be spared to make it so. It is right, however, to mention, that the schoolroom is often inconveniently crowded.

TABLE IV.—Boys' school. Arithmetic.

Class.	Draft.	Number examined.	Good.	Fair.	Middling.	Bad.
V.	—	2	2	–	–	–
IV.	First, . . .	6	3	3	–	–
,,	Second, . .	12	5	5	2	–
,,	Third, . . .	6	2	3	1	–
III.	First, . . .	11	4	4	2	1
,,	Second, . .	8	4	3	1	–
,,	Third, . . .	7	–	4	2	1
II.	First, . . .	10	4	4	2	–
,,	Second, . .	7	3	3	1	–
Totals, . . .		69	27	29	11	2
Per-centages, . .		100·0	39·1	42·1	15·9	2·9

The proficiency in arithmetic is also in close accord with that in reading and spelling; the per-centage of "good" and "fair" being again 81; and of "middling" and "bad," 19. This subject is well taught, the pupils are made acquainted not merely with the rules, but

Appendix B.

Reports upon District and Minor Model Schools.

Bailieboro'.

with the principles on which they depend; and the boys in the senior classes worked, with readiness and accuracy, difficult exercises in the more advanced parts of the science. The answering of the senior classes in the theory of proportion, and fractions, vulgar and decimal, was highly creditable. Boys who complete this course in this school become good arithmeticians.

TABLE V.—Boys' School. Grammar.

Class.	Draft.	Number examined.	Good.	Fair.	Middling.	Bad.
V.	—	2	2	–	–	–
IV.	First, . . .	6	1	4	1	–
,,	Second, . .	12	5	4	3	–
,,	Third, . . .	6	1	2	1	2
III.	First, . . .	12	7	3	1	1
,,	Second, . .	8	6	2	–	–
,,	Third, . . .	7	3	4	–	–
II.	First, . . .	9	7	1	1	–
,,	Second, . .	7	4	2	1	–
Totals, . . .		69	36	22	8	3
Per-centages, . .		100·0	52·2	31·9	11·6	4·3

The examination in grammar was conducted nearly in accordance with the ordinary school programme, and extended from pointing out and defining the principal parts of speech by the second class to syntactical parsing, and the analysis of sentences in the fifth class. The proficiency throughout was satisfactory; 84 per cent. of those examined being classed under the first two heads; and only 16 per cent. appearing as "middling" and "bad."

TABLE VI.—Boys' School. Geography.

Class.	Draft.	Number examined.	Good.	Fair.	Middling.	Bad.
V.	—	2	2	–	–	–
IV.	First, . . .	6	4	2	–	–
,,	Second, . .	12	5	4	3	–
,,	Third, . . .	6	2	2	2	–
III.	First, . . .	11	4	2	4	1
,,	Second, . .	8	5	2	1	–
,,	Third, . . .	7	1	4	2	–
II.	First, . . .	10	4	5	1	–
,,	Second, . .	7	1	4	2	–
Totals, . . .		69	28	25	15	1
Per-centages, . .		100·0	40·6	36·2	21·8	1·4

Geography receives due attention and is taught with success. The junior classes exhibited a fair knowledge of the Maps of the World, Europe, and Ireland; and the senior classes were further well prepared in portions of the text-book, and the elements of mathematical and physical geography.

TABLE VII.—Boys' School. Writing from Dictation.

Class.	Draft.	Number examined.	Good.	Fair.	Middling.	Bad.
V.	—	2	2	–	–	–

Totals, . . .		63	52	8	1	2
Per-centage, . .		100·0	82·5	12·7	1·6	3·2

* Second draft of Second Class not examined in Writing from Dictation.

The proficiency in writing from dictation was extremely satisfactory; the very large proportion of 82·5 per cent. being classed as "good;" and only 4·8 per cent. below "fair." The senior classes were required to write on paper long passages from their respective lesson books, and the junior classes shorter and less difficult passages on slates. It is right to mention that errors in punctuation were not reckoned when awarding the marks for this subject; mistakes in orthography alone being counted.

Besides the ordinary course of instruction, common to all National schools, the senior classes in this model school are prepared in several extra subjects, viz.—Euclid, mensuration, algebra, trigonometry, book-keeping, and different branches of natural science. We examined them in all these subjects, partly by papers, and partly *viva voce*, and found them generally well taught. Indeed the school bears a high reputation for its scientific teaching; and the science classes in connexion with it are among the most successful in the three kingdoms, under the science and art department. At the examinations held in May, 1868, the pupils of the Bailieborough science class in acoustics, light, and heat, obtained a larger number of first-class certificates than the "eleven" next best classes in same subjects in the United Kingdom put together. This class, though taught in the model school by the head master, Mr. Doherty, and including several pupils of the school, both male and female, is quite distinct from it, and does not come under our inspection. We merely allude to it now because we desire to place on record the unprecedented success it has attained; and because its success confirms in a remarkable manner the favourable opinion we entertain of Mr. Doherty's ability and zeal as a teacher.

Speaking generally, we are happy to be able to say that the Bailieborough boys' school is in a highly efficient and satisfactory state. The different branches, as has been seen, are thoroughly and well taught; and the discipline and general tone of the school are excellent.

It is much to be regretted that the urgent representations regarding the necessity of increasing the school accommodation, which have been made annually for some years, have not yet been successful. The pupils, both in the boys' and girls' schools, are inconveniently crowded, and the work of instruction is consequently carried on under difficulties which ought not to exist.

Appendix B.
„ Reports upon District and Minor Model Schools.
Bailieboro'.

We now proceed to give, for the female school, tables similar to those already given of the result of our examination of the boys.

It appears from this table that over 70 per cent. of the girls examined acquitted themselves more or less satisfactorily in reading; but, on the other hand, nearly 30 per cent. failed to satisfy us in this most important branch. Examining the table more closely, we observe that the fourth and fifth classes generally did well, and that the failure was almost entirely confined to portions of the second and third classes. The reading of the senior classes was fluent and intelligent, and characterized by a degree of distinctness rarely met with in female schools.

TABLE II.—Girls' School. Spelling, &c.

Class.	Draft.	Number Examined.	Good.	Fair.	Middling.	Bad.
V.	—	8	5	2	1	–

Totals,		85	35	31	15	4
Per-centages,		100·0	41·2	36·5	17·6	4·7

Under the head of spelling are included the meanings of words and a knowledge, varying in each class, of the verbal distinctions and the rules for spelling, as given in Dr. Sullivan's Spelling-Book Superseded. Nearly 78 per cent. of those examined acquitted themselves creditably; and, except in the second draft of the second class, the answering was remarkably uniform. This is the surest test of careful teaching, for it proves that the teacher's attention was not bestowed upon the clever pupils

alone, but that the duller ones, who usually form the majority, received their full share of instruction.

Table III.—Girls' School.—Writing.

Totals, . . .		85	12	47	26	–
Per-centages, . .		100·0	14·1	55·3	30·6	–

We cannot speak favourably of the writing in the girls' school. Very few comparatively could be classed as "*good*" writers; and though a large proportion appear as "*fair*," the term is used rather relatively than absolutely. The fault is in the kind of handwriting taught, which is stiff and angular, much too large, and yet not well defined. We impressed upon the head mistress the necessity of altering the style of the writing, and we have reason to know that she is acting on our suggestions.

Table IV.—Girls' School.—Arithmetic.

Class.	Draft.	Number examined.	Good.	Fair.	Middling.	Bad.
V.	. . . .	8	3	2	3	–
IV.	First, . .	11	6	4	1	–

Totals, . . .		84	31	19	18	16
Per-centages, . .		100·0	36·9	22·6	21·4	19·1

Very nearly 60 per cent. of the girls examined did more or less creditably in arithmetic, and a little over 40 per cent. failed. The failure was chiefly in certain drafts of the second and third classes, and is attributable either to neglect or want of ability on the part of the teachers or monitresses in more immediate charge of these drafts. In the senior classes, and in the other drafts of the second and third classes, the proficiency in arithmetic was satisfactory.

TABLE V.—Girls' School.—Grammar.

Class.	Draft.	Number examined.	Good.	Fair.	Middling.	Bad.
V.	. . . .	8	7	1	–	–
IV.	First, . . .	11	6	3	2	–
„	Second, . .	7	5	–	2	–
III.	First, . . .	12	2	4	5	1
„	Second, . .	14	5	4	5	–
„	Third, . . .	6	1	5	–	–
II.	First, . . .	9	6	3	–	–
„	Second, . .	9	1	1	6	1
„	Third, . . .	9	–	1	–	8
Totals, . . .		85	33	22	20	10
Per-centages, . .		100·0	38·8	25·9	23·5	11·8

The answering in grammar was satisfactory except in the same drafts of second and third classes in which we have had already to notice the failure in arithmetic. The course of instruction extends from a knowledge of the leading parts of speech in the lowest draft of second class to syntactical parsing and analysis in the fifth class. Grammar is a favourite subject in girls' schools; and the senior girls in this school have attained a respectable degree of proficiency in it.

TABLE VI.—Girls' School.—Geography.

Class.	Draft.	Number examined.	Good.	Fair.	Middling.	Bad.
V.	. . . .	8	6	1	–	1

Totals, . . .		84	25	23	20	16
Per-centages, . .		100·0	29·7	27·4	23·8	19·1

The answering in geography, including portions of the text-book for all classes, and the elements of mathematical geography in the fourth and fifth classes, was not as good as on former occasions; the rather large proportion of 43 per cent. having failed to qualify for classification as "fair." The fifth class and the first draft of second class were the best prepared; the other classes were all more or less weak in this branch. Still 57 per cent. of the whole number examined did "well" or "fairly," which, in a subject not of primary importance, cannot be considered unsatisfactory.

Totals, . . .		58	40	11	4	3
Per-centages, . .		100·0	69·0	18·9	6·9	5·2

NOTE.—Second class not examined in writing from dictation.

The proficiency attained in writing from dictation is highly satisfactory. As in the boys' school, already referred to, the senior classes were required to write on paper, the junior classes on slates. All acquitted themselves well, only 12 per cent. of the entire falling below "fair."

Great attention is paid in the girls' school to instruction in plain and fancy needlework, and knitting, &c. The supply of materials is abundant, and the girls work regularly every day, plain work receiving the largest amount of attention. Many of the girls have attained a high degree of skill in this most important branch of female education, and no one can remain long at the school without learning the use of her needle.

On the whole, the girls' school is in an efficient state; but we cannot speak of it in such high terms of praise as have been employed, and we believe most deservedly, on some former occasions; it is a good and useful school, and girls passing through it receive an excellent education, but, while from 30 to 40 per cent. of the pupils fall below par in some important subjects, we cannot consider its condition entirely satisfactory.

The inconvenient crowding of the pupils, from want of sufficient school accommodation, which we have already adverted to in our remarks on the boys' school, exists, even in a greater degree, in the female department, and cannot fail to operate injuriously on the instruction of the girls.

We do not consider it necessary to give any tables showing the results of our examination of the infant school—suffice it to say that the ten infants, whom we examined in detail, acquitted themselves very creditably for children of their age. We are careful not to allow pupils to remain in this school beyond the recognised infant school age; and the education of such very young children consists rather in training than in teaching them. Singing, including motion-songs, marching, object lessons, and lessons on maps form the staple of the collective exercises; and, concurrently with these, the ordinary elements of education are taught according as the children are able to benefit by such instruction. The sum total of knowledge thus imparted may not be great; in this school we do not permit it to go beyond the programme of instruction for second class; but the preliminary training is invaluable; and our experience in this, as in other model schools, is that children who begin in the infant school always make the best and most rapid progress in the higher departments.

Appendix B.

Reports upon District and Minor Model Schools.

Bailieboro'.

The public examination and distribution of prizes took place on the 8th of October. The boys' school-room and the class-room communicating with it were filled to overflowing throughout the day by a most respectable audience, who manifested a lively interest in the proceedings. The boys, girls, and infants were introduced in succession and examined by their respective teachers on the leading subjects of their school course. The boys of the senior division were also examined, in an interesting manner, by Mr. Doherty, on practical mensuration and natural science; and by Mr. M'Cabe, the agriculturist at Bailieborough Model Farm, on agriculture. The proceedings were enlivened at intervals by pieces of vocal music, creditably executed by the singing classes, taught by Mr. M'Cotter, assistant master.

After the examination, the premiums awarded at the preliminary examination were announced by the Head Inspector, and the certificates handed to the successful competitors by the Right Honorable Sir J. Young, bart., Governor-General of Canada, who, with Lady Young, honoured the school by attending on the occasion.

We cannot conclude this report without again urging on the Commissioners the necessity of having additional school accommodation provided. This can be done without difficulty, by building an additional room for the boys, and removing the infants to the present boys' school-room. There is abundant space available, and the schools need not be closed for a day during the execution of the work. It should be remembered that the house was not originally built for a model school; and was not calculated to accommodate the large attendance by which it has now for some years been thronged.

We have the honour to be, gentlemen, your obedient servants,

M. FitzGerald, Head Inspector.
Alexander John Simpson, District Inspector.

The Secretaries, &c., &c.

Waterford. No. 14.—Annual Report, for the year 1868, upon the Waterford District Model School, by Timothy Sheahan, Esq., A.M., T.C.D., Head Inspector.

Passage West, 20th February, 1869.

Gentlemen,—I have the honour to submit, for the information of the Commissioners, my report upon the Waterford Model School for the year 1868.

House and Premises.—The different departments are kept clean and in good repair, and the grounds are carefully looked after.

Teaching Staff.—There was no change this year among the principal or assistant-teachers. Of the pupil-teachers, two were transferred—one to the Lurgan, and the second to the Galway Model School. Two others were summoned to the central training establishment.

The following table furnishes a return of the principal and assistant teachers, the pupil-teachers, and paid monitors, employed in the schools for any portion of the year, with their religious denominations, and the dates of entry :—

	Boys.	Girls.	Infants.
At 5*s.* per quarter,	55	21	8
„ 2*s.* 6*d.* „	26	35	42
„ 1*s.* 1*d.* „	11	28	26
Total,	92	84	76

The annual examination of the schools was held in July by Mr. Lane, District Inspector, and myself. We were occupied several days at the work, and at its close certificates and premiums were distributed in presence of the parents and friends of the pupils, and others who felt interested in the proceedings on the occasion.

As we forwarded after the examination a joint report, showing the proficiency of the pupils in the different subjects, it will be sufficient here to refer briefly to the character of the results therein given.

Infant School.—We were very much pleased with the general working of this school. The classes were instructed with care and skill, and made good progress. There were forty-one removals to the adult schools in the course of the year.

Girls' School.—In this school we found the proficiency of the classes very fair in all subjects except grammar and geography. We had to notice here only eleven cases of promotion during the previous year, from a lower to a higher class. With an average of sixty-two, and all regular in their attendance, more rapid progress might have been expected.

Boys' School.—In this school the general proficiency of the classes was very fair. It was good in reading, penmanship, and writing from dictation. In grammar and arithmetic we did not find a higher proficiency than is every day met with in ordinary National schools; but, making allowance for the amount of time and attention devoted to extra branches —music, drawing, natural philosophy, and geometry—it would be hard

to complain of want of attention on part of the teachers. We had to notice in this, as in the girls' school, the few promotions from a lower to a higher class that had taken place in the previous year. They amounted in all to twenty-nine for the year preceding the examination.

I have the honour to remain, gentlemen, your obedient servant,

TIMOTHY SHEAHAN, Head Inspector.

To the Secretaries, &c., &c.

APPENDIX to foregoing REPORT upon the WATERFORD DISTRICT MODEL SCHOOL.

JOINT REPORT of TIMOTHY SHEAHAN, Esq., A.M., T.C.D., Head Inspector, and JOHN C. LANE, Esq., District Inspector, upon the Examination of the Pupils of the WATERFORD DISTRICT MODEL SCHOOL for the year 1868.

Waterford, 1st September, 1868.

GENTLEMEN,—We have the honour to submit for the information of the Commissioners the following joint report, the results of the annual examination held by us in the Waterford Model School on the 13th, 14th, 15th, and 16th days of July, 1868.

We examined thoroughly the pupils in the different classes, on the subjects set down in their respective programmes, taking into account the character of the attendance, and any other circumstance of importance to consider, in judging of their progress and proficiency.

We subjoin returns of the classification of the pupils in the three departments, and of the teachers and monitors employed in each for their instruction.

The children present (14th July, 1868), are classed as follows :—

Subjects.	Boys.	Girls.	Infants	Subjects.	Boys.	Girls.	Infants.
Lesson Books:				Arithmetic—*continued*:			
Book I.,	–	–	58	Practice, Interest, &c.,	18	7	–

Appendix B.

Reports upon District and Minor Model Schools.

Waterford.

Proficiency of the Classes.—Infant School.—Out of the seventy-four pupils in attendance there were only sixteen in the second book. The others were mere infants, except a few who were able to read easy lessons in the First Book.

Reading.—The second class read correctly the lessons they had been prepared in, spelled the difficult words and the clauses proposed, and appeared to possess a very fair knowledge of the meanings of the words, and the subject of each lesson.

Grammar.—These pupils were able to distinguish most of the parts of speech.

Geography.—They appeared familiar with the maps of the World, Europe, and Ireland.

Arithmetic.—The answering on the multiplication, money, time, and avoirdupois tables was very fair. They wrote down five places of figures, and read nine places. They also worked on slates easy questions in the first rules, except division.

The younger children went very cleverly through their different gallery lessons and exercises, and at the public examination showed, as far as their tender years admitted, that they had been duly prepared for elementary instruction in the branches usually taught in infant schools. We were particularly pleased with the good order and discipline of the children, and the amount of collective attention secured during simultaneous instruction.

There were forty-one cases of promotion in this school since the 1st July, 1867. The average attendance for the year being thirty-four males and twenty-nine females.

Girls' School.—Reading.—The classes generally were very fair in reading, spelling, and explanation.

Penmanship.—The junior pupils wrote tolerably. The senior classes wrote very fairly.

Arithmetic.—The proficiency of the second and third classes was not as good as should have been expected, and rather below what may be every day witnessed in a good ordinary National school. A few girls in the fourth and fifth classes exhibited a very fair knowledge of proportion and practice.

Dictation.—The third and fourth classes wrote good exercises, and appeared well acquainted with the rules of spelling. The fifth class answered well in derivations.

Geography.—The second and third classes answered very fairly on the maps of the World, Europe, and Ireland. The fourth and fifth classes answered on the maps generally, and the first four chapters of the Geography Generalized.

Branches for Females.—In this department everything was satisfactory. All the classes were well instructed, and the specimens of the different descriptions of work exhibited at the public examination were very much admired.

Progress of Pupils.—We have nothing favourable to say upon this very important point. On examining the class rolls we found the cases of promotion to be as follows:—

From the junior to senior division of 2nd class,	8
From 2nd to 3rd class,	8
From junior to senior division of 3rd class,	9
From 3rd to 4th class,	—
From 4th to 5th class,	3

There were only eleven cases during the year from a lower to a higher class. These, with the seventeen promotions from junior to senior divi-

sions in the same class (which are scarcely ever reckoned in ordinary schools), make in all twenty-eight, whilst the average attendance is sixty-five. This must be considered very slow progress.

Males.—Reading.—The different classes were very fair in reading and spelling. The advanced pupils read with ease and expression, and exhibited a good knowledge of the subject matter of the lessons.

Penmanship.—The junior classes wrote very fairly. The senior pupils exhibited very good specimens.

Grammar.—The second class pupils were very fair. The third and fourth classes were pretty fair. The fifth class pupils, with a few exceptions, were only tolerable. The fourth and fifth classes had a very fair knowledge of derivations.

Geography.—The second class answered fairly on the maps of the World and Ireland.

The third class answered on the maps of the British Isles, Europe, and America.

The fourth and fifth classes answered on the maps generally, and on eight chapters of the Geography Generalized.

Dictation.—The different classes were well prepared in this important branch. There were few mistakes in their written exercises, some of whic hwere very trying.

Arithmetic.—The second class pupils were fair in notation, tables, and the simple rules.

The third class pupils were only tolerable.

The fourth class worked questions in proportion and practice.

The fifth class had a good knowledge of proportion, decimal fractions, and commercial arithmetic.

Book-keeping.—The fifth class answered poorly in this branch.

Geometry.—The fifth class pupils were able to compute the areas of plain surfaces, and demonstrated propositions in the 1st, 2nd, and 3rd Books of Euclid.

Algebra.—The fifth class had a slight knowledge of simple equations.

Natural Philosophy.—The fifth class pupils were very fairly prepared in the subjects contained in the Fifth Book of Lessons.

Progress of Pupils.—There were only 29 cases of promotion since the 1st July, 1867, and 17 of these occurred in the third quarter of last year. There were 4 in the last quarter, leaving only 8 since the 1st January. The average attendance for the year ended the 30th June last was 74.

It appears that the progress of the pupils both in this and the female school, as far as it can be estimated by the promotions from a lower to a higher class, is far lower than what is expected in ordinary schools, even under a second class teacher. And in regard to proficiency, we found nothing in the answering in the most important subjects that is not met with in these same schools, the age and attendance of the pupils being considered.

It is due to the principal teachers to state that the determined opposition so actively carried on against these schools by the Roman Catholic clergy has very seriously affected their usefulness, and rendered the results of this examination far short of what might have been expected were the Roman Catholic pupils permitted to attend them.

We have the honour to be, gentlemen, your obedient servants,

TIMOTHY SHEAHAN, Head Inspector,
JOHN C. LANE, District Inspector.

To the Secretaries &c., &c.

Appendix B.

Reports upon District and Minor Model Schools.

Clonmel.

No. 15.—Annual Report, for the year 1868, upon the Clonmel District Model School, by Timothy Sheahan, Esq., A.M., T.C.D.

Gentlemen,—I have the honour to submit for the information of the Commissioners my report upon the Clonmel District Model School for the year 1868.

House and Premises.—The interior of the house appeared to have received the ordinary attention as regards cleanliness and state of repair. The playgrounds attached to the schools are not in a satisfactory state; they are covered with large round pebbles and are calculated to do serious injury to any child that may happen to fall on them. It would be very desirable if they could be covered with binding gravel such as in Waterford.

Teaching Staff.—There has been no change in the staff of principal or assistant teachers in the course of the year. Two pupil-teachers left; one through illness, and the second for the central training school. Four monitresses have left. One, having completed four years' service, is likely to remain at home, two were called up for training, and the fourth expects to be called up next session.

The following table gives the names of the principal and assistant teachers and the pupil-teachers and monitors that were employed for any portion of the year, with their religious denominations and dates of entry:—

TABLE I.

Name.	Position in School.	Religious Denomination.	Entry to this School.
BOYS' SCHOOL.			
Terence Smyth,	Principal,	Roman Catholic,	July, 1849.
Joseph Mayne,	Assistant,	Established Church,	June, 1865.
James Fitzpatrick,*	Pupil Teacher,	Roman Catholic,	Jan. 21, 1867.
James Connor,†	Do.	Established Church,	Jan. 22, 1867.
James Murphy,	Do.	Roman Catholic,	July 1, 1867.
James Barbour,	Do.	Presbyterian,	Sept. 13, 1867.
Michael Cunnane,	Do.	Roman Catholic,	Sept. 14, 1867.
GIRLS' SCHOOL.			
Joanna Browne,	Principal,	Roman Catholic,	May, 1864.
Jane E. Orr,	Assistant,	Presbyterian,	Sept., 1861.
Susan Graham,‡	Monitress,	Established Church,	July 1, 1864.
Margaret Bradford,	Do.	Presbyterian,	Sept. 1, 1865.
Jane Doyle,§	Do.	Roman Catholic,	July 2, 1865.
Mary Clifford,‖	Do.	Do.	Nov. 6, 1865.
Mary Smyth,	Do.	Do.	Sept. 1, 1867.
Margaret Wayland,	Do.	Established Church,	Sept. 1, 1867.
Sarah Redmond,¶	Pupil Teacher,	Presbyterian,	Oct. 23, 1866.
Annabella Burnes,**	Monitress,	Established Church,	Aug. 17, 1868.
INFANTS' SCHOOL.			
Ellen Watters,	Principal,	Established Church,	July, 1866.

* James Fitzpatrick left from illness—disease in hip joint—4th July, 1868.
† James Connor left 14th January, 1869. Summoned to training; his two years of service comp ted.
‡ Susan Graham left 30th June, 1868. Time of service completed.
§ Jane Doyle left 27th July, 1868. Summoned to training.
‖ Mary Clifford left 31st October, 1868. Time of service expired; expects to be called to training.
¶ Sarah Redmond left 27th July, 1868. Summoned to training; now teaching a school in Dublin.
** Annabella Burnes transferred to Clonmel from Kilkenny. Appointed to Kilkenny, 1st January, 1867.

TABLE II.—This table gives the literary classification of the pupils on the rolls at the end of the year; also their classification according to the religious denominations :—

Subjects.	Boys.	Girls.	Infants.
Lesson Books:			
Book I.,	3	2	21
„ II.,	4	10	9
„ III.,	15	25	–
„ IV,	18	10	–
„ V.,	26	11	–
Totals,	66	58	30
Grammar:			
Parts of Speech *only*,	19	37	9
Parsing and Syntax,	44	21	–
Derivations,	44	21	–
Composition,	26	36	–
Geography:			
Lessons on Maps *only*,	7	12	30
From Text-Books:			
Local,	59	46	–
Mathematical and Physical,	44	21	–
Arithmetic:			
Tables *only*,	3	–	12
Simple Rules,	4	12	18
Compound Rules,	11	25	–

Subjects.	Boys.	Girls.	Infants.
Arithmetic—*continued*:			
Proportion,	4	10	–
Practice, Interest, &c.,	44	11	–
Mental,	66	58	30
Writing:			
On Slates *only*,	–	–	12
„ Paper,	66	58	18
From Dictation,	63	58	9
Branches for Females:

Appendix B.

Reports upon District and Minor Model Schools.

Clonmel.

The religious denominations of the pupils on the rolls at the end of the year were as follow :—

	Boys.	Girls.	Infants.	Total.
Established Church,	44	27	16	87
Roman Catholics,	9	12	5	26
Presbyterians,	8	14	8	30
Others,	5	5	1	11
Totals,	66	58	30	154

The religious denominations of the pupils on the rolls at the end of last year were as follow :—

	Boys.	Girls.	Infants.	Total.
Established Church,	40	23	22	85
Roman Catholics,	24	13	5	42
Presbyterians,	5	14	6	25
Others,	7	3	4	14
Totals,	76	53	37	166

TABLE III.—The following table gives the average numbers on rolls and in daily attendance; also the amount of school-fees, and the requisites sold pupils attending the schools for the years 1867 and 1868 :—

		Boys.	Girls.	Infants.
1868	Average number on rolls,	69·7	56·2	34
	Average daily attendance,	55·9	40·1	25
	Per-centage,	80·	71·3	73
	School fees received,	£41 11*s.* 4*d.*	£34 19*s.* 8*d.*	£17 17*s.* 3*d.*
	School requisites sold,	£8 19*s.* 3*d.*	£4 14*s.* 0*d.*	£1 2*s.* 0*d.*
1867	Average number on rolls,	83·1	55·3	39
	Average daily attendance,	61·6	40·8	25
	Per-centage,	74·6	73·7	63
	School fees received,	£37 0*s.* 2*d.*	£30 10*s.* 7*d.*	£13 18*s.* 2*d.*
	School requisites sold,	£11 7*s.* 4*d.*	£6 12*s.* 3½*d.*	£1 2*s.* 9½*d.*

Rates of Payment.—Pupils on the rolls at the close of 1868 :—

	Boys.	Girls.	Infants.
At 5*s.* per quarter,	22	22	5
At 2*s.* 6*d.* per quarter,	30	24	12
At 1*s.* 1*d.* per quarter,	14	12	13

These returns show that there has been very little change in the working of the schools for the last year, except that there has been an increase in the fees received in the adult schools. The small numbers at 1*s.* 1*d.* per quarter (thirty-nine in all) show how few of the poorer class attend. This is to be attributed to no fault on part of the teachers, or want of confidence in them with the public, but entirely to the determined and active opposition on part of the Roman Catholic clergy.

Pupil-teachers and Monitors.—There were only three pupil-teachers in the male school at the close of the year. Those were then carefully examined by Mr. O'Hara and myself. I have the results of their examination now before me. From these it appears that James Murphy, appointed in June, 1867, answered sixty-five per cent.; James Barber, appointed in September, 1867, answered fifty-nine per cent., and Michael Cunnane, appointed at the same time, answered fifty per cent.

We examined on this occasion five monitresses, whose names, with dates of appointment and per-centage answerings at the oral and written examinations are given in the following table :—

Name.	Entry.	Per-centage of Answering.	
		Written.	Oral.
Margaret Bradford,	1/9/65	72·2	63·4
Mary Smyth,	1/9/67	69·	66·6
Margaret Wayland,	1/9/67	40·	58·
Annabella Burns,*	1/8/68	52·	61·
Anne Prossor,	1/8/68	45·7	56·

* Appointed Monitress in the Kilkenny Model School, 1st January, 1867.

At the oral examination the answering of the pupil-teachers was so low in grammar, etymology, and Spelling-book Superseded, as to make it clear that their home lessons on these subjects had not been carefully looked after. This matter was noticed to the head master, who had the charge of this portion of their studies. We had every reason to be pleased with their answering in the other branches.

The answering of the monitresses was, on the whole, very satisfactory.

The general examination of the pupils was commenced on the 19th and ended on the 23rd July, with the usual short examinations, singing and inspection of needlework and drawings.

As the results of this examination have been already reported to the office, it will be sufficient to give summarily the character of these results in each of the three schools.

In the infant school there were twenty-eight children examined and the proficiency exhibited in reading, spelling, tables, geography, and music was as good as could be expected from their tender years. We remarked that there had been only three cases of promotion for the previous year.

In the girls' school there were forty-three pupils examined. The proficiency exhibited by the pupils generally, in reading, penmanship, and the industrial branches, was good or very fair. The fourth and fifth classes were very fair in grammar, etymology, and writing from dictation, but were backward in a knowledge of maps, and in arithmetic.

In this school there were only fourteen cases of promotion during the year, with an average attendance of 40·8.

In the boys' school there were fifty-six pupils examined. In this school the second and third classes were fair in reading and penmanship, but poor in arithmetic, grammar, and geography.

The fourth and fifth classes were very fair in the ordinary subjects, also in book-keeping, geometry, algebra, and natural philosophy.

The proficiency exhibited by the boys and girls in music and drawing gave much satisfaction.

I have the honour to be, gentlemen, your obedient servant,

TIMOTHY SHEAHAN, Head Inspector.

To the Secretaries, &c., &c.

APPENDIX to foregoing REPORT.

JOINT REPORT of TIMOTHY SHEAHAN, Esq., A.M., T.C.D., Head Inspector, and THOMAS O'HARA, Esq., District Inspector, upon the examination of the pupils of the CLONMEL DISTRICT MODEL SCHOOL, for the year 1868.

Clonmel, 15th August, 1868.

GENTLEMEN,—We beg to submit the following report on the annual examination for the year 1868, of the pupils attending the Clonmel Model School.

The public examination was held on Thursday the 23rd July, and during the three preceding days we were engaged on the preliminary private examination, on the results of which our award of premiums was based; regard being also had, of course, to the conduct of the pupils, the regularity and punctuality of their attendance, and their diligence in the preparation of their lessons. All the pupils in attendance were examined minutely, and on all the subjects specified in the programmes for their respective classes, as well as on certain extra subjects which we shall refer to further on.

Infant Department.—The teaching staff in the infant school consists of a principal and three paid monitresses. The number of pupils on

Appendix B.
Reports upon District and Minor Model Schools.
Clonmel.

rolls was 36, of these 32 were present for examination. The average daily attendance for the year preceding the examination was 28·5; and the number of promotions for the same period was *three*. Considering the attendance and the ampleness of the teaching power, we would have expected the number of promotions to be much greater; but it is to be urged on the teachers behalf that many of the children are so young as to be fit subjects for nursing rather than for teaching. The first-class pupils read and spelled fairly in the lessons previously prepared by them. They also showed a fair appreciation of the meaning of what they read; and they evinced considerable quickness and moderate accuracy in mental additions and subtractions. The proficiency of the majority of the second class pupils was very fair, and was evidently the result of careful teaching.

Girls' School.—The teaching staff in this school consists of a principal, an assistant, and four paid monitresses. The number of pupils on rolls is 48, of these there were 43 present for examination. The average daily attendance for the twelve months preceding the examination was 54; and the number of promotions for same period was 15.

Reading, spelling and explanation.—The proficiency of those who have been regular in attendance is very fair in these branches; and the reading of some of the fourth and fifth class pupils is finished and expressive.

The *Penmanship* is particularly good—so good that in many instances it was difficult to decide whose writing was best.

Dictation.—The fifth class pupils acquitted themselves well in this branch; the fourth class pupils fairly; and the second and third class pupils tolerably.

Arithmetic.—The proficiency, though on the whole, fair in this subject, is not relatively as satisfactory as in the previous subjects. The fourth and fifth class pupils can work easy sums in proportion and practice with facility; but they have as yet very little skill in applying arithmetical principles to the solution of sums differing in any way from those they have hitherto been in the habit of working. All failed to do the following sum:—"A dealer mixes 20lbs. of tea at 3*s.* per lb., with 30lbs. at 2*s.* per lb., at what price per lb. must he sell the mixture so as to have a gain of 10 per cent. on the transaction?"

Grammar.—The fourth and fifth class pupils have a good practical knowledge of grammar, and some of the fifth class pupils have made considerable progress in the knowledge of the derivations of words. The proficiency of the second and third class pupils in grammar is medium, and calls for no particular observations.

Geography.—The junior class pupils answer fairly in the prescribed course; but the acquaintance of the senior class pupils with maps is not at all satisfactory. They have apparently devoted their attention mainly to the text-books, on which they answer very fairly. For instance, though nearly all in the fourth and fifth classes could repeat with readiness the names of the principal rivers in France and Spain, none of them could give in the order of succession the names of the seven or eight large rivers which flow into the sea between the Straits of Gibraltar and the Straits of Dover.

Needlework is taught with great care and success; some of the specimens of work executed by the pupils, and for which we awarded special premiums, were very creditable.

Boys' School.—The teaching staff consists at present of a head master, an assistant master, and five pupil-teachers. The number of pupils on rolls is 63, of whom 56 presented themselves for examination. The average daily attendance, for the twelve months preceding the examination, was 75·7, and the number of promotions during the same period was 53.

First Class.—Four present; average age, seven years; attendance, irregular. Only one able to read any as yet.

Second Class.—Six present; average age, eight and three-quarter years; attendance, regular. One-half of the class were fairly prepared in reading, spelling, explanation, arithmetic, and parts of speech; none of them familiar with the outlines of map of world.

Third Class.—Fifteen present; average age, ten and a half years; attendance, for the most part, regular.

Proficiency fair in reading, spelling, explanation, and penmanship, and very fair in arithmetic; grammar very poor. Geography, as regards home lessons, fair; but very poor so far as acquaintance with maps is concerned; dictation, rather unsatisfactory.

Fourth Class.—Eighteen present; average age, twelve and a half years; attendance, regular.

One-half of the class acquitted themselves very fairly in reading, writing, arithmetic, and dictation. The grammar of all, with two or three exceptions was inferior; the geography was also rather unsatisfactory. A few answered fairly from text-books, but nearly all were deficient in acquaintance with the maps of Europe, Ireland, and the World.

Fifth Class.—Thirteen present; average age, fourteen and three-quarter years; attendance, regular.

The general proficiency of seven of these thirteen pupils was creditable; the proficiency of the other six was, on the whole, unsatisfactory. Geography was the subject in which their deficiency was most notable. All the fifth class pupils receive instruction in geometry, mensuration, algebra, and bookkeeping, and four or five of them are making fair progress in these branches.

Physical Science.—The fourth and fifth class pupils are regularly instructed in a pretty extensive course of physical science, and the answering in this course satisfied us that it has received a fair amount of attention from both teacher and pupils.

Vocal Music.—All the pupils in the schools receive instruction in singing, on two days in each week, from Mr. James Washington; and, so far as we are capable of judging, the results are very creditable.

Drawing.—This branch is regularly taught to the pupils of the boys' and girls' schools, many of whom have been awarded premiums for proficiency in it by the Department of Science and Art, under whose auspices an examination in drawing is held each year in the school.

In reviewing the results of our examination, and of a year's teaching in these schools, we consider it our duty to state that we would have expected a much greater number of promotions in the infant and female departments. The answering of children in a lower class may be creditable; but if, after the lapse of twelve months of regular attendance, the same children are presented for re-examination in the same class, *the fact* itself is not creditable to the teachers, however satisfactory the re-examination of the children may have been. In the male school the *number* of promotions was satisfactory; but we have to remark, in reference to many of them, that they were made without sufficient consideration; many of the boys whom we found in the fourth class in particular were only fit for the third class.

The public examination was largely attended by the friends of the pupils and by others, all of whom appeared highly pleased with the results.

We have the honour to be, gentlemen, your very obedient servants,

TIMOTHY SHEAHAN, Head Inspector.
THOMAS O'HARA, District Inspector.

The Secretaries, &c., &c.

Appendix B.

Reports upon District and Minor Model Schools.

Newry.

No. 16.—JOINT REPORT of M. FITZGERALD, Esq., Head Inspector, and D. C. PORTER, Esq., District Inspector, on NEWRY DISTRICT MODEL SCHOOL, for the year 1868.

April, 1869.

GENTLEMEN,—We have the honour to submit the following as our report on the examination of Newry District Model School, for the year 1868. We commenced the preliminary examination on Saturday the 12th of December, and we held the public examination on the following Friday, the 18th of December. We examined every class in the three departments of the school, on all the subjects in which they had been under instruction during the preceding twelve months; and we so divided the classes and the subjects that each of us examined every class in half the subjects of instruction, exchanging subjects in alternate classes. We are thus enabled to speak *jointly* of the manner in which every class and every subject was taught. We marked carefully the answering of each pupil on sheets prepared for the purpose; and, from these sheets, we have prepared tables showing the proficiency attained by each class in reading, spelling, arithmetic, writing, dictation, grammar, and geography. These tables refer exclusively to the boys' and girls' schools. We do not give any tabulation of the answering on extra subjects in the boys' school; or of the proficiency of the pupils of the infant school, for the reasons hereinafter assigned. In framing these tables we adopted the following standard for those subjects in which each answer and miss was recorded. We regarded 60 per cent. and above as "good" answering; from 40 to 60 per cent. as "fair;" from 20 to 40 per cent. as "middling;" and below 20 per cent. as "bad." With reference to reading and writing these terms explain themselves.

At the time of the examination there were on the rolls 77 boys, 98 girls, and 55 infants—numbers differing but slightly from the corresponding period of 1867. The following table shows the classification of these pupils, and the subjects which they were returned to us by the teachers as learning:—

Subjects.	Boys.	Girls.	Infants.	Subjects.	Boys.	Girls.	Infants.
Lesson Books:				Arithmetic—*continued.*

Appendix B.
Reports upon District and Minor Model Schools.
Newry

The numbers present and examined, in each school, will be found in the Tables showing the proficiency in the different subjects. The attendance of girls—especially some who live at a distance from the Model School—was somewhat reduced, on one day, by the extreme inclemency of the weather. This, however, does not materially affect the per-centages, which are calculated with reference only to the number present and actually examined.

The following Table shows the average age, by classes, of the pupils examined in the male and female departments.

	2nd Class.	3rd Class.	4th Class.	5th Class.	Total.
Boys—Average age, . .	8·8	11·2	13·6	–	10·5
Girls—Average age, . .	9·6	11·4	14·0	14·1	11·8

From this it would appear that the girls, in the respective classes, are rather older than the boys in the corresponding classes; the difference is not great, and is probably attributable to the increase of manufacturing industry in Newry—in consequence of which boys are sent to school, and removed from school, at an earlier age than girls, to be employed in the mills.

We now proceed to give the Tables showing the proficiency attained in the subjects already enumerated; and to each of these Tables we append a brief statement of our own opinion.

Boys' School—Table I.—Reading.

Class.	Draft.	Number Examined.	Good.	Fair.	Middling.	Bad.
IV.	—	12	4	3	5	–
III.	First, . . .	6	6	6	–	–
„	Second, . .	8	–	4	4	–
„	Third, . . .	11	–	11	–	–
II.	First, . . .	15	6	5	4	–
„	Second, . .	15	–	10	4	1
Totals, . . .		67	16	33	17	1
Per-centages, . .		100·0	23·9	49·2	25·4	1·5

From this Table it appears that less than one-fourth of the total number examined could be said to read "well"; about one-half read "fairly"; and rather over one-fourth "middling" or "badly." This is not a high rate of proficiency for a Model School; and contrasts unfavourably, not only with the proficiency of the girls in this school, but with the boys in other Model Schools similarly tabulated. It must be remembered that the examination in reading was confined to the portion of the lesson book already read by each class; and further, that the marks are relative, not absolute. Thus "good" or "fair" in second class, means simply good or fair for that class, and it is not intended to convey that the reading is as good as in the third or fourth class. The same remark applies to the other subjects, as well as reading.

Appendix B.

Reports upon District and Minor Model Schools.

Newry.

Boys' School—Table II.—Spelling.

Class.	Draft.	Number Examined.	Good.	Fair.	Middling.	Bad.
IV.	—	12	6	3	3	–
III.	First, . . .	6	2	2	1	1
„	Second, . .	8	1	4	2	1
„	Third, . . .	11	–	1	8	2
II.	First, . . .	15	2	6	5	2
„	Second, . .	15	6	2	5	2
Totals, . . .		67	17	18	24	8
Per-centages, . .		100·0	25·4	26·8	35·8	12·0

The proficiency in spelling is even less satisfactory than that in reading. About one-fourth of those examined spelled "well," another fourth "fairly" —but very nearly one-half the school could be classed only as "middling" or "bad," in this important branch. Under this head we include the spelling of single words, and a knowledge of the portions of the "Spelling-Book Superseded," which had been learned by the fourth class, and the two highest drafts of third class; but we do not include writing from dictation, which will be tabulated separately.

Boys' School—Table III.—Arithmetic.

Class.	Draft.	Number Examined.	Good.	Fair.	Middling.	Bad.
IV.	—	12	1	1	4	6
III.	First, . . .	6	–	3	1	2
„	Second, . .	8	–	2	4	2
„	Third, . . .	11	–	5	4	2
II.	First, . . .	15	5	5	5	–
„	Second, . .	15	–	4	5	6
Totals, . . .		67	6	20	23	18
Per-centages, . .		100·0	·9	29·8	34·3	26·9

We can have no hesitation in stating that arithmetic is not efficiently taught in the boys' school. Less than *one-tenth* of the pupils examined acquitted themselves well. Less than one-third did fairly; while nearly two-thirds were middling or bad. Under any circumstances this failure in arithmetic would be very unsatisfactory; but, in a manufacturing and business town like Newry, the effect on the reputation of the school is very damaging. Nor is failure in arithmetic to be attributed to the severity of the examination. We have before us the proficiency of each class under different heads; thus, the fourth class was examined separately in the simple and compound rules, in the advanced rules, and in the theory of arithmetic; the third-class, separately, in simple and compound rules, in simple proportion, and in mental arithmetic, and so on in the other classes; and in the second class the answering in tables is included in the tabulation; yet under every separate head the proficiency is equally low, and the fourth class failed as completely in the simple and compound rules as in the more advanced rules, or in the theory.

Boys' School—Table IV.—Penmanship.

Class.	Draft.	Number Examined.	Good.	Fair.	Middling.	Bad.
IV.	—	12	8	4	–	–
III.	First, . . .	6	4	2	–	–
„	Second, . .	8	1	4	3	–
„	Third, . . .	11	2	7	2	–
II.	First, . . .	15	5	5	5	–
„	Second, . .	15	4	5	5	1
Totals, . . .		67	24	27	15	1
Per-centages, . .		100·0	36·0	40·2	22·4	1·4

The proficiency in writing is about, on the whole, equal to that in reading; and, though much higher than that in arithmetic, is not quite satisfactory in a Model School. Three-fourths of those examined wrote "well" or "fairly;" the other fourth "middling" or "badly." In this branch also, the boys' school contrasts unfavourably with the girls' school; but, speaking generally, the penmanship of the boys seems to have received attention; and the results may be characterized as fair.

Boys' School—Table V.—Writing from Dictation.

Class.	Draft.	Number Examined.	Good.	Fair.	Middling.	Bad.
IV.	—	12	4	1	3	4
III.	First, . . .	6	1	2	–	3
„	Second, . .	8	2	–	2	4
„	Third, . . .	11	1	2	–	8
II.	First, . . .	} Not examined in dictation.				
„	Second, . .					
Totals, . . .		37	8	5	5	19
Per-centages, . .		100·0	21·6	13·5	13·5	51·4

The proficiency in this important branch must be pronounced unsatisfactory—only the senior classes were examined; but of those little over one-third acquitted themselves "well" or "fairly"—the remaining two-thirds being classed as "middling" or "bad," and over one-half of the entire number falling within the latter category. Writing from dictation is so important a branch of primary education, and usually receives so much attention, that the failure of these boys calls for the gravest censure—it can only be the result of very culpable negligence on the teachers' part. The tests applied were not more severe than are commonly employed in good ordinary schools; and the corresponding failure, though in less degree, in oral spelling, clearly proves that there could be nothing accidental in the failure in writing from dictation.

The examination in grammar, for the fourth class, and two highest drafts of third class, consisted of parsing syntactically easy passages from their respective lesson books, and the portions of the text book in which they were prepared. In the junior draft of third, and in the second class, the examination was confined to pointing out and defining the parts of speech. The senior classes did poorly, the junior classes fairly. The aggregate result shows over one-third well prepared; one-fourth fairly; one-fourth middling; and about one-eighth badly. The fourth class was the worst prepared of any, only one boy, of the whole class, having acquitted himself even fairly.

Per-centage, . .		100·0	28·4	17·9	35·8	17·9

The examination in geography was chiefly on the maps of the world, Europe, Ireland, and the British Isles, with the corresponding portions of the text-book in the senior classes. The fourth class also had prepared the first five chapters of the Geography Generalized. The proficiency, even on this limited course, cannot be considered satisfactory, more than half the whole number examined, appearing under the heads "middling" or "bad."

Under the head "extra branches" we examined the boys present in fourth class on the elements of natural philosophy and physiology, as these subjects could be learned from Johnston's sheets, and on mensuration. We do not give any tabulation of the answering, simply because there is no answering to tabulate. Two boys answered "fairly" on natural philosophy and physiology—all the rest "middling" or "badly;" while on mensuration the whole class failed to answer even the simplest questions.

It is not pleasant for us to have to comment in such unfavourable terms on a school intended to be a "model" of what an efficient primary school should be; especially when it is a school long established, and

one which, we believe, formerly enjoyed a high reputation; and it is our still more disagreeable but imperative duty to repeat, what we have already written officially to the Education Office, that we believe the low state of the school is attributable to the neglect of the Head Master. We are aware that the school is not at present giving satisfaction to the people of Newry, who are deeply interested in having the means of procuring a good education for their children; and we do not think that it is likely to regain their confidence while the present Head Master retains his office.*

We now proceed to give the results of our examination of the girls' school, which we shall exhibit in a series of tables, in all respects similar to those already given for the boys' school, and framed upon the same principles.

Girls' School—Table I.—Reading.

Class.	Draft.	Number Examined.	Good.	Fair.	Middling.	Bad.
V.	—	16	14	2	–	–
IV.	—	13	6	5	2	–
III.	First, . . .	14	9	4	1	–
„	Second, . .	17	10	7	–	–
II.	First, . . .	12	2	9	1	–
„	Second, . .	11	7	2	2	–
Totals, . . .		83	48	29	6	–
Per-centages, . .		100·0	57.8	35·0	7·2	–

The proficiency indicated by this Table is highly satisfactory. Considerably over half the whole number examined read well, and more than a third additional fairly. Taken together, over nine-tenths acquitted themselves respectably; and less than one-tenth fell so low as "middling;" while not one in the entire school could be said to read "badly." These results are in accordance with the impressions left on our minds by the reading of the girls—it was careful, correct, and distinct—characterized by suitable expression in the higher classes, and by attention to the pauses in the lower. Collective class reading is practised in this school, and with considerable success. It is an excellent exercise for securing accuracy of *time* in reading.

Girls' School.—Table II.—Spelling, &c.

* The head master referred to has been removed from this school.

Appendix B.

Reports upon District and Minor Model Schools.

Newry.

The proficiency in spelling, &c., is, on the whole, satisfactory. Half of those examined spelled "well"; one-fourth "fairly"; the remainder being either "middling" or "bad." However, in all the classes above second, explanation, and in the fifth class derivations, are included under this head. This was an oversight, and in future examinations these subjects will be kept distinct.

Girls' School.—Table III.—Arithmetic.

Class.	Draft.	Number Examined.	Good.	Fair.	Middling.	Bad.
V.	—	15	6	7	2	–
IV.	—	12	1	5	4	2
III.	First,	14	2	7	4	1
„	Second,	17	10	4	2	1
II.	First,	12	4	5	3	–
„	Second,	11	2	2	5	2
Totals,		81	25	30	20	6
Per-centages,		100·0	30·9	37·0	24·7	7·4

In arithmetic, the fourth and fifth classes were examined in simple and compound rules, more advanced rules, theory of arithmetic, and mental arithmetic. The second and third classes were examined on tables, and the former in simple the latter in compound rules. The proficiency was not high. Rather less than one-third did "well"; rather more than a third "fairly"; and the rest were "middling" or "bad." A great many failed in addition of money, apparently from want of sufficient exercise in this all-important rule. On the whole, the proficiency in arithmetic, though not unsatisfactory, was not as good as we would wish it to be.

Girls' School.—Table IV.—Writing.

Class.	Draft.	Number Examined.	Good.	Fair.	Middling.	Bad.
V.	—	16	14	2	–	–
IV.	—	13	8	5	–	–
III.	First,	13	10	3	–	
„	Second,	17	10	5	2	–
II.	First,	13	6	7	–	–
„	Second,	14	8	6	–	–
Totals,		86	56	28	2	–
Per-centages,		100·0	65·1	32·6	2·3	–

The writing of girls in this school is of a superior character. Foster's copy-books are in use, and some of the girls produce remarkably close imitations of the more advanced head-lines. Great attention is paid to this branch, and with gratifying success.

Girls' School.—Table V.—Dictation.

Class.	Draft.	Number Examined.	Good.	Fair.	Middling.	Bad.
V.	—	15	13	2	–	–

Totals, . . .		76	33	18	6	19
Per-centages, . .		100·0	43·4	23·7	7·9	25·0

Writing from dictation was well done by the fifth, senior third, and second classes, and badly by the fourth and junior third, especially the latter. It appeared, however, that all the pupils examined in this class, with three or four exceptions, had been promoted or admitted into it in the three months preceding the examination; hence probably their inability to write as well, from the Third Book as their classification would lead one to expect. Of the four pupils who failed in fourth class, two were new pupils admitted to the school within the two months preceding the examination. Making allowance for these failures, for which the school cannot fairly be held responsible, the general proficiency in dictation was satisfactory.

Per-centages, .		100·0	33·7	25·3	28·9	12·1

Under this head, the fifth and fourth classes and the senior draft of third, were examined in syntactical parsing; and the junior classes in pointing out and defining the parts of speech. All classes were, besides, examined on some portion of the text book. The general proficiency was fair—nothing more; not as good as we expected, or as is usual in the female department of model schools, in which grammar is one of the favourite studies. The junior draft of the third and second classes showed the least merit—much, however, could not be expected from the latter. Exactly half the whole number of failures were in these two classes or drafts. The fifth class and the senior second were the best prepared.

Girls' School.—Table VII.—Geography.

Class.	Draft.	Number Examined.	Good.	Fair.	Middling.	Bad.
V.	—	16	6	5	3	2
IV.	—	9	–	3	1	5
III.	First, . . .	12	5	5	2	–
„	Second, . .	15	4	4	5	2
II.	First, . . .	12	–	2	8	2
„	Second, . . .	11	3	2	2	4
Totals, . . .		75	18	21	21	15
Per-centages, . .		100·0	24	28	28	20

The examination in geography ranged from the outlines of the Maps of the World and Europe, in the junior draft of second class, to what may be called a general course of geography in the fourth and fifth classes. All the classes were also examined on some portion of the Text Book. The general proficiency was moderately fair. Rather more than half the whole number examined answered more or less respectably; the remainder—rather less than half—failed. The best answering was in the fifth and senior third classes; the worst in the fourth and senior second.

From the foregoing tables and remarks it will be seen that the girls' school, is, on the whole, going on well. The reading and writing are superior; the other branches fair. Speaking generally, the more important branches are the best taught.

Besides the subjects tabulated, the girls receive instruction in vocal music, drawing, and needlework, plain and fancy. The latter branch is well attended to. The general tone of the school is good, and the teachers are most attentive to their duty.

In the infant school 10 pupils presented themselves for examination in the second class, and of these 5 acquitted themselves creditably in the subjects in which they had been prepared. We do not think it would serve any useful purpose to present the results of the examination of these little children in a tabular form, especially as the majority of them were promoted into the class almost immediately before the examination. In the month of October, two months before the examination, 12 other pupils —10 of them from second class—had been removed from the infant school to the male and female departments. We have, therefore, no trustworthy data, so far as this examination is concerned, on which to form a judgment of the proficiency attained by the pupils under favourable circumstances; and we think it better to abstain from offering any opinion. The functions of an infant school are so peculiar and distinct, that its merits are not best measured by an examination of the pupils as in ordinary schools. We do not desire to find fault with the infant department of Newry Model School, but we are not in a position to bestow upon it any high degree of commendation. ...

The public examination and distribution of prizes took place on the 18th December. The attendance was very large and most respectable; and the greatest interest was manifested in the proceedings by all present. During the day several pleasing pieces were sung in an effective manner by the pupils of the vocal music class, under the leadership of their instructor, Mr. Russell.

On the 12th of August, 1868, the model school was visited by S. N.

Stokes, esq., one of Her Majesty's Inspectors of Schools, and a member of the Royal Commission on Primary Education in Ireland. He was accompanied by a gentleman, whose name we did not learn, but who was, we believe, one of the Assistant Commissioners. They remained in the establishment for about three and a half hours, and examined classes in each department. *Appendix B.* Reports upon District and Minor Model Schools.

No. 17.—Annual Report for the Year 1868 upon the Newtownards District Model School, by J. G. Fleming, esq., Head Inspector. *Newtownards.*

Derry, January, 1869.

Gentlemen,—I have the honour to submit, for the information of the Commissioners, the following report on the Newtownards Model School for the year 1868.

The buildings are in excellent repair, and have been kept with neatness and taste. In company with Mr. Macdonnell, District Inspector, I visited, on several occasions, the school-rooms and premises during the year, and we always found them in a satisfactory condition. In March last we suggested some alterations in the infants' school-room, with the view of improving the ventilation and stopping the strong drafts of air to which the infants were exposed. These defects have been remedied, and now this room is all that can be desired as regards light, ventilation, and fitness for educational purposes. The attention of the Commissioners was also drawn to the want of a ball-court in the boys' play-ground and to the propriety of enclosing the unsightly plot of ground fronting the school-rooms. I believe steps will soon be taken to carry these suggestions into effect.

The grounds about the schools are tastefully laid out and planted with choice shrubs and flowers. These are, however, quite too numerous for the small space of ground which they cover. When the proper season comes they should be thinned out so as to give the most thriving plants room enough to attain their full growth. Nevertheless these grounds present a gay and showy appearance, and are a source of pleasure to all connected with the schools. They are under the charge of Mr. Greer, one of the assistants, who deserves much credit for the style in which they have been kept. But they should be more extensively used as instruments of education. A good beginning towards effecting this desirable end was made last year. The plants have been labelled and the ground marked off into plots, one of which is assigned to two pupil-teachers, who are required to keep it in good order. To aid in this work, the Commissioners have sent twelve copies of Lindley's School Botany for the use of the pupil-teachers.

TEACHING STAFF—*continued.*

FEMALE SCHOOL.	Age.	When Trained.	Class and Division.
R. Lester, Principal,	27	1859	I[a]
S. Pelling, Assistant,	25	'64	I[b]
T. M'Cann, do.,	26	'65	II[c]
L. Kennedy, do.,	23	'66	I[a]
Monitresses—three.			
Pupil-teachers—three.			
INFANT SCHOOL.			
M. Bradford, Principal,	20	Not	II[a]
M. Dowling, Assistant,	22	'64	II[b]
Monitresses—four.			
Pupil-teachers—one.			

Miss Collins, principal teacher in the infants' school, having resigned, Miss Bradford, her assistant, was appointed her successor. Miss Dowling, from the Trim Model School, succeeded Miss Bradford. These are the only changes which the permanent teaching staff of the school underwent during the year. It is in place to mention that, since February, 1868, nine young persons, pupils of this institution, left to become either principal or assistant-teachers in National schools. Moreover, thirty-seven males and fifty females educated in it have, during the past six years, adopted the profession of teacher.

The following table shows the state of the attendance, the amount of school-fees received, and the amount received for requisites sold at reduced rates during the year 1868 :—

	Boys.	Girls.	Infants.	Total.
Average on rolls,	150	101	95	346
Average attendance,	131	83	80	294
Per-centage of average attendance to average on rolls,	87	82	84	

	Boys.	Girls.	Infants.	Total.
School-fees received,	£86 2 10	£56 17 0	£39 3 6	£182 3 4
Requisites sold at half price,	£26 7 8	£11 18 11	£4 12 8	£42 19 8

It now remains for me to give the classification of the pupils on rolls, and comparing this with the answering of the several classes examined by me and Mr. Macdonnell, District Inspector, a good estimate can be formed of the proficiency attained by them in all the branches of their prescribed course of study. I believe they are not surpassed in literary acquirements, steadiness, and good conduct by the pupils of any other model school under my superintendence. Children at an ordinary National school, in charge of an experienced, trained teacher, who answer above one half of the questions proposed to them, are regarded as pretty good scholars, while answering which exceeds 60 per cent. is looked upon as very creditable. Now it appears from the short return herewith annexed, and for the accuracy of which I can vouch, that of 135 boys examined during the week ended 10th October, 1868, by me and Mr. Macdonnell, 75 answered above 70 per cent. of our questions, which were searching and somewhat intricate for pupils whose average age was slightly under 11 years. It is, I feel, due to Miss Lester, the respected principal teacher of the girls' school, to state that the answering of her pupils was equally satisfactory. For instance, of 35 girls in her senior division, only five answered less than 60 per cent. of the questions, while fifteen answered 70 or above 70 per cent. of them. I take this opportunity to state that all the girls in her school get instruction in plain sewing and knitting; about three-fourths of them devote some time to fancy work. Upwards of 300 articles of plain work and a large stock of fancy work were executed by the pupils during the year.

Summary of the proficiency of the different classes in boys' school.

Answered.	Fifth class.	Fourth class.	Third class.	Second class.	Totals.
80 per cent. and above,	2	4	13	10	29
70 to 80,	8	7	10	21	46
60 „ 70,	1	5	16	16	38
50 „ 60,	1	3	4	4	12
Less than 50,	–	3	2	5	10
Totals,	12	22	45	56	135

The public examination and distribution of premiums took place on the 13th October, in presence of a large and respectable audience deeply interested in the proceedings, which were frequently applauded throughout the day.

The following was the order of the examination:—

Mr. Scott examined junior division of boys in reading and geography.
Miss M'Cann examined junior division of girls in Natural History.
Miss Kennedy examined same division in geography.
Mr. O'Reilly examined middle division of boys in reading, writing from dictation, and mental arithmetic.
Miss Bradford examined the infants in reading, spelling, maps, singing, &c.
Miss Lester examined the senior division of girls in reading, grammar, and writing from dictation.
Miss Pelling examined same division on the solar system.
Mr. Harbison examined on "food plants."
Mr. Greer examined same division in drawing and the physiology of the senses.

Several pretty airs were sung by the girls during the day, under the guidance of Miss Lester, with much taste and sweetness.

The children on the rolls are classed as follows:—

Subjects.	Boys.	Girls.	Infants.	Subjects.	Boys.	Girls.	Infants.
Lesson Books:				Arithmetic—*continued.*			
Book I.,	–	–	61	Proportion,	43	22	–
„ II.,	59	30	29	Practice, Interest, &c.,	47	15	–

The numbers examined were—boys, 135; girls, 94; infants, 85.

Appendix B.

Reports upon District and Minor Model Schools.

Newtownards.

Of the pupils examined there were—

	Boys.	Girls.	Infants.	Total.
Able to read I. Book correctly,	5	1	12	18
„ II. Book correctly,	51	23	10	84
„ III. or higher Books with ease and intelligence,	76	70	–	146
Acquainted with the parts of speech *only*,	24	8	–	32
Able to parse syntactically,	74	47	–	121
Acquainted with the outlines and general features of the Map of the World *only*,	51	10	22	83
„ with Maps of Europe and Ireland,	41	29	6	76
„ with general course of Geography,	29	27	–	56
Able to set down accurately a sum of 7 places of figures,	120	74	–	194
„ to work correctly a sum in Subtraction,	125	74	6	205
„ „ „ Division of Money,	99	56	–	155
„ „ „ Proportion or Practice,	79	31	–	110
„ to write on paper fairly,	66	36	–	102
„ „ a good hand with ease and freedom,	68	48	–	116
„ „ a sentence with tolerable accuracy,	64	21	–	85
„ „ „ ease and correctness,	43	45	–	88

I thought it right to explain to the assemblage that the pupils had been subjected to a lengthened and searching examination by me and Mr. Macdonnell during the preceding week, and that it was usual to give a prize to each child who answered 60 per cent. of the questions proposed, but owing to the very superior character of the answering, I found it necessary to withhold premiums from pupils who failed to reach a minimum standard of proficiency of 66 per cent.

Mr. Hunter, Chief of Inspection, handed the certificates to the successful pupils.

The money premiums, which included four for needlework and four for drawing, amounted to £15, and were distributed as follows :—

	£	s.	d.
Boys' school, 93 premiums,	8	0	0
Girls' school, 54 „	5	10	0
Infants' school,	1	10	0

In conclusion, I beg to furnish the results of the answering of the paid monitors who attended the examination held in 1868. There was but one male monitor in the boys' school when this examination took place, and as he had been very recently appointed, he was not examined.

Names, ages, and dates of appointment of monitresses at Newtownards Model School, who were examined in 1868—

Name.	Age.	Date of Appointment.	Character of Answering.
Mary A. Harbison,	19	12/63	Very satisfactory.
Kate M'Donald,	17	8/66	Excellent.
Lizzie M'Culloch,	16	4/67	Very good.
Mary Peerse,	17	6/67	Very good.
Harriet Morgan,	19	1/68	Satisfactory.
Mary M'Kee,	18	6/68	Satisfactory.

One monitress, Agnes Hutton, was absent from the examination, owing to ill health.

The character of the answering of these young persons, as set forth in the tabulated returns which I forwarded to the office in August last, is highly creditable to them, and affords the most satisfactory evidence that they have been attentive to their studies, and that their teachers have faithfully discharged their duties towards them. It is also very gratifying to be able to report that the conduct of these girls during the year has

been, in every respect, most exemplary, and that the manner in which they have performed their duties in the schools has given the fullest satisfaction to me as well as to Mr. Macdonnell, the District Inspector.

I am, gentlemen, your obedient servant,

J. G. FLEMING, Head Inspector.

The Secretaries, &c., &c.

No. 18.—ANNUAL REPORT for the year 1868, upon the CARRICKFERGUS MINOR MODEL SCHOOL, by J. G. FLEMING, esq., Head Inspector. *Carrickfergus.*

Derry, January, 1869.

GENTLEMEN,—I beg to submit for the information of the Commissioners the following report on the Carrickfergus Minor Model School for the year 1868.

The school buildings and premises are in good repair. The whole of the outside wood-work has been recently repainted, and all necessary improvements executed. Well grounded complaints were made in former years regarding the want of light in the girls' school-room. This defect has been to some extent remedied by inserting a sky-light in the roof. Owing to the position of the infants' school-room the teachers and children are exposed to strong currents of air which endanger their health, especially during the wet, stormy months of winter. The two assistants were so ill from this cause, in October last, that they were unable to attend to their duties for a considerable time.

Since last year's report no change has taken place in the staff of teachers and assistants. I cannot speak too highly of the interest they take in the welfare of the schools, and of the painstaking and efficient manner in which they perform their duties. Except in the case of illness, their attendance has been punctual and regular.

The number of pupils in attendance is much the same as in past years. In the boys' school a slight increase has taken place, but in the girls' and infants' school this attendance has, in point of numbers, undergone no change worthy of notice. The following tables show the character of the attendance and the amount of fees received during the year 1868.

	Boys	Girls.	Infants.	Total.
Average on rolls,	109	58	77	244
Average daily attendance,	91	47	66	204
Amount of school-fees received,	£63 10*s.* 6*d.*	£31 12*s.* 6*d.*	£38 19*s.* 1*d.*	£134 2*s.* 1*d.*

	Boys.	Girls.	Infants.	Total.
Viz.:—paying 5*s.* per quarter,	33	16	13	62
„ 2*s.* 6*d.* „	45	21	48	114
„ 1*s.* 1*d.* „	29	13	26	68

The private or preliminary examination was conducted in the usual way by me and Mr. M'Ilroy, District Inspector. It took place in October last, and occupied us several days. In the girls' school the general answering was highly satisfactory. Reading, penmanship, and arithmetic have received due attention, but grammar and geography have been, to a great extent, neglected in the boys' school. The system of instruction pursued in the infants' school is admirable, and the general proficiency of the pupils is all that could be reasonably expected from children of so tender an age.

Appendix B.

Reports upon District and Minor Model Schools.

Carrick-fergus.

I give in the annexed tables the classification of the pupils examined, and the results of the answering of the several classes in the boys' and girls' schools.

Subjects.	Boys.	Girls.	Infants.	Subjects.	Boys.	Girls.	Infants.
Lesson Books:				Arithmetic—*continued.*

„ a sentence with tolerable accuracy,	33	10	43
„ with ease and correctness,	19	22	41

The teaching staff in the *boys' school*—principal, two assistants, and four paid monitors; in *girls school*—principal teacher, two assistants, and two monitresses; in *infants' school*—principal teacher, assistant, and three monitresses.

Appendix B.

Reports upon District and Minor Model Schools.

Carrick-ferrus.

I furnish the names, dates of appointment, and the results of the answering of these monitors at the examination held during the year 1868.

	Date of Appointment.	Per-centage of Answering.
Thomas Hopkins,	Sept. 1866.	65
Charles Kirkley,	Sept. 1866.	73
James Morrison,	Nov. 1867.	57
William Close,	Nov. 1867.	53
Margaret Stewart,	July, 1865.	67
Mary J. Thompson,	July, 1865.	69
Jane Moore,	Nov. 1867.	71
Mary Marshall,	Nov. 1867.	57

I have to add that no change of any kind took place in the monitorial staff of these schools during the past twelve months.

The private examination was completed, and the award of premiums made on the 19th October. On the following day the public examination was held before a large and respectable audience, consisting of many of the neighbouring clergy, and others interested in the welfare of the school. The parents of several of the children were also in attendance. The proceedings were conducted in the usual way, and passed off most satisfactorily.

I am, gentlemen, your obedient servant,

J. G. Fleming, Head Inspector.

The Secretaries, &c., &c.

Appendix C.

Head Inspectors' Reports on Schools Inspected and Teachers Examined.

APPENDIX C.

General Reports of Head Inspectors, on Schools inspected and Teachers examined, during the year 1868.

M. Fitz-Gerald, esq.

The Commissioners, while publishing the General Reports of their Head Inspectors, desire it to be distinctly understood that they do not hold themselves responsible for the opinions expressed in those Reports, nor do they feel called upon to adopt any suggestions they may contain.

No. 1.—General Report, for the year 1868, on Schools inspected and Teachers examined, by M. FitzGerald, Esq., Head Inspector.

Dublin, April, 1869.

Gentlemen,—I have the honour to submit, for the information of the Commissioners of National Education, the following report for the year 1868.

I. At the commencement of the year I was placed permanently in charge of the North Dublin group of districts, which had been temporarily under my superintendence during the preceding ten months; and, at the same time, the Head Inspectors' circuits were re-arranged, and five of the

Appendix C.

Head Inspectors' Reports on Schools Inspected and Teachers Examined.

M. Fitz-Gerald, esq.

districts which I had in 1867 were transferred to other groups, five new ones being added to mine. The five taken from me were Cavan, Ballinamore, Tuam, Galway, and Ballinasloe; and the five substituted for them were Newry, Swineford, Boyle, Roscommon, and Longford. My circuit, as finally arranged, consisted of the following districts:—

No. of District.	Official Centre.	No. of District.	Official Centre.
19,	Newry.	27,	Roscommon.
21,	Swineford.	28,	Longford.
22,	Boyle.	29,	Trim.
24,	Ballieboro'.	30,	North Dublin.
25,	Drogheda.	33,	Mullingar.

These districts extend from Dundrum Bay, in the county Down, to the Shannon at Athlone; and from the mouth of the Liffey to the shores of Lough Conn, in Mayo; they include portions of no fewer than fifteen of the thirty-two counties of Ireland, and they comprise nearly every variety of soil, population, and mode of livelihood to be found in the country.

There are model schools at Newry, Ballieboro', and Trim; and the West Dublin model school, though situated in the South Dublin district, is attached for purposes of inspection to North Dublin; and consequently falls under my superintendence.

Owing to the change of districts above referred to, a great part of my time, available for inspection during the year, was devoted to special visits to schools in the newly added districts, and to making myself generally acquainted with these districts. Hence I was not able to proceed in as systematic a manner as I proposed with the work of inspection in all my districts; and, as my data are necessarily incomplete, I shall defer for the present offering any generalized remarks on the state and progress of education in the schools which I was enabled to visit. There are, however, some points which were forced in a prominent manner on my attention, and to which I shall briefly advert.

Foremost among these is the very inferior and, in many cases, wholly inadequate character of the school accommodation in parts of the western districts. A considerable portion of the school-houses in these districts consists of thatched cabins of the poorest class, badly built, badly lighted, and in bad repair. Such houses are generally either the property of the teachers, or rented by them, often at exorbitant rents, for school purposes. In external appearance they differ little, if at all, from the hovels inhabited by the poorest class of labourers; and, internally, being generally low and narrow, they afford the worst possible accommodation for pupils. They are always badly furnished; and, even if desks of a better class be provided, they yield in a short time to the unequal strain caused by the inequalities of the floor, and become crazy. The walls afford no space for hanging maps, scarcely room for reading tablets; where maps can be hung they soon get the bottom rail knocked off by the children rubbing against them as they pass, or as they sit on forms by the wall. Ventilation is happily provided for, as in all Irish cabins, by the open door and the wide chimney; but, as a set off, the latter often fails to perform its own office, as the dingy maps and soot-covered rafters too plainly tell. To add to the inconvenience, these hovels are frequently crowded to excess, especially when the cessation of farm labour allows the more grown children to attend. At such a time, I have seen a class of over thirty boys and girls standing at arithmetic on the roadside, in front of a school-house, in the northern part of Roscommon, while more than double that

number were literally packed into the building—such a one as I have described—some standing round the walls reading from books or tablets, several crowded into the two or three creaking desks endeavouring to write; and some even kneeling at forms on which they had placed their copy-books. I have reason to believe that this was no uncommon case; and that many of the smallest and most inconvenient houses are similarly crowded during great part of the year.

Appendix C

Head Inspectors' Reports on Schools inspected and Teachers examined.

M. Fitzgerald, esq.

I need not dwell upon the more obvious evils resulting from allowing such houses to be taken into connexion with the Board as National schools. It is easy to see that, unless the school accommodation be adequate and suitable, the work of instruction must proceed at a disadvantage—order and discipline become impossible—and, whether on the floor or in the desks, the crowding is fatal to efficient teaching. But there are other evils not so obvious, though not less fatal to the progress of education in the locality where they exist. I have said that the worst houses are generally the property of the teacher, or rented by him, which in most cases, comes to the same thing. Let us take the former case first. When the teacher owns the *house*, he has generally a freehold in the *school*. No matter how inefficient he may be, short of absolute incompetence, the manager cannot remove him, unless he is prepared to provide a new house for his successor; and thus many inefficient teachers are kept on from year to year, until, at last, they have been so long recognised that it would be almost injustice to remove them. Again, cases arise where teachers, who have built their own school-houses, becoming old or infirm, hand over the schools to their sons, or their daughters' husbands, who may have no qualifications for the position beyond their relationship to the owners of the houses; and, for the reason already stated, the managers must acquiesce in the transfer. And this, be it observed, is not confined to houses of the poorest class, but extends to cases where teachers may have built houses of a better type, as many of them have done. In fact, where the teacher owns the house, he is virtually independent of the manager.

But how does it stand when—as is the more common case—the teacher rents the school-house? The very fact of his being obliged to do so affords *prima facie* proof that the nominal manager of the school takes no practical interest in education. In such cases, therefore, the teacher gets but little in the way of school-fees, and nothing by way of endowment; so that the rent of the school-house has to be paid out of the Board's grant, which is given in aid of salary; and as the teachers who have to rent houses are generally in the lowest class, the rent not unfrequently forms a large per-centage of their income. One very gross case of this kind which came under my notice in the course of the year I reported at the time to the Commissioners, who communicated at once with the manager; but I have not heard that any useful result attended their remonstrance. It is very disheartening to find that these things exist—to know that the grant made by the Board is not only not supplemented by local effort, but actually diminished to a considerable extent to provide the very house in which the school is to be conducted, and for which, if for anything, the locality should pay. Where such culpable apathy or selfishness exists it seems almost a hopeless effort to strive to raise either the character of the instruction or the position of the teacher; it seems almost unreasonable to require or allow the State to do anything for people who will do so little for themselves; and one is driven to wish for the power to tax such indolent people as the only means of compelling them to do their duty. Nor, I fear, can the Commissioners and their officers stand wholly acquitted of blame. It was always in their power to refuse grants in these cases; and it is to be wished that this power had been sternly exercised from

Appendix C.

Head Inspectors' Reports on Schools inspected and Teachers examined.

M. Fitz-Gerald, esq.

the first. No doubt the best motives influenced them in departing from the strict letter of rule in this matter; no doubt they thought that a bad school-house was better than none; that it was better to have the people taught in bad school-houses than not taught at all; no doubt they believed that better houses could not be provided, and this may have been true at the time in some localities. But I am persuaded that the Commissioners had no idea of how bad some of the houses were which they sanctioned; and that they have no idea of how bad some of them have become in the course of years, until now they are a disgrace to the system. And I am further persuaded that if no grants had ever been made to these patched-up cabins, we should now have suitable houses in their stead. By the words "suitable houses," I do not mean buildings of a superior character, such as the vested houses or the better class of non-vested houses, of which so many excellent examples are to be found; I mean simply plain, substantial, roomy buildings, not necessarily slated or even boarded, but plastered and whitewashed, with good windows, and kept in decent repair. It would not surely be too much to require that any locality aspiring to a grant from the public funds for purposes of education should provide such a building; and when we reflect that two-thirds of its cost can be obtained on easy terms from the same public funds, we need have little hesitation in insisting upon its being provided.

But we may be assured that as long as the Commissioners tolerate the existence of the miserable hovels to which I have referred, so long will the parties locally interested remain content with them; so that reform in the matter must begin from above. If, as I believe, the time has come when the very poorest locality is able to provide suitable school-buildings, it is only necessary for the Commissioners to let it be known that such must be provided within a reasonable time, or that otherwise the grants will be withdrawn. Once let the managers of such schools know that they will be no longer tolerated, and better buildings will be provided fast enough. Besides, a good cheerful school-room is an important agent in educating the people of the poorer localities. If they see nothing in the school better or cleaner or more comfortable than in their own dwellings, they will conclude that nothing better is required; but if they resort, even occasionally, during their earlier years to a clean, cheerful room, they will at least know what cleanliness and comfort mean, and may be led in time to seek to secure these blessings for themselves. On every ground, therefore, it is most desirable that houses of this class should be got rid of. They are a wrong to the pupils whose progress is materially retarded by want of sufficient space; they are a wrong to the teachers, who, in most cases, have to provide out of their scanty resources for the payment of the rent; they are a wrong to the people of the locality to whom they are presented as a type or measure of the accommodation which the Commissioners, representing the Government, consider suitable for their imitation; and they are a wrong to the system of National Education, which is degraded in the estimation of the people and of the public by having such houses connected with it. They have been tolerated too long already, and by this mistaken indulgence have acquired a prescription which perhaps forms the most serious obstacle to their removal; but if their removal be firmly insisted on, I believe a very short time will suffice to secure the substitution of more suitable buildings. The very immunity which these localities have so long enjoyed from the necessity of providing adequate school accommodation, can be pleaded with equal force and justice as a reason why they should no longer be permitted to evade their responsibility in this matter. It is one of considerable importance, and I strongly recommend it to the attention of the Commissioners. Perhaps I should guard against the

inference that the inferior class of house I have described is the typical school-house of the western districts. I do not at all mean to convey this idea. Such houses are happily the exception rather than the rule; but in some localities they are far too numerous, and should not be permitted to exist at all. *Appendix C.* Head Inspectors' Reports on Schools inspected and Teachers examined.

Somewhat akin to this is the necessity which exists for providing dwelling-houses for the teachers within reasonable distance of their schools. Very few schools through the country have such dwellings connected with them; and in most country localities the teachers find the greatest difficulty in obtaining suitable lodgings. There is perhaps no one measure equally easy of attainment which would go so far to improve the condition of the teachers, to make them contented, and to fix them permanently in their schools as attaching a dwelling-house and small garden to each. Where these conveniences exist there is such competition for the appointment that managers can select superior teachers, and the advantages are such that the fear of losing them acts as a powerful stimulus in keeping the teacher up to his work; and thus not only the teacher but the school is benefited. I dwelt at some length on this subject in a former report, so that I consider it unnecessary to pursue it further at present. I shall merely repeat my opinion that the example set by the Commissioners in not contributing to the erection of teachers' dwellings, or in not requiring such to be provided in connexion with vested schools, has operated most injuriously upon the teacher's interests. *M. Fitz-Gerald, esq.*

The inquiry carried on during the past year by the Royal Commission on Primary Education has attracted attention to many points in connexion with elementary education in Ireland likely to form the subject of future discussion, and not improbably of legislation on the subject. Some of these it would be out of place to advert to in this report, others it would be considered improper for a person in the service of the Board to discuss; and though I readily acquiesce in the propriety of the rule which forbids the Board's officers to comment on the controverted questions connected with Irish primary education, I cannot but regret the necessity which seals the lips of those whose attention is specially devoted to the subject, and who have the best opportunity of forming a correct judgment. There are, however, two points in connexion with the future of Irish education upon which I should like to say a few words, namely, payment by results, and local support of schools.

Payment by results, in its widest sense, means that the remuneration given to the teacher shall be proportioned to the work done in his school, a principle so obviously just as to need no demonstration, and the economic value of which was so happily summarized by Mr. Lowe when introducing the Revised Code:—"I cannot," said the right hon. gentleman, "promise the house that this system shall be efficient, or that it shall be cheap; but I can promise that if not efficient it shall be cheap, and if not cheap it shall be efficient." But obviously just and valuable as the principle is, its application is a matter of greater difficulty than appears at first sight. The very definition of the term "results," is by no means easy—it is in fact co-extensive with the term "education," and must be measured by all that we understand by the latter word. Mere proficiency in reading, writing, and arithmetic, or even in the other branches of primary education taught in our schools, falls very short of "education" in its most comprehensive sense; and if we base our payments on this proficiency we shall leave out of account all the higher elements of education—those which it is most desirable to encourage and reward—the inculcation of high principle, the formation of good habits, all, in short, that we understand by the moral tone of a school, all that goes to make men good citizens. These things cannot be measured by

Appendix C.

Head Inspectors' Reports on Schools inspected and Teachers examined.

M. Fitz-Gerald, esq.

examination, and included in our "payment by results;" and yet, if we omit them, our scheme will be necessarily incomplete. Under our present system of payment, imperfect as it is supposed to be, all these elements are considered—not perhaps with the mathematical precision indicated by a per-centage of proficiency, but with an honest endeavour to give each its due weight; and if we would preserve the high standard which a large proportion of our teachers pride themselves on maintaining, we must be very careful to recognise and reward those qualifications which no mere examination of pupils can measure. I am of opinion that this can be best attained by preserving in great measure our existing mode of classification, and awarding to each teacher a personal salary proportioned to his attainments and success as a schoolmaster, and by adding a small payment for the proficiency attained by the pupils. I abstain purposely from entering into details, either as to the subjects or mode of examination, or as to the proportion which the personal salary should bear to the "results'" salary; I merely desire to state my view as to the principle on which the latter mode of payment should be introduced. There should be no violent or sudden change; the new mode of payment should be made so acceptable that all deserving teachers—and for no others would I claim a moment's consideration—would hail it as a boon, and set themselves heartily to co-operate in carrying it into effect. After a time, if it was found to work well, the proportion of salary dependent on the "results" could be increased, by which the good teachers would be still further rewarded; and ultimately, by proceeding cautiously, we might hope to discover the exact ratio which the one class of salary should bear to the other, so as to secure, in practice, the most efficient operation of the scheme. One certain good would result from proceeding in the manner I recommend—the payment for "results" would be an *addition* to the teacher's salary; and thus one step would be taken towards raising his remuneration to an amount more nearly proportioned to the services he renders and to the social position he ought to hold.

Another mode of securing this most desirable object would be to insist upon greater local effort in aid of schools receiving State support. This involves a principle as obviously just as that of payment by results, but, unfortunately, even more difficult of application. I need not repeat the comparison—or rather the contrast—between England and Ireland in this respect; nor need I compare the amount of State aid with that locally provided in this country. The figures have been published again and again, and are sufficiently familiar to all interested. I would merely remark that time brings no improvement in this matter: that, on the contrary, the disproportion is even greater than formerly—and that I can discern no sign of any awakening to a higher sense of their duty on the part either of the landed proprietors and the managers, or the parents of the pupils. Here and there we find bright exceptions, many of whom I could name, but they are exceptions, and the rule is the other way. Several causes conspire to produce this unfortunate state of things; and I can see no reasonable grounds for supposing that these causes are likely to operate less effectively in the future than in the past. It would take up too much space, and would moreover be an invidious task, to enumerate these causes in detail; nor is it necessary that I should do so; they are well known, and we may assume that they are likely to continue. But the state of things which they produce need not continue. There is no reason why the inhabitants of any particular district should be allowed to escape their responsibility in this respect, and to dip their hands into the public purse for money which ought to come out of their own pockets. Already every locality must maintain its own roads, must provide for its own poor, must support, in great measure, its own

medical charities; and, by parity of reasoning, every locality should provide, in part at least, its own means of education. Indeed this is already done to a small extent in the workhouse schools; and what the guardians do for the paupers within the workhouses I would require them to do for the independent poor outside their walls. A very small addition to the poor-rate, which falls equally on the landlord and the tenant, would provide the necessary funds; and I would not have the slightest hesitation in intrusting the Boards of Guardians throughout the country with the local management of the schools—preserving to the clergy of all denominations the essential rights which they now enjoy, and with which very few Boards of Guardians in the country would be found desirous to interfere. Again, I purposely abstain from entering into details, my purpose being simply to direct attention to the machinery which exists in Ireland for carrying out a system of local taxation for educational purposes—a machinery which is based upon the fullest local representation—a machinery which is already engaged in discharging duties of an analogous, almost kindred nature; and which, from long practice in dealing with public funds, would administer these in the most useful and economical manner. And I think it only due to the Boards of Guardians to say that, as far as my observation extends, I have always found them anxious to promote the education of the children committed to their care. I would even go further and say that, in their desire to secure efficient teachers, and to get rid of inefficient ones, they would compare favourably with any other class of school managers; and I would hope for the best results from enlisting their intelligence, public spirit, and local supervision in the cause of popular education in Ireland.

Appendix C.

Head Inspectors' Reports on Schools inspected and Teachers examined.

M. Fitz-Gerald, esq.

There is another subject connected with National Education which has, from time to time, received the favourable notice of the Commissioners, and to which I would take this opportunity of drawing attention—I refer to the permissive introduction of classical teaching into our schools. The arguments in favour of this step appear to me irresistible; and the cost attending it would be very small compared with the great object in view. Our schools have virtually annihilated the old classical and semi-classical schools, in which so many eminent Irishmen received the first part of that education which opened for them the road to wealth, and not unfrequently to fame; and the destruction of these schools has, doubtless, doomed to a life of obscurity and servile toil many whose genius, had the opportunity been afforded, might have shed additional lustre upon their country. I do not forget, as is sometimes forgotten by those who discuss this question, that our schools, more widely scattered, and affording an incomparably better English education, have placed the means of social advancement within the reach of thousands to whom the former schools were inaccessible; and I can have no doubt that the aggregate of good done by them has been immeasurably greater; but I think we might have done this, and not have left the other undone. If the Commissioners had encouraged, or even approved of the teaching of classics in National schools, of course, under proper restrictions, there can be little doubt that we would now have among our staff of teachers many excellent classical masters, from whom any boy in the country, desirous of classical education, could obtain it at a cheap rate—such men, combining the mental expansion due to classical study, with the superior method introduced by our training schools, would form a corps of instruction far more efficient than their predecessors, or than they themselves have proved; and we might fairly expect to see boys proceeding from their classes worthy to compete with the pupils of the most favoured of our Royal or Endowed schools. Their position, too, would be more comfortable and more respected than that even of our best

Appendix C.

Head Inspectors' Reports on Schools inspected and Teachers examined.

M. Fitz-Gerald, esq.

teachers at present; and the whole body would hold a proportionably higher place in public estimation. I remember one case which came under my own observation some years ago in the county Tipperary, where the master of a National school cleared over £100 a year by teaching classics out of school hours; and I may add that English in all its branches, arithmetic, and mathematics, were admirably taught in the same school, by the same master. The common objection that English would be neglected for classics is not worthy of serious refutation. The very reverse would be the fact. English would be better, because more scientifically and skilfully, taught by a master possessed of a fair knowledge of classics; and those who raise this objection forget that, with the constant supervision of the manager, and the frequent examination of the school by the Inspector, it would be simply impossible for the teacher systematically to neglect any branch of the school course. I sincerely trust that this important subject may soon again engage the attention of the Commissioners; and that the same large and enlightened views with which it has hitherto been regarded, may influence their decision. With the recollection of what classical teaching did for thousands of the humbler classes of Irishmen in former days, with the example of Scotland before them, they need have little fear that any opportunity of acquiring classical knowledge which may be afforded in National schools, can prove anything but a blessing to the country.

II. *Examination of Teachers.*—The number of teachers summoned to the examinations held in the several districts of my group during 1868 was 326, viz.:—162 males and 164 females. Of these, 92 males and 82 females were classed teachers seeking further promotion, and 70 males and 82 females were probationary teachers not yet classed. Twenty-one males and 31 females, from one cause or another failed to present themselves at the examinations, so that the entire number actually examined was 141 males and 133 females, or 274 of both sexes. I cannot say that I consider the results of the examinations satisfactory. Of the male teachers only 49—viz., 18 classed teachers and 31 probationers—succeeded in obtaining promotion; 81, including 19 probationers, were left stationary; and no less than 13 probationers were recommended for dismissal, as unfit for the service and unworthy of further trial. The female teachers did rather better: 66 of them, viz., 23 classed teachers and 43 probationers, were promoted; 61, including 25 probationers, were left stationary; and 8 probationers were dismissed. Of the 21 probationers of both sexes dismissed, 17 were actually examined, and found wholly incompetent; and 4—viz., 2 males and 2 females—were dismissed for absenting themselves from the examinations without sufficient cause: these had all been examined at least once before, and found undeserving of classification. I must say that very great indulgence is shown to the probationary teachers, and no one is dismissed until he has been proved to be wholly unfit for the office of teacher. I am disposed to think that it would be wise to exclude such very inefficient candidates *in limine;* it would be a kindness to themselves to prevent them from wasting some two years of their youth in the vain endeavour to obtain classification, and it certainly would be a great kindness to the pupils in the schools over which they are placed, and who cannot be expected to make any progress under such incompetent instructors. The programme of proficiency for probationers is too low, and, low as it is, is not, I fear, always insisted on, owing to the difficulty of getting suitable candidates to come forward for the office as vacancies occur. The alternative frequently presented to the Inspector is between closing up a school altogether and allowing an unqualified or poorly qualified teacher to take charge. I believe the proper course in such a case would be to reject the unqualified teachers at all hazards, and

either let the pupils go to some more distant school or compel the managers to offer inducements sufficient to encourage eligible candidates to present themselves. I believe the worst course is to allow incompetent persons to enter on the duties of teacher, from which it takes a year, and often two, to remove them, and whose removal at last is regarded as an act of harshness, if not injustice. Happily cases of the kind are few, but, in my opinion, there ought to be none such. All candidates for the office of teacher should be required to possess the requisite qualifications *before* entering on the duties of it, and the true method to secure this is to send unqualified persons back for further preparation—if they are in earnest, they persevere in study and come up again better prepared; if they are not they disappear, and the service is well rid of them. I believe the reason that so many candidates for promotion fail to obtain it is, that they do not study properly—whether from want of books, want of system, or want of inclination, I fear that many do not study at all; they come up trusting to their previously acquired knowledge, to the preparation afforded by the daily routine of school business—perhaps in not a few cases to luck—and, as a matter of course, they break down under the double ordeal of the written and oral examination. Even good and successful teachers frequently fail at examination. It is worth considering whether, in certain cases, promotion might not be made without special examination, and whether it is desirable to retain so many different subjects of examination as we have at present. The whole subject is one requiring careful consideration, and one that should engage the early attention of the Commissioners.

I have the honour to be, gentlemen, your obedient servant,

M. FitzGerald, Head Inspector.

The Secretaries, &c., &c.

No. 2.—General Report for the year 1868, upon Schools inspected and Teachers examined, by James Patterson, Esq., Head Inspector.

James Patterson, esq.

Gentlemen,—I have the honour to present this my general report on schools inspected and teachers examined by me in the year 1868.

On the 1st of February, by the change made in the grouping of the districts assigned to the several Head Inspectors, Galway was substituted for Waterford as the official centre for my group. The districts under my charge during any portion of the year were these.

I. Up to 1st February only:

No. of District.	Official Centre.	In Counties.
39,	Carlow,	Carlow, Kilkenny, Wexford, Wicklow.

James Patterson, esq.

There are District Model schools in Galway and Limerick, and a Minor Model school in Parsonstown. On these I have furnished separate reports.

In the course of the year I furnished 320 reports on other schools which I had visited and examined thoroughly or partially. These schools were thus distributed :—

In County.	Schools.	In County.	Schools.
Carlow,	2	Roscommon,	2
Clare,	43	Sligo,	6
Galway,	84	Tipperary,	27
Kerry,	4	Waterford,	9
Kilkenny,	12	Wexford,	1
Limerick,	38		
Mayo,	79	Total,	320
Queen's,	1		

By districts the following was their distribution :—

	District.	Schools. Fully examined.	Partially examined.	Total.
Of my former group.	39.	1	1	
	43.	1	3	
	46.	2		
	49.	6	10	16
	53.	1	1	2
My group subsequent to the change.	20.	14	15	29

	34.	20	19	39
	35.	8	10	18
	36.	11	20	31
	42.	11	15	26
	45.	6	15	21
	51.	9	17	26
	52.	12	17	29
	Totals,	137	183	320

The bulk of my work during 1868 lying in territory that was new to me, I am not able to state from observation what progress has been made in education in this part of Ireland since any previous year; but I proceed now to describe it as I found it, remarking at the outset that my notes for the most part relate to the poorest portion of the kingdom—the portion in which the greatest number of obstacles have hitherto impeded the education of the people. I will refer only to the ordinary National schools, leaving out of account, for the present, model schools, convent schools, workhouse schools, and prison schools.

I. *Character of the School-houses.*—This varies much in different districts, chiefly according as vested schools (those that have been built with aid from the Commissioners, and according to specifications) are numerous or not. In the Ballina district (20) not one school in ten is vested; in the Gort district (42) more than half the number are. These are the extremes; but no other district has nearly so few vested schools as the first-named. The Westport district (26) has nearly as many as the second, while the numbers in the others gradually diminish till, in the Galway district (34), they are about one-fifth of the whole. In many

Appendix C.
Head Inspectors' Reports on Schools inspected and Teachers examined.
James Patterson, esq.

places excellent school-houses have been built entirely at the expense of the landlord, the manager, or the people of the locality; but too often, in localities where aid from the Board on the required conditions is objected to, the only school-houses provided are mere makeshifts, many of them quite unfit for the purposes of a school. These, I am glad to say, are becoming annually more rare.

II. *Attendance of Pupils.*—Taking my ten districts together, and comparing them with the rest of Ireland, the attendance of pupils, as shown by the school records, appears to be of medium regularity. The average number in daily attendance for the previous twelve months in all the schools I inspected was in the ratio of 53 to 100 in the average number on the rolls for the same period. But it varied considerably in the different districts, in the Newcastle West district (52) being 59 per cent., and in the Westport district only 49. In the latter the attendance falls off considerably during the summer half-year; in the former it falls away slightly during the winter. But the greatest difference is in the attendance from day to day, which is much less uniform in the northern district than in the southern. I do not think there is any good reason for this. In no district is the attendance so regular as it ought to be, but I find it is always least irregular where the payment of school-fees is most insisted on. When the schools are not supported by local rates it is most damaging to their usefulness to permit indiscriminate gratuitous admission to them. This is what occurs in the western districts, where the schools are most inefficient. Managers often argue, most erroneously, that to enforce payment of school-fees would deter children from attending. Some patrons who contribute generously to the support of schools admit the children of their tenants, or, more commonly, all children indiscriminately, without charge; some managers who contribute nothing to their teachers' income nevertheless prohibit the payment of any fee, and the teachers, consequently, have nothing for their support but the salary —in these cases generally that of the third class, or less—granted by the Commissioners; and this happens in places where, in the absence of National schools, and sometimes even in competition with them, teachers of adventure schools gain a living from the contributions of the children who resort to them. Teachers of National schools in and around towns are often deterred from demanding fees by the operation of another class of schools unconnected with the Board, which are sustained, not by payments directly made by the children, but by endowments and private contributions, supplemented by periodical collections in the houses of worship. National school teachers in the neighbourhood of such institutions feel that they cannot enforce the payment of school pence without the risk of losing their pupils. Probably they would lose some, but I doubt that, even in such circumstances, the attendance of steady scholars at their schools would be much diminished if they taught them well and demanded some return from their parents. There can be no doubt that offering for nothing what is worth paying for has the effect of causing the boon to be slighted altogether by many who would eagerly take advantage of it if it cost them even a trifle. A comparison of the ten districts of my group, one with the other, renders strikingly apparent the concurrence of regularity of attendance with payment of school fees. The schools which I inspected during the year may be taken as fair samples of the whole. They represent the districts as holding the following order, district 51 being, as will be seen, two places higher in one column than in the other, and districts 34 and 36 appearing to have changed places in one column, with these exceptions the most perfect parallelism prevailing.

[TABLE.

Appendix C.

Head Inspectors' Reports on Schools inspected and Teachers examined.

James Patterson, esq.

(I.) Order as to regularity of pupils' attendance.	Number of District and Centre.	(II.) Order as to average amount of Fees paid per School.	Number of District and Centre.
First, . . .	52. Newcastle West.	First, . . .	52. Newcastle West.

Third, . . .	45. Ennis.	Third, . . .	42. Gort.
Fourth, . . .	42. Gort.	Fourth, . . .	51. Limerick.
Fifth, . . .	34. Galway.	Fifth, . . .	36. Parsonstown.
Sixth, . . .	32. Tuam.	Sixth, . . .	32. Tuam.
Seventh, . . .	20. Ballina.	Seventh, . . .	20. Ballina.
Eighth, . . .	35. Ballinasloe.	Eighth, . . .	35. Ballinasloe.
Ninth, . . .	36. Parsonstown.	Ninth, . . .	34. Galway.
Tenth, . . .	26. Westport.	Tenth, . . .	26. Westport.

The districts held, with respect to the proficiency of the pupils, very nearly the same relative position; in this case District 36 being third, and District 34 ninth, in order.

Dilatory attendance each day is as great an evil as the frequent absences of the pupils. In those districts where fees are scarcely at all paid this habit is lamentably prevalent. It can be, to a large extent, prevented without harshness, by a systematic and determined teacher, who knows how to enforce discipline, and shows he is in earnest, by getting through an important part of each day's business early in the forenoon. I have seen teachers of this stamp effect the most salutary and well-nigh incredible change in the attendance at schools where their predecessors had convinced themselves that it was impossible that children so poor, so scattered, so occupied, or so idle, could ever be brought together in considerable numbers, or in good time. A teacher in earnest, and properly seconded by the manager of his school, can almost always secure both a punctual and a fairly regular attendance of scholars, and nothing less should be expected of him. But the almost universal practice of postponing roll-call till noon (which in most instances is practically deferring it till *after* noon), is virtually an announcement to the scholars that their attendance is not required any earlier, an announcement that the scholars thoroughly understand and obey, if the statements sometimes made by teachers are to be relied on, viz., that to mark the rolls within the first hour of the school-day, would seriously reduce the reputed average attendance. On arriving at schools so late as 11 o'clock, I often find a smaller number of children present than the recorded attendance for the previous days of the month, though no sufficient reason can be alleged for the delay in any of the pupils' attendance. Sometimes I discover, with considerable difficulty, that the previous records were in excess of the truth: accepting them as generally correct, it appears that a large proportion of the children, for whose attendance the teachers receive credit, are present certainly no more than three, probably no more than two, hours at secular instruction daily. The permission to postpone the marking of the rolls till just before noon gives opportunity to dishonest or careless teachers to make exaggerated returns of attendance without much chance of detection. It is by incidental visits that such falsification is to be discovered; but in every district with which I am connected there are many schools that the District Inspector can never visit incidentally in the afternoon. Managers, for the most part, leave the verification of the returns to the Board's officers; and, as the Board's officers have seldom opportunity of comparing the actual attendance with that taken credit for, errors escape notice, and these errors, whether the result of carelessness or of design, are necessarily errors in excess. To prevent them, and at the same time to promote punctuality of attendance, and the children's satisfactory progress

in instruction, I believe that a rule to record the attendance very soon after 10 o'clock, or at least before 11, would be most effectual.

III. Instruction given in the Schools.

Taking the number 100 to represent excellent,
" 80 " good,
" 60 " fair,
" 50 " middling,
" 25 " poor,

the average value of the instruction I found given in the several districts is exhibited in the following table. It takes into account both the extent and quality of the instruction, and the average number of children that were sufficiently prepared in their programme in each school that I examined. This synopsis gives but an approximate idea of the relative value of the work done in the several districts, being based on too small a number of instances (about one-seventh of the total number of schools) for an induction to be absolutely relied on :—

District Number and Official Centre.	Average value of the Instruction given in									Order of excellence on the whole.
	Reading.	Penmanship.	Arithmetic.	Dictation.	Grammar.	Geography.	Needlework.	Extra branches for Boys.	All branches together.	
20. Ballina,	67	63	56	57	55	53	20	21	53	Eighth.
26. Westport,	68	67	45	50	48	41	42	—	49	Ninth.
32. Tuam,	70	66	58	54	47	42	50	30	54	Sixth.
34. Galway,	60	64	41	46	41	39	34	17	45	Tenth.
35. Ballinasloe,	72	69	54	53	45	40	43	40	54	Seventh.
36. Parsonstown,	72	65	65	55	63	46	48	37	59	Fourth.
42. Gort,	76	81	73	61	64	59	55	32	66	First.
45. Ennis,	70	69	48	53	48	52	50	51	56	Fifth.
51. Limerick,	72	71	64	54	40	47	54	62	60	Third.
52. Newcastle West,	77	70	65	57	52	56	72	60	63	Second.
Average for all the schools examined.	70	68	56	54	51	47	44	31	55	

1. *Reading* is the branch in which not only the largest absolute number of children passed, but in which also there were fewer failures among those who ought to have passed than there were in any other branch of the school programme. In some schools (15 per cent. of those I examined) all the scholars, according to their ages, acquitted themselves remarkably well, reading their proper books with ease and intelligence, and having made sufficient progress for their years. In twice as many (30 per cent.) the reading was nearly as good, but the numbers able to read not quite so large as they might have been. In 38 per cent. the quality of the reading and the number of the readers was fair; in 15 per cent. middling; and in the remaining 2 per cent. decidedly unsatisfactory. It was not to be expected that the pupils should be well acquainted with the subject-matter of their reading books, as few of them had yet perused the new editions which were in their hands. Instruction and systematic examination on the subject-matter of the reading lessons is too much neglected by the teachers generally. This is proved by the low marks for lesson books generally obtained at their first examination by all probationary teachers who have been pupils at National schools. Reading, indeed, cannot be so much said to be taught as to be learned in the majority of the schools in my circuit; for the pupils gain little assistance from the teachers in acquiring knowledge from what they read, or in correcting their pronunciation

Appendix C.

Head Inspectors' Reports on Schools inspected and Teachers examined.

James Patterson, esq.

of English, which, their vernacular language being Irish, is often barbarous in the extreme.

2. *Writing* is more carefully attended to than reading, and the number of pupils who passed in it was nearly as high. Irish children have taste and faculty for learning to write and to draw. The introduction and general use of a good system of copy-books has greatly promoted their progress in writing; but in drawing little or nothing has been done in the ordinary schools. Were a good supply of copy-books kept up, and attendance at forenoon instruction enforced in the schools, the teaching of writing might produce results 50 per cent. better than the present. The schools in which I found the results of the teaching of this branch *excellent* were 12 per cent. of the whole, in which *good*, 28 per cent.; *fair*, 38 per cent.; *middling*, 18 per cent.; quite *unsatisfactory*, 4 per cent.

3. *Arithmetic.*—In few schools is arithmetic taught so well as it might be. Teachers, perhaps, by attempting too much fail to accomplish so much as they might were their aims more modest, and more rational. Their prevailing fault is in imagining much has been done when children are pushed on to the advanced rules while still inexpert in simple processes, and ignorant of the expedients whereby they may be abridged and rendered easy. And the exercises given to the pupils are generally too little varied, too abstract, and too little relating to matters with which they are conversant, and in which they take an interest. Many pupils who can find, perhaps, by a tedious enough process, the correct answer to any question, under the rules they have been learning to know verbatim from the book, are yet bewildered when a similar question, or the same, varied in form, is put to them. This is the natural result of the mechanical mode of teaching adopted. The instruction in arithmetic in 10 per cent. of the schools examined was *excellent;* in 12 per cent. *good;* in 22 per cent. *fair;* in 32 per cent. middling; and in 24 per cent. *very poor.*

4. *Writing from Dictation*, though practised by the senior classes in all schools, does not receive sufficient attention from the junior. The consequence is that, while the pupils at the top classes can generally write very correctly any ordinary sentence dictated to them, a much smaller portion of the junior and middle divisions of the schools do satisfactorily what is expected of them. In my present group of districts the bulk of the pupils do not write nearly so correctly as under careful instruction they might be made to do. In 5 per cent. of the schools I found the proficiency of the pupils quite satisfactory; in 10 per cent. *good;* in 25 per cent. *fair;* in 43 per cent. *middling;* and in 17 per cent. *very low.*

5. *Grammar*, to be intelligently taught, requires a knowledge of the principles of composition and of the structure of the English language that few teachers in the west of Ireland possess; and to be intelligently learned requires a development of mind to which children so young as the great majority of those attending National schools have not attained. The most that can be expected is that children in the third class should be able to distinguish the parts of speech, and those above the third class be able to analyze a sentence that is not very complex. But this branch is taught (so to speak) generally in a desultory sort of way, or as a mere mnemonical exercise, and consequently with little useful result. There are a few schools, with advanced classes of pupils of the age of fourteen years and upwards, preparing for commercial life, or for the occupation of teaching: in these I occasionally find boys and girls very well able to analyze and parse sentences. On the whole, I found the instruction in this branch *excellent* in three per cent. of the schools; *good* in 12 per cent.; *fair* in 22 per cent.; *middling* in 36 per cent.; and *indifferent* or *worthless* in 27 per cent.

Appendix C.

Head Inspectors' Reports on Schools inspected and Teachers examined.

James Patterson, esq.

6. *Geography* implies instruction on the maps, and little more, in our school programme. Yet, considering the excellence of the maps now supplied at cheap rates to National schools, it is disappointing to find them little studied, even when managers and teachers have taken pains to procure them. But many schools are very ill provided with this apparatus since the discontinuance of the triennial free grants of requisites: in some that I have visited not a shred of any map was to be seen. The teachers of those schools, to be sure, informed me that they had sent for maps, for which they were obliged to pay out of their very slender salaries.

7. *Needlework*, of course, is only taught where a female teacher is employed; and, as many schools conducted by masters without female assistants are attended by both boys and girls, many female pupils receive no instruction in what ought to be a most important part of their education. Even where there are female teachers, dearth of materials is often an insuperable obstacle to progress in work. There are localities where many of the school-going children probably never possessed a new article of dress; the very rags that they wear were old rags when they first put them on, and too tattered even to be mended. Such children have no materials for needlework; the teacher cannot afford to provide them; and no one who has the means feels enough of interest in the school to do so. In many schools, however, needlework is regularly taught, and in some with praiseworthy success.

8. *Extra branches for boys*, usually taught where there are boys over fourteen years of age in attendance, are the rules for mensuration of plane surfaces, two or three books of Euclid's Elements, a very little algebra, and writing out a waste-book, with an attempt at a journal, in book-keeping. I have generally found geometry intelligently taught by second and first class teachers, and the pupils familiar with the rules for calculating the areas of rectilineal figures and circles; in algebra nothing more than a beginning made; and of book-keeping barely anything known. In a small number of schools agriculture is taught.

Although the actual good accomplished by the National schools in this region falls far short of what is desirable, and of what, obstacles notwithstanding, is yet practicable, education is through their instrumentality gradually extending year by year. The District Inspectors with whom I have the pleasure of being associated, eminently qualified for the work, labour with untiring zeal to advance the standard of education in their districts; and, when adequate local support is given to the schools, with marked success. But the absence of stimulus to the teachers and scholars from vigilant local superintendence, friendly counsel, and material aid, too often renders their efforts unavailing. Yet there are managers who exercise a powerful influence for good in their own sphere, and beyond their own: managers, lay and clerical—for the most part clerical—Protestant and Catholic—here, of course, principally Catholic—whose schools are a credit to themselves, and an unspeakable benefit to the whole community.

IV. *Cost of the Education in payments to Teachers.*—The amount paid by the Commissioners of National Education to the teachers and monitors in the 120 schools which I examined in these districts and reported on in full, in the year 1868, was, for twelve months, £5,381 as salaries, and a small additional sum in gratuities for special services, such as instructing monitors, keeping very orderly schools, &c. Both together might come to £5,500, not more. The average daily attendance of pupils at the same schools was 6,833, and the number presented for examination 6,848. Of these 6,848 children, 3,508 passed in reading the Second or Third Book, 2,979 in writing tolerably, and 2,490 in simple subtraction.

Appendix C.

Head Inspectors' Reports on Schools inspected and Teachers examined.

James Patterson, esq.

The first number includes the second, which again includes the third. For each child, then, in the average daily attendance the Commissioners paid, in the form of salaries and gratuities, 16*s.* 1*d.*; or, for each of them able to read so well as not to be likely ever to forget the art, £1 11*s.* 5*d.* The total amount that the teachers received from local sources during the same period was, according to their accounts, £1,163, viz., £213 from the patrons, and £950 from the children. I have little doubt that teachers receive many small payments from the children which do not appear in their books, the Board's grants not depending in any way on their keeping a cash-book. I will therefore suppose the school-pence amount to double the sum mentioned, which makes the total received from local sources £2,113, if my conjecture be right. This averages 6*s.* 2*d.* a child in the daily attendance, and 12*s.* for each in the average daily attendance able to read the Second Book. The payments to the teaching staff from both sources amount thus, at the outside, to £2 3*s.* 5*d.* for each scholar in the average daily attendance that can read passably; that, in five cases out of six, can also write tolerably; that, in about five cases out of seven, has also learned less or more of arithmetic, besides having begun to learn whatever is taught in the school of grammar and geography, and, if a girl, of needlework. This is not an inconsiderable fee for the education of a child at a common school; but it must be recollected that one child in the average attendance represents two actual pupils, and besides that, a child cannot read the Second Book without a year's previous instruction. Still, if the attendance were large and regular, teachers of efficiently conducted schools would have fair incomes at this rate; but, as circumstances are, it affords, on an average, just £63 8*s.* 7*d.* to the teaching staff, generally consisting of two or three persons, in each school.

V. *Pecuniary position of Teachers.*—The incomes of National school teachers in most of the ten districts under my superintendence are certainly inadequate remuneration for the duties they are expected to perform. But scarcely any principal teacher is in receipt of the full pay that it is in his power to obtain by earnestly and intelligently preparing for his work and performing it with efficiency. Very few men or women have attained to first class, and still fewer to the first division of it; and their actual classification is the index to their usefulness in nine cases out of ten. In most of the districts, too, there are several good service salaries undisposed of through lack of meritorious claimants, that is, of teachers who do the amount of good service in their schools that may fairly be expected of all. But the case of assistants is different. Except when the average attendance is large enough to require the employment of two assistants no higher assistants' salary than £24 is granted by the Board, and as a general rule there is no supplement from local sources to that sum. Even when two assistants are employed it is only the senior that receives more than £24. This is not sufficient to induce intelligent and well conducted young men to remain in the service, and consequently many who of necessity are taken as assistants are barely worth the small pay they receive. Were the pay attached to third class (£18 and £24 for male teachers, and £16 and £20 for females) increased to £20 and £25 for males, and £17 and £21 for females, it would be likely to attract persons of superior abilities and energy, who would not be content to remain at the bottom of the scale, but would, by intelligent and successful exertion, go on simultaneously improving the state of their schools and their own position in life.

The following tables show the numbers of teachers examined in the several districts, and the consequent action recommended to be taken in their regard. Of the 206 male teachers and 191 female teachers called

to the examination, 122 and 150, respectively, being probationers, were summoned peremptorily to pass an examination to qualify them to be recognised as classed teachers. The remaining 84 masters and 41 mistresses, being already classed, attended at their own request as candidates for promotion, whose schools had been efficiently conducted during the past year. Of these 125 classed teachers, 18 were assistants and 107 principal teachers; and this illustrates the remark made above to the effect that teachers too often neglect to improve their own position under the Board; for in the same districts that furnished these candidates for promotion there were more than 600 other principal teachers who had not yet reached the highest class to which they all ought to aspire, many of whom had even several intermediate steps to take before reaching it.

Some monitors, who had completed their term of service as such, attended the examinations with the teachers as candidates for classification. Four of these had been senior monitors—two in convent schools, and two in ordinary National schools. Only one was classed. Of four others, who had been first-class monitors in convent schools, two were placed in the first division of third class, one was placed in the second division of it, and one did not pass.

The senior monitors in office in the several districts (excepting those appointed since December, 1867) were, like the teachers, called together as usual for examination by the District Inspectors, who, after marking their written exercises, forwarded them to me for revision. A very few

were absent owing to sickness. 170 boys and 249 girls attended. Of these numbers 5 boys were monitors in a school of between 300 and 400 scholars in average attendance, taught by monks; and 116 girls were monitresses in 23 convent schools, with average attendance of pupils ranging from 60 to 460 pupils. The remaining 165 boys and 133 girls were monitors and monitresses in ordinary National schools with average attendance of pupils ranging from 35 to 170.

No. 3.—GENERAL REPORT, for the year 1868, upon SCHOOLS INSPECTED and TEACHERS EXAMINED, by TIMOTHY SHEAHAN, Esq., A.M., T.C.D., Head Inspector.

Timothy Sheahan, esq., A.M.

March 31st, 1869.

GENTLEMEN,—I have the honour to submit for the information of the Commissioners my general report for the year 1868.

I took charge of my present circuit in February, 1868, having been moved to it from Dublin, where I had resided the previous nine years. It comprises eight of the ten districts that formerly belonged to the Cork or Southern Circuit; and instead of the remaining two, Newcastle and

Appendix C.

Head Inspectors' Reports on Schools Inspected and Teachers Examined.

Timothy Sheahan, esq., A.M.

Limerick, there have been added the Clonmel and Waterford districts. This re-adjustment was rendered necessary to secure an equal distribution of the district model schools amongst the Head Inspectors. Of these schools there are now in my charge four—Cork, Clonmel, Dunmanway, and Waterford.

I. *Inspection of Schools.*—In the course of this year I examined thoroughly, and forwarded full reports upon 97 ordinary National schools; and upon 105 schools which were incidentally visited I sent up short reports. I could have visited a larger number had I not been detained in Dublin during the month of January. I was much engaged, too, in the course of the year holding inquiries, and attending to matters connected with the district model schools under my charge.

The following table gives the numbers of the schools inspected and incidentally visited during the year:—

No. and Name of District.	Schools fully inspected.	Schools visited.	Total.
48. Youghal,	18	20	38
49. Waterford,	15	22	37
53. Clonmel,	7	11	18
54. Tralee,	3	3	6
55. Macroom,	6	6	12
56. Mallow,	11	9	20
57. Killarney,	1	–	1
58. Bantry,	2	2	4
59. Dunmanway,	11	11	22
60. Cork,	23	21	44
Total,	97	105	202

The necessity of paying frequent visits to the four district model schools kept me a good deal in the districts where they are situated, and in the districts in my way to and from them. This will account for the many schools visited in Districts 48, 49, 56, 59, 60.

In the course of the present year I purpose devoting most of the time that can be spared for inspection to visiting schools in those districts where few were examined last year.

As I could not venture, with any degree of certainty, an opinion on the state and prospects of education through my circuit from the results of my visits to a few schools in each district, I have referred to the reports of Districts Inspectors for 1867. I am happy to say that I have found the statements therein expressed supported by the results of my inspection, so far as these results could enable me to form an opinion on the matters touched on in them.

II. *Examination of Teachers.*—There were examined this year in the ten districts 160 male and 161 female teachers. Of these 94 males and 96 females appeared as probationers. It does not tell well for the prospects of education to see 60 per cent. of the entire number presenting themselves for classification, the more especially in these districts where the system was so early taken up and so generally supported.

This state of things may be traced in a great measure to the feelings of the Roman Catholic bishops on certain important points. They have no confidence in the Central Training Establishment, and are unwilling that their clergy should send their teachers to be trained there. They are also unwilling to accept grants for building on the terms proposed, though schools are in many places badly required.

There is another circumstance which has tended to limit the supply of skilled and efficient teachers: it is the discontent that prevails throughout the country amongst the National teachers, who feel that they are not receiving an adequate remuneration for their services, and in this

Appendix C.

Head Inspectors' Reports on Schools Inspected and Teachers Examined.

Timothy Sheahan, esq., A.M.

feeling they are supported by public sympathy to a large extent. Many good men have left our service from this cause, and the same has induced several young lads of capacity and promise to avoid it, and seek employment elsewhere.

Though I have referred to this matter on several occasions in my general reports, yet I cannot avoid touching on it when I have to account for the large number of young and inexperienced persons who are, year after year, presenting themselves for classification. I am sorry to have to say that several of those examined this year were very poorly qualified, being wanting in skill, intelligence, and capacity, and such as could not have been appointed even temporarily had less objectionable persons offered.

The following table shows the numbers of the male and female teachers that were examined in the ten districts with a view to classification, or as candidates for promotion :—

—	Classed Teachers.						Probationers.	Total.
	1ª.	1ª.	2ª.	2ª.	3ª.	3ª.		
Males, ...	1	3	7	11	27	17	94	160
Females, ...	2	7	4	8	28	16	96	161
Total, . . .	3	10	11	19	55	33	190	321

I have given in the appendix a return for each district, showing the numbers examined in it and the results of their examinations.

The following table gives the classification of the numbers promoted in the ten districts, with the numbers left stationary, and the numbers dismissed :—

—	Teachers examined.	Teachers to be promoted to Classes							Teachers to be stationary.	Teacher to be dismissed.
		1ª.	1ª.	1ª.	2ª.	2ª.	3ª.	3ª.

No. 4.—GENERAL REPORT for the year 1868, upon SCHOOLS INSPECTED and TEACHERS EXAMINED, by J. G. FLEMING, Esq., Head Inspector. *Appendix C.*

Head Inspectors' Reports on Schools Inspected and Teachers Examined.

Derry, February, 1869.

J. G. *Fleming, esq.*

GENTLEMEN,—I beg to submit, for the information of the Commissioners, the following, as my general report on schools inspected and teachers examined by me during the year 1868.

The supervision of the six model schools in my group of districts, and the periodic examination of the pupils in attendance at them, involved additional official engagements of an arduous and responsible character. But, as I have already furnished you with a special report on each of these institutions, I shall confine myself to a short recapitulation of the character and amount of the official business performed by me during the past twelve months. I shall also refer, with some minuteness of detail, to the condition of the schools which I visited, and to the results of the examination of the male and female teachers whose literary attainments were tested in order to ascertain their fitness to undertake the charge of schools, or, if already classed, to decide as to their claims for promotion to some higher grade.

In February last, in compliance with official instructions, I left Derry to take charge of the undermentioned districts. Their areas, as compared with those of the north-western districts, are small; but the number of schools in my present circuit is larger, and the attendance far beyond what I met with in my late sphere of duty. For instance, the attendance at 105 schools which I visited in 1867, amounted to 4,348; while the attendance at 113 schools, inspected by me during the past year, amounted to 6,081. Two of these schools indeed were in large towns, and commanded an exceptionally large attendance, but the remainder belonged to the ordinary class of National schools. In connexion with this subject, I may refer to the large number of evening schools now in operation in the counties Antrim, Down, and Armagh. Generally speaking, they have been established and partially aided by the owners of large factories. They have not, perhaps, accomplished all that those gentlemen may have anticipated, but their influence has been turned to useful account in refining and elevating the tastes and social habits of those who have been wise enough to attend them with a view to intellectual improvement. The rough and severe manual labour in which so many of the working classes are engaged, and the associations by which they are surrounded at their places of abode and at their daily callings, tend to the formation of uncouth and repulsive manners, which some ignorant persons regard as a necessary accompaniment of manly independence and strength of mind. Unquestionably the night school exercises a wholesome control over the temper and language of such persons, and thus serves to tone down the hardening influence of their daily occupations. Moreover, the presence and bearing of teachers who exhibit the courtesies of better society, do a great deal of good in schools of this kind. At the same time, they tax to the utmost the patience and physical endurance of the teachers, many of whom state that their health has suffered from the toil which the twofold duty of conducting the day and night school obliges them to undergo. They would willingly forego the additional salary they receive for their labours in the night school, but they are obliged to perform this duty, as managers of schools are unable or unwilling to secure the services of a second teacher to relieve them from their irksome task.

Appendix C.

Head Inspectors' Reports on Schools Inspected and Teachers Examined.

J. G. Fleming, esq.

I give in the subjoined table the names of the ten districts under my superintendence, together with the number of schools which I fully inspected or incidentally visited in each of them. It is in place to mention that I travelled 3,635 miles on the public service during the past year, at a cost of £48 5*s.*, or a fraction over 3¼*d.* per mile.

No. and Name of District.	Number of Schools fully inspected.	Number of Schools visited incidentally.
2. Derry,	1	–
4. Ballymena,	3	5
6. Strabane,	3	3
8. Belfast, North,	4	2
9. Belfast, South,	3	7
10. Newtownards,	21	21
11. Lurgan,	3	4
15. Dungannon,	14	24
16. Armagh,	14	14
17. Downpatrick,	16	16
18. Monaghan,	20	9
23. Cavan,	11	8
Total,	113	113

Hence I fully inspected 113 schools, and visited incidentally the same number during the year 1868. I found it impossible to get through a great amount of inspection duty, as I had to devote much of my time to the examination and classification of teachers, and the supervision of six model schools. But for the facilities for travelling, which the numerous railways afforded me, I could not have completed all my official business within the year, as the examination of teachers involved far more trouble and time than I anticipated from my experience as Head Inspector in other districts. For instance, the number of female teachers examined last year in the two Belfast districts fell little short of the total number of female teachers examined in 1867, in the ten north-western districts. I willingly avail myself of this opportunity to thank the Inspectors officially associated with me, for the hearty co-operation and valuable help they gave me in the discharge of public business. It was mainly owing to their ability and zeal that I succeeded in bringing to a close the examination of teachers, and the inspection of model schools before the end of the year.

The nature and amount of official business which engaged my time during the past year may be gathered from the following summary:—

	Days.
Inspection of Schools,	106
Examination and classification of teachers,	39
Supervision of model schools, and examination of pupils attending same,	40
Drawing up questions for examination of teachers, and revising their written exercises,	9
Official inquiries, and other miscellaneous duties,	16
Preparing my general report,	12
Schools closed for Christmas and Easter vacation,	18
Saturday's official correspondence, &c.,	52
Sundays,	52
Ill, or on leave of absence,	22
Total,	366 days.

The attendance at the National schools in small towns, villages, and country districts is seldom so large as to overtax the teacher's strength and energy. Not so in most manufacturing towns, owing to the extreme difficulty of keeping up a properly qualified body of male assistant teachers. Men of the proper stamp and character, and fitted by temper and acquirements, seem indisposed to submit to the cares and vexations

of the school-room, seeing that the same mental activity, good conduct, and perseverance expended in business will insure them a generous and speedy remuneration. It cannot cause surprise that men with such opportunities decline to fill subordinate positions in National schools. Managers are, accordingly, driven to appoint females to these minor posts, an objectionable practice, but which must, however, be allowed in many cases. This remark also applies to seaport towns, where, generally speaking, the young men go to sea, and do not show any wish to become school teachers. For instance, the assistants in the Portaferry, Hollywood, and Strangford schools are females; and in Bangor, Carrickfergus, and Donaghadee the services of male assistant teachers cannot be secured. For the same reasons, lads will not accept the situation of paid monitor; the young person who fills the post of monitor in Donaghadee National school is unwilling to continue his services in this capacity. He wants to go to sea, contrary to his mother's wish, as his father and brother, both sailors, lost their lives through shipwreck some years ago. Cases of this kind are, I believe, numerous enough, but my scanty knowledge of the schools now under my superintendence, prevents me from giving further details in connexion with this subject. It is, however, worthy of remark that in the Belfast districts, which contain a vast number of schools that command a very large attendance, there are very few male paid monitors. Many of the monitresses, I am happy to add, give valuable help, especially in schools attended by very young children, and in time they become efficient assistant teachers. They then claim and hold a prominent position in their respective schools, where their usefulness is unquestionable. Their training and gentleness of manner eminently fit them to bear the turmoil and drudgery of the school-room, control the temper and win the affections of the young. But, for them, I believe, the infants, who form so considerable a proportion of the attendance in large town schools, would be sadly neglected, not indeed from unwillingness on the part of the principal teachers to do their duty, but from sheer inability to devote sufficient time to these young children, unless at a loss to their more grown pupils. Praiseworthy efforts have been made in many places to remedy this defect, but still the early training and other advantages which the infant school brings with it have, as yet, been restricted within far too narrow a field of operation. This, among other causes, has retarded the spread of education among the humbler classes; hence a marked increase in the number of infants' schools is much needed, especially in manufacturing districts, where thousands of small children leave school for good before they can read lessons in the third or even second section of the Second Book.

Speaking with some experience of the subject, I may observe that much more is effected through the agency of the infant schools than is generally supposed by persons unacquainted with their working. I shall not dwell further on this point, as I have elsewhere stated that children who are fortunate enough to attend a good school of this kind are, as a rule, more intelligent and more advanced in the elementary branches at seven than the pupils of most ordinary National schools are at nine or even ten years of age.

I furnish in the annexed table a careful summary of the attendance of pupils in the 113 schools fully inspected by me last year. It appears that considerably more than one-half the number of children on rolls was in attendance on the days of my inspection. In fifteen schools the yearly average attendance exceeded 70, but this was far above the attendance in the rest of the schools to which this report has reference. This I regard with satisfaction, as I know that in those schools where the daily average attendance is high—say above 100, and where there is but one school-room—it is very hard to enforce order and discipline, especially as suitable class-rooms have in comparatively few instances been provided.

Appendix C.

Head Inspectors' Reports on Schools Inspected and Teachers Examined.

J. G. Fleming, esq.

Hence much overcrowding, to the detriment of health, and an incessant noise and din which give the teachers much unnecessary trouble and annoyance. In numerous instances these evils could be easily remedied by the erection of spacious class-rooms, so as to enable the teachers to carry out the plan so much recommended by experienced educationists, of making three divisions of the classes where the largeness of the attendance warrants such an arrangement. With some few exceptions the school-houses I saw in the rural districts were well lighted and ventilated, and in other respects admirably suited for educational purposes. Their short distance from the homes of the pupils who attend them is a great boon to those poor children who are thus spared the hardship of a fatiguing walk to and from school, and frequent exposure to bad weather during the inclement winter months.

Number of schools inspected in detail during the year,			113
	Males.	Females.	Total.
Number of pupils present at examination,	3,899	2,582	6,481
Number on rolls,	6,694	4,193	10,887
Per-centage of attendance to every 100 on rolls,			59·5

The number of pupils able to read correctly in Second or higher class-books was about 44 per cent., or something less than half of the total number in attendance on the days of my inspection—1,739 read with ease and accuracy lessons consisting of three or four syllables; and 1,150 read with fluency and distinctness numerous passages in the Third or Fourth lesson book; the remaining 3,592 were either in First Book or so slightly acquainted with the Second Book that they broke down in the attempt to read words of two syllables, or even monosyllables of more than ordinary difficulty. The annexed figures represent these results, and the required per-centages.

Total number of pupils present at examination,		6,481
		Per cent.
Able to read correctly in Second Book,	1,739	26·8
Able to read any of the higher books with ease and accuracy,	1,150	17·7
Unable to read lessons in 3rd or 2nd sections of Second Book,	3,592	55·5

The general answering of the several classes on the meaning of words and phrases was better than I anticipated from the experience I had acquired in other school districts. This, however, is easily explained. English was the vernacular language of *all* the children examined by me during the past year, while on previous occasions many of the children who came before me for examination spoke Irish alone until they began to attend school. This, I need hardly add, placed their teachers under serious disadvantage, and proved a great bar to progress, especially in reading. It is disheartening to find that more than one-half of these 6,481 children, could not read a very simple narrative, and what makes the matter worse, many of them will shortly leave school for good, owing to the poverty of their parents, and the numerous sources of employment now open to children in large commercial towns. The evening schools, now so general, afford children of this stamp an opportunity for self-improvement which many of them turn to good account. Some of them, moreover, are classed as "*half-timers*," that is, their employers are bound by law to allow them two and a half hours daily, in order to attend school. There is, therefore, reason to hope that they will gradually master the rudimentary branches—reading, writing, and elementary arithmetic, or, at any rate, that they will remain long enough under instruction to prevent them from drifting into a total forgetfulness of all they had learned during the short period they remained at school as regular pupils. Persevering and patient efforts, united with hope and energy, have I believe done much for children of this class. This is a matter of great importance, as in their case education, however limited,

Appendix C.
Head Inspectors' Reports on Schools Inspected and Teachers Examined.
J. G. Fleming, esq.

helps to improve their worldly prospects. It not only makes the worker a better artisan, but, as employers well know, it exercises a beneficial influence over all his habits, and leads to a more prudent use of the rewards of labour.

The answering of the several classes examined by me on the subject-matter of their reading lessons was, I have already stated, ready and intelligent. I must add, this remark does not apply to their style of reading passages in verse, which, as a general rule, were hurried over in a sing-song tone, with little or no appreciation of the author's meaning. Some of these pieces had been committed to memory, but only in very few schools, and not at all to the desired extent. This is to be regretted, as an excellent opportunity is thus lost of storing the mind with many beautiful images and noble thoughts, which, when acquired in the freshness of youth, seldom fade from the memory in after years. Exercises of this kind should also be encouraged on other grounds—they add a good many words to the slender vocabulary of those whose education is unavoidably limited, and in some respects superficial. This, indeed, appears clearly enough from the correspondence of the poorer classes; their letters usually begin and end with the same phrases, and, when sifted, are found to contain a very small list of words.

A taste for reading should be fostered by turning to useful account the illustrated lesson-sheets with which most schools are provided. This, however, is never attempted, although my conviction is that the printed matter which they contain may be made valuable accessories in stimulating thought, awakening inquiry, and creating a thirst for information. Interesting facts and attractive narratives may be made to tell with lasting effect on the minds of the young. Of course anything like thorough teaching in these respects cannot be looked for; but in the tangible, visible objects of natural history the inquisitiveness of children will find sources of delight and instruction which may become the groundwork for further acquisition in the same path.

The annexed figures give a correct summary of the proficiency of the pupils in penmanship and writing from dictation.

		Per cent.
Total number able to write fairly on paper, . . .	946	14·6
" " with ease and freedom, . .	247	4· nearly.
" " from dictation a sentence with tolerable accuracy, . .	1,083	16·7
" " from dictation a passage with ease and correctness, . .	301	4·6

These per-centages are, it must be admitted, low, and show that penmanship has not received the attention which its importance merits. It is, however, necessary to remark that the foregoing return exhibits the proportion of pupils able to write as compared with the total number in actual attendance, about one-half of whom, being in first class only, had received little or no instruction in penmanship. Hence, the per-centages in question may be at least doubled if I exclude from consideration all who had not begun to read in the Second Lesson Book. In all the model schools the writing of a large proportion of the pupils was characterized by freedom and elegance of style. Their copy-books, moreover, exhibited a striking uniformity, showing that the subject had been systematically taught. It is in place to mention that the black-board has been extensively used in teaching penmanship in these excellent schools, and with the best results. I believe the same may be said of schools conducted by teachers prepared for their office in any of these institutions. No doubt much of their success is owing to the watchful supervision they exercise over their writing classes—no child is allowed to hold

Appendix C.

Head Inspectors' Reports on Schools Inspected and Teachers Examined.

J. G. Fleming, esq.

his pen amiss for any length of time, or to go on from line to line repeating the same blunders. Of course the same plan is open to every teacher, but it is effectually carried out in a comparatively small number of schools. It is true that in overcrowded school-rooms, from want of sufficient space, this full and constant supervision must not be expected. Cases of this kind are, however, very exceptional, and do not invalidate the broad statement that in a considerable number of schools the children, when writing either on slates or paper, are left too much to themselves, and do not get the requisite help from their teachers. Without overrating it as a branch of instruction, I attach the utmost importance to good writing. Where well taught, I nearly always find the proficiency in other subjects also good, and order, neatness, and discipline fully observed. On the other hand, copy-books disfigured by a shameful scrawl, are an almost unfailing sign that the general business of the school has been neglected, and that the teacher is either unwilling or unable to discharge his duties faithfully and efficiently; and no wonder, for penmanship is not a science difficult of attainment—it is simply a manual art, which, with due diligence and attention, can be acquired by the most stupid children. If, therefore, it can be learned by carefully observing a few mechanical rules, it follows that the want of proficiency in it is all the more inexcusable.

Arithmetic, which ranks in the school programme as one of the three essential branches, receives in most schools a considerable share of attention. The general answering on it was, in some respects, quicker than in schools of a corresponding class which I inspected during the year 1867. This observation chiefly applies to the pupils of the senior division, who displayed much readiness in working sums in the money rules, simple proportion, and practice. This, I think, may be regarded as satisfactory proficiency for lads whose average age did not greatly exceed eleven years. Girls have but little time to devote to arithmetic, as needlework is for them a subject of far greater importance. Moreover, readiness and skill in making out business accounts will suffice for the requirements of any situation they may be called on to fill, and as they do not stop long at school it would be wrong to test them by the standard adopted in a boys' school. The following summary shows the results of their answering. Girls in the senior division exhibited a sound knowledge of the principles of notation and numeration, and they worked questions in the compound rules with creditable accuracy and despatch. Those who had been for a length of time under instruction could work easy sums in simple proportion. Children in the advanced division of second class had acquired a fair knowledge of the cardinal operations—addition, subtraction, multiplication, and division. This, I am happy to add, was the fruit of varied and frequent exercises in these elementary rules, which constitute the groundwork of all solid instruction in arithmetic. Intelligent pupils in junior division of third class seldom failed to work pretty hard sums in compound division; some were still more advanced, while others fell below this standard. But the summary I have given deals only with general averages, and does not touch individual cases.

In some schools plain sewing is wholly neglected, or it is so superficially taught that it might as well be omitted from the course of instruction. This, in many instances, arises from the unwillingness of parents to allow their children to devote any of their time when at school to needlework. They will not, therefore, provide them with sewing materials, chiefly on the ground, as several teachers have assured me, that their children have ample time and opportunity to learn sewing and knitting at their respective homes. This is likely enough in a small number of cases, and it is also true that many poor women who never

entered a school are excellent knitters, and earn a good deal by their skill in this branch of plain work. But, generally speaking, the children of the poorer classes can do very little with their needle. Managers often deplore this neglect, so detrimental to the usefulness of their schools, but it is due to the female teachers to state that, as a rule, they are not responsible for the slight progress made by some of their pupils in needlework. I found that in most cases they had given considerable attention to their sewing classes; they had, however, to contend with the apathy or ignorance of parents, and hence their comparative want of success. In some schools, indeed, the time allowed for needlework was too short. Lastly, the want of aid and local supervision on the part of those who could supply the schools with work and whose influence would have a beneficial effect on the minds of pupils and teachers is one of the causes which stop improvement in this direction. It is to be hoped that as education advances the advantages resulting from skill in plain sewing will be duly valued. To be well instructed in fixing and fitting work for sewing, to hem, stitch, and darn well, are qualifications that will greatly promote usefulness in any station in life. But to the poor they are absolutely necessary, and, therefore, in every girls' school they should be regarded as essentials. Anyone conversant with the condition and habits of the poor must have observed how great an advantage it is to them to have merely some skill in darning or patching, and what thriftlessness ensues from want of it; how much more, then, must a good knowledge of plain sewing tend to make them notable and industrious.

In the subjoined table full particulars are given of the results of the examination of teachers held during the past year in the ten districts under my superintendence.

ANNUAL EXAMINATION (1868).

	Males.	Females.
Number summoned to attend,	242	216
„ who failed to attend,	26	35
„ recommended to be promoted to classes—		
1^1,	7	2
1^2,	5	1
1^3,	9	1
2^1,	21	9
2^2,	15	9
3^1,	44	67
3^2,	19	30
„ recommended to be left stationary,	86	53
„ „ „ dismissed for failure in—		
Two subjects,	1	–
Three or more subjects,	9	9

It appears that of a total number of 397 teachers who attended the written examination 19 were dismissed owing to the want of literary attainments. They were probationers, and had failed to obtain a class at a previous examination. Had strict justice been dealt out to many of those who have been returned as stationary they would also have been dismissed, as their answering gave very slight proof of ability or due preparation. They have, however, been allowed further trial, because this was their first examination, and because if removed from their situations more suitable persons could not be got to fill them. Twenty-six male and thirty-five female teachers did not attend the examination although summoned thereto by the District Inspectors. Twelve male teachers were absent through illness; seven withdrew, being candidates for promotion, but from want of preparation or some other reason they declined to present themselves for examination. They had been already

Appendix C.

Head Inspectors' Reports on Schools Inspected and Teachers Examined.

J. G. Fleming, esq.

classed; they were summoned at their own request, and they gave satisfactory explanation of their absence. Finally, seven stayed away without valid excuse.

Of 216 female teachers summoned to attend the written examination, no less than 35 absented themselves; 16 could not attend through *bonâ fide* illness; 6, being candidates for promotion and already classed, did not come forward for examination, the reasons they assigned for their absence were satisfactory; 2 resigned; and the rest had no excuse to allege for their absence.

The number of female teachers promoted to the higher grades is very small, although, generally speaking, candidates for first or second class got good marks for reading, penmanship, writing from dictation, and needlework; they also answered pretty well in geography and grammar. Some of them, however, broke down in arithmetic or lesson books, both essential subjects. Hence, of 181 female teachers examined only 22 succeeded in gaining any grade above the third class.

In conclusion, it is my pleasing duty to refer in terms of praise to the conduct, demeanour, and appearance of the teachers who attended the examinations to which this report has reference. Their dress was neat and becoming, but without any display of finery unsuitable to their station in life. Again, although these examinations were attended by an unusually large number of young, inexperienced teachers, in no instance had I any reason to administer a reprimand or caution for carelessness, loss of temper, or inattention to the regulations which are enforced on these occasions. All this is the more creditable, as many of the teachers under examination had good reason for believing that their answering was below the required standard of proficiency, and as such would exclude them from promotion; and in some cases would, in all likelihood, warrant their dismissal from the service of the Commissioners.

I remain, gentlemen, your obedient servant,

J. G. FLEMING, Head Inspector.

The Secretaries, &c., &c.

A. O'Callaghan, esq.

No. 5.—GENERAL REPORT for the year 1868, on SCHOOLS INSPECTED and TEACHERS EXAMINED, by A. O'CALLAGHAN, esq., Head Inspector.

GENTLEMEN,—I have the honour to submit, for the information of the Commissioners of National Education, my general report for the year ended the 31st December, 1868.

I. The following statement represents the duties in which I was engaged during the year, and the number of days given to each of them respectively:—

	Days.
(*a.*) Inspection of ordinary National Schools,	65
(*b*) Examinations in seven Model Schools.	46
(*c.*) Incidental visits while travelling long distances,	19
(*d.*) Travelling long distances without other duty,	9
(*e.*) Examination and classification of teachers in the Belfast group of districts,	21
(*f.*) In the Derry group,	36
(*g.*) Revising exercises of teachers and paid monitors,	23
(*h.*) Official writing, inquiries, and other duties,	85
(*i*) Off duty,	7
(*k.*) Sundays and holydays,	55
Total,	366

Appendix C.

Head Inspectors' Reports on Schools Inspected and Teachers Examined.

A. O'Callaghan, esq

II. I have to observe that I did not begin the superintendence of my present circuit until the 4th March, having been up to that time fully occupied with business connected exclusively with the Belfast group of districts.

The Derry circuit contains the whole of the counties of Londonderry and Donegal, and parts of Tyrone, Fermanagh, Cavan, Leitrim, and Sligo.

The following table represents the number of the different classes of National schools in each of the ten districts committed to my charge :—

Official Centre.	Ordinary.	Model (Departments).	Convent.	Poor Law Union.	Evening.
Letterkenny,	112	–	–	3	–
Londonderry,	112	3	2	3	1
Coleraine,	117	6	–	3	–
Donegal,	115	–	1	3	1
Strabane,	124	–	1	2	1
Maghera,	128	–	–	–	5
Sligo,	114	3	1	2	–
Enniskillen,	114	3	1	–	–
Omagh,	105	6	1	1	–
Ballinamore,	124	–	1	1	1
Total,	1,165	21	8	18	9

I inspected during the year 149 ordinary National schools, and seven model schools. On 72 of these schools full reports were forwarded to the Education Office. The other schools were visited incidentally, and reports of these visits were made on the special forms.

The following tables, except the last, refer to 58 of the schools which were fully inspected—convent, model, and infant schools being excluded—and contain information on the number of pupils on rolls and in average attendance, their ages, their progress from class to class, the classification of the teachers in charge of the schools, the amount of school-fees and of local contributions, &c., &c.

Attendance of pupils in 58 ordinary National schools :

	Average on rolls.	Average attendance.	Centesimal proportion.
Boys,	2,502	1,469	58·7
Girls,	1,579	919	58·2
Total,	4,081	2,388	58·5

The following table represents the literary classification of the pupils who were in attendance on the days of inspection :—

Class.	Boys.	Girls.	Centesimal proportion to whole attendance.
First,	518	396	74·
Second,	404	288	
Third,	235	119	26·
Fourth,	132	62	
Fifth,	9	3	
Total,	1,298	868	

From this table it appears that 74 per cent. of the pupils examined were in first and second classes—a proportion that is very unsatisfactory. This result is almost entirely due to the very limited duration of the school-going period in the poorer parts of Donegal, Tyrone, and Sligo. Their slender means oblige the parents to employ their children at home in various occupations, and to keep them from school for several months of the year. This necessity interposes a barrier to their literary progress which no skill or energy on the part of teachers can entirely surmount.

The following table exhibits the number of attendances made in twelve

Appendix C.

Head Inspectors' Reports on Schools Inspected and Teachers Examined.

A. O'Callaghan, esq.

months by the pupils of these schools. It is formed from returns made to me by the teachers. As I have had no means of checking these returns I am not responsible for them as being accurate or otherwise :—

	Boys.	Girls.	Per-centages. Boys.	Girls.
Number of pupils who attended for 200 days and above,	289	112	22·3	12·9
„ „ 150 „ and under 200,	302	176	44·4	38·9
„ „ 100 „ „ 150,	274	162		
„ „ 50 „ „ 100,	189	176	33·3	48·2
„ „ under 50 days,	244	242		
Total number present at examination,	1,298	868		

Progress of the Pupils.—The two following tables show the number advanced from lower to higher classes in these 58 schools, and exhibit the proportion of the number of pupils so promoted to the number in average attendance :

	Second.		Third.		Fourth.		Fifth.	
	Boys.	Girls.	Boys.	Girls.	Boys.	Girls.	Boys.	Girls.
(*a*) Number of pupils advanced from class to class,	297	188	236	105	109	52	10	2

	Boys.	Girls.	Total.
(*b*) Average attendance,	1,469	919	2,388
Number promoted,	652	347	999
Centesimal Proportion,	44·3	37·7	41·8

Ages of the Pupils.—The following table exhibits the number at the different years of age who were present in school on the days of inspection :—

Ages.	Boys.	Girls.	Per cent.	Ages.	Boys.	Girls.	Per cent.
3 years,	5	8		14 years,	58	23	
4 „	40	49		15 „	31	10	
5 „	126	83	38·6	16 „	15	–	
6 „	129	103		17 „	3	–	6·8
7 „	170	124		18 „	2	1	
8 „	165	121		19 „	1	–	
9 „	165	114		20 „	1	1	
10 „	165	93					
11 „	93	58	54·6				
12 „	62	50					
13 „	67	30		Total,	1,298	868	

From this table it appears that only seven of every hundred pupils in attendance on the days of inspection in these schools were above thirteen years of age, and about 39 per cent. were under eight years.

Religious Denomination of Pupils.—These, numbering 2,166, are thus distributed :—

Established Church,	245	
Roman Catholics,	1,088	2,166
Presbyterians,	816	
Others,	17	

Classification of the principal teachers in these schools :—

		Males.	Females.			Males.	Females.
First Class,	First Division,	1	–	Third Class,	First Division,	7	2
	Second „	8	–		Second „	1	2
	Third „	4	1		Probationers,	6	3
Second „	First „	10	1				
	Second „	10	2		Total,	47	11

There are also employed in these schools 14 assistant teachers and 29 paid monitors.

Support of Schools.—These 58 schools are sustained from the following sources :—

	£	s.	d.		£	s.	d.
Grant from Board,	1,955	0	0	Average amount for each school,	33	14	1
School-fees,	532	13	10	„ „ „	9	3	8
Other local contributions,	286	17	0	„ „ „	4	18	11

Of these local contributions, £60 are granted annually by the Honorable the Irish Society. In the grant from the Board are included the salaries not only of the principal teachers but also those of the assistant teachers and the paid monitors. *Appendix C.* Head Inspectors' Reports on Schools Inspected and Teachers Examined.

Educational value of these Schools.—With respect to the success of these 58 schools in giving a sound education to the young in their respective localities, they are to be classed thus:— *A. O'Callaghan, esq.*

11 schools very good.		19 schools indifferent.	
26 „ very fair.		2 „ bad.	

The following statement as to the proficiency of the pupils in the leading subjects of instruction is applicable to a large proportion of the schools inspected by me:—

Reading.—There is a very appreciable improvement in this most important branch. This is mainly due to the introduction into the schools of the new lesson books. The useful and interesting matter contained in them, and the beautiful poetical pieces, with the pictorial illustrations with which they abound, have had a very marked influence in quickening the curiosity of the pupils, and in stimulating the teachers to interrogate them in the subject-matter. I have accordingly found during the past year more knowledge of the subjects treated than in any former year. Thus, explanation, the most powerful instrument within the reach of our teachers for the culture and strengthening of the mental faculties, has received a new and vigorous impulse.

Grammar and Geography.—These subjects are not taught in a large number of the schools with the success that might naturally be expected. This result may probably be explained by the well known fact that the parents in general care nothing for these subjects, and are opposed to the teachers' devoting any portion of the school time to instruction in them. The time-tables, however, provide in their arrangements time amply sufficient to secure satisfactory results.

Penmanship.—This branch is still improving. The use of the copy-books with engraved head-lines has very largely contributed to this result. A comparison of the present copy-books with those in the hands of the pupils four or five years since would prove that a remarkable improvement has taken place in penmanship, especially in the rural schools.

Arithmetic.—A grave fault is beginning to disappear, namely, counting on the fingers. As a natural consequence, there is more expertness with accuracy. The teachers appreciate more than formerly the advantage of concise methods, and of exercising their pupils in mental calculations. I have to notice that in 95 per cent. of the schools the sums are worked invariably on slates alone. This exclusion of arithmetical exercises on paper seems to be very absurd, when it is considered that it is an almost total disuse in school of a practice that prevails in all places of business. The old system of education erred in abstaining so much from slate-work; the present practice is, in my opinion, far more objectionable. The teachers, however, are universally persuaded that the weight of educational authority is clearly in its favour. But as a fact of experience, I know some schools in which home-exercises in parsing, explanation, and in arithmetic, are assigned to the pupils with the happiest results to be done by them on paper.

Writing from Dictation.—This subject is fairly taught in most of the schools; but it is scarcely ever written on paper. In only 9 of the 58 schools have I met with the use of writing-books for dictation. In my judgment it is a grave mistake on the part of the teachers to restrict this exercise so rigidly to slates. When a pupil passes from the third class he should, in my opinion, never write this exercise but on paper.

I beg leave to offer a suggestion with respect to the roll book, which

Appendix C.

Head Inspectors' Reports on Schools Inspected and Teachers Examined.

A. O'Callaghan, esq.

if carried into effect would greatly facilitate the work of inspection. The school programme lays down that "If there be only one division in a class, the proficiency set forth above under each head will be required of every pupil exhibiting 100 attendances in the class." My suggestion is, that the number of attendances of each pupil in his class should be entered opposite to his name in the roll book. There is sufficient space on the right side of every folio for an additional column to record this useful and needful information. Every Inspector with whom I have consulted on this point has approved of my proposal. Indeed, it has been already acted on in three of the districts. I avail myself of this occasion to acknowledge my obligations to the District Inspectors with whom I am associated for the marked cordiality and earnestness with which they have co-operated with me. I feel assured that much of the success of the schools is due to the zeal and the ability which they bring to bear on their most important and extremely onerous duties.

I conclude this report with the following table which shows, with regard to the teachers, male and female, summoned to the examinations of the year, the number of them who attended, with the number who succeeded in obtaining higher grades, or who failed, or who were dismissed for incompetency :—

EXAMINATIONS OF TEACHERS.

	District.	Number summoned to attend.	Number who failed to attend.	Cause assigned for non-attendance.	Number recommended to be promoted to Classes.							Number recommended to be left stationary.	Number recommended to be depressed.	Number recommended to be dismissed for failure in		
					I¹.	I².	I³.	II¹.	II².	III¹.	III².			One subject.	Two subjects	Three or more subjects.
Males.	1	33	3	In every instance, illness was the cause assigned for absence.	–	–	–	–	–	4	3	20	–	–	–	3
	2	20	–		–	–	–	–	–	1	1	15	–	–	–	3
	3	25	–		–	–	–	–	–	1	1	22	–	–	–	1
	5	31	2		–	–	–	–	–	–	–	28	–	–	–	3
	6	30	2		–	–	–	–	–	1	5	16	–	–	–	6
	7	23	3		–	–	–	–	–	1	1	15	–	–	–	3
	12	18	2		–	–	–	–	–	1	3	12	–	–	–	–
	13	26	–		–	1	–	–	–	2	1	21	–	–	–	1
	14	19	2		–	–	–	–	–	–	–	17	–	–	–	–
	31	16	2		–	–	–	–	–	–	3	10	–	–	–	1
Females.	1	17	2		–	1	–	1	–	4	1	7	–	–	–	1
	2	8	1		–	–	–	1	–	4	2	–	–	–	–	–
	3	27	4		–	1	–	3	2	5	–	10	–	–	–	2
	5	13	1		–	–	–	1'	1	1	1	8	–	–	–	–
	6	11	–		–	–	–	–	–	3	–	6	–	–	–	2
	7	18	2		–	–	–	–	–	5	4	7	–	–	–	–
	12	21	6		–	–	–	–	–	5	5	4	–	–	–	1
	13	3	–		–	–	–	–	–	1	1	1	–	–	–	–
	14	2	–		–	–	–	–	–	1	–	1	–	–	–	–
	31	19	5		–	–	–	–	–	6	1	7	–	–	–	–

From this statement it appears that of 227 male teachers examined only 30 were found deserving of advancement to higher grades, and that 176 were left stationary in their classification, while 21 were found to be wholly incompetent. In the case of the female teachers the results are far less unsatisfactory. Out of 118 who were examined 61 were successful in obtaining promotion, while 51 were left stationary, and 6 were dismissed from the service on grounds of total incompetency.

I have the honour to be, gentlemen, your obedient servant,

ANDREW O'CALLAGHAN, Head Inspector.

The Secretaries, &c., &c.

APPENDIX D.

LIST OF SCHOOLS IN OPERATION

ON

31ST DECEMBER, 1868;

WITH

SUMMARY IN COUNTIES AND PROVINCES.

List of Schools in operation on the 31st December, 1868.—Province of Ulster.

ULSTER—2,432 Schools.

COUNTY OF ANTRIM—405 Schools.

Note.—In the column headed "*Vested or Non-Vested*," the letters V.T. denote Schools *Vested* in *Trustees*; V.T.B., those with additional security of *Bond*; V.C., those *Vested* in *Commissioners*; A., *Assigned* to Commissioners; and B., those *Secured* by *Bond* merely. Schools not having any of those letters are "*Non-Vested*." Religious denominations of Managers and Teachers are expressed thus—E.C., Established Church; R.C., Roman Catholic; Pres., Presbyterian; other Protestant Dissenters, Diss.

Number.	Roll Number of School.	Parish.	School.	Vested or Non-Vested.	Religious Denomination of Manager or Correspondent.		Number and Religious Denomination of Teachers.		Attendance for the Year.				Amount paid for Books, Requisites, and Apparatus, at Reduced Prices.	Aid granted by the Board during the year.		Amount of Local Emoluments received in Aid of Salary.		Observations.

APPENDIX K.

List of Teachers in receipt of Supplemental or Good Service Salaries.

With a view to encourage efficient and earnest teachers to labour zealously for the improven ent of their schools, Supplemental or Good Service Salaries, in addition to the ordinary class salaries, are awarded upon the recommendation of the Head and District Inspectors, and in accordance with the following graduated scale, based upon classification and length of service combined :—

Scale of Good Service Salaries.

Males.									Females.								
Of Class.	After good service of								Of Class.	After good service of							
	8 Years.			12 Years.			17 Years.			8 Years.			12 Years.			17 Years.	
	£	s.	d.	£	s.	d.	£	s.		£	s.	d.	£	s.	d.	£	s.
III¹	3	0	0	4	0	0	6	0	III¹	2	0	0	3	0	0	5	0
II²	4	0	0	5	0	0	7	0	II²	3	0	0	4	0	0	6	0
II¹	5	0	0	6	0	0	8	0	II¹	4	0	0	5	0	0	6	10
I³	6	0	0	7	10	0	9	10	I³	4	10	0	5	10	0	7	10

I¹	8	0	0	11	0	0	13	0	I¹	7	0	0	9	0	0	11	0

The regulations under which these Salaries are awarded, and continued, are:—

1. No teachers less than eight years in the Commissioners' service from date of first obtaining classification, or who may rank below III¹ Class, or at whose schools the daily average attendance is under thirty-five, shall be entitled to Good Service Salary.
2. No teachers shall be eligible for this salary who have been fined or depressed for misconduct, or who have been reprimanded or admonished for serious neglect.
3. When a teacher in receipt of Supplemental Salary, shall have completed the period of service next above that on account of which such award was made, the higher rate of Good Service Salary attached to such higher period shall not be paid until so recommended by Inspector.
4. When a teacher shall become entitled to a higher rate of Supplemental Salary by promotion from one class to another, such higher rate shall not be paid until the expiration of one year in the new class, nor until such increase shall have been specially recommended by Inspector.
5. Teachers who, after having obtained Good Service Salaries, shall relax in their efforts or fail in those qualities that first obtained them this distinction, or at whose schools the average attendance shall fall below thirty-five, shall thereby forfeit such Supplemental Salary.

Appendix L.

Questions proposed at the Examinations.

Male Teachers.

APPENDIX L.

QUESTIONS (for answer in writing) proposed at District Examinations for the year 1868.

No 1.—MALE TEACHERS.

A.

Grammar.—1. "How *reverend* was the look serenely aged
He bore this aged Pensylvanian *sire*
When *all but kindly fervours were assuaged*
Undimmed by weakness' shade or turbid ire
And though amidst the calm of thought entire
Some high and haughty features might betray
A soul impetuous *once* 'twas earthly fire
That fled composure's intellectual ray
As Etna's fires grow dim before the rising day."

Punctuate this stanza, and parse *fully* the words in italics.

2. Write out a short account of the changes which the Anglo-Saxon language underwent in its transition to the English of the present day.

3. Explain, and illustrate by means of examples, the different forms of what are called contracted sentences.

4. Give the three rules for the use of the semicolon.

5. Give an example of each of the three kinds of verses or measures, and explain the principal difference of construction between them.

Geography.—1. Draw a map of Palestine showing the relative position of the several tribes of Israel, and of the Gentile nations that inhabited the land along with them.

2. Why are some eclipses of the sun total, some partial, and some annular?

3. How was it proved that the motion of light is progressive and not instantaneous? Let your answer be explicit.

4. Name the towns which are the chief seats of the manufacture (*a*) of iron goods (*b*) of woollens, (*c*) of cotton fabrics, and (*d*) of flax products in the British Isles, and on the Continents of Europe and America.

5. What are the modern names for Lusitania, Batavia, Pannonia, Sabrina, Chersonesus Taurica, and Elam?

Lesson Books.—1. Relate the principal events in the life of Samuel. What form of government did he establish in his old age among the Israelites?

2. Explain the precise meaning attached by Geologists to the term *fossil*, and enumerate some important and wonderful facts which the study of fossils reveals to man.

3. Describe the manner in which insects and most of the inferior animals breathe; and explain the arrangement which enables amphibious animals to bear the interruption of respiration without injury.

4. Why is it that the navigation of the Baltic is annually stopped by the ice in a latitude not more northerly than that of tracts which, in the main ocean, are always open to the passage of ships?

5. By what proofs is it established that the present dry land on the surface of the earth was covered with water for a much longer period than during its transient immersion at the Deluge?

History.—1. Mention some of the most important events that render the eighth century B.C. so remarkable.

2. Name the last king of Poland, and give a brief sketch (*a*) of the

Appendix L.

Questions proposed at the Examinations.

Male Teachers.

circumstances which led to the destruction of that kingdom, (*b*) the powers that took possession of it, and (*c*) the resistance that was offered in its defence.

3. Give a short account of the reign of Charles the Fifth.

4. State fully and clearly, as you would to a class, all that you know respecting any three of the following: *John of Gaunt, Perkin Warbeck, Sir Philip Sydney, Cardinal Wolsey, John Hampden, Roger Ascham, Warren Hastings, Lady Jane Grey, or General Wolfe.*

Reasoning.—1. Explain what is meant by a Fallacy, and state, with examples, what two classes Fallacies are divided into, and what are the subdivisions of each.

2. Write down the Six Rules of Syllogisms, and explain which of them is violated in this syllogism—

What exists in England exists in the world;
Only one Queen exists in England;
Only one Queen exists in the world.

3. State what is meant by conversion; and explain how a particular negative may be converted illatively, and by what name such conversion is designated.

4. Explain how Categorical propositions, and how Hypothetical propositions are divided, giving an original example of each.

Money Matters.—1. How does it happen that many of even the educated classes grow up with indistinct and mischievous views on the subject of Money Matters?

2. Explain the circumstances under which high wages and high profits go together.

3. How do you reconcile the following statements?—

(*a*) "It costs only as much in labour and other expenses to obtain about fifteen pounds of silver as one pound of gold; and this is the cause that one pound of gold will exchange for fifteen pounds of silver;" and

(*b*) It is not the labour that anything costs that causes it to sell at a high price.

Arithmetic.—1. (*a*) Distinguish between "Annuities Certain" and "Annuities Contingent."

(*b*) Explain an "Annuity in reversion."

(*c*) Write out the rule for finding the amount of an Annuity, payable yearly, the payments of which are forborn for a given time, compound interest being charged on them as they become due.

2. A. and B. each lend £256 for three years, at 4½ per cent. per annum, one at simple interest, the other at compound interest; find the difference in the amount of interest they respectively receive.

3. Add together 345, 614, 532, and 340 in the scale whose base is 7; multiply the result by thirteen, and give the answer in the duodecimal scale.

4. A, B, and C, join their capitals, which are in the proportion of ½, ⅓, and ¼; at the end of four months A withdraws the half of his capital, and at the end of nine months more they divide their profits, £284; what should each receive?

5. Solve each of the following questions by the *short method* specially applicable to it—

(*a*) Interest of £66 for 211 days, at 6 per cent. per annum.

(*b*) Interest of £879 11*s.* 8*d.* for 13 years and 4 months, at 5 per cent. per annum.

(*c*) Interest of £282 for 11 months, at 5 per cent. per annum.

Algebra.—1. If s be the sum of n terms in a geometrical progression, a and z the first and n^{th} terms respectively, and r the common ratio; prove that $z=a\,r^{n-1}$, and $s=a\left(\frac{r^n-1}{r-1}\right)$.

2. Prove that when any quadratic equation is reduced to the form $x^2+px+q=o$, the co-efficient of the second term with the sign changed is equal to the sum of the roots of the equation, and the third term equal to their product.

3. A certain number of two digits contains the sum of its digits four times, and their product twice. What is the number?

4. Find by logarithms what will £1,000 amount to in 10 years at 5 per cent. per annum, compound interest, the interest being paid yearly.

5. Given the difference of two numbers=3, and the difference of their cubes=513, to find the numbers.

Geometry.—1. Write out the definition of *Proportionals;* and explain their nature fully, as you would to a class commencing the 5th Book.

2. Enunciate and prove the 25th Proposition of the 6th Book.

3. It is required to bisect any triangle—

(1) By a line drawn parallel to the base, and

(2) By a line perpendicular to the base.

4. Prove $\cos\frac{1}{2}(A-B):\cos\frac{1}{2}(A+B)::a+b:c$.

5. Calculate the diameter of a spherical glass capable of holding exactly 19 gallons of water.

Natural Philosophy.—1. Describe the mechanism of a common clock, and illustrate your description clearly by a diagram.

2. Explain the conditions under which two sounds will produce silence; describe the best shape for sounding boards over pulpits; and state the several particulars to be attended to in erecting a building with a view to the best acoustic effect.

3. Explain the signification of the terms *Affinity, Equivalents, Symbols,* and *Atomic Weights,* in chemical nomenclature, and state the laws which regulate the phenomena of chemical attraction.

4. What data must you have in order to calculate the horse power of a Steam Engine? Illustrate your answer by an example, in which the horse-power shall be 360.

5. Give the symbols and chemical equivalents of *carbonic acid, muriatic acid, chlorine, and ammonia.*

Bookkeeping.—1. Give the substance of the "*General Observations*" on Bookkeeping at the end of the Board's Treatise.

2. John Nolan, having passed his bill for £100 to James Murphy in the course of business, neglects to provide for it at maturity, and the bill is protested. Murphy, believing Nolan to be solvent, pays the bill and expenses for him, charging him commission. How will this transaction appear in Murphy's books?

3. When goods on commission are all sold, and the money handed to the employer, how must the account be closed.

4. How are such charges as rent, wages, &c., to be dealt with?

Agriculture.—1. Name the several compounds in the soil and air which supply the elements necessary to build up the organic or combustible part of plants.

2. Name the mineral constituent of the soil which, existing in it in

Appendix L.

Questions proposed at the Examinations.

Male Teachers.

very limited quantity, and being sold off in grain crops, in the bodies of animals, and in dairy-produce, it is most important to restore in manure.

3. State the advantages of growing crops in regular rotation; and give the order of succession of the crops in all the rotations you know.

4. Give the dates of sowing mangold wurzel, Swedish turnips, Aberdeen turnips, and white turnips; and the acreable yield of these crops, and their feeding value per ton.

5. What purposes are served in the animal economy by (*a*) starch, and analogous compounds; (*b*) gluten, and analogous compounds; (*c*) the fatty matter of food?

B.

Grammar.—1. "Thy *form benign* O Goddess wear
Thy milder influence impart
Thy *philosophic train be there*
To soften not to wound my heart
The generous *spark extinct* revive
Teach me to love and to forgive
Exact my own *defects to scan*
What others are to feel and know myself a man."

Punctuate this stanza, and parse *fully* the words in italics.

2. Write a short essay on the Analysis of Sentences.

3. Explain, with examples, what is meant by a "*Subject Sentence*," and what by an "*Object Sentence.*"

4. Give the substance of Dr. Crombie's Observations on the Potential and Subjunctive Moods.

5. Explain the different methods of parsing compound tenses, employing as an example the tense in this sentence—"*Capital punishment should have been abolished long ago.*"

Geography.—1. Describe the method of ascertaining the *latitude* and *longitude* of a ship at sea.

2. Name the *superior* planets, and say what would be a more appropriate designation than *superior*, and why?

3. Mention the several *mountains* and *valleys* about *Jerusalem*, and their relative position.

4. Show that there is a great natural obstacle to the drainage of the interior of Ireland; and name another country similarly circumstanced.

5. If the ports of the United States of America were blockaded, whence could Great Britain obtain products similar to those she now receives from the United States?

Lesson Books.—1. What among the Jews were the distinct offices of the Priest, and of the Prophet?

2. Describe the structure of the stem of exogenous plants, and explain through what part the sap rises.

3. Of what metals are *Bronze*, *Brass*, and *Pewter* composed? What is meant by the *tenacity* of metals? Illustrate your answer by one or two examples.

4. In what manner is the carbonic acid gas which animals produce in respiration, and that which originates from fermentation and combustion, removed from the air?

5. Write a short account of the chief uses of *Vegetables.*

History.—1. Explain the circumstances that led to the revolt of the ten tribes under Jeroboam.

2. Give a short account of the first triumvirate established in Rome; and the causes that led to its dissolution.

3. Name the Hanse Towns, and explain why they were so called.

4. Give as full an account as you can of any three of the following :— *Robert Bruce, The Black Prince, William Caxton, Anna Boleyn, John Milton, Sir Isaac Newton, Admiral Drake, Sir Walter Raleigh, the Duke of Marlborough,* or *the Duke of Wellington.*

Reasoning.—1. (*a*) What is a term? (*b*) How are terms divided? (*c*) Show that a term is not necessarily a single word, and that every word is not a term.

2. Explain what is meant by conversion : and state the converse of this proposition—"No law is effectual that is more frequently evaded than obeyed."

3. (*a*) What is the strict definition of the word "*Argument;*" and in what sense is it often employed in ordinary language? (*b*) By what names are the Major premise and the Minor premise commonly designated.

4. Explain exactly the difference between *Generalization* and *Abstraction.*

Money Matters.—1. State a few of the most important advantages that are secured by division of labour.

2. What arguments would you employ to reconcile persons to the losses and inconveniences occasioned by the introduction of a new machine?

3. Show how the abolition of the National Debt would seriously affect many of even the labouring classes.

Arithmetic.—1. (*a*) Define the terms "*Exchange,*" "*Par of Exchange,*" "*Course of Exchange,*" and "*Agio.*" (*b*) If the Exchange between London and Paris be £1 = 25fs. 50c., and between Paris and Frankfort 20fs. = 9 florins and 20 kreutzers; what is the value of £51 in florins and kreutzers?—NOTE, 1 florin = 60 kreutzers.

2. A company of militia, consisting of 72 men, is to be raised from three towns, which contain respectively 1,500, 7,000, and 9,500 men—how many must each town provide?

3. If goods worth £1,200 be insured at £1 10*s.* per cent., to what amount must they be insured so that, in case of loss, the person insuring may recover the value of the goods and the premium?

4. Resolve the fraction $\frac{159}{493}$ into a convergent series.

5. Each of the following questions is to be solved, in one or two lines, by the short method applicable to it—

(*a*) Find the interest of £756 10*s.* 5*d.* for 6 years and 8 months at 5 per cent. per annum.

(*b*) Do. £521 for 9 months at 6 per cent. per annum.

(*c*) Do. £33, for 157 days at 5 per cent. per annum.

Algebra.—1. Explain fully the *four* methods given by Algebraists for resolving equations in which two unknown quantities are to be found. Give an example of each.

2. Divide the sum of $\frac{a+b}{a-b}$ and $\frac{a-b}{a+b}$, by their difference.

3. A farmer sells to one person 9 horses and 7 cows for £300; and to another, *at the same prices,* 6 horses and 13 cows for the same sum. What was the price of each?

Appendix L.

Questions proposed at the Examinations.

Male Teachers.

4. Divide 28 into two parts such that one shall be four times as much less than 17 as the other is greater than it.

5. Reduce to its lowest terms—

$$\frac{16x^4-53x^2+45x+6}{8x^4-30x^3+31x^2-12}$$

Geometry.—1. Enunciate and prove the 44th Proposition of the 1st Book of Euclid.

2. Enunciate and prove the 14th Proposition of the 2nd Book.

3. Given the base, one of the angles at the base, and the sum of the sides, to construct the triangle. Give the *analysis* of this question, as well as the solution.

4. The sum of the squares of two lines is equal to the square of their difference together with twice the rectangle under them.

5. Required the *solidity* of a zone whose diameters are respectively 20 feet and 12 feet, and the height 10 feet?

Natural Philosophy.—1. Describe (using a diagram) the means by which the force of gravity is made to move the minute hand of a clock.

2. Enunciate *two* laws followed by reflected sound; compute the distance of a rock from which an echo reaches the ear of a trumpeter five seconds after he has sounded the note that produced it; and give the reason why no echo is heard from a distance less than 57 feet.

3. Describe the construction and uses of the mercurial and water barometers, and of the aneroid; explain how the indications made by these instruments are produced; and how these indications are affected by change of place, as, for instance, from the sea level to the bottom of a mine 500 feet below it.

4. Explain what is meant in mechanics by the "*working point*" and what by the "dead point;" and what is meant by putting machinery *out of gear.*

5. Name instruments, in common use, which are examples of levers of each order; and specify examples of the angular lever.

Bookkeeping.—1. In which of the cases of partnership are the books kept as for the trade of an individual, and why? State what additional accounts must be opened.

2. In the case of partnership referred to in the last question, the stock account does not show the net profit made, or loss incurred—why?

3. Explain what is meant by *subsidiary* books; name those in most general use; and describe any two of them.

4. Give the rule for entering each of the following transactions—

(*a*) When goods insured are lost at sea.
(*b*) When goods not insured are lost at sea.

Agriculture.—1. Give a general description of the following manures: (*a*) Farm-yard Manure, (*b*) Peruvian Guano, (*c*) Bones.

2. Name the mineral constituents which are most abundant in ordinary soils.

3. Explain fully how thorough drainage warms and otherwise improves the soil.

4. Give the order of succession of the crops in the four and in the five-course rotation of cropping; and point out the circumstances for which each of these is best adapted.

5. Describe the operations required, both in autumn and spring, in preparing ground for root crops.

C.

Appendix I.

Questions proposed at the Examinations.

Male Teachers.

Grammar.—1. "It is difficult *to conjecture* why at a time when the Irish *had already been converted* to Christianity *he should have determined on establishing a monastery* in Tory an *island* so completely *cut* off *as it must always have been* from communication with other parts of the country." Punctuate this passage, and parse *fully* the words in italics.

2. In the above parsing exercise (*a*) state what the pronoun "it," at the commencement, stands for; (*b*) write out the Rule of Syntax, exemplified in the word "island."

3. Explain (*a*) the difference in meaning between the active and the passive voice, (*b*) how the passive voice is formed, and (*c*) how the active can be changed into the passive without changing the meaning.

4. Show that the imperfect participle is often used instead of the infinitive mood.

5. Name, and explain the nature of each of the three classes into which the figures of speech are divided.

Geography.—1. Draw a sketch of the sea-coast of Palestine, marking the mouths of the rivers, the promontories, and the sea-ports.

2. Name the tideless seas, and state the cause of their being tideless.

3. Name the several straits that separate two continents; and say in what direction the current sets through each, and the reason.

4. Name as many towns in Ireland as you can recollect, part of whose names signifies *island*, and name the water on which each is situated.

5. Describe the courses of all the rivers which, rising in the Alps, flow into any sea; and name, in regular order, the principal towns passed by each.

Lesson Books.—1. Why was Moses instructed by God to inform the people of Israel that they should wander in the desert till all the generation which came out of Egypt had died? Name the two persons who were exempted from this decree.

2. What two-fold purpose is fulfilled by the roots of plants? Name that portion of the root which commonly dies in winter.

3. Name the three forms of iron, and describe how each is prepared.

4. Mention some remarkable facts illustrative of the instinct and sagacity of insects.

5. Write out the substance of the lesson "*On the Covering of Animals.*"

Arithmetic.—1. (*a*) Define "*Simple Proportion*," and "*Compound Proportion*," and (*b*) write out the Rule of Compound Proportion.

2. Add together three-fifths of a day, two-thirds of an hour, and four-fifths of 6 hours, and express the result as the decimal of a week.

3. Find the interest, *by two different methods* (of which one must be the *special rule* for years and months at 5 per cent.) of £378 15*s.* 6*d.* for 3 years and 4 months at 5 per cent. per annum.

4. (*a*) Find the value of 756 cwt. 2 qrs. 17½ lbs. of sugar, at £1 18*s.* 4*d.* per cwt. (By Practice, *complemental method.*)

(*b*) Find the cost of 48 square yards, 8 square feet, 114 square inches, at 13*s.* 7½*d.* per square yard. (By Practice.)

5. Write out the rules given in mental arithmetic, referring to the following cases:—

(*a*) To find the value of 112 lbs., the price per lb. being given.

(*b*) To find the value of 1 lb., the price per cwt. being given.

(*c*) To find the interest of any sum for months at 5 per cent. per annum.

Appendix L.

Questions proposed at the Examinations.

Male Teachers.

Money Matters.—1. Mention the wants that no amount of money can relieve, and state the reason.

2. Explain and point out the application of the fable of the "Stomach and the Limbs."

3. Enumerate the conditions necessary to make anything an article of value, and state which you consider most important, and why?

Mensuration.—1. Enunciate and prove the Proposition of Euclid from which we get the rule for finding the area of a triangle when the base and perpendicular height are given.

2. Given the radius of a circle equal to 21 feet, find the side of the inscribed square.

3. Given the sides of a triangle 17, 19, and 21 feet respectively, calculate (*a*) the area of the triangle; and (*b*) the perpendicular on the shortest side from the opposite angle.

4. Find the cost of papering a room 20 feet long by 17 feet broad by 11 feet 6 inches high, deducting one-tenth for opes, at 2*s.* 3½*d.* per dozen yards, room paper being 21 inches wide.

5. What is the ratio of the mass of the earth to that of the moon, their diameters being 7,912 miles and 2,160 miles respectively?

Bookkeeping—1. Name and *describe* the three kinds of accounts used in Bookkeeping.

2. Explain what is meant by "*taking stock*," and say why it is necessary, when balancing the accounts, to have recourse to stock-taking in the fourth set and not in the seventh set?

3. State how the following transactions are to be entered:—

(*a*). When I want a rebate to be made on the present payment of money, for goods bought upon credit.

(*b*). When I sell a bill for ready money, and give discount.

4. Draw out neatly a form of Journal, and enter thereon the following transactions from the Waste Book:—

WASTE BOOK.

DUBLIN, JANUARY 1ST, 1868.

		£	*s.*	*d.*
I have on hand—				
Cash, ...	£319 17 10			
Goods, ...	754 6 0			
		1,074	3	10
2				
Received from Murray & Co.:—				
Goods, as per invoice, ...		84	10	6
6				
Paid Clerk's Salary, one quarter of a year, ending this day, ...		25	0	0
8				
Paid James Blake on account, . . .		20	0	0
10				
Bought a house in Grafton-street, and got for my bargain, ...		52	10	0

Agriculture.—1. Mention the several sources whence plants derive their food.

2. The following system is pursued by a vast number of small farmers in this country: After potatoes, they grow grain, year after year, until the land is so reduced in condition that it will no longer grow a profitable crop of grain; they then lay it down to grass (to *rest*, as they call it)

for a considerable number of years; when sufficiently rested, it is cropped with oats, and the same course gone over again. Point out the objections to this system, and explain the system you would substitute for it.

3. Explain how tillage liberates plant-food in the soil.

4. Describe the operations called *trenching* and *subsoiling*; and state the object and advantages of each.

5. Give the order of succession of the crops in the four-course rotation.

Dictation Exercise.—Of Milton's system of education much has been written, and it is not hazarding a very rash criticism to say that much has been written in vain. To carry it into effect would demand a mind as largely gifted as his who devised it; but it does not follow, that because it is beyond the reach of ordinary teachers it is therefore impracticable. The grand assault that has been made upon it is on the ground of its comprehensiveness; but without descending into details, it must appear sufficiently obvious, that as no pupil can learn more than he possesses capacity to imbibe, so he will benefit most by that system which supplies him with the greatest choice in those studies which his capacity is adapted to receive. If the comprehensiveness consisted in an injudicious attempt to instruct students in a variety of things at the same time, the result would doubtless be, that, attempting to obtain too many objects at once, they would acquire none perfectly. But the comprehensiveness was in the extent of progressive learning, and not the range of immediate tasks.

Few writers are so unequal as Young; or rather, few writers of such powerful and acknowledged genius were ever so deficient in comparative or critical taste. To him every idea seemed good, provided only it was strong, original, and ingenious; and as his subject was precisely the one best suited to this species of intellectual sword-play, the conceits, unexpected analogies, and epigrammatic turns, of which he was so fond, are as offensive and incongruous as would be the placing of the frippery fountains and clipped yews and trimmed parterres of Versailles among the glaciers and precipices of Alpine scenery.

No. 2.—Female Teachers.

Female Teachers.

A[1].

Grammar.—1. "*Bid them be chaste* be innocent *like thee*
Bid them in duty's sphere *as meekly move*
And if *so* fair from vanity *as* free
As firm in friendship and *as* fond in love."

Punctuate this passage, and parse *fully* the words in italics.

2. Write out a paraphrase of the above stanza, placing the words in the natural order of prose, and supplying the ellipsis throughout.

3. What were the old forms of the past tense "could," and how did it acquire the letter "l"?

4. Explain, by means of examples, all the cases in which a subject, consisting of two or more nominatives joined by a copulative conjunction, takes a verb in the singular.

5. Show that Etymology is a safe guide in *many* cases of doubtful orthography.

Geography.—1. Write out full notes of a lesson on the distribution of the human race.

2. How many motions has the moon, and what is the duration of each? Explain clearly how the time of her rotation on her axis has been established.

Appendix L.

Questions proposed at the Examinations.

Female Teachers.

3. Name the four provinces into which the Holy Land was divided by the Romans, giving two of the principal towns of each.

4. Describe the position of each of the following, giving its proper geographical designation :—*Agra, Cupar, Cutch, Altorf, Cuttack, Amboyna, Helicon, Taranaki.*

5. State how Spain and the Netherlands became attached to the crown of Austria; also name the last Emperor of Germany, and say when and by whom he was compelled to renounce that title.

Lesson Books.—1. What effect (*a*) upon the ocean, and (*b*) upon the vessels of all organized beings, has the pressure of the atmosphere; and what is the amount of that pressure?

2. How did the institution of chivalry arise, and what was its effect?

3. For what reason does it appear to be ordained by Providence that few things that are most desirable can be obtained without labour?

4. Describe the prospect that Moses had from Mount Nebo when he was permitted to gaze on the Land of Promise which he was not to enter.

5. Write out three stanzas from Longfellow's "Village Blacksmith."

Arithmetic.—1. State and explain the rule for finding the value of the decimal of a pound sterling to the nearest farthing. Work an example in full to illustrate your answer.

2. Five persons run a coach 122 miles; A provides horses for 14 miles, B for 19 miles, C for 24 miles, D for 29 miles, and F for the rest of the journey—the profits cleared for 3 months amount to £250. What is each person's share?

3. Find a fourth proportional to $\frac{\cdot 77}{4\cdot 1}$, $\frac{4\frac{2}{3}}{1\frac{1}{5}}$, ·009.

4. A grocer buys coffee at £5 12*s.* 6*d.* per cwt., and chicory at £2 5*s.* 5*d.* per cwt., and mixes them in the proportion of 2 parts of chicory to 5 parts of coffee. He retails the mixture at 1*s.* 3*d.* per lb. What is his gain per cent.?

5. If £240 makes £20 interest in 1 year and 5 months, how much interest will £1,110 16*s.* make in 97 days?

A².

Grammar.—1. "*Tell them* tho' 'tis an awful thing *to die*
'Twas ev'n to thee *yet the dread path once trod*
Heaven lifts its everlasting portals high
And *bids the pure* in heart *behold* their God."

Punctuate this passage, and parse *fully* the words in italics.

2. Write out a plain paraphrase of the above stanza, placing the words in their natural order, and supplying the ellipsis.

3. State what the pronoun "it" stands for in the first and second lines of the above stanza; and also explain the peculiarity and propriety of the use of "*high*" in the third line.

4. State, with examples, the different words which may be employed *absolutely* in a sentence; and explain what is meant by the expression "*employed absolutely.*"

5. Distinguish "equivocal" from "ambiguous," and also "to weary" from "to fatigue."

Geography.—1. Write out full notes of a lesson on the distribution of plants.

2. Name the planets which exhibit *phases* similar to those of the moon,

Appendix L.

Questions proposed at the Examinations.

Female Teachers.

and state the *two* facts respecting them which can be inferred from the existence of these phases.

3. Give a sketch of the geography of India under the following heads: (*a*) boundaries and extent; (*b*) subdivisions, with their principal towns; (*c*) mountain and river systems, with the direction in which they run.

4. Describe the position of each of the following, giving its proper geographical designation: *Toledo, Khiva, Patras, Simplon, Muscat, Spartel, Ushant, Arnon.*

5. State the circumstances under which the Saxons first appeared in Britain, and give a brief sketch of their subsequent occupation of the country.

Lesson Books.—1. In what region of the earth are the movements of the atmosphere carried on with the greatest regularity; and what striking exceptions are there to the rule?

2. Where, and at what time, were (*a*) the art of writing and (*b*) the art of printing first practised in Europe?

3. Injurious as is the attempt by a Government to regulate the rate of wages, what much more hurtful interference frequently happens? Explain how this interference acts.

4. Name the fruits that were cultivated by the ancient inhabitants of the land of Canaan at the time of the Israelitish invasion; and mention the circumstances connected (*a*) with themselves, and (*b*) with the inhabitants, that deterred the Israelites from entering the country as soon as they reached it from Egypt.

5. Write out three stanzas of Moore's poem commencing "Thou Art, O God."

Arithmetic.—1. Account fully for the following rule for calculating the interest of a given sum for a year at a given rate: "*Multiply the principal by the rate, and divide the product by* 100." Give an example to illustrate your answer.

2. A advanced in a business £500, B £760, and C £925; they lost £600. What proportion of this loss must each of them bear?

3. If £140 be the wages of 8 men for 10·3 weeks, what will be, at the same rate, the wages of 14 men for 6·6 weeks?

4. Find a fourth proportional to ·7, $1\frac{7}{8}$, $\frac{4}{9}$ of $8\frac{3}{4}$.

5. By selling cheese at £3 6*s.* 6*d.* per cwt. $11\frac{1}{4}$ per cent. was gained; at what rate should it be sold so as to realize a profit of $14\frac{3}{4}$ per cent.?

A[3].

Grammar.—1. "Upon the *middle* of the night
Waking she heard the *night-fowl crow*
The cock sung out *an hour ere light*
From the dark fen the oxen's low
Came to her without hope of change
In sleep she seemed to walk *forlorn*
Till the cold winds woke the *gray-eyed* morn
About the lonely moated grange."

Punctuate this stanza, and parse *fully* the words in italics.

2. Explain, with examples, the five different ways in which a nominative case is liable to be parsed in a sentence.

3. What was the old form, and what the original meaning of the auxiliary "can"? and explain how it came to have its present meaning.

4. Explain clearly what are the imperfections of the English alphabet.

5. Distinguish the synonymous terms "abandon," "desert," "forsake."

Appendix L.

Questions proposed at the Examinations.

Female Teachers.

Geography.—1. Write out full notes of a lesson on the atmosphere, its properties and uses.

2. What is the greatest meridian altitude which the sun attains in the latitude of Dublin? Explain fully the process by which you arrived at the answer?

3. Give a sketch of the geography of Australia, under the following heads: (*a*) Extent, and position as to latitude and longitude; (*b*) the colonies into which it is divided, with their chief towns; (*c*) its mountain and river systems.

4. Describe the position of each of the following, giving its proper geographical designation: *Platte, Beyrout, Kiel, Sofala, Thun, Erivan, Olympus, Monserrat.*

5. By whom were the Turks arrested in their victorious career through Europe? Give the date of the decisive battle, and state where it was fought.

Lesson Books.—1. What reasons have we for supposing that electricity is an agent in causing rain?

2. Name three female sovereigns of different countries who reigned in their own right, and some important incidents of their reign.

3. What advantage or disadvantage results from the regulation by Government of the rate of wages? In whose interest has such regulation been generally undertaken?

4. Mention a bay in Ireland remarkable for the successive hostile descents of two French fleets; the date, and the occasion of each of those visits, and the result of the second.

5. Write out four stanzas of the poem "Sweet Innisfallen."

Arithmetic—1. Why is it that ciphers annexed to the right hand of decimals do not affect their value? What change in the value of a decimal takes place by annexing a cipher to the left hand of decimals? Give examples to illustrate your answer.

2. A grocer buys 67 cwts. of sugar at £1 18*s.* 10½*d.* per cwt., and mixes it with 61 cwts. at £2 1*s.* 9*d.* per cwt., at what price per lb. must he sell the mixture to realize a profit of 15 per cent.?

3. Reduce to its simplest terms $\frac{\cdot6' + \frac{3}{7}}{4\frac{5}{7} - 3\cdot2'}$.

4. A field of 16 statute acres produces 440 bushels of wheat: How much is that upon every 22 square yards?

5. If 7 needlewomen can finish a certain quantity of work in 10 days of 9¾ hours each, how long would it take 3 needlewomen to do twice the same work, reckoning 10¼ hours to the day?

A⁴.

Grammar.—1. "'Then I will drop' said the trusting flake
'But *bear* in mind *that the choice* I make
Is not in the flowers on the dew *to awake*
Nor the mist that shall pass with the morning
For things of thyself they expire with thee
But *those* that are lent from on high *like me*
They rise and will live from thy dust set free
To the regions above returning.'"

Punctuate this stanza, and parse *fully* the words in italics.

2. Explain, with examples, the different ways in which an infinitive mood is liable to be parsed in a sentence.

3. Write out the substance of Dr. Sullivan's remarks upon the auxiliary "do."

Appendix L.

Questions proposed at the Examinations.

Female Teachers.

4. What rules have been laid down to enable us to decide when we should prefer the termination "ize," and when "ise?"

5. Distinguish the synonymous terms, "to invent" and "to discover."

Geography.—1. Write out full notes of a lesson on the winds.

2. Do the Equinoxes occur exactly at half yearly intervals; and, if not, why not? Explain your answer fully.

3. Describe the Overland Route to India, and explain its advantages over the old route.

4. Describe the position of each of the following, giving its proper geographical designation:—*Abo, Ypres, Labuan, Mobile, Arcot, Ticino, Elburz, Boothia.*

5. Name the last King of Poland, and give date of his election. State the circumstances which led to the destruction of Polish independence.

Lesson Books.—1. How is the deposition of dew caused, and under what conditions is it most copious?

2. Name three Sovereigns who resigned their thrones, and mention some important incidents that occurred during their reigns.

3. To what extent does a rich man, who spends a large income, diminish the wealth of the whole country; and how does the wealth of a miser benefit the community?

4. Describe the make of the curragh or coracle used on the west coast of Ireland. State where, and for what purpose similar curraghs were used in very ancient times, and how that fact has become known to us.

5. Write out four stanzas of Longfellow's "Psalm of Life."

Arithmetic.—1. State and explain the rule for finding the interest of a given principal for any other time than a year. Show, by an example, that in sums of this kind, especially when the rate is 6 per cent., the work may frequently be abbreviated.

2. If I buy 98 dozen of wine, each bottle containing $1\frac{1}{2}$ pints, for £120·6, at what rate per quart must I sell it to gain £20·1 per cent.

3. Show that $\frac{\cdot375 \times \cdot375 - \cdot025 \times \cdot025}{\cdot375 - \cdot025} = \frac{2}{5}$

4. If a horse eats $10\frac{7}{8}$ lbs. of hay per day, and a cow $14\frac{5}{8}$ lbs., how many days will a ton of hay serve 7 horses and 5 cows?

5. A man buys 50 shares in a railway at £20 10*s.* per share, and 100 more at £7 15*s.* per share. The *half yearly* dividend is 3*s.* 4*d.* per share. What interest per cent. per annum does he get for his money?

B¹.

Grammar.—1. "Time may chill and *bow* and *bind*
Glowing heart and chainless mind
They droop the flowers of fancy *youth*
Round the ripening fruits of truth
Yet I feel while here I stray
Dawn again youth's sunny *day.*"

Punctuate this stanza and parse *fully* the words in italics.

2. Write out the emphatic, and also the unemphatic form of the First Future.

3. What is an "Inflection"? What parts of speech are capable of Inflection?

4. Give examples of words (*a*) that always end in "or"; (*b*) that always end in "our"; (*c*) in which the affix may be written either "or" or "our."

Appendix L.

Questions proposed at the Examinations.

Female Teachers.

5. Name, with examples, the six forms for expressing Past time, which the compound tenses supply.

Geography.—1. Describe the great equatorial current which flows through the Pacific and Indian Oceans; and explain how vessels trading to Australia turn it to account.

2. The sun's meridian altitude, at Cincinnati, on the 21st of December, is found to be 27° 20′—what is the latitude of the place? Explain your answer fully.

3. Make out a complete list of the foreign possessions of the United Kingdom in each quarter of the globe, classifying them under the following heads: (*a*) Subject states; (*b*) Colonies; (*c*) Military or Commercial posts.

4. Name the counties in Ireland which are intersected by the parallel of 53° North Latitude.

5. State fully for what each of the following places is remarkable:—*Caernarvon, Amiens, Cracow, Aughrim, Plassey.*

Lesson Books.—1. Recount the events that led to the re-establishment, under Maccabees, of the independence of the Jewish people.

2. What effect on wages has the price of food?

3. What was the longest period for which an Israelite might alienate his land under the law of Moses; how did that alienation differ from letting on lease; and how were houses in cities or large towns treated differently in such a transaction from houses built in fields or villages?

4. Write out the verses which relate to the poor man's day of rest in Graham's poem on the Sabbath. Commence with the line—

"But chiefly man the day of rest enjoys."

5. Relate the circumstances on which Wolfe's poem commencing "Not a drum was heard" is founded.

Arithmetic.—1. Define the following—"*Simple fraction*," "*compound fraction*," "*complex fraction*," "*mixed number*." Show that if two fractions be equal, the numerator of the one is to its denominator as the numerator of the other is to its denominator.

2. By selling butter at £5 12*s.* per cwt. I lost 5½ per cent.; at how much per cwt. must it be sold to clear 5½ per cent.?

3. Divide 3626·19629091 by 71·31, and prove the result.

4. In a certain school there are 88 learning grammar, which is 55 per cent. of the total number of scholars; find the total number.

5. What principal, lent at simple interest on the 1st January, at 5½ per cent., would amount to £1,000 on the 20th October of the same year?

B².

Grammar.—1. "Weak and irresolute is man
The *purpose* of to-day
Woven with pains into his plan
To-morrow rends away
The *bow well bent* and *smart the spring*
Vice seems already *slain*
But passion rudely snaps the string
And it revives again."

Punctuate this passage, and parse *fully* the words in italics.

2. Why is it improper to call the two participles the "present" and the "past"? How should they be named, and why?

3. Explain how the present-perfect tense is formed, and what it denotes.

Questions proposed at the Examinations.

4. Give three rules for determining the place of the accent from the termination.

5. Give examples of words having double-sounding consonants, and state why the consonants have the double sound.

Female Teachers.

Geography.—1. Compare the warm regions of the earth with the cold and temperate parts of it, with respect to (*a*) the *quantity* of rain which falls in the year; and (*b*) the *number of rainy days* within the same period. Show that, in our own latitude, a relation of a similar nature prevails.

2. Name two seas in Europe in which the tides are almost imperceptible, and explain the reason.

3. Give the situation of each of the following shires; and name *two* principal towns in each:—*Cardigan, Cromarty, Dorset, Roxburgh, Flint.*

4. Name the Counties of Ireland through which the Meridian of 8° West Longitude passes.

5. State fully for what each of the following places is remarkable:—*Bannockburn, Leipsic, Stratford-on-Avon, Upsal, Tours.*

Lesson Books.—1. From what nation was Herod the Great sprung; what people did he govern; and for what was his reign distinguished?

2. On what does the rate of wages depend?

3. What part of an Israelitish city answered to our court-houses, and why was that part chosen? During what period of the day did the judges sit; and how long in the history of the nation did their authority continue to be respected?

4. Write out three stanzas of the poem on the Omnipresence of God, commencing with the line—"Above, below, where'er I gaze."

5. Describe the structure of the Giant's Causeway.

Arithmetic.—1. Show by an example that operations in the rule of proportion may be shortened by the method of aliquot parts, whether the first term is a unit or not.

2. If 375·25 yards of cloth be made in 9 days by 25 men, how many men would be required to make 1125·75 yards in one-third of that time?

3. How must a commodity, purchased at the rate of £14·5 per cwt., be sold to gain 21·4 per cent.; how much of it must be sold at that rate to gain £100?

4. The simple interest of £275 19*s.* 2*d.* for $2\frac{1}{5}$ years is £34 9*s.* $10\frac{4}{7}$*d.*, what is the rate per cent.?

5. In a National School of 80 children 62 learn to write. What is the per-centage?

B².

Grammar.—1. "*Can this be He who wont to stray*
A *pilgrim* on the world's highway
Oppressed by power and mocked by pride
The *Nazarene* the Crucified."

Punctuate this passage, and parse *fully* the words in italics.

2. Explain how the Prior-perfect Tense is formed in the active voice, and how in the passive voice; and state what this tense denotes.

3. When may participles be regarded as adjectives?

4. Explain clearly, as you would to a class, why the doubling of the "l" in "woollen" is contrary to the second rule for spelling.

5. Show by an example that the definite article is not always employed to point out a *noun*.

Appendix L.

Questions proposed at the Examinations.

Female Teachers.

Geography.—1. Describe the Zone of Calms, and point out in what respect this name is inappropriate.

2. Whether are the Tides higher near the Equator, or near the Poles. Explain the cause clearly.

3. Name in order the Maritime Counties of England between the mouths of the Thames and the Severn; giving *two* principal towns in each.

4. Name the countries of Europe through which the Meridian of 15° East Longitude passes.

5. State fully for what each of the following places is remarkable:—*Ajaccio, Runnymede, Cawnpore, Nijni, Novgorod, Trafalgar.*

Lesson Books.—1. State the uses to which the bark of the oak, of the cinnamon, of the cinchona, and of a species of mulberry are severally applied, and the countries in which these trees are indigenous.

2. Show what it is that gives *value* to a commodity, and that it is a mistake to suppose that the labour bestowed on it does so.

3. What commodities did Israel obtain from Tyre in the time of Solomon, and what was given in exchange?

4. Write out six verses of Addison's poem, commencing with the words "The spacious firmament on high."

5. Name the animals found in the Arctic regions which are mentioned in the lesson on "The Northern seas" in the Third Reading Book.

Arithmetic.—1. State the rule for multiplying decimal fractions: give the reasons of the rule.

2. Work the following questions by practice, and by the *shortest* method: prove your answers by proportion—

(*a*) 13 cwt. 1 qr. 17½ lbs. at £2 16*s*. 8*d*. per cwt.
(*b*) 22 lb. 10 oz. 15 dwts. 18 grains, at £3 18*s*. 9*d*. per lb.
(*c*) 12,000 oranges at 4*d*. per dozen.

3. A cask, which contained 2,005 gallons, leaked 27 per cent., how much remained in the cask?

4. At 3·2 per cent. per annum, what principal will amount to £402 10*s*. in 5 years?

5. If 30 cwt. are carried 15 miles for £1 12*s*. 6*d*., how far ought 40 cwt. be carried for £8 10*s*.

B⁴

Grammar.—1. "*Bound* on a voyage of awful length
And *dangers little known*
A *stranger* to superior strength
Man vainly trusts *his own*
But oars *alone can ne'er prevail*
To reach the distant coast
The breath of heaven *must swell* the sail
Or all the toil is lost"

Punctuate this stanza, and parse *fully* the words in italics.

2. Explain what the Second Future Tense implies, and how it is formed in the active voice, and how in the passive.

3. Show that the Present Tense is often used Colloquially for the Future; and explain what is meant by "Colloquially."

4. Give examples of words in which "y" is changed into "i," although it is part of a dipthong.

5. Give three examples of irregularly-formed comparatives, and also of irregularly-formed superlatives; and explain in what the irregularity consists.

Geography.—1. Name the divisions of the Earth's Surface which have been made at different times, with respect to temperature, and explain in each case the principle on which the division depends.

2. State the exact interval between two successive tides; and explain the cause.

3. Name the Border Counties of England and Scotland; and give *two* principal towns in each.

4. Name the countries of Europe intersected by the parallel of 45° North Latitude.

5. State fully for what each of the following places is remarkable:—*Hastings, St. Helena, Utrecht, Calmar, Assaye.*

Lesson Books.—1. What is meant by the terms *deciduous* and *endogenous*, applied to trees; and what exactly are *radicles, tubers, and bulbs?*

2. What is stated in one of the Lessons on Money Matters to be the reason why a woman prefers wearing jewellery to adorning herself with natural flowers; and what is the practical reflection annexed to the statement?

3. When, by whom, and whither were (*a*) the Israelites, (*b*) the Jews, carried captive on the overthrow of their kingdoms?

4. Write out three verses of Cowper's poem commencing "I'm monarch of all I survey."

5. Describe the appearance and uses of the papyrus.

Arithmetic.—1. Show by an example that multiplying the numerator of a fraction by any number is the same in effect as dividing the denominator by that number, and conversely.

2. How much cheese worth £2 15*s.* 7*d.* per cwt. must be given for 756 lbs. of bacon at 8¾*d.* per lb.

3. A grocer, whose average daily receipts came to £14 10*s.* 9*d.*, clears 16·6 per cent. on the prime cost of his goods; find his profits for a year of 310 days.

4. What sum will amount to £1,431 17*s.* 9*d.* in 11 years, and in how many more years will it amount to £2,000, the rate being in both cases 3½ per cent. simple interest?

5. 16 per cent. of the population of a town containing 33,550 people died of cholera; find the number of deaths.

C[1].

Grammar.—1. "What a truly noble animal I should be, were my legs in any degree answerable to my horns!"

Parse this sentence fully.

2. How is a verb conjugated negatively (*a*) in simple tenses, (*b*) in compound tenses?

3. Show that the present tense is often employed in reference to a past action, and explain what is the effect of this use of the present tense.

4. Write out the Rule of Syntax referring to the government of the possessive case.

5. Write down all the prefixes that signify "with" or "together;" state the language from which each is taken, and give also, with examples, the different forms which each takes in composition.

Geography.—1. What is the hour at Rio Janeiro, 43° 14′ W., when it is 1.30 p.m. at Liverpool, 2° 59′ W.? Give the work in full.

2. Name four rivers subject to periodical floods, and explain how these floods are caused.

Appendix L.

Questions proposed at the Examinations.

Female Teachers.

3. Name the conterminous counties of Ulster and Leinster, and give the chief towns of each.

4. Give the proper geographical designations, and state the position of each of the following:—*Leyden, Godavery, Goree, Guadaloupe, Ravenna.*

5. Name the articles of commerce which we import from Australia, and the goods we send in return.

Lesson Books.—1. Detail the processes undergone by wool from the time it is shorn until it is made into a coat.

2. Why is the missel-thrush so named; in what respect does it differ from the song-thrush; during what portion of the year does each kind sing?

3. Write three stanzas of the poem entitled "The Voice of Spring," omitting those which commence with the words "I am coming."

4. Give the history of the bee from the time when the egg is laid until the perfect bee emerges from the cell.

5. How is it shown that the New Zealanders are far less savage than the New Hollanders?

Arithmetic.—1. Can any meaning be attached to the multiplication of 2*s.* 6*d.* by £1 2*s.* 6*d.*; state a reason for your answer?

2. My daily expenses are 10*s.* $9\frac{3}{4}$*d.*, how much can I save out of an income of £310 2*s.* 9*d.*?

3. Which is the greater—$\frac{5}{7}$ of $1\frac{3}{4}$, or $\frac{1}{3}$ of $3\frac{2}{3}$? By how much?

4. A man buys 42 shares at £5 18*s.* $9\frac{1}{2}$*d.* each, and 78 at £2 3*s.* 11*d.* each. What does he lose by selling them all at £3 5*s.* per share? At what price per share should he have sold them so as to save himself from loss?

5. Calculate and write out in a neat form the following account: $17\frac{3}{4}$ lbs. of coffee at 1*s.* 8*d.* per lb.; $7\frac{1}{2}$ stones of sugar at $4\frac{1}{2}$*d.* per lb.; 13 quarts of vinegar at 8*s.* 4*d.* per gallon; 25 lbs. of salt at 8*s.* per cwt.

C².

Grammar.—1. "The *legs which* I despised *would have borne* me *away* in safety, *had not the antlers* I was *so vain of betrayed* me to ruin."

Parse fully the words in italics.

2. How is a verb conjugated both negatively and interrogatively?

3. Decline the relative pronoun "who," and also "which," and state what cases the relative "that" may be employed in.

4. Write out all the exceptions to the fourth rule of spelling, and state what rule the word "wisdom" is an exception to.

5. Write down all the prefixes that signify "against" or "opposite to," and state what language each belongs to, and what form each takes in composition, giving examples.

Geography.—1. When it is 6 o'clock A.M. in Dublin, it is 3.45 P.M. in Jeddo. Required the longitude of Jeddo, that of Dublin being 6° 20′ W. Give the work in full.

2. Explain why it is that the Sun never sets on the British Dominions; and, commencing at England, mention the order in which his light falls on them.

3. Name the conterminous counties of Connaught and Leinster; and give the chief towns of each.

4. Give the proper geographical designation, and state the position of each of the following:—*Drontheim, Erzeroom, Socotra, Hatteras, Gozo.*

5. What is likely to be the cargo of a ship sailing from Malaga in Spain?

Lesson Books.—1. Describe the nature and habits of the horses, large herds of which are seen among the Tartars, and how they differ in disposition from the wild horses in some other parts of the world.

2. Narrate the fable, the moral of which is that "Industry is itself a treasure."

3. Write out the Evening Hymn given in the 2nd Book of Lessons.

4. Mention three kinds of fish that frequent both fresh and salt water, and some peculiarities in the habits of each.

5. Where and how is the trade of *lumbering* carried on?

Arithmetic.—1. Define the meaning of the terms "Practice" "Aliquot Parts," and find the yearly rent of 169 acres 0 rood 19 perches, at £1 18*s.* 9*d.* per acre.

2. A water pipe supplies a cistern at the rate of 51$\frac{3}{4}$ gallons per hour; how much will it supply in $\frac{1}{9}$ of an hour?

3. If 234 yards of linen are bought at 2*s.* 2$\frac{1}{2}$*d.* per yard, and sold $\frac{1}{3}$ at 2*s.* 10*d.* per yard, $\frac{1}{3}$ at 2*s.* 3*d.* per yard, and the rest at 1*s.* 6*d.* per yard, what will be the net loss or profit on the whole outlay?

4. What quantity of calico that is $\frac{3}{4}$ yards wide will line 9$\frac{1}{2}$ yards of cloth 1$\frac{3}{4}$ yards wide?

5. Calculate and write out in a neat form the following account:—37$\frac{1}{4}$ gallons of milk at 2$\frac{1}{2}$*d.* per quart; 19 cwt. of rice at 4*s.* 1*d.* per stone; 25 dozen of eggs at $\frac{3}{4}$*d.* each; 3 qrs. 17 lbs. of butter at 11*d.* per lb.

C[3].

Grammar.—1. "*Large masses, which he could not grasp readily* with his teeth, he *pushed forward,* leaning against them with *his right fore* paw and his chin."

Parse fully the words in italics.

2. How is a verb conjugated progressively? What verbs cannot be so conjugated?

3. Show that the rule which states that "Adverbs should not be used as adjectives," admits of some exceptions.

4. Write out all the exceptions to the third rule for spelling; and state also what rule the word "daily" is an exception to.

5. Write down all the prefixes which signify "around," stating the language each belongs to; and giving, with examples, the different forms that each of them takes in composition.

Geography.—1. To what besides the earth's motion in her orbit are we indebted for the changes of the seasons? Show that the earth might revolve round the sun without producing any such change.

2. Name four mountain peaks, one in each continent, which are covered with perpetual snow.

3. Name the conterminous counties of Leinster and Munster, and give the chief towns of each.

4. Give the proper geographical designation, and state the position of each of the following:—*Altona, Bidassoa, Matsmai, Detroit, Elba.*

5. From what countries do we derive our supply of the following:—*indigo, cocoa, olive oil, palm oil,* and *tobacco?*

Lesson Books.—1. Give the old and erroneous account of the migrations of the herring, and state what is now known to be the fact regarding its movements.

2. Name the cider counties of England, and the portion of the sea round which they are situated.

Appendix L.

Questions proposed at the Examinations.

Female Teachers.

3. Write out the last three stanzas of the poem which opens with the words "Around the fire one wintry night."

4. Detail the particulars, mentioned in the narrative of Mungo Parke's adventure, of the furniture in the hospitable negro's house, and of the work at which the female inmates occupied themselves; and state how he knew that the songs by which they lightened their labour were extemporaneous.

5. Name the plants, beautiful exotics with us, which flourish in great abundance at the Cape of Good Hope.

Arithmethic.—1. Express in figures twenty millions twenty thousand and twelve; and in words 10,101,010; substract thirteen thousand and thirty-five from this last-mentioned number, and divide the remainder by $30\frac{1}{4}$.

2. Gold of the value of £450,000 arrives from Australia; what is its weight avoirdupois, the price being £3 18*s.* per oz. avoirdupois?

2. Multiply $3\frac{1}{3}$ by 19 $\frac{3}{11}$, and divide the product $2\frac{1}{7}$.

4. Reduce 3 roods 21 perches and 27 square yards to square feet.

5. Calculate and write out in a neat form the following account:—6,000 black lead pencils at 9*d.* a dozen; 4,032 pen-holders at 2*s.* 3*d.* a gross; 20 reams of paper at $4\frac{1}{2}$*d.* per quire; 5,000 slate pencils at 1*s.* 1*d.* per 100.

C⁴.

Grammar.—1. "*Their intention being now obvious,* I thought *that the easier* they *were permitted* to rob me, the *less* I had *to fear.*"

Parse fully the words in italics.

2. How is a verb conjugated emphatically? Show that this form of conjugation does not always imply emphasis.

3. Show that the rule, that "Adjectives should not be used as Adverbs," admits of some exceptions.

4. State, with an example of each, the *four* cases in which a participial noun must be followed by the preposition "of."

5. Write down all the prefixes which signify "beyond," stating the language from which each is taken, and giving an example of each in composition.

Geography.—1. Explain clearly how the length of the earth's diameter has been ascertained.

2. Name four rivers, one in each continent, which empty themselves into the sea by several mouths.

3. Name the counties through which the Midland Railway, from Dublin to Galway, passes; and give the chief towns of each.

4. Give the proper geographical designation, and state the position of each of the following:—*Stettin, Yarkand, Volturno, Annapolis, Cherbourg.*

5. Whence do we principally derive our supply of *Coffee, Soda, Amber, Maize,* and *Cochineal?*

Lesson Books.—1. Describe the outward appearance, internal structure, habits, and use made of the camel.

2. Where did Abram obtain his great riches, and what induced him to go there?

3. Write out two stanzas of the poem on "Summer's Departure."

4. How are pigeons used as messengers; and at what rate do they fly?

5. Name the several European states that possess colonies in the West Indies.

Arithmetic.—1. State the rule for finding the greatest common measure of two quantities. What is the greatest common measure of 638296 and 33888?

2. If 2 cwt. 1 qr. 18 lbs. of tea cost as much as 18 cwt, 9 lbs. of sugar, how much sugar should be given in exchange for 1 lb. of tea?

3. Find a fourth proportional to $\frac{1}{5}$, $\frac{6}{9}$, $4\frac{1}{3}$.

4. Reduce fifteen millions fifty thousand and fifteen ounces, avoirdupois, to tons, cwts., qrs., and lbs. Prove the work.

5. Calculate and write out, in a neat form, the following account:—$14\frac{1}{2}$ dozen collars at 9*d.* each; 45 rolls of trimming, each 20 yards long, at $1\frac{1}{4}$*d.* per yard; 9000 knitting needles, at $2\frac{1}{2}$*d.* per score; $15\frac{3}{4}$lbs. Berlin wool, at $4\frac{1}{2}$*d.* per oz.

Senior Monitors.

(1st & 2nd Years).

Grammar.—1. Parse the following sentence:—I was much entertained by the very interesting book which you were kind enough to lend me.

2. Correct the errors in the following sentences, giving in every case the reason for the correction:—

(*a*) You may send either of them six pieces.
(*b*) Be not afraid; it is me.
(*c*) The people has no opinion of their own.

3. Explain fully what is required in syntactical parsing.

4. Give the roots, and affixes or prefixes, in the following words, and name the language from which each word is taken:—*Obituary, Infidel, Hebdomadal, Nautical, Laggard.*

5. Write out the third and fifth rules for spelling, and give at least three exceptions to each rule.

Geography.—1. Define the following geographical terms:—*Estuary, Bay, Harbour, Basin of a River, Cape, Promontory, Sound.*

2. Give some of the most familiar and convincing proofs of the earth's sphericity.

3. Name the principal lakes of Ireland, and the counties in which they are respectively situated.

4. Give a short account of the antiquities and curiosities of Ireland.

5. Mention the principal possessions and colonies in the different continents belonging to the British Empire.

Lesson Books.—1. How would you explain to a class what a useful thing money is?

2. In what respects do plants differ from minerals?

3. In what two points does the dromedary differ from the camel?

4. Write out the substance of Judah's appeal to Joseph, when the latter expressed his determination to detain Benjamin.

5. Enumerate the various uses we make of the seed of plants.

Arithmetic.—1. Find the cost of 13 gallons and 1 quart of beer, the price of 5 gallons being 7*s.* 1 1*d.*; and of 16 cwt. 3 qrs. and 21 lbs. of sugar, at 5*s.* 8*d.* per stone.

2. Show how the price of 68 articles, at $3\frac{3}{4}$*d.* each, may be found by mental arithmetic.

3. Divide $7\frac{7}{8}$ by 15, and add $\frac{3}{4}$ to the quotient, and work out the same result, using decimals.

Appendix L.

Questions proposed at the Examinations.

Senior Monitors.

4. If a cow purchased for £7 10*s.* be sold for £9 16*s.*, what will be the gain per cent.

5. Calculate and write out in a neat form the following bill:

$17\frac{5}{8}$ yards of calico at $9\frac{3}{4}d.$ per yard.
$35\frac{3}{4}$ yards of flannel at 1*s.* $9\frac{1}{4}d.$ per yard.
$104\frac{5}{6}$ yards of Holland at 1*s.* $0\frac{3}{4}d.$ per yard.

(3rd & 4th Years).

Grammar.—1. "*Ye mariners* of England!
That guard our native seas;
Whose flag *has braved* a thousand *years*
The battle and the breeze;
Your glorious *standard launch* again
To match another foe."

Parse the words in italics in the above sentence.

2. Explain the best way of arriving at the meaning of a sentence; and show how the process of logical analysis is conducted.

3. "The student who is ambitious to excel must expect difficulties."
"There is no charm in the female sex, which can supply the place of virtue."
Explain why a comma is inserted before the relative in the second sentence, and not in the first.

4. Correct the errors in the following sentences, and give in each case the reason of the correction:—

"He must go himself or send his servant."
"He will not be pardoned unless he repents."

5. Show how the tendency to accent the root and not the termination of a word is exemplified; and mention two tendencies by which it is counteracted.

Geography.—1. Make a rough sketch of the South Coast of Asia, including the largest Islands in the Eastern Archipelago.

2. Mention the beneficial effects of tides, waves, and currents of the sea.

3. State the peninsulas of Europe, their boundaries, and chief towns.

4. Whether is the earth's velocity in her orbit uniform or variable? Explain the design of this.

5. Describe the general features of Ireland, especially as to the inequalities of surface; and show the contrast of the coast with the interior.

Lesson Books.—1. Mention the chief circumstances which render Egypt the most interesting to us of all the countries in Africa.

2. Write out a short lesson showing the advantages of commerce.

3. Describe the means resorted to for catching and taming wild elephants.

4. Write out the heads of a lesson intended to explain how the waters of the earth preserve their freshness, and how their waste is repaired.

5. Who is the author of the poem from which the following line is taken? Write out the remaining lines of the verse—

"In the world's broad field of battle."

Arithmetic.—1. What sum must be put to interest at the rate of $6\frac{1}{2}$ per cent. per annum, to amount to £758 in three years?

2. How many suits, each requiring 4 yards 3 quarters and $2\frac{1}{2}$ nails, can be made out of a piece of cloth measuring 68 yards 2 quarters and 3 nails; and what would be the cost of the entire at £2 5*s.* 9*d.* per suit?

Appendix L.

Questions proposed at the Examinations.

Senior Monitors.

3. Three men can do a piece of work in 6 days if they work 10 hours a day; how long will it take 16 men to do twice the amount of work when they are working at it 9 hours a day?

4. A man buys an article for 6*s.* 8*d.*, and sells it for 7*s.* 4*d.*, find his gain per cent. (2) What would have been his loss per cent. had he bought it for 7*s.* 4*d.* and sold it for 6*s.* 8*d.*?

5. Find a fourth proportional to the *sum*, *difference*, and *quotient* of ·025 and 4·15.

Mensuration and Geometry.—1. Find the area of a circular lake whose circumference is 76 chains.

2. The length of a room being 20 feet 4 inches, its breadth 14 feet 6 inches, and its height 10 feet 8 inches; how many square yards of painting are in it, deducting fire-place of 4 feet 4 inches, and two windows, each 6 feet by 3 feet 2 inches.

3. Prove that parallelograms upon equal bases and between the same parallels are equal to one another.

4. It is required to describe a square equal to a given rectilineal figure.

5. The squares of the diagonals of a parallelogram are together equal to the squares of its sides.

Algebra.—1. Determine the value of the unknown quantities in the following equations:—

$$7x-5y=1$$
$$2x+3y=18.$$

2. Divide the sum of $\frac{a+1}{a-1}$ and $\frac{a-1}{a+1}$ by their difference.

3. Find the product of $4a^3-16ax+3x^3$ by $3a^3-2a^2x$.

4. From $\frac{5x-1}{2}-\frac{7x-2}{10}=6\frac{3}{5}-\frac{x}{2}$, find the value of x.

5. Divide $a^3+3a^2b+3ab^2+2b^3+3b^2c+c^3$ by $a+2b+c$.

Paid Monitresses.

Paid Monitresses

First and Second Years.

Grammar.—1. Parse the following sentence:—"I know of hardly any animal that is so difficult to approach as a wild goose." (Note: Every word is to be *fully* parsed.)

2. (*a*) Write out the rule for forming the plural number of nouns ending in *o*.

(*b*) Write the plural form of each of the following:—*portico, stiletto, grotto, octavo, manifesto.*

3. Write the declension, in proper form, in the singular and the plural number of the following:—*field, who, she.*

4. Write out, in the usual form, the imperfect tense of the verb "*to study*" in the indicative mood; and also in the potential mood (indefinite form of conjugation).

5. (*a*) Explain what groups of words are included, respectively, in the second class, and in the third class of verbal distinctions in the Spelling Book Superseded.

(*b*) Point out the exceptional character of the spelling of the word "traveller"; and write out the rule of spelling to which it is an exception.

Appendix L.

Questions proposed at the Examinations.

Paid Monitresses

Geography.—1. (*a*) Name the principal parallels of latitude.
(*b*) Name the circles which bound the torrid zone and the south temperate zone respectively.
2. (*a*) Name the principal mountain ranges of England and Wales.
(*b*) To which of them does each of the following elevations belong:—*Snowdon, Skiddaw, Crossfell, Dunkerry Beacon,* and *Brown Willy.*
3. (*a*) Name the counties surrounding Derbyshire.
(*b*) Also the chief towns of Derbyshire.
4. (*a*) Name the county in which each of the following towns is situated:—*Clones, Dungarvan, Lisburn, Cootehill, Westport, Moate,* and *Callan.*
(*b*) The highest summits of Magillicuddy's Reeks, the Mourne Mountains, and the Wicklow Mountains.
5. Write out the following particulars respecting Denmark:—
(*a*) Its area.
(*b*) Its population.
(*c*) Its principal divisions.

Lesson Books.—1. (*a*) On what kinds of food does the squirrel subsist? (First Book of Lessons.)
(*b*) Tell what is said respecting his nest.
(*c*) Of what animal is his flesh the favourite food?
2. Give the examples mentioned in the Fourth Book proving (1) the extreme malleability, and (2) the extreme tenacity of gold.
3. (*a*) In the lesson on snakes in the Third Book they are divided into two classes. Name them.
(*b*) On what principle does it depend that the bite of the cobra, for instance, may be sucked with impunity, provided the skin inside the mouth be unbroken.
4. (*a*) Show that the Esquimaux are indebted to imitation for the form of their huts, and their mode of obtaining food.
(*b*) Of what substance are the windows of their huts composed?
5. (*a*) Write out the two last stanzas of the poem, "The Burial of Sir John Moore."
(*b*) "Field of his fame." Name it; and tell in what country it is, and in what year the battle was fought.

Arithmetic.—1. (*a*) Simple subtraction. Give a definition of it.
(*b*) How is the work proved to be right?
(*c*) From sixty millions thirty thousand and forty-two, substract four millions ninety thousand and eighty-six, and multiply the remainder by 80076.
2. (*a*) Reduce 216 lbs. 17 dwts. 17 grs. to grains.
(*b*) Reduce 2573426 inches to miles.
3. Find the value of a silver salver weighing 101 lbs. 4 oz., at 6*s.* 5*d.* per oz.
(*a*) By proportion, and
(*b*) By practice.
4. Find the value of 1 lb. 2 oz. 8 dwts. 20 grs., at £3 17*s.* 6*d.* an *oz.* (To be worked in two different ways by practice).
5. Find the interest of £763 for 120 days at 5 per cent. per annum.
(*a*) By the ordinary method in interest.
(*b*) By the special method given in mental arithmetic.

Third and Fourth Years.

Appendix L.

Questions proposed at the Examinations.

Paid Monitresses.

Grammar.—1. Parse the words in italics (and these only) in the following sentence:—"The *breed* of the swallow *ought* to be *cherished*, *as* the bird is of infinite service to mankind by *destroying myriads* of insects, *which would* prove very *prejudicial* to the labours of the husbandman.

(Note.—Every word marked for parsing is to be accounted for *fully*.)

2. Place the following words in a column, and, opposite to each of them, in another column, write its plural form:—*calico, portico, quarto, alley, Henry, index, axis, larva, seraph, stratum.*

3. (*a*) Into how many classes are irregular verbs divided?
   (*b*) Write out the first person, singular number, of the present and the past tense, indicative mood, and the past participle, of each of the following verbs, and name the class to which it belongs:—*to break, to cast, to do, to heave, to be, to dare, to rise, to beseech.*
   (Note.—If double forms occur, give them).

4. (*a*) "English verbs have but two distinctions of tense." How is this statement reconciled with the fact that future time can be expressed in English?
   (*b*) Give instances, showing that the present tense is used to express, sometimes, future time, and, sometimes, past time.

5. (*a*) Name the three different ways in which derivative words are formed from their primitives.
   (*b*) Name the letters which are cognate to *v*.
   (*c*) Give the derivation of each of the following words:—*starch, dribble, syntax, biography, contradict, interrogate.*

Geography.—1. (*a*) To what part of the earth is the polar star in the zenith?
   (*b*) In that case, what is the altitude of the star? and what is the latitude of the place?
   (*c*) Explain the following terms:—*centrifugal force, force of projection, perihelion,*

2. (*a*) What is the primary cause of the wind?
   (*b*) Name the classes into which winds are divided.
   (*c*) What are the monsoons, and to what class do they belong?

3. (*a*) Name the six distinct groups of mountains in Ireland.
   (*b*) In what direction should two lines be drawn on the map of Ireland so as to include the principal bogs?
   (*c*) Name the population of each of the following towns:—*Dublin, Cork, Belfast, Derry, Limerick*, and *Sligo*.

4. (*a*) Name the boundaries of Palestine.
   (*b*) How was it divided under Joshua?
   (*c*) How under the Romans?
   (*d*) Give the *several names* of *each* of its two principal lakes.

5. (*a*) How is Oceanica usually divided?
   (*b*) Name the Australian colonies, and the chief town of each of them.

Lesson Books.—"There is scarcely any part of the date-tree which is not useful to the inhabitants of the countries where it grows." Explain this statement fully.

2. (*a*) From what material are the water bottles of the East formed?
   (*b*) Describe the process of making them.

3. (*a*) Write out a concise definition of "*Taxes*."
   (*b*) Give the proportions in which every 20*s*. of them are distributed, in the expenditure made by Government, on account of the Public Service.

Appendix I.

Questions proposed at the Examinations.

4. (*a*) Write out the two last stanzas of the poem, "The Battle of Hohenlinden," beginning—"The combat deepens. On, ye brave," &c.
   (*b*) State in what year this battle was fought; and give the names of the two opposing generals.

Paid Monitress s.

5. (*a*) Who was the last of the judges of Israel?
   (*b*) Why was the form of Government changed?
   (*c*) Who was the first Hebrew monarch?

Arithmetic.—1. From thirteen millions seven hundred and sixteen pounds, thirteen shillings, and four pence farthing, subtract nine hundred and nine thousand eight hundred and six pounds, sixteen shillings, and three pence three farthings; and divide the remainder by forty-five.

2. (*a*) Given four numbers arranged in the form of a proportion; what test should be applied to ascertain whether it be an arithmetical or a geometrical proportion?
   (*b*) How many men would perform in 168 days a piece of work which 108 men can do in 266 days?

3. A gentleman, after paying an income tax of *7d.* in the pound, has £248 10*s.* 8*d.*; what was his gross annual income?

4. (*a*) Distinguish between "*aliquot parts*" and "*aliquant parts.*"
   (*b*) Find the value of 268 cwt. 3 qr. 17 lbs. at 16*s.* 8*d.* a cwt. by two different methods (in practice), of which one must be the "complement method."

5. The following questions are to be solved by the special rules in *mental* arithmetic applicable to them:—
   (*a*) Value of 107 yards at 6¾*d.* a yard.
   (*b*) Interest of £108 for four months at 2½ per cent.
   (*c*) Interest of £64 for three months at 6 per cent.
   (Note.—The work must be given in full.)

First Class Monitors (Males).

First-Class Monitors—Males.

Grammar.—1. "But *were* I *Brutus*,
And *Brutus* Antony, there were an Antony
Would ruffle up your spirits, and *put* a tongue
In every wound of Cæsar *that should move*
The stones of Rome to rise and *mutiny.*"

Parse the words in italics, taking care, when necessary, to supply the ellipsis in full, and to quote the rule of Syntax.

2. The words *both*, *but*, *only*, and *that*, have each more than one meaning, and may be classed accordingly as different parts of speech. Frame short *original* sentences to illustrate the different applications of these words.

3. Give at least two examples of—
   (*a*) Adverbs compared by er and est; and
   (*b*) Adverbs irregularly compared.

4. Explain clearly why, strictly speaking, none but transitive verbs can be used in the passive voice.

5. Correct the errors in the following sentences, giving in each case the reason for the correction—
   (*a*) Take them books and give them to James.
   (*b*) These are the men whom you thought were there.
   (*c*) Neither precept nor example are so forcible as habit.

Geography.—1. Explain the following terms:—*Axis*, *meridian*, *ecliptic*, *zenith* *table land*, *delta*, and *watershed.*

Appendix L.

Questions proposed at the Examinations.

First Class Monitors (Males).

2. Suppose yourself placed in an unknown country, or at sea, how could you ascertain your exact position. Describe the process in full, and say what instruments you would require.

3. Give the proper geographical designation, and the position of any six of the following: *Chicago, Tchad, Le Maire, Sacramento, Godavery, Pichincha, Lopatka, Shiraz,* and *Celebes.*

4. Describe the two modes in which the Islands of Polynesia have been formed.

5. Name, in order, the seas, bays, gulfs, and straits which should be sailed through in a voyage from St. Petersburg to Taganrog.

Lesson Books.—1. Describe the water bottles of the East, and the mode of their manufacture. State the three instances in which the mention of them occurs with peculiar interest in Scripture; and name two countries in which similar bottles are in use at the present day.

2. What is *gutta percha*, where found, and how manufactured? Enumerate at least *three* uses to which it is applied.

3. Write out the first, second, and last verses of the poem entitled a "Psalm of Life;" and say by whom it was written.

4. Mention some instances of the voracity of the *Pike*. Name the fish which alone seems able to escape its rapacity, and state the reason.

5. (*a*) Point out how the payment of *Taxes* resembles other payments, and how it differs from them; and (*b*) state how the taxes raised in the United Kingdom are expended.

Arithmetic.—1. Reduce $\cdot 5471$, and $\cdot 007$ to equivalent vulgar fractions.

2. A, B, and C embark in trade. A brings in £650 capital, B brings £2,075, and C brings £1,025. They gain £480—how much should each partner receive?

3. Divide the product of $\frac{7}{13}$ and $\frac{3}{7}$ by their difference, and reduce the answer to a decimal.

4. A gambler lost one-third of his money at play; but, if had lost £50 more, he would have lost half his money—how much had he originally?

5. Find the present worth of a bill for £830, bearing interest at 3½ per cent. per annum, and having 47 days to run—*true* discount?

Geometry and Mensuration.—1. Enunciate and prove the 39th proposition of the 1st Book of Euclid.

2. Enunciate and prove the 4th proposition of the 2nd Book.

3. Find a point in the base of a triangle from which if lines be drawn parallel to the sides and terminated in them, they shall be equal.

4. Required the area of an equilateral triangle whose perimeter is 90 feet.

5. What length of a beam of timber, 9 inches square, will be worth £1 7*s.* 6*d.*, the value of the timber being 2*s.* 9*d.* per cubic foot?

Algebra.—1. Calculate the value of the following expression:—

$$\left\{a-(b-c)\right\}^2+\left\{b-(c-a)\right\}^2+\left\{c-(a-b)\right\}^2,$$

when $a=1$, $b=3$, and $c=5$.

2. Divide $a^2-b^2+2bc-c^2$ by $a-b+c$.

3. Reduce $\frac{2x^4-x^3-10x^2-11x+8}{2x^3-3x^2-9x+5}$ to its lowest terms.

4. Solve $5x-\frac{2x-1}{3}+1=3x+\frac{x+3}{2}+7$.

Appendix L.

Questions proposed at the Examinations.

5. There is a number, consisting of two digits, the sum of whose digits is equal to 10; and if the digits be reversed, the number thus formed is less by 1 than twice the original number. Required the number.

First Class Monitors (Males).

Method and School Management.—1. Explain what is meant by "*phrase spelling*," and point out what you consider its advantages.

2. Give the substance of the "*practical rules*" which refer to order and cleanliness.

3. Draw up notes of a lesson on simple proportion, suited to a class commencing to learn the rule.

4. Explain the use and advantages of the "*school programme.*"

5. State when the name of a pupil should be struck off the rolls, &c.; and describe fully the manner of doing so.

6. Draw up neatly, and in proper form, a time table adapted to a school attended by boys and girls, having an average daily attendance of 40 pupils, and including a fourth class. The teaching staff to consist of a principal teacher and one paid monitor.

First Class Monitors (Females).

FIRST CLASS MONITORS—FEMALES.

Grammar.—1. "I come not, *friends*, to steal away your hearts;
I am *no orator*, as Brutus is;
But, as you *know* me *all*, a plain blunt *man*,
That love my friend; and *that* they know *full* well
That gave me public leave to speak of him."

Parse the words in italics in the foregoing lines; quoting, in every case, where necessary, the rule of syntax which applies.

2. Frame short *original* sentences, in which each of the following words shall be followed by its appropriate preposition:

Acquiesce, deficient, militate, averse, derogatory.

3. Explain clearly, with illustrations, why it is that, in the compound tenses, inflections for person and number are made in the auxiliary and not in the principal verb.

4. Correct the errors in the following sentences, giving, in each case, the reason for the correction.

(*a*) It is very probable that neither of them are right.
(*b*) I intended to have written to you before this.
(*c*) When a string of such sentences occur the effect is disagreeable.

5. State the three classes into which the *figures of speech* are divided. Name two figures of each class, giving an example of each figure.

Geography.—1. State what is meant by "*great*" and "*small*" circles; and name the principal circles of each class on the Terrestrial Globe.

2. (*a*) Name the *three* classes into which the winds may be divided.
(*b*) Explain the cause of the *trade winds;* and state the limits within which they blow, and their direction.

3. In what countries are any six of the following cities: *Bukharest, Avignon, Odessa, Kiel, Bruges, Saragossa, Dusseldorf, Lemberg,* and *Padua?*

4. Make out a list of the West India Islands, showing the different countries to which they belong.

5. Specify the manufactures for which the following places are remarkable: *Belfast, Leeds, Coventry, Liege, Lowell, Lyons,* and *Geneva.*

Lesson Books.—1. Name the three parts into which the Code of Laws given by Moses to the Israelites is commonly divided. Explain the nature and object of each. State when and why two of them ceased to be binding; and why the third continues still in force.

2. Describe the *papyrus* as to appearance and mode of growth. State the two principal purposes for which it was used; and the manner of its application in each case.

3. Write out neatly the first, second, and last verses of the poem entitled "The Battle of Hohenlinden;" and say by whom it was written.

4. Give the substance of the lesson on the Sloth, pointing out particularly the popular errors respecting this animal, and the two causes assigned to account for their existence.

5. Describe the duties of a *housemaid*.

Arithmetic.—1. From 37a. 2r. 13p. 28½ yds. subtract 9a. 3r. 12p. 30 yds., statute measure, and reduce the remainder to Irish measure.

2. If 50 men, working 8 hours a day, excavate 850 cubic yards of earth in 6 days, how many hours a day should 60 men work in order to excavate 750 cubic yards in 4½ days?

3. What sum placed at simple interest for 3 years and 8 months, at 4½ per cent., will amount to £145 9*s.* 8*d.*?

4. Divide £100 among four persons so that the second shall receive half as much again as the first, the third half as much again as the second, and the fourth as much as the first and third together.

5. If 1,400 men have provisions that will last for 38 days, how many men must be sent away that the same provisions may last the remaining men for 56 days? Write down the answer in words.

Method and School Management.—1. Give a sketch of the progressive method of teaching geography, recommended by Dr. Sullivan.

2. Describe the three kinds of parsing, and say what classes should be learning each kind respectively.

3. Describe the manner in which the average daily attendance at National schools is ascertained.

4. Explain the nature and object of the "*Report*," or, as it is sometimes called, the "*Absentee*" Slate suspended in National schools.

5. Draw up neatly, and in proper form, a Time Table adapted to a School attended by boys and girls, having an average daily attendance of 40 pupils, and including a fourth class. The teaching staff to consist of a principal teacher and one paid monitor.

6. What are the requirements of the *Programme* as regards needlework?

Appendix M.

APPENDIX M.

Programme of Examination for Candidates for Inspectorships.

PROGRAMME of EXAMINATION for CANDIDATES for INSPECTORSHIPS under the Board of National Education, Ireland.

	OBLIGATORY SUBJECTS.	No. of Marks for each Subject.	
1.	ENGLISH:—		
	Consisting of English Composition,	600	
	,, Spelling, Grammar, and Language,	500	
	,, Literature—Bacon's Essays, some of Edmund Burke's Works (Thoughts on Causes of Present Discontents, Speeches on Economic Reform, American Taxation, and on Conciliation with America, and Address to Electors of Bristol before going to Poll (1780). Two or three Plays of Shakspeare (Othello, Macbeth, and Julius Cæsar,) and parts of Milton (Sonnets, L'Allegro, Penseroso, and I., II., IV., Books of Paradise Lost,) and Pope (Essay on Criticism, Essay on Man, Moral Essays, and Imitations of Horace),	500	2,000
	,, Rhetoric and Criticism, such as Blair's Lectures and Whately's Rhetoric,	400	
2.	ELEMENTARY MATHEMATICS:—		
	Consisting of Arithmetic,	600	
	,, Euclid, 1st, 2nd, 3rd, and 6th Books,	400	
	,, Algebra, including Quadratic Equations,	400	1,700
	,, Trigonometry, to solution of Plane and Spherical Triangles, inclusive,	300	
3.	GEOGRAPHY,		500
4.	HISTORY, including Smith's Greece, Liddell's Rome,		400
5.	PHYSICAL SCIENCE, selections from Board's Course, as—Mechanics, Hydrostatics, Pneumatics, and Optics,		600
6.	LOGIC (Lessons on Reasoning),		300
7.	POLITICAL ECONOMY (Smith's Wealth of Nations, Books I. and II., and Easy Lessons on Money Matters),		300
8.	BOOK-KEEPING,		200
	Total,		6,000

NOTE.—In the Obligatory Subjects, no Candidate will be appointed whose marks on the whole course do not amount to 2,000, or who shall fail in showing a competent knowledge of any one of the subjects.

OPTIONAL COURSE.

1.	LANGUAGE, LITERATURE, AND HISTORY OF GREECE AND ROME,	1,000
2.	,, ,, ,, OF FRANCE,	400
3.	,, ,, ,, OF GERMANY,	400
4.	,, ,, ,, OF ITALY,	400
	No Candidate will be allowed to be examined in more than one Modern Language.	
5.	LOGIC (Whately, Mill, Books I., II., III., and V.),	400
6.	HISTORY AND PHILOSOPHY OF EDUCATION,	400
7.	POLITICAL ECONOMY, Smith's Wealth of Nations—Books I., II., III., and V., Malthus (Essay on Population), Senior, and J. S. Mill (Books I., II., III., and V.),	400
8.	HIGHER MATHEMATICS (Theory of Equations, Differential and Integral Calculus),	600
9.	NATURAL SCIENCE:—	
	(*a*) Chemistry, Heat, Electricity, and Magnetism, as treated of in Board's Course of Lectures,	500
	(*b*) Animal and Vegetable Physiology, with principles of Classification (Carpenter),	500
	(*c*) Geology, Mineralogy (Ansted, Page),	300
	Total,	5,300

No Candidate will be allowed to be examined in more than three of the branches of knowledge included under last head—Natural Science.

A Candidate will not get credit for any subject in the Optional Course unless his marks show him to be possessed of a competent knowledge of that subject.

The successful Candidate at the Examination must attend at the Inspection Office and Schools in Marlboro'-street to learn the details of his future duties, and he will not receive his appointment unless he shows by his conduct, and the tests to which he may be submitted there, that he is fully competent to perform the duties of an Inspector.

Candidates must be at least twenty-three years of age and not more than thirty-eight.

Candidates must produce satisfactory certificates of age, of general good health, and of moral character and regular habits.

All persons nominated to Inspectorships in the service of the Commissioners of National Education, must pass a satisfactory examination in the subjects in the above Programme under the direction of the Civil Service Commissioners.

APPENDIX N.
